A ki focus is an implement that certain characters use as a focus for their inner magical energy, known as ki. A ki focus might take the form of a training manual, a scroll of ancient secrets, a blunt training weapon, or a cherished memento.

**Attunement:** Before you can use a ki focus, you must attune yourself to it. To attune yourself to a ki focus, you must have the item on your person during a short or an extended rest and must have proficiency with ki focuses. Some characters study their ki focus to attune themselves to it. Others meditate with it or wield it as they practice fighting techniques. The ki focus that you are attuned to occupies your ki focus item slot.

Whenever you take a rest, you can attune yourself to a ki focus in your possession, but you can be attuned to only one ki focus at a time. Also, only one creature at a time can be attuned to a particular ki focus. Once you attune yourself to a ki focus, no one else can be attuned to it until you are no longer attuned to it or you are dead.

**Using a Ki Focus:** Once you have attuned yourself to a ki focus, you must either wear it or hold it in order to use it as an implement.

**Ki Focuses and Weapon Attacks:** If you use a magic ki focus, you can add its enhancement bonus to the attack rolls and the damage rolls of weapon attacks you make using a weapon with which you have proficiency. If you have both a magic ki focus and a magic weapon, you choose before you use an attack power whether to draw on the magic of the ki focus or that of the weapon. Your choice determines which enhancement bonus, critical hit effects, and magic item properties and powers you can apply to that power. You can't, for example, use the enhancement bonus of your ki focus and the critical hit effect of your magic weapon on the same attack.

# Primordial Shards

Relics from the Dawn War lie scattered across the planes. Some objects are strange and inscrutable, their purpose and function long forgotten; others hum with elemental power, offering much to a passerby who happens to claim them.

A primordial shard is a crystalline sliver, usually no more than two inches in length, imbued with elemental energy. A character uses a primordial shard by carrying it somewhere close to his or her body or by embedding it in the skin. Primordial shards transform their wielders into elemental creatures and improve their bearer's control over the most common forms of elemental magic.

A character can benefit from only one primordial shard at a time.

## Cinder of Gazra

The primordial named Gazra cared nothing for the world and sought to burn creation to ash, then start again, only to destroy the world and everything in it once more. Gazra was put down by the combined efforts of Khala and Zehir, who dismembered the fiery lord and scattered his remains across the planes.

## Pitted Flowstone

The vile elemental prince Bwimb, the primordial called the Ooze Lord, was an ocean of acid that flowed across the Astral Sea until he was finally struck down by Kord. The primordial's ruined essence then fell as rain on the natural world below, producing acid-etched shards that give their bearers uncanny control over acid's corrosive effects.

# Elemental Gifts

Elemental spirits and other entities sometimes reward powerful servants with control over the elements. An adventurer might earn an elemental gift by communing with such an entity, finding a font of elemental energy, or being exposed to some planar catastrophe involving the Elemental Chaos.

These elemental gifts are alternative rewards, which function as magic items that do not occupy an item slot and that typically fade after five levels (see *Dungeon Master's Guide 2*).

## ELEMENTAL VIEWPOINT: FRENGAR, FROST GIANT WARCHIEF

Puny mortals! Miserable, weak, sickly things, they are. I set my thralls to work my mines, to dig iron out of the hard ground . . . and the miners sicken and die. I chain them to the forge and command them to shape my iron into arms and armor and tools with their clever hands . . . and they collapse and die. I put my thralls out in the cold fields to tend my herds, to keep my livestock and cattle from running off, and to guard against thieves and predators . . . and I find my thralls frozen in the morning and my flocks scattered. So then I bring my human thralls into my hall and command them to serve me, to cook my meals and scrub my floors, and still they whine and complain and say they grow sick from cold and hunger!

I have met some of these so-called wizards and sorcerers who claim to command the magic of the elements. Hah! They think they can control the magic of the giants? Do they think they are stronger than we are? Would they make us their thralls? Thieves and tricksters! No frost-mage or ice-sorcerer can shackle my strength. When I have hewn down their warriors and broken their limbs, I take them back to my frigid halls and give them work fit for weaklings and slaves.

# Introduction

**Get ready** for the next level!

*Player's Handbook 2* is the most significant expansion yet to the 4th Edition Dungeons & Dragons® game. The *Player's Handbook*® presents eight races and eight classes. This book introduces five more races and eight more classes, including a mix of all-new material and some old favorites, along with a wealth of new options for any character.

Chapter 1 presents five additional races. The gnome and the shifter make the journey from the *Monster Manual*® to this book. The goliath (introduced in 2004's *Races of Stone*) and the half-orc return to the D&D® game in updated form. Devas are a new race of reincarnated immortal spirits striving for the perfection of their souls. This chapter also includes racial paragon paths for the races in this book as well as ones in the *Player's Handbook*.

Chapter 2 is the heart of the book, with eight new classes. Longtime D&D players will recognize some of these classes from past editions, but you've never seen them presented like this before. The arcane classes expand to include the bard and the sorcerer. The invoker and the avenger join the roster of divine classes. The primal power source makes its debut with classes of all four roles: the barbarian, the druid, the shaman, and the warden. The chapter ends with six new epic destinies.

Chapter 3 introduces the concept of backgrounds, a new game element you can use to customize your character and help expand his or her personality and history. If you're using the *Forgotten Realms Player's Guide*, you're familiar with the idea of choosing a home region for your character and gaining a benefit from that origin. The backgrounds in this chapter offer you dozens of ideas for expanding your character's story, and a choice of related benefits. This chapter also includes new feats, equipment, and magic items, including armor, weapons, and implements designed for use with the new classes in this book. The chapter ends with a group of new rituals.

At the end of the book is an important appendix of rule updates. It contains an updated explanation of how to read a power description, including new rules that apply to many of the powers in this book—in particular, rules about keywords such as beast form, spirit, and summoning. The appendix also contains the new version of the Stealth skill as well as updates to rules related to that skill in the *Player's Handbook*.

The D&D game is constantly evolving. *Player's Handbook 2* is the second book in a series that will continue adding new options for your characters for years to come. But the game changes in smaller ways as well, and the best way to keep up with those changes is to visit the Wizards of the Coast website.

## Your Part in the Story

One of the Dungeon Master's jobs is to be a narrator—to describe what's going on in the world of the game as you explore it along with your fellow adventurers. When your party enters a room, the DM tells you what it looks like and what's in it. However, narration isn't exclusively the DM's job: You describe your own character's actions, and even during an intense combat encounter, you have a chance to take part in telling the story of the game.

The flavor text included in every power description is a starting point you can use when narrating your part in the action. When your barbarian attacks, you can just say, "Krusk uses *howling strike*. I get a 24." Or using the flavor text as a cue, you can say, "With a blood-freezing scream, I throw myself into the fray! Does a 24 hit?"

A power's flavor text is only a starting point. You can modify that flavor however you like, as long as you don't change the power's game effects. Maybe you would rather think of the barbarian power *macetail's rage* as channeling the World Serpent, a primal spirit that appears in some shaman powers. You might say, "The earth shakes beneath my feet as the World Serpent stirs, knocking my foe to the ground!"

Choosing a background for your character can also be a great opportunity to take part in shaping the story of the game. After you've looked at the "Backgrounds" section of Chapter 3, talk with your DM about the background elements you want for your character.

The D&D game is all about telling an adventure story. If you take a more active part in telling your character's part of the story, everyone has more fun.

# THE PRIMAL POWER SOURCE

Four of the classes introduced in this book—the barbarian, the druid, the shaman, and the warden—use the primal power source. Some primal powers are more overtly magical than others, but they all draw on the spirits of nature that pervade the world and, to some extent, the echo plane known as the Feywild.

According to legend, when the gods made war against the primordials at the dawn of time, the battles raged across the cosmos for uncounted centuries. The gods slowly gained the upper hand, successfully imprisoning or banishing many of the primordials. However, this war threatened the very existence of the world, as the primordials who brought it forth from the Elemental Chaos clashed with the gods who sought to fix the form of the world in permanence. In the last days of the war, a new force made itself known in the cosmos: the spiritual expression of the world itself. These primal spirits declared an end to the conflict, asserting that the world would no longer be a battleground for the two opposing forces. The gods and the primordials were banished to their home planes, and the primal spirits of the world decreed a balance: The world would remain a place where matter and spirit mingled freely, where life and death proceeded in an orderly cycle, where the seasons changed in their unending wheel without interference. The gods and the primordials could still influence the world, but they could not rule it.

These primal spirits are beyond number, ranging from spirits too weak to have proper names to the mightiest incarnations of nature's power: the Primal Beast, the Fate Weaver, the Great Bear, the World Serpent, and others. They are spirits of winds and weather, of predators and prey, of plains and forests, of mountains and swamps. As the people of the world have come to know these primal spirits and live in harmony with them, some mortal spirits have joined their number after death, just as some mortal souls pass to the dominions of their gods. These great ancestors are among the most potent of the primal spirits.

Characters who use the primal power source stand firmly rooted in the world, between the divine power of the Astral Sea and the primordial churning of the Elemental Chaos. They have some affinity with the native inhabitants of the Feywild, who share their love and respect for the natural world. They are staunch enemies of aberrant creatures whose very existence is a blight on the natural world, as well as of demons that seek to destroy it, undead that violate life's natural cycle, and (to a lesser extent) those who seek to despoil the wilderness in the name of progress and civilization.

That doesn't mean that a primal character must be a sworn enemy of the gods, or of a character such as a paladin of Erathis who seeks to settle and civilize the world. There might be some conflict and disagreement between such characters, but they also have many common foes. A primal character's greatest concern is with creatures and forces that threaten the stability of the world and the balanced cycles of nature. In a broad view, the cities and civilizations of humans and other races are just as much a part of nature as are primeval forests and mountains, and just as worthy of protection.

Many primal characters do hold the gods in great respect. Without the gods' intervention, the primordials would have left the world in an ever-changing state not much different from the Elemental Chaos, hostile to natural life. In general, even evil gods would rather rule the world than destroy it.

For that reason, characters who wield primal power sometimes worship gods as well. As god of the wilderness, Melora is sometimes seen as an ally of the primal spirits. Kord is occasionally called the lord of the storm spirits, and both Corellon and Sehanine have ties to the Feywild that make them friendly with nature spirits.

Primal powers are called evocations, because primal characters evoke primal spirits to make attacks and effects in the world. Some characters channel primal spirits through their bodies in order to transform themselves and thereby make their physical attacks more formidable. Barbarians invite primal spirits to take residence in their bodies, entering a trancelike rage in which a spirit's ferocity overwhelms the barbarian's own reason. Wardens draw on the primal spirits of earth, trees, and beasts to transform their bodies, giving them strength to stand against their enemies. Druids call on the Primal Beast to transform their bodies into animal forms, taking on different aspects of the Primal Beast's nature.

Other characters evoke primal spirits to create external effects. Shamans use spirit companions as their primary link to the spirit world. A spirit companion might attack an enemy, or a shaman might conjure another spirit to create an effect—and afterward, the spirit's power lingers in the shaman's spirit companion. Druids, too, can evoke primal spirits to create terrain effects, buffet foes with thunder and wind, or create bursts of fire.

CHAPTER 1

# Character Races

THE EIGHT races described in the *Player's Handbook* are the most common heroic races in the world of the DUNGEONS & DRAGONS game, but they are by no means the only ones. This chapter introduces five new races, from the humble gnome to the exalted deva.

Two of these races—the gnome and the shifter—appear in the *Monster Manual*, but here they're fleshed out and presented with an eye toward their use as player characters. (The information in this book supersedes what's in the *Monster Manual*.) The other races—the deva, the goliath, and the half-orc—are new additions to the game and the world.

This chapter also includes racial paragon paths for the races in this book as well as ones in the *Player's Handbook*.

The races in this chapter follow the same format as the ones in the *Player's Handbook*. When you create a character, you can choose one of these races instead of one of those.

**Devas** are noble, virtuous beings who strive to perfect themselves through an apparently endless sequence of reincarnations. Once immortal spirits who served the gods of good, devas are now bound in flesh, the better to wage war against the forces of evil in the world and beyond.

**Gnomes** are small and stealthy fey who value a quick mind and the ability to escape notice. Gnomes are drawn to illusion and trickery. They explore the world with a sense of curiosity and wonder.

**Goliaths** dwell high in mountainous regions, traveling with the migrations of elk and other game. They view life as a grand competition and call on primal power to enhance their considerable physical strength and endurance.

**Half-orcs** combine the best qualities of humans and orcs and are strong, fierce, decisive, and resourceful. They savor the simple pleasures of life, from feasting and revelry to the thrill of battle.

**Shifters** carry a touch of lycanthropic blood in their veins. In the heat of battle, they tap into the power of the beast within, unleashing the savagery that lurks beneath their surface. They are predators by nature, defining the world in terms of hunter and prey.

Deep in the recesses of memory, devas recall what they once were: immortal servitors of the gods of good, spirits who chose to bind themselves to the world in mortal flesh. For millennia, their souls have been reborn to wage an endless war against the forces of darkness. Most devas are fiercely committed to the cause of good, because they fear what they might become if they turn to evil: A deva whose soul becomes corrupted risks being reborn as a rakshasa.

Play a deva if you want . . .

- to have dimly remembered connections to a thousand heroic lifetimes.
- to embrace the cause of good and strive for perfection in all you do.
- to be a member of a race that favors the avenger, cleric, invoker, and wizard classes.

## Physical Qualities

In appearance, devas are very similar to humans, but with an unearthly beauty and an uncanny stillness about them. They are almost as tall as dragonborn, but much more slender.

Devas' coloration distinguishes them most strongly from humans. All devas have patterns of light and dark colors on their skin. The light portions are chalk white or pale gray, and the dark areas range from blue or purple to dark gray or black. In any individual deva, either light or dark can be dominant, with the opposite shade appearing in simple, elegant patterns on the face, chest, and shoulders. A deva's hair is typically the same color as these skin patterns.

When sitting or standing at rest, devas remain almost perfectly still, except for the occasional blink of the eyes. They don't fidget or twitch, and their eyes move only when they are actively examining something.

Devas do not have children. When a deva dies, his or her spirit is reincarnated in a new, adult body that appears in some sacred place, such as a mountain peak, a riverbank, or a desert oasis. The new deva retains enough memory of past lives to speak and understand multiple languages and offer the proper prayers and sacrifices to the gods of good.

## Playing a Deva

Devas are refined and polite. They follow the highest moral standards, but they are not afraid of violence. They believe that the pursuit of good is an eternal war with the forces of evil, embodied in rakshasas, demons, devils, and the evil gods and their servant angels. Devas wage that war in their hearts as well, constantly vigilant lest evil take root and corrupt their souls, transforming them into the creatures they most despise.

Because they remember, at least dimly, a life in the Astral Sea spent in close company with the gods, most devas are devout worshipers of the gods of good, especially Bahamut but also Moradin and Pelor. Devas seek to achieve a personal connection with the gods rather than approach them through temples and priests. They worship at meals in their homes, setting an empty place for the absent gods, and strive through meditation and prayer to become more like the gods they serve. Deva adventurers are commonly avengers, clerics, and invokers, who savor the experience of divine power flowing through them without any intermediary.

Devas do not have cities or societies of their own, and their numbers are so small that a deva can spend entire lifetimes without ever meeting another of his or her kind. They live among other races and, at least to some extent, adopt their ways. However, all devas remember elements of the life they had before their incarnation in flesh and the beginning of their cycle of rebirth, and they share some common cultural elements of dress, religion, and habits. Devas favor flowing clothes of fine silks, polished metal armor with winglike shoulder ornaments, and headdresses or helmets that suggest crowns or halos. In other ways, they prefer to live simply, without extravagance.

**Deva Characteristics:** Dedicated, devout, elegant, enlightened, introspective, mystical, refined, righteous, spiritual, thoughtful

**Male Names:** Adiah, Ansis, Ayab, Bavak, Beriah, Eben, Elyas, Galad, Gamal, Hiyal, Iannes, Kerem, Mahar, Marach, Mathas, Natan, Nehem, Oris, Raham, Ronen, Samel, Sered, Tavar, Vered, Zachar

## Deva Adventurers

Three sample deva adventurers are described below.

Galad is a deva wizard who believes that the goal of his existence is to attain perfect knowledge of the universe. He believes that his arcane power is a manifestation of all he has learned throughout all his past lives, and that in this life or perhaps the next he will achieve perfect mastery and become a demigod, freed from the cycle of reincarnation.

Eranah is an invoker who wields the power of Bahamut. Just as Bahamut warred with Tiamat when the world was young, Eranah believes that her calling in this incarnation is to fight against the evil dragons and dragonspawn that pollute the world. Words of power resound in her mind like an echo of the Platinum Dragon's voice when she invokes his wrath upon her enemies.

Raham is a shaman who has embraced his life in the world, abandoning all thought of his previous astral existence. The primal spirits of the world are his patrons and allies, not the gods he left behind. He sees his endless rebirth as a part of the cycle of nature and has no desire to escape it.

In the Feywild, the best way for a small creature to survive is to be overlooked. While suffering in servitude to the fomorian tyrants of the Feydark, gnomes learned to hide, to mislead, and to deflect—and by these means, to survive. The same talents sustain them still, allowing them to prosper in a world filled with creatures much larger and far more dangerous than they are.

Play a gnome if you want . . .

- ✦ to be curious, funny, and tricky.
- ✦ to rely more on stealth and deception than on brute strength and intimidation.
- ✦ to be a member of a race that favors the bard, sorcerer, warlock, and wizard classes.

## Physical Qualities

Gnomes are smaller even than halflings, rarely exceeding 4 feet in height. Apart from their size, they resemble elves or eladrin, with pointed ears and chiseled facial features such as high cheekbones and sharp jaws. They have a more wild look than eladrin do, though, particularly in the hair that sprouts from their heads in random directions. Some male gnomes sprout tufts of hair from their chins, but they otherwise lack body hair.

Gnome skin tone ranges from a ruddy tan through woody brown to rocky gray. Their hair can be virtually any color, from stark white to blond and various shades of brown to autumnal orange or green. Their eyes are glittering black orbs.

Gnomes are as long-lived as eladrin, living over 300 years, but they show more of the effects of age. A gnome over the age of 100 has gray or white hair and skin that shows the wrinkled and weathered lines of a century of laughter, but even the oldest gnome retains the strength and agility of youth.

## Playing a Gnome

In quiet forests of the Feywild and remote woodlands in the world, gnomes live out of sight and mostly beneath the notice of larger races. Gnomes dwell in homes dug among the roots of trees, easily overlooked and cleverly concealed by camouflage and illusion. They are fond of the burrowing mammals that share their habitat, such as badgers, foxes, and rabbits, and have a sense of kinship with these small animals that share their forests.

Unobtrusiveness is a virtue among gnomes. They grow up on games of stealth and silence, in which the winner is the last to be discovered. An adult gnome who draws attention in a crowd is considered dangerously rude. Gnome folk heroes are not mighty warriors, but tricksters who slip out of captivity, play great pranks without being detected, or sneak past magical guardians. They deflect both aggression and attention with humor, and they guard their thoughts with friendly laughter.

Gnomes also value a quick mind and the ability to come up with a clever solution to any problem.

### Being Small

Small characters follow most of the same rules as Medium ones, with the following exceptions.

- You can't use two-handed weapons, such as greatswords and halberds.
- When you use a versatile weapon, such as a longsword, you must use it two-handed, but you don't deal additional damage for doing so.

They appreciate witty conversation, especially rapid-fire repartee. They are inventive and resourceful, although they have little interest in or aptitude for the kind of technology found in human cities. They have an innate talent for magic and a love of illusion, music, poetry, and story.

Eager to see what the world has to offer and willing to be awed by its wonders, gnomes greet the world with open curiosity. Gnomes who are drawn to adventure are most often driven by curiosity and wanderlust above any desire for wealth or glory.

Gnomes were once enslaved by the fomorian rulers of the Feydark, the subterranean caverns of the Feywild. They regard their former masters with more fear than hatred, and they feel some degree of sympathy for the fey that still toil under fomorian lashes—particularly the spriggans, which some say are corrupted gnomes. Gnomes are not fond of goblins or kobolds, but in typical gnome fashion, they avoid creatures they dislike rather than crusading against them. They are fond of eladrin and other friendly fey, and gnomes who travel the world have good relations with elves and halflings.

**Gnome Characteristics:** Affable, clever, crafty, curious, funny, guarded, inconspicuous, inventive, secretive, sly, tricky

**Male Names:** Alston, Alvyn, Brocc, Eldon, Frug, Kellen, Ku, Nim, Orryn, Pock, Sindri, Warryn, Wrenn

**Female Names:** Breena, Carlin, Donella, Ella, Lilli, Lorilla, Nissa, Nyx, Oda, Orla, Roswyn, Tana, Zanna

## Gnome Adventurers

Two sample gnome adventurers are described below.

Kellen is a gnome bard with a grim sense of humor and a ready blade. He was thrust unwillingly into an adventuring career when cyclopses raided his village and took him captive. He labored as a slave to a fomorian king for a decade before finally making his escape and fleeing the Feywild entirely. Though he longs to return one day to free the members of his family he was forced to leave behind, fear of what awaits him in the Feywild keeps him in the world.

Orla has lived in the world her entire life. She was born in a forest among elves, but an encounter in the forest one evening changed her life. She found herself face to face with a fey spirit of such power that she was unable to move or speak and could only acquiesce to its unspoken demands. Her life belongs to that spirit now, she knows. She wields its power as a fey pact warlock, but she feels its desires and pursues its goals without fully understanding where they might lead her.

Goliaths are mountain-dwelling nomads who see life as a grand competition. Their scattered bands have never been major players in the politics of the lowland world, but they have wandered the mountain ranges of the world since the primordials first shaped the peaks and valleys. Tall and massive, goliaths revere the primal power of nature and use it to enhance their own strength.

Play a goliath if you want . . .

- to be tougher and stronger than nearly anyone else.
- to master the rugged mountain slopes.
- to be a member of a race that favors the barbarian, fighter, and warden classes.

## Physical Qualities

Goliaths tower over even dragonborn, standing between 7 and 8 feet tall. Their skin is gray or brown, mottled with darker patches that they believe hint at some aspect of each goliath's fate or destiny. Their skin is speckled with lithoderms, coin-sized growths of bone that appear like pebbles studding their arms, shoulders, torso, and head. A bony ridge juts over their gleaming blue or green eyes. Male goliaths are bald, and females have dark hair they typically grow long and wear in braids.

Goliaths have life spans comparable to those of humans.

## Playing a Goliath

Goliaths are driven by a fierce love of competition. Anything that can be conceived as a challenge invites goliaths to keep score, tracking their progress against both their comrades and themselves. A goliath fighter might remark on how many times he has drawn first blood in battle within a particular dungeon compared to the party's rogue, and he's certainly mentally tracking his own performance against his last adventure. This competitiveness takes the form of good-natured rivalry among goliaths. As a race they have no patience for cheaters, gloaters, or sore losers, but goliaths can be very hard on themselves when they fail to measure up to their own past accomplishments.

Daring that borders on foolhardiness is also a common trait among goliaths. They have no fear of heights, climbing sheer mountain cliffs and leaping great chasms with ease. Their nomadic lifestyle of hunting and gathering instills in them an inquisitive interest in whatever lies over the next ridge or at the head of a canyon. To a wandering hunter's mind, that curiosity can lead to better hunting grounds or a good water source that would otherwise go undiscovered.

Goliaths respect and revere the natural world, and goliath adventurers commonly draw on the primal power source. Druids and shamans are more common among them than clerics, and goliath priests—called skywatchers—invoke the spirits of nature and their ancestors far more often than they call on the distant gods of the Astral Sea. Some goliath tribes also honor Kord, Melora, and Avandra, particularly those tribes that have frequent contact with other races. Tribes that regularly trade with dwarves sometimes offer sacrifices to Moradin as well.

**Goliath Characteristics:** Competitive, daring, driven, inquisitive, powerful, reliable, restless, trusting

**Male Names:** Aukan, Eglath, Gauthak, Ilikan, Kavaki, Keothi, Lo-Kag, Maveith, Meavoi, Thotham, Vimak

**Female Names:** Gae-Al, Kuori, Manneo, Nalla, Orilo, Paavu, Pethani, Thalai, Uthal, Vaunea

## Goliath Adventurers

Three sample goliath adventurers are described below.

Kavaki was injured in an avalanche as a young man and exiled from his tribe because he was unable to walk with them when they moved to a new hunting ground. His tribe lamented his loss, celebrated his accomplishments, and then left him for dead. However, a ram spirit sheltered him through blizzards and storms until his injury healed, and he now evokes the power of that ram spirit to fuel his barbarian rage. Still cut off from his tribe, Kavaki has found a new family—a group of adventurers—and is determined never again to be in a position where he cannot carry his own weight.

Nalla was a tent-mother for her tribe, caring for infants and toddlers while their parents performed their own tasks on the tribe's behalf. When her own child died in an orc raid, however, Nalla felt that she could no longer bear to care for children, and she soon exiled herself. As a fighter, she has fallen in with a band of adventurers she now guards with her life, almost as if they were the children of her tribe.

Lo-Kag was a trader for his tribe, interacting regularly with a nearby dwarf clan. As a warden, he was interested in the traditions of the dwarven defenders—determined fighters and paladins sworn to the defense of their clanhold—and learned much from a mentor trained in their ways. On his last trip to the dwarf clanhold, however, he found it deserted. Corpses lay strewn around the citadel, but he saw no sign of violence or looting. Instead of returning to his tribe, Lo-Kag set out into the world to investigate the mystery of the dwarves' demise.

**Furious Assault:** You have the *furious assault* power.

**Furious Assault** Half-Orc Racial Power

An obscure legend claims that when Corellon put out Gruumsh's eye in a primeval battle, part of the savage god's essence fell to earth, where it transformed a race of humans into fierce half-orcs. Another story suggests that an ancient hobgoblin empire created half-orcs to lead orc tribes on the empire's behalf. Yet another legend claims that a tribe of brutal human barbarians chose to breed with orcs to strengthen their bloodline. Some say that Kord created half-orcs, copying the best elements from the human and orc races to make a strong and fierce people after his own heart. If you ask a half-orc about his origin, you might hear one of these stories. You might also get a punch in the face for asking such a rude question.

Play a half-orc if you want . . .

- to be big, strong, and fast.
- to harness anger into resilience and combat power.
- to be a member of a race that favors the barbarian, fighter, ranger, and rogue classes.

STEVE ARGYLE

## Physical Qualities

Half-orcs favor their human lineage in appearance, but are distinguished by skin that tends to various shades of gray, broad jaws, and prominent lower canine teeth—though these are still a far cry from the jutting tusks of orcs. On average, they are taller and stronger than humans as well. Their hair is usually black, though it grays quickly with age. Most half-orcs who live among humans favor human styles of clothing and hairstyle, but a few adopt orc traditions, tying small bones or beads into long braids or bunches of hair.

Half-orcs don't live quite as long as humans do. They mature quickly, reaching adulthood at about 16 years, and rarely live past the age of 60.

## Playing a Half-Orc

Half-orcs combine the best qualities of humans and orcs, though some would argue that the good qualities of orcs are few and hard to find. From their orc blood, half-orcs inherit great physical strength and toughness. They are fierce warriors, fleet of foot as they charge into battle.

Their human blood makes half-orcs decisive and bold, resourceful and self-reliant. They are adaptable and able to make their way in almost any circumstance. Although half-orcs often live on the fringes of society in human towns and cities, they still find ways to prosper in a world to which they don't fully belong.

For all their good qualities, many half-orcs exhibit characteristics that polite society finds uncouth or undesirable. Half-orcs have little patience for complicated rules of etiquette or procedure and find little value in hiding their true opinions in order to spare someone's feelings. They enjoy the simple pleasures of food and drink, boasting, singing, wrestling, drumming, and dancing, and they don't find much satisfaction in more refined or sophisticated arts. They're prone to act without much deliberation, preferring to overcome obstacles as they arise rather than consider every possible outcome and make contingency plans. These qualities lead some members of other races to consider them rude or crass, but others find their brashness refreshing.

Half-orcs generally live among either human or orc cultures—some in bustling human towns or cities, others among remote human or orc tribes. Most half-orcs have two half-orc parents, but sometimes half-orcs marry and have half-orc children with humans or orcs. Orcs show grudging respect to half-orcs for their considerable strength and for their cunning intelligence, which sometimes allows half-orcs to rise to leadership positions in orc tribes.

Although possessed of many strengths, half-orcs frequently encounter prejudice in human communities. Thus, most half-orcs gravitate to careers involving physical labor or violence. For some, the life of an adventurer is either a natural extension of that trend or a way to throw off the weight of prejudice. The adventuring life also means finding a place in a group of allies and equals—a simple pleasure that is all too hard for many half-orcs to find in the world.

**Half-Orc Characteristics:** Brash, ferocious, hedonistic, impulsive, short-tempered, tough, uninhibited

**Male Names:** Brug, Dorn, Druuk, Gnarsh, Grumbar, Hogar, Karash, Korgul, Krusk, Lubash, Mord, Ohr, Rendar, Sark, Scrag, Tanglar, Tarak, Thar, Ugarth, Yurk

**Female Names:** Augh, Bree, Ekk, Gaaki, Grai, Grigri, Gynk, Huru, Lagazi, Murook, Nogu, Ootah, Puyet, Tawar, Tomph, Ubada, Vanchu

## Half-Orc Adventurers

Three sample half-orc adventurers are described below.

Tarak, a half-orc rogue, is at home in the city. He grew up in the rough-and-tumble wharf quarter and ran with street gangs and rough sailors. Everything changed when a sailor dropped dead at his feet, leaving a mysterious box in Tarak's possession. The box brought chaos into his life until he fled the city and fell in with some adventurers on the road. Tarak doesn't know what's in the box—its strange lock has defeated every attempt to open it, and its hard metal sides resist breaking. But goblins and doppelgangers have proven themselves willing to kill to get the box for themselves, piquing Tarak's interest.

Murook is a warden, born and raised among an orc tribe. She was a staunch defender of her tribe for years, but her ties to the primal spirits of wood and stone slowly coaxed her away from the worship of Gruumsh and led her to question the brutality the orcs performed in his name. She made her way to human lands and has struggled to fit in, trying to leave behind the barbarian ways of her tribe and adopt at least a veneer of civilization, but she is still far more comfortable among the trees and mountains than confined in a city or village.

Dorn is a half-orc ranger who prefers not to talk about his birth and his family. He spent most of his life in a hut at the outskirts of a farming village, hunting and trapping in the surrounding forest, keeping to himself and asking only to be left alone. His life turned upside down on his thirtieth birthday, when a group of adventurers stopped in the village looking for directions to an ancient ruin. The villagers steered the adventurers to Dorn, who agreed to guide them through the forest. He never returned home, because that first adventure led him into many more.

**Requirement:** You must be bloodied.
**Effect:** Until the end of the encounter, your speed increases by 2, and you gain a +1 bonus to AC and Reflex.

Shifters are fierce hunters strongly influenced by their animal nature. Though they can't fully change shape as their lycanthrope ancestors can, shifters do become more bestial during the heat of battle, calling on the primal power of the beast within.

Play a shifter if you want . . .

- ✦ to tap into bestial strength or speed in battle.
- ✦ to be a character in tune with your primal savage nature.
- ✦ to be a member of a race that favors the druid, fighter, ranger, and warden classes.

STEVE ARGYLE

## Physical Qualities

In broad strokes, shifters resemble humans with animalistic features. Their bodies are lithe and strong, and they often move in a crouched posture, springing and leaping along the ground. Their faces have a bestial cast, with wide, flat noses, large eyes and heavy eyebrows, pointed ears, and long sideburns. The hair of their heads is thick and worn long. Shifter skin and hair are usually some shade of brown.

Longtooth shifters claim werewolves as ancestors and have a vaguely canine cast to their features that becomes much more pronounced when they use their *longtooth shifting* power. Razorclaw shifters are descended from weretigers and are more catlike, particularly when using *razorclaw shifting*.

Shifters live about as long as humans.

## Playing a Shifter

Shifters are strongly influenced by their animal natures. They think and act like predators, conceiving of most activities in terms of hunting and prey.

Longtooth shifters are drawn to a pack of companions, whether that's a family group or an adventuring party. They work well as part of a team in combat, coordinating their attacks with their allies and coming to the aid of beleaguered friends. They're drawn to the leader and defender roles, and they make excellent clerics, fighters, paladins, and wardens.

Razorclaw shifters are more independent, self-reliant, and adaptable. They're no less devoted to their adventuring companions, but they trust their allies to take care of themselves, and they strive to carry their own weight in the group. They're more inclined to be strikers or controllers, and they favor classes such as avenger, druid, ranger, and rogue.

Historically, most shifters dwelled in nomadic bands in plains and forests far removed from cities and towns. Since the fall of Nerath, however, the increasing dangers of the wilds have driven many shifters into closer proximity to human and elf communities. Some shifters have adapted smoothly to this change, carving niches for themselves as trappers, hunters, fishers, trackers, guides, or military scouts. Others have a much harder time fitting in. Shifters who feel alienated from the plains and forests they love sometimes take up the adventuring life as a way of escaping the confines of city walls and returning to nature. Some shifters, though, turn to a life of crime, preying on the residents of their new homes like the hunters they are.

**Shifter Characteristics:** Active, alert, fierce, free-spirited, intuitive, perceptive, predatory, self-reliant, unrestrained, wild

**Male Names:** Ash, Brook, Claw, Cliff, Flint, Frost, River, Rock, Storm, Thorn, Tor

**Female Names:** Aurora, Autumn, Dawn, Hazel, Iris, Lily, Rain, Rose, Summer

## Shifter Adventurers

Three sample shifter adventurers are described below.

Ash is a proud longtooth cleric devoted to Melora. His clan moved from the open plains into a nearby city shortly after the fall of Nerath, and most of them have adjusted smoothly to an urbanized life. Even during his childhood, though, Ash felt a calling to the wild places of the world, and he ventured far from the city on his wanderings. As a personal rite of passage when he turned 18, he traveled ten days from the city into the wilds and stayed there for ten more days, spending his time hunting, gathering food, and praying to the god of the wilderness. He had planned to return after those ten days but decided that Melora had a different plan in mind. He avoids cities and towns now unless he has no choice, spending his time wandering the wilds, exploring ancient ruins, and fighting the monsters that make the wilderness unsafe.

Summer is a razorclaw druid whose tribe still wanders a pristine forest far from any human cities. She was her tribe's moonspeaker, a religious leader who traveled among the different clans of her tribe. In the summer of one year, she went to visit the northernmost clan and never found them. She traveled farther and farther afield until she found a hobgoblin city. While sneaking into the city, she discovered that the surviving members of the clan were now slaves of the hobgoblins. She plans to return to that city one day to free her people, but in the meantime she is very interested in the power she has gained through adventuring.

Storm is a razorclaw avenger dedicated to the Raven Queen. He knows no tribe except the remote monastery where he was raised and trained. For many years, he never knew another shifter, and he believed himself to be a human who was specially blessed for the work of the Raven Queen—endowed with speed, stealth, and strength to make him more perfect in her service. On reaching adulthood, he left the monastery and ventured into the world on his first major undertaking for his order. There he discovered others of his race and has begun to question fundamental assumptions of his identity. Disillusioned about his god's work, he has taken up with a group of adventurers while he sorts out his place in a world that is much different from anything he previously imagined.

# RACIAL PARAGON PATHS

Most paragon paths are specific to particular classes. This section presents racial paragon paths, which are specific to races included in this book and in the *Player's Handbook*. The only prerequisite for any of these paths is that you be a character of the appropriate race. Only a dwarf can be a firstborn of Moradin, for example, and you must be a half-orc to take the bloodfury savage path. A racial paragon path is an exemplar of a race's defining characteristics. A scion of Arkhosia is not just any dragonborn hero: He or she is one of the finest examples of certain qualities that set dragonborn apart from other races.

Exemplars of the half-elf race do not pursue a paragon path; instead, they take the Versatile Master feat in Chapter 3.

**Choosing a Racial Paragon Path:** When you reach 11th level, you can choose a racial paragon path instead of another paragon path (see *Player's Handbook*, page 53). You gain the features and the powers of the path at the levels specified in the racial paragon path's description.

**Implements:** If your racial paragon path includes powers that have the implement keyword, you can use your class's implements, as well as implements you can use because of a feat, with those powers. When you wield a magic version of such an implement, you can add its enhancement bonus to the attack rolls and the damage rolls of your racial paragon path powers that have the implement keyword. Without an implement, you can still use these powers.

## Adroit Explorer

*"Turn back? Now? But we don't know what's on the next floor!"*

**Prerequisite:** Human

The unknown has an inexplicable hold on you. Your greatest ambition is to discover, to unearth, to explore. You are the perfect expression of the human tendency to comb the world in search of knowledge and power, infused with an almost superhuman determination. This determination is central to your nature—a drive that propels you to work harder, fight longer, and strive for more than you should be able to attain through your own merits. You are not satisfied until you have achieved complete victory in your endeavors, and you develop powers to help you achieve your goals. Your will only grows stronger when your back is against the wall, and you fight all the harder, making sure you win the day.

Whether you are motivated by a thirst for knowledge of the world's most ancient civilizations, a hunger for long-lost secrets of arcane power, a drive to conquer and settle the world in the name of Erathis, or a lust for gold and glory, you're willing to face great danger to achieve your goals. Thanks to your single-minded dedication, you usually manage to escape from danger in one piece, even if you survive only by the skin of your teeth.

### Adroit Explorer Path Features

**Ambitious Effort (11th level):** Choose an encounter attack power of 7th level or lower from your class. You gain that power. If you choose an encounter attack power that you already know, you now have two uses of that power per encounter. At 21st level, you can replace this power with an encounter attack power of 13th level or lower from your class.

**Bloody Determination (11th level):** The first time you are bloodied during an encounter, you gain a +5 power bonus to your next attack roll before the end of your next turn against the enemy that bloodied you.

**Heroic Action (11th level):** When you spend an action point to take an extra action, you also gain resist 10 to all damage until the end of your next turn. The resistance increases to 20 at 21st level.

# Ancestral Incarnate

*"It looks as if you spent a lifetime learning that technique. I humbly counter—with a technique that took a dozen lifetimes to master."*

**Prerequisite:** Deva

All devas have at least a tenuous connection to their past lives, and they see themselves as spiritual descendants of their previous incarnations. For you, the connection to your past lives is more tangible. As an ancestral incarnate, you can call forth your own spirit as it existed years or centuries ago to advise you, protect you, and confound your enemies. Those who have the temerity to face you in battle learn that they aren't fighting just the present-day incarnation of you, but also every incarnation of you that has ever been.

## Ancestral Incarnate Path Features

**Resurgent Action (11th):** When you spend an action point to take an extra action, you can regain the use of an encounter attack power that you have already used during this encounter. The power's level must be no higher than your level - 4, and you must use the power when taking the extra action.

**Serene Countenance (11th):** You gain a +2 bonus to saving throws to end effects that make you dazed or stunned.

**Past-Life Acolytes (16th):** When you perform any ritual, you can make three ghostly incarnations of your past lives step out of your body to help you. Each incarnation either grants you a +2 bonus to the ritual's skill check or contributes a healing surge to help pay the ritual's healing surge cost, if any. The number of incarnations increases to four at 20th level, five at 25th level, and six at 30th level.

HOWARD LYON

# Bloodfury Savage

*"I'll tear out your heart and make it my feast!"*

**Prerequisite:** Half-orc

In the veins of your people flows the mingled blood of orcs and humans, a perfect union of ferocity and adaptability. In general, half-orcs manifest the best traits of humans and orcs. In your heart, though, orc drums beat a call to war, stirring a savage craving for violence. You brim with fury you can barely contain, and in the thick of combat it overflows into a raging torrent. Only battle can feed the hunger in your soul, for you were born to the bloodfury.

For your entire life, you have felt the stirrings of war within you, the conflict between the human and orc halves that define your divided nature. From the battle raging inside, you derive great power, great strength, and above all, a great capacity for destruction. In combat, you lose yourself to the storm, unleashing your bloodfury in a frothing display of violence that inspires fear in all who fight you.

JOHN STANKO

# Fey Beguiler

*"Now you see me—but not for long!"*

**Prerequisite:** Gnome

The gnome race has learned to survive in a dangerous world by remaining unnoticed, staying out of sight and wielding magic to become invisible. As a fey beguiler, you take that a step farther, using magic to cloud and confuse your enemies' minds while you perfect your own talents for stealth and secrecy.

As you progress along the path of the fey beguiler, you learn an array of methods to move around unseen while bedeviling your foes. You can turn invisible, blast your foe with a globe of fey light and dash away unseen, or dumbfound an opponent, leaving it vulnerable to your allies' attacks. To supplement the powers of your path and your class, you also learn skills and utility powers typically available to rogues and wizards, either magical or mundane tricks to enhance your stealth, movement, or other capabilities. The key to your success is to escape notice, and you have an arsenal of techniques to do just that.

You can be sly and sneaky, moving quietly and skulking through the shadows. Subtlety is a valuable tool, and secrecy can save your life. But sometimes a forthright attack on an enemy's mind is just the right tool for the job.

RAVEN MIMURA

## Fey Beguiler Path Features

**Skill Learning (11th level):** You gain training in a skill from the rogue or wizard class skills list.

**Disappearing Trick (11th level):** You can spend an action point to become invisible until the end of your next turn or until you attack, instead of taking an extra action.

**Clever Versatility (12th level):** You gain a utility power of 10th level or lower from the rogue or wizard class.

# Firstborn of Moradin

*"My strength is the eternal endurance of the mountains. I will not break."*

**Prerequisite:** Dwarf

At the dawn of creation, dwarven myths say, Moradin made the race of dwarves. His firstborn had bones cut from bedrock, souls wrought from iron, and hearts carved of gleaming diamonds. These firstborn were the models after which all other dwarves were patterned.

Although the firstborn of Moradin's making vanished in servitude to the giants, their fighting techniques and mystical traditions have not been lost. A new era of dwarven heroism has arrived, and the legacy of the firstborn continues. Those few who most skillfully follow the paths of the ancient firstborn are slowly transformed into the image of Moradin's firstborn.

As one of the present-day firstborn of Moradin, you forge a deep connection with the earth, tapping into the power that courses through the bedrock beneath your feet. You draw on the strength of the mountains to resist injury, expand your senses through rock and stone, and root yourself in the bones of the earth. You are the stuff new legends are made of.

WAYNE REYNOLDS

# Halfling Scoundrel

*"The bigger they are, the easier they topple."*

**Prerequisite:** Halfling

The greatest heroes of halfling legend are those who defeat giants, dragons, or other oversized threats to their homes and communities, using their wits, their agility, and a hefty dose of audacity. These heroes aren't necessarily armored warriors wielding legendary swords, and they don't have lands or noble titles. They are ordinary folk who rise to the challenge of the times, proving that size and strength aren't needed to come out on top. You're one of these heroes.

Like most halflings, you have found that the best way to get by in a world full of much larger creatures is to stay out of their way. Doing that might mean keeping out of their sight or staying on their good side. It might also mean keeping out of their reach, or dodging their attacks. Stealth and trickery might not be weapons and armor by themselves, but they are a useful supplement to the finest steel. Coupled with your natural daring and determination, these strengths are enough to bring you victory against any foe, no matter how large.

Compared to the legendary heroes of other races, you might come across as a scamp or a scoundrel. But the fact that you're crafty, resourceful, and sometimes sneaky doesn't make you any less of a hero. Avandra has blessed you with courage beyond question, ingenuity sufficient for any challenge, and the stealth you need to survive.

## Halfling Scoundrel Path Features

**Fearless Scoundrel (11th level):** Whenever you are affected by a fear effect that a save can end, you can make a saving throw against the effect at the start of your turn. If you don't save, you can make another saving throw against the effect at the end of your turn.

STEVE ELLIS

**Resourceful Action (11th level):** You can spend an action point to gain a +5 bonus to an attack roll, a saving throw, or a skill check you have just rolled, instead of taking an extra action.

**Crafty Combatant (16th level):** When you use your *second chance* racial power and the enemy's attack misses after the reroll, that enemy grants combat advantage to you until the end of your next turn.

**Target:** One creature
**Attack:** Dexterity or Charisma vs. AC
**Hit:** 5[W] + Dexterity or Charisma modifier damage.
**Miss:** Half damage.

You gain a +2 bonus to all defenses against the target's attacks. If the target misses you with an attack, you can make a basic attack against it as an opportunity action.
**Special:** When you gain this power, choose Dexterity or Charisma as the ability you use when making attack rolls and damage rolls with this power.

# Moonstalker

*"I can see my destiny in the face of the moon, and I call to it in greeting."*

**Prerequisite:** Shifter

Shifters harbor a bestial nature inside themselves. When a shifter is under duress, this nature reveals itself in his or her features and prowess. This innate savagery is the gift of shifters' lycanthrope ancestors, the quality passed down through the generations that gives the shifter race its identity. Most shifters can call on their legacy when needed, but you enjoy a closer kinship to your lycanthrope forebears.

You take the name moonstalker for the strong lycanthropic heritage you have awakened in your spirit. You have always had an animalistic side, manifested in your physical features and sometimes through your behavior, but at some point you learned that you were different, and that the gift from your ancestors was greater than you could have believed. You are still able to shift your form, physically expressing shifter traits, but you can take that power a step farther and use your bestial nature to fully transform into a wolf or a tiger. This ability accompanies a host of other changes, and your tactics and behavior leave behind civilized methods for those of an untamed predator.

DEVON CADDY-LEE

## Moonstalker Path Features

**Hunter Action (11th level):** When you spend an action point to make an attack, you can shift a number of squares equal to your Wisdom modifier as a free action before or after the attack.

# Scion of Arkhosia

*"By the blood of Io, you will fall!"*

**Prerequisite:** Dragonborn

Scions of Arkhosia are the descendants of the noble dragonborn heroes of the fallen empire of Arkhosia. In the years since that empire fell, its heirs have scattered across the world, their lineage and heritage confused or lost in the darkness of the present age. Most dragonborn spend their lives unaware of what sort of potential lies within them, but a few manage to awaken and master their hidden reserves of power.

You are one of these scions, and you have begun the long and arduous process of unlocking the power of your noble blood. Your ancestry places you closer to your dragon kin than other dragonborn are. As a result, you gain a greater mastery over your *dragon breath*, able to alter its substance at will.

The clearest sign of your noble heritage, though, is the draconic wings that begin to form on your back as soon as you adopt this paragon path. They take some time to grow strong and large enough to sustain short bursts of flight, but they mark you unmistakably as what you are: a hero of your people reborn.

MATIAS TAPIA

## Scion of Arkhosia Path Features

**Versatile Breath (11th level):** Whenever you attack with your *dragon breath* racial power, choose one of the following damage types: acid, cold, fire, lightning, or poison. The attack's damage is also that type.

**Draconic Outburst (11th level):** When you spend an action point to make an attack, each enemy adjacent to you takes damage equal to 5 + your Constitution modifier when you resolve the attack. This damage is the same type you initially chose for your *dragon breath* racial power.

**Blood of Io (16th level):** You gain overland flight with a speed of 12.

# Shiere Knight

*"By the court of the Summer Queen, you shall pay for your transgressions!"*

**Prerequisite:** Eladrin

Most noble eladrin, including bralani and ghaeles such as those described in the *Monster Manual*, are prominent figures in their houses, lords and ladies who have positions of authority over the lesser members of their houses. A few eladrin heroes, however, champion the cause of their race as a whole, rather than of any particular house. Though they are often anointed by house nobles, these shiere knights are free agents, beholden to no particular house and dedicated to protecting the eladrin from fomorians, spriggans, and other hostile denizens of the Feywild.

Becoming a shiere knight involves more than attaining a title. As a champion of your race, you become a living embodiment of the power of the Feywild. Your appearance is marked by a sign of the fey power within you: a faint glow that outlines your frame and burns in your eyes, an eldritch wind that constantly stirs the air around you, or some other manifestation of your otherworldly nature. You can channel this power to beguile your foes or drive them off in fear.

## Shiere Knight Path Features

**Blessed of the Fey (11th level):** Whenever you are affected by a charm effect that a save can end, you can make a saving throw against the effect at the start of your turn. If you don't save, you can make another saving throw against the effect at the end of your turn.

**Fey Leap Action (11th level):** You can spend an action point to teleport 10 squares, instead of taking an extra action.

*Level 21:* Intelligence, Wisdom, or Charisma + 6 vs. Will

**Special:** When you gain this power, choose Intelligence, Wisdom, or Charisma as the ability you use when making attack rolls with this power.

**Fey Escape** — Shiere Knight Utility 12

*As your foe draws near, a swirling storm of leaves spins around you and whisks you to safety.*

**Daily ✦ Teleportation**

**Special:** When you gain this power, choose Intelligence, Wisdom, or Charisma as the ability you use when making attack rolls with this power.

BRIAN DESPAIN

# Stoneblessed

*"There are secrets in the peaks, mysteries I have unraveled and embraced."*

**Prerequisite:** Goliath

There can be no understating the kinship that goliaths share with their mountain homes. Like the mountains, goliaths stand tall despite the hardship of life amid the wind, snow, and ice of the highest crags. Most goliaths are proud merely to draw strength from their upbringing amid the towering peaks, but a rare few come to embody the spirit of the mountains.

You are such a hero, a stoneblessed goliath who has an uncommon connection to stone and earth. Rock beneath your feet emboldens you, and the elements nourish you, until you become the personification of your homeland's peaks. As a stoneblessed, you draw power from the stone itself, allowing you to transcend the bounds of your mortal form and achieve astonishing acts of strength. Your attacks strike with the weight of the mountain behind them. When you reach the pinnacle of this path, you can transform yourself into an entity of stone, crushing those who stand against you.

MICHAEL BIEREK

When you take the first step on this path, your features and form begin a slow transformation, revealing the depth of your mountain connection. Your skin gains the texture of sandstone, thickening to protect you from harm. Your eyes lose their moisture until they eventually shine like diamonds, reflecting light in a rainbow. The lithoderms that stud your shoulders and elbows transform into crystalline growths. Among goliaths, these features mark you as a true champion, a chosen hero of your kind.

## Stoneblessed Path Features

**Stonehide Action (11th level):** When you spend an action point to take an extra action, you also gain a +2 bonus to AC until the end of your next turn.

**Target:** One creature
**Attack:** Strength vs. Fortitude
**Hit:** 4[W] + Strength modifier damage.

# Turathi Highborn

*"The error of my ancestors was in dealing with evil powers they couldn't control."*

**Prerequisite:** Tiefling

The sins of Bael Turath lie exposed in the sinister appearance of its tiefling descendants. Each pair of horns, every sinewy tail, and every set of glowing red eyes reminds the world of the perils of dealing with devils and the evils that result from such fell bargains. Many tieflings rise above the darkness clouding their souls, but a few find it far harder to divorce themselves from their sinister heritage, largely because of their familial connections to those first tieflings who forged pacts with Asmodeus and other archdevils of the Nine Hells.

As a Turathi highborn, you bear a heavier burden than your kin, for it was your ancestors who damned the tiefling race. For better or worse, you retain a stronger connection to the Nine Hells than most of your race. You loose bursts of hellfire on your enemies when enraged, and infernal power undergirds your other talents. Drawing on the lore of Bael Turath's ancient nobility, you can unhinge the minds of your foes or make them your slaves—even as you engulf them in hellfire.

## Turathi Highborn Path Features

**Turathi Frenzy (11th level):** You gain a bonus to damage rolls against bloodied enemies equal to 1 + your Charisma modifier.

**Hellfire Action (11th level):** When you spend an action point to make an attack, that attack deals 2d6 extra fire damage on a hit.

**Miss:** Half damage, and the target makes a basic attack against a creature of your choice as a free action.
**Special:** When you gain this power, choose Charisma, Constitution, or Intelligence as the ability you use when making attack rolls with this power.

# Twilight Guardian

*"Despoiler! Feel nature's wrath!"*

**Prerequisite:** Elf

Among the elves, a rare few embrace the splendor of the natural world and draw power from its bountiful life in ways that others cannot begin to understand. Such elves champion nature in all its forms, placing the needs of the wilderness above their own. These heroes are called twilight guardians, for they preserve the wilderness from the encroaching darkness, safeguarding the natural world from destruction at the hands of the incautious and the malevolent alike.

Though it might seem that the twilight guardian chooses to champion the cause of nature, most twilight guardians would say that the world chose them. The world responds, they believe, to an uncommon reverence for nature, an awareness of the true power of life, and an understanding of the need for a harmonious balance to ensure the world's survival. These qualities arise most commonly among the elves, and thus the path of the twilight guardian is unique to that race.

As a twilight guardian, you evolve into a physical conduit of natural power, channeling the life force of the earth itself to better combat your enemies. The power flowing though you sharpens your senses and attunes you to your surroundings. Protecting the wilderness is your paramount concern. You are not required to safeguard a particular region, but instead to protect nature wherever you go in your travels. As long as you remain a stalwart protector, the natural world will aid you in your crusade, lending you its strength to ensure your triumph over those who would contaminate the land.

JAMES ZHANG

## Twilight Guardian Path Features

CHAPTER 2

# Character Classes

**Your character's** class is the most important factor in determining what your character can do. Your class determines what armor and weapons you start off knowing how to use, what skills you can learn, how many hit points you have, and—most important—the class features and powers you wield. These, in turn, determine what role you're best suited for in combat encounters as well as in some noncombat encounters.

This chapter introduces eight classes to the D&D game, representing three power sources and all four character roles. The bard and the sorcerer take their place alongside other arcane classes. The avenger and the invoker expand the roster of divine classes to all four roles. The primal power source is represented here by one class for each role: barbarian, druid, shaman, and warden.

Every class dabbles in functions related to another role. Some classes have one secondary role, whereas others incline toward one of two secondary roles based on an individual character's choice of class features and powers. The role entries for the classes in this book note each class's secondary role or roles.

Here you'll find descriptions of the following eight classes, along with four new paragon paths for each one. The chapter concludes with six new epic destinies.

**Avenger (page 32):** A divine striker trained in secret rites to bring divine justice to the gods' foes.

**Barbarian (page 48):** A striker who rages with primal fury.

**Bard (page 66):** An arcane leader who inspires and empowers with magic song and verse.

**Druid (page 82):** A controller who is a master of primal magic and can take on animal forms.

**Invoker (page 100):** A controller who wields raw divine power, the magic the gods used to fight the primordials.

**Shaman (page 118):** A mystic leader who channels primal power through a spirit companion.

**Sorcerer (page 136):** A striker who is an open floodgate of unshaped arcane might.

**Warden (page 152):** A staunch defender who channels the power of earth and root.

In secret temples far from bustling cities and priestly hierarchies, orders of esoteric warriors train their initiates in ancient traditions now forgotten or forbidden by most religious organizations. The champions of these orders are avengers—deadly weapons in the hands of their gods, imbued with divine power through secret rites of initiation. In battle, avengers swear to execute divine vengeance, entering a mental state that gives them unerring focus on a single enemy.

As an avenger, you were trained in a monastery, initiated through secret rites, and imbued with the power to smite your god's foes. You might be a disciple of Ioun, sworn to hunt and exterminate the minions of Vecna until you one day face the Maimed God. You could be an agent of the Raven Queen, bringing death to those who would defy your mistress. Or perhaps you serve Bahamut as an agent of justice, bringing ruin to tyrants and oppressors. The organizations devoted to your god might view you as a heretic or a hero, but you answer only to your god and to the vows you swore upon your initiation as an avenger.

Where will those vows lead you? One thing is certain: Doing the will of your god is never easy and never free of peril.

## Avenger Class Features

Avengers have the following class features.

### Armor of Faith

The favor of your deity wards you from harm. While you are neither wearing heavy armor nor using a shield, you gain a +3 bonus to AC.

### Avenger's Censure

As an avenger, you train your mind, body, and soul toward one purpose: destroying the enemies of your faith. To that end, you gain divine aid in pursuing a single target, though the way you eliminate that enemy varies. Do you pin your foe down and keep other enemies away, or do you pursue your foe across the field of battle?

Choose one of these options. Your choice provides bonuses to certain avenger powers, as detailed in those powers.

**Censure of Pursuit:** If your *oath of enmity* target moves away from you willingly, you gain a bonus to damage rolls against the target equal to 2 + your Dexterity modifier until the end of your next turn. The bonus increases to 4 + your Dexterity modifier at 11th level and 6 + your Dexterity modifier at 21st level.

**Censure of Retribution:** When any enemy other than your *oath of enmity* target hits you, you gain a bonus to damage rolls against your *oath of enmity* target equal to your Intelligence modifier until the end of your next turn. This bonus is cumulative.

### Channel Divinity

Once per encounter, you can use a Channel Divinity power. You start with two Channel Divinity powers: *abjure undead* and *divine guidance*. You can gain additional Channel Divinity powers by taking divinity feats.

### Oath of Enmity

Your god gives you the power to strike down your chosen prey. You gain the *oath of enmity* power.

## Avengers and Deities

**Choice of Deity:** Each avenger chooses a single deity from the pantheon and gives his or her exclusive service to that deity (see "Deities," *Player's Handbook*, page 20). Most avengers are trained at secret temples or monasteries where they learn esoteric doctrines and hidden legends that often suggest the superiority of their deity over all others.

A ceremony of investiture at your home temple, which culminated in an experience that seemed like a manifestation of your deity, granted you the ability to wield your divine powers. Your investiture complete, you left your temple to travel the world in the service of your deity and your order—or perhaps you fled your order and now seek a way to serve your god beyond the order's strictures. Whatever relationship you have with your order, nothing can remove the spark of divine power within you. What you do with that power is yours to decide.

**Choice of Alignment:** You must choose an alignment compatible with the deity you serve. Good avengers serve good deities, lawful good avengers serve lawful good deities, and so on. However, if you are unaligned, you can serve any deity, for avengers' work often leads to a certain level of disillusionment and detachment that prompts them to be unaligned.

## Implements

Like clerics and paladins, avengers use holy symbols to help channel and direct their divine powers. When they make their own holy symbols, the symbols are often different in some detail from the symbols used by other characters, yet avengers can use the same holy symbols used by clerics and paladins.

When you wear or hold a magic holy symbol, you can add its enhancement bonus to the attack rolls and the damage rolls of avenger powers and avenger paragon path powers that have the implement keyword. Without a holy symbol, you can still use these powers.

## Creating an Avenger

The three key ability scores for an avenger are Wisdom, Dexterity, and Intelligence. Avengers typically choose feats, skills, and powers to complement the ability score related to their choice of Divine Censure.

### Avenger Overview

**Characteristics:** Swinging a melee weapon in combat, you wield devastating divine power against your foes. You have a secondary assortment of ranged and close implement powers that let you draw your foes closer to you, teleport near them, or scorch them with divine wrath from afar.

**Religion:** An avenger might serve any deity, but an avenger is more likely to worship an unaligned deity than a god of good or lawful good. Avengers of Ioun are among the most common, fighting a war of knowledge against the servants of Vecna. Unaligned avengers often revere the Raven Queen, Erathis, or Sehanine, and evil avengers often serve Asmodeus, Lolth, Tiamat, or Zehir.

**Races:** Elves and razorclaw shifters make excellent pursuing avengers, and devas excel as isolating avengers. Many avengers are human, because most of the hidden monasteries that produce avengers are of human origin.

### Isolating Avenger

After you swear an *oath of enmity*, you keep your enemy beside you and drive other foes away. Your powers help you isolate one creature at a time and bring it down quickly and let you take vengeance when that creature's allies get past your defenses. Your attacks use Wisdom, so it should be your best ability score. Choose Intelligence for your second-best score, reflecting your keen tactical awareness. Select powers that help you sequester your foe from its allies.

**Suggested Class Feature:** Censure of Retribution
**Suggested Feat:** Toughness
**Suggested Skills:** Athletics, Intimidate, Religion, Streetwise
**Suggested At-Will Powers:** *bond of retribution*, *overwhelming strike*
**Suggested Encounter Power:** *avenging echo*
**Suggested Daily Power:** *temple of light*

### Pursuing Avenger

Once you swear an *oath of enmity* against an enemy, you pursue that creature wherever it goes. As much as it might try to escape your wrath, your powers let you follow it and punish it for trying to flee. Make Wisdom your highest ability score, and make Dexterity your second-best score to help you nimbly pursue your foe. Select powers that prevent your foe from moving away from you or that let you shift or teleport to the foe's side.

**Suggested Class Feature:** Censure of Pursuit
**Suggested Feat:** Invigorating Pursuit
**Suggested Skills:** Acrobatics, Perception, Religion, Stealth
**Suggested At-Will Powers:** *bond of pursuit*, *radiant vengeance*
**Suggested Encounter Power:** *angelic alacrity*
**Suggested Daily Power:** *oath of the final duel*

## Avenger Powers

Your avenger powers are called prayers. Many avengers describe the experience of calling on their gods' powers in combat as a state in which prayers are uttered almost instinctively, as if their gods were controlling their actions.

Each avenger has the power *oath of enmity* and the Channel Divinity powers *abjure undead* and *divine guidance*.

If another effect lets you roll twice and use the higher result when making an attack roll, this power has no effect on that attack. If an effect forces you to roll twice and use the lower result when making an attack roll, this power has no effect on that attack either.

## Hammer of Judgment

*"The hammer of the smith must sometimes also be the hammer of the warrior."*

**Prerequisite:** Avenger

As the blacksmith's hammer shapes metal according to the smith's will, so you have been sent to shape the world to your god's will. A tool and a weapon in your god's hand, you are called to shape the course of kingdoms and punish those who stand opposed to the ways of your god. Although the smith's hammer is a tool of building and creation, in time of need it can also be a weapon of destruction.

In following this path, you emphasize the control elements of many avenger powers, particularly pulling, pushing, sliding, and teleporting your foes. You gain abilities that let you push your foes even with powers that don't normally involve forced movement and that increase the distance you move your foes with your powers. Your new attack powers push your targets around or knock them to the ground.

True to the name of this path, you are most effective if you are wielding a hammer, such as a maul.

FRANZ VOHWINKEL

# Oathsworn

*"Your words are nothing but wind. My words endure."*

**Prerequisite:** Avenger, *oath of enmity* power

For certain avenger sects, the swearing of oaths is a central part of their religious observances and their rites of initiation. In the teachings of these sects, an oath sworn by an avenger is akin to the words of creation spoken by the gods to give lasting form to the world; when the avenger's will and the god's will are one, an avenger's oath has the power to make reality conform to the words of the oath.

As a member of one of these oathsworn sects, your *oath of enmity* power carries particular weight. When you swear your god's judgment against a foe, that creature's attacks are less likely to harm you. When your foe lies dead, you claim the reward of fulfilling your oath, drawing new vigor for the remaining battle. As you advance along the oathsworn path, you gain powers that are more effective against the target of your oath, weakening it or making it vulnerable to your later attacks. You can even grant the benefit of your *oath of enmity* to your allies for a short time, ensuring that they help you bring your foe to justice.

## Oathsworn Path Features

**Blood Oath (11th level):** You gain a +1 bonus to all defenses against attacks made by your *oath of enmity* target.

**Sworn Action (11th level):** When you spend an action point to make an attack, you make two attack rolls against each target of that attack and use either result.

**Enduring Oath (16th level):** When your *oath of enmity* target drops to 0 hit points, you can spend a healing surge as a free action.

MATIAS TAPIA

# Unveiled Visage

*"Look upon my face and see the face of my god."*

**Prerequisite:** Avenger

At the culmination of your rite of initiation years ago, one of the avengers in your secret temple pulled back the hood of a voluminous cloak to reveal a face that was not mortal, but fully divine. You saw the face of your god in that moment, and that sight transformed you. That knowledge of divine presence is what allows you to wield the power you have and what authorizes you to act in your god's name. Slowly—ever so slowly—you are growing into the image of your god, to the point where your face begins to reveal your deity's countenance as well.

To the initiated in your faith, the face of your god is a wondrous sight, capable of inspiring awe and increased devotion. To the enemies of your god, the face is a thing of fear, of searing and blinding radiance.

Your path is about your own physical and spiritual transformation. As you progress along the path of the unveiled visage, you become a more clear mirror of your god's face and a more faithful expression of the god's will. You can tap into the vigilance of the divine mind and transform yourself into a divine aspect not unlike an angel, flying on wings to better fight your god's foes.

# Zealous Assassin

*"It is the will of Sehanine that the servants of Lolth should die as they lived—in silence and in secret."*

**Prerequisite:** Avenger, trained in Stealth

Every avenger is trained in the ruthless art of combat and skilled in the art of isolating a foe and dispatching it with a few swift blows. Some avenger sects also emphasize the art of stealth—particularly those dedicated to deities who favor stealth, shadows, and secrecy, including Sehanine, Lolth, Zehir, and Vecna. Among these avengers, the most dangerous follow the path of the zealous assassin.

As a follower of this path, you embody devotion and ruthlessness in equal measure, making you a deadly weapon aimed at your deity's foes. Your skills are focused on the ability to slip in and out of shadows at the edge of combat, dealing blows that quickly dispose of enemies. You pool shadows around yourself or hide in a nimbus of divine light, and you master techniques that take advantage of openings in combat, dealing greater damage when you have combat advantage or against bloodied foes. At the culmination of the path, you can make yourself invisible to your foe, then sear it with blinding radiance that leaves it more susceptible to your attacks.

Barbarians are savage warriors who deal out powerful blows from their mighty weapons. They charge from foe to foe and seldom feel the pain of an enemy's strike. For barbarians' foes, the moments of greatest terror come when barbarians call upon primal forces to lend power to their raging spirits. These rages, although temporary, give a barbarian incredible powers, a combination of skill, willpower, and a legacy of ancient tribal rituals.

As a barbarian, you have a link to powerful nature spirits and other primal forces bound to the warriors of your tribe by the songs and totems of your legacy. These spirits lend energy to your rages, transforming you into a devastating force on the battlefield. As you become more experienced, these rages transcend mortal limitations, manifesting directly as waves of elemental power or gifting you with supernatural recuperative powers.

When the heat of battle is upon you, will you respond with a sudden charge that fells with one mighty swing of your weapon, or with a prolonged rage that leaves destroyed foes in your wake?

# Barbarian Class Features

Barbarians have the following class features.

## Barbarian Agility

While you are not wearing heavy armor, you gain a +1 bonus to AC and Reflex. The bonus increases to +2 at 11th level and +3 at 21st level.

## Feral Might

Barbarians connect with the natural world in a variety of ways. Some barbarians grow so hardened to physical punishment that they find it easier to simply absorb, rather than avoid, attacks. Others are living examples of the power of one's will to shape one's fate.

Choose one of the following options. The choice you make gives you the benefit described below and also provides bonuses to certain barbarian powers, as detailed in those powers.

**Rageblood Vigor:** You gain the *swift charge* power. In addition, whenever your attack reduces an enemy to 0 hit points, you gain temporary hit points equal to your Constitution modifier. The number of temporary hit points equals 5 + your Constitution modifier at 11th level and 10 + your Constitution modifier at 21st level.

**Thaneborn Triumph:** You gain the *roar of triumph* power. In addition, whenever you bloody an enemy, the next attack by you or an ally against that enemy gains a bonus to the attack roll equal to your Charisma modifier.

## Rage Strike

Barbarian daily attack powers have the rage keyword (page 220). They allow you to unleash powerful bursts of emotion, willpower, and primal energy. Each rage power starts with a mighty attack, and then you enter a rage, which grants an ongoing benefit.

At 5th level, you gain the *rage strike* power, which lets you channel an unused rage power into a devastating attack while you're raging. Using *rage strike* is an alternative to using a second rage power in a climactic battle; it gives you the damage output of a daily power without forcing you to enter a different rage.

## Rampage

Once per round, when you score a critical hit with a barbarian attack power, you can immediately make a melee basic attack as a free action. You do not have to attack the same target that you scored a critical hit against.

# Creating a Barbarian

You can choose any barbarian powers you like for your character, though many barbarians favor one of two builds: the rageblood barbarian or the thaneborn barbarian. All barbarians rely on Strength. Barbarians also benefit from a high Constitution or Charisma, depending on which expression of the class they favor.

## Rageblood Barbarian

You can withstand a great deal of physical punishment, especially when you are in the throes of rage. At higher levels, your powers, particularly your rages, visibly manifest the spirits sacred to your tribe. Strength should be your highest ability score, since you use it for your attacks, but make Constitution a close second. Charisma might be your third-best score, especially if you want to use some powers designed for the thaneborn barbarian build. Rageblood barbarians lean toward defender as a secondary role.

**Suggested Class Feature:** Rageblood Vigor
**Suggested Feat:** Weapon Expertise
**Suggested Skills:** Athletics, Endurance, Perception
**Suggested At-Will Powers:** *devastating strike*, *recuperating strike*
**Suggested Encounter Power:** *avalanche strike*
**Suggested Daily Power:** *bloodhunt rage*

### Barbarian Overview

**Characteristics:** You combine powerful melee attacks with an excellent ability to absorb damage. You gain tremendous bursts of power through mighty rages. You have unusually high hit points for your role, making you more durable than other strikers.

**Religion:** Most barbarians revere the primal spirits of the natural world rather than calling on the gods of the Astral Sea. Some barbarians don't see conflict between the gods and the primal spirits and therefore honor deities of nature or warfare in addition to the primal spirits. These barbarians often revere Kord, Melora, Avandra, or the Raven Queen. Evil or chaotic evil barbarians turn to Gruumsh or, more rarely, Bane or Zehir.

**Races:** Goliaths are ideal rageblood barbarians. Dragonborn make excellent thaneborn barbarians. Half-orcs are often barbarians but don't favor either of the two types. Dwarf and shifter barbarians tend to be rageblood barbarians, while halfling and half-elf barbarians choose the thaneborn path.

### Thaneborn Barbarian

You use primal power to fuel your mighty rages and lend power to your already imposing personal presence. Your combination of physical prowess and charismatic appeal draws allies to you as surely as it fills your foes with fear. Again, make Strength your highest ability score, followed by Charisma and then Constitution. Thaneborn barbarians lean toward leader as a secondary role.

**Suggested Class Feature:** Thaneborn Triumph
**Suggested Feat:** Rising Fury
**Suggested Skills:** Athletics, Intimidate, Perception
**Suggested At-Will Powers:** *howling strike*, *pressing strike*
**Suggested Encounter Power:** *vault the fallen*
**Suggested Daily Power:** *macetail's rage*

## Barbarian Powers

Your powers are evocations of primal strength. At lower levels, your powers rely partly on martial skill and personal presence, but even at the start of your career, the primal spirits of the world infuse your body with vigor. At higher levels, the primal spirits flow more freely through you and your weapons, creating effects that are more obviously supernatural.

Your barbarian daily attack powers have the rage keyword (page 220). While you are raging, your barbarian at-will attack powers gain certain benefits, as detailed in those powers.

**Prerequisite:** Barbarian

You revere the bear as a symbol of the warrior's strength and prowess. Through long and ancient rites, you have bound that symbol to your heart with more than just words and totems. In battle, you become the bear, shaping your form to its form and your strength to its strength.

Most bear warriors strive to emulate the bear beyond combat situations. You might catch fish with your bare hands, tear open beehives to feast on the honey inside, or roar in an aggressive territorial display. Like many barbarians, you're more at home in the wild places of the world than when surrounded by buildings.

# Fearbringer Thane

*"You needn't wait until the bodies fall to know the victor. Simply find the eyes that first hold fear—those are the eyes that can never see victory."*

**Prerequisite:** Barbarian

Many barbarians combine mastery of primal power with an imposing personal presence and natural leadership ability. The most dreaded warriors among them are fearbringer thanes, who harness those twin powers to strike terror into their enemies' hearts.

As a fearbringer thane, you shape battles with your will and your fearsome presence. Fear is a weapon you wield, turning your foes to quaking weaklings before you cut them down with your axe or sword. As your rages seize you and fill you with primal power, that power flows out from you to inspire your allies and fill your enemies with terror.

Many fearbringer thanes use their power to gather hordes of savage warriors under their banners. Others, including most player characters, lead smaller bands of adventurers on raids into dungeons and other adventure sites. In either case, a fearbringer thane is something like a hybrid of barbarian and warlord, as close to a leader as a barbarian comes.

*"The land gives wings to my feet and makes my spirit soar."*

**Prerequisite:** Barbarian, trained in Nature

The wilderness is your home, and your connection to the primal spirits of the land grants you speed and ferocity. You move through the forest like a deer, and you charge into battle with the cheetah's speed and fury.

The powers of a wildrunner emphasize mobility, letting you shift and move quickly while striking your foes. You pounce from foe to foe, avoiding opportunity attacks while dealing all the damage your rage can muster.

Elf barbarians are frequently drawn to this paragon path, because its powers complement their natural mobility. Likewise, many rangers who nurture a connection to the primal forces of nature by taking barbarian multiclass feats find this path appealing.

## Wildrunner Path Features

**Hunter's Fury (11th level):** When you spend an action point to make a melee attack, you can shift a number of squares equal to your Strength modifier after the attack.

**Wildrunner's Swiftness (11th level):** You gain a +1 bonus to your speed, or a +2 bonus while you are raging.

**Wild Resilience (16th level):** While you are raging, you gain a +2 bonus to saving throws.

Bards are artists first and foremost, and they practice magic just as they practice song, drama, or poetry. They have a clear sense of how people perceive reality, so they master charm magic and some illusions. Sagas of great heroes are part of a bard's repertoire, and most bards follow the example of many fables and become skilled in a variety of fields. A bard's artistic ability, knowledge of lore, and arcane might are widely respected, particularly among the world's rulers.

Art and magic share a sublime beauty, and, as a bard, you seek the place where the two meet. You might be a naturally talented wanderer who casts impressive spells almost instinctively, a student of a bardic college who learned ordered systems of magic and epic poetry, a warrior skald who mixes skill at

arms with thundering music, a dashing performer known for putting on a good show even for your enemies, or a perfectionist who seeks the consummate formula that blends art and magic into a higher force.

A steady rhythm beats in the back of your mind as you brandish your sword. Your eyes and ears pick up the motion of the villains that surround you, and one glance tells you everything you need to know to defeat them. You whistle three staccato notes, letting your allies know the symphony of battle is about to begin.

## Bard Class Features

Bards have the following class features.

### Bardic Training

You gain the Ritual Caster feat as a bonus feat, allowing you to use magical rituals. You own a ritual book, and it contains two rituals of your choice that you have mastered: one 1st-level ritual that has bard as a prerequisite (see Chapter 4) and another 1st-level ritual.

In addition, you can perform one bard ritual per day of your level or lower without expending components, although you must pay any other costs and use any focus required by the ritual. At 11th level, you can perform two bard rituals per day of your level or lower without expending components; at 21st level, you can perform three.

### Bardic Virtue

Bards praise many virtues in their stories, telling tales of people whose particular qualities set them above common folk. The valor of dauntless heroes and the cunning of great minds are among these virtues, and a bard can choose to emphasize either quality.

Choose one of the following options. The choice you make gives you the benefit described below and also provides bonuses to certain bard powers, as detailed in those powers.

**Virtue of Cunning:** Once per round, when an enemy attack misses an ally within a number of squares of you equal to 5 + your Intelligence modifier, you can slide that ally 1 square as a free action.

**Virtue of Valor:** Once per round, when any ally within 5 squares of you reduces an enemy to 0 hit points or bloodies an enemy, you can grant temporary hit points to that ally as a free action. The number of temporary hit points equals 1 + your Constitution modifier at 1st level, 3 + your Constitution modifier at 11th level, and 5 + your Constitution modifier at 21st level.

### Majestic Word

The arcane power of a bard's voice can heal allies. You gain the *majestic word* power.

### Multiclass Versatility

You can choose class-specific multiclass feats from more than one class.

### Skill Versatility

You gain a +1 bonus to untrained skill checks.

### Song of Rest

When you play an instrument or sing during a short rest, you and each ally who can hear you are affected by your Song of Rest. When an affected character spends healing surges at the end of the rest, that character regains additional hit points equal to your Charisma modifier with each healing surge. A character can be affected by only one Song of Rest at a time.

### Words of Friendship

Bards use magic to honey their words and turn the simplest argument into a compelling oration. You gain the *words of friendship* power.

## Implements

Bards use wands to direct and control their spells. When you wield a magic wand, you can add its enhancement bonus to the attack rolls and the damage rolls of bard powers and bard paragon path powers that have the implement keyword. Without a wand, you can still use these powers.

Songblades and some magic musical instruments (see Chapter 3) can be used as implements for bard powers and bard paragon path powers. Bards treasure these magic musical instruments not only for the power they offer, but for the wondrous melodies they produce in the hands of a skilled musician.

### Bard Overview

**Characteristics:** Your powers are a mix of ranged, melee, and close attacks, giving you plenty of options whether you choose to lead from the front or the rear. Your attacks can provide bonuses and extra movement to you and your allies, or they can charm and deceive your enemies.

**Religion:** Many bards revere Corellon, patron of both artists and wielders of arcane magic. Cunning bards also honor Avandra and Sehanine, who are credited with inspiring trickery in the heroes of old. Valorous bards are more likely to revere Bahamut, Kord, or Moradin. Evil bards often worship Lolth, Tiamat, or Zehir.

**Races:** Half-elves are sometimes said to be the best bards, partly because their ability score bonuses favor the valorous bard and partly because their Dilettante racial trait complements the bard's Multiclass Versatility. Gnomes and tieflings both make excellent cunning bards.

# Creating a Bard

Your choice of ability scores, class features, and powers suggests one of two builds based on the storied virtues of cunning and valor. All bards use Charisma for their attacks. Intelligence increases the effect of tricky attacks, and Constitution is best for powers that inspire allies.

## Cunning Bard

The heroes of the past whom you hold as exemplars overcame adversity and escaped danger using their wits, by tricking their foes and concocting cunning stratagems. You seek to emulate those heroes, combining your winning personality with a keen intellect. You use Charisma for your attack powers, so make it your highest score, followed by Intelligence to improve the effects of your tricky powers. Constitution is a good third score. Look for powers that let you put your cunning to work. Most cunning bards focus on ranged attack powers, using a wand from a safe distance to orchestrate the flow of battle.

**Suggested Class Feature:** Virtue of Cunning
**Suggested Feat:** Advantage of Cunning
**Suggested Skills:** Arcana, Bluff, Intimidate, Perception, Streetwise
**Suggested At-Will Powers:** *misdirected mark, vicious mockery*
**Suggested Encounter Power:** *blunder*
**Suggested Daily Power:** *stirring shout*

## Valorous Bard

To your mind, the ancient heroes most worthy of emulation are those whose courage in the face of overwhelming odds carried them to victory. Your own fortitude and forceful personality inspire similar valor in your allies. Your highest ability score should be Charisma, since you use it for attack powers, followed by Constitution to improve your powers of inspiration. It's a good idea to make Intelligence your third score. Choose powers that emphasize valor and endurance in the face of adversity. Most valorous bards focus on melee and close attack powers, wielding a sword in the thick of battle and leading by example.

**Suggested Class Feature:** Virtue of Valor
**Suggested Feat:** Strength of Valor
**Suggested Skills:** Arcana, Athletics, Diplomacy, Intimidate, Perception
**Suggested At-Will Powers:** *guiding strike, war song strike*
**Suggested Encounter Power:** *shout of triumph*
**Suggested Daily Power:** *slayer's song*

## Student of the Seven

*"Why hitch your cart to just one horse?"*

**Prerequisite:** Bard, any multiclass feat

Among the many legends told by bards, a few mythic figures appear with some regularity, including the mysterious Seven. The Seven are sisters, or sometimes brothers, whose names vary from tale to tale. They're not gods, but they're not mortals either; sometimes they're exarchs of Corellon or some other god, and sometimes they're angels who come from seven different dominions. But most often, they're simply the Seven. Some tales describe them as patrons of the arts, inventors or sponsors of dance, poetry, singing, instrumental music, painting, drama, and the like. Other tales describe them as patrons of every mortal activity, or even as sponsors of different power sources. The Seven are never exactly the same in any two tales, or even in the same tale told twice. And as their student, neither are you.

Following the promptings of the Seven, your interests accept no limitations. No narrow field of study can contain your wide-ranging curiosity. You excel as an arcane leader, but what's to prevent you from learning a few tricks from a martial defender or a primal controller? No knowledge is off limits, and nothing is impossible.

By taking multiclass feats and learning powers from a variety of classes, you always have the right tool for the job. In addition, you learn spells that have enormous versatility, ensuring that you can provide help anytime you or an ally needs a bonus in a specific area. You dabble in a little bit of everything, and you manage not only to improve yourself but also to make others a little better at what they do best.

# Summer Rhymer

*"Ancient rhythms, endlessly refreshed. This blade cuts like a poem."*

**Prerequisite:** Bard, Virtue of Cunning class feature

Among the most powerful residents of the Feywild is Tiandra, the Summer Queen (see *Manual of the Planes*). Her court is a reflection of her unearthly beauty, hung with flower garlands and alive with bustling activity. Her smile can ripen crops, and her favor bestowed on a mortal can quicken the gifts of song and poetry.

Whether the Summer Queen has actually smiled on you or you merely aspire to seek her blessing, you claim some association with the Summer Fey and study their musical magic. In your feytouched presence, you and your allies teleport freely, and you can call on the Summer Queen's powers of growth to aid your own healing powers.

If you serve the Summer Queen well, you might hope to receive some favor from her. Great heroes of the past have sometimes received noble titles, magic instruments, access to powerful enchantments, and other gifts from her hand. As the fey go, the Summer Queen is relatively trustworthy, but be warned: No fey gift is truly free.

# Voice of Thunder

*"When thunder speaks, all nature feels a twinge of fear."*

**Prerequisite:** Bard

Your voice is your power, and as you study and practice ancient bardic traditions, your power grows stronger. The rumble of thunder in a stormy sky, the tremor of the earth that topples buildings, the rhythm of waves crashing against the shore, the explosive detonation of fire—your voice is the raw elemental power of sound, booming and concussive.

Variations of this path appear in the bardic traditions of many races and cultures. Eladrin often associate their magical traditions with forces of nature, and like a bralani of autumn winds or a tulani of summer sun, you might be a noble eladrin of the thunderstorm. Dwarf and goliath bards are more inclined to think of the rumble of stone. Drow bards speak of the voice of fury or of madness that empowers their harshly beautiful music. Tieflings wield explosive force with their mighty voices.

The features and powers of this path increase the range and effectiveness of your thunder powers. Your thunderous songs and shouts echo to repeat their assault on your foes, and your *song of thunder* gives your allies the ability to conjure echoes of your booming voice.

FRANZ VOHWINKEL

# War Chanter

*"Together we take our place among the greatest heroes the world has ever known!"*

**Prerequisite:** Bard, Virtue of Valor class feature

Bards look to the tales of past heroes for inspiration and use those tales to spur their allies. As a war chanter, you embrace those tales as a pattern for your own life, leading your companions into battle with songs and cadences that extol the virtues of bravery, endurance, and strength of arms. The roar of battle, the clash of steel on steel, the warrior's cry, the tramp of marching feet—these are all notes you weave into the symphony of war, which flows across the field like a raging torrent, catching up your friends and foes alike.

Your music and oratory inspire your allies to greater deeds of valor. Your Virtue of Valor grants temporary hit points to you as well as to your allies, and your own battle prowess can bolster your allies against injury. Your powers are similar in some ways to those of a warlord, granting your allies movement and attacks against the foes you strike with your own weapon.

## War Chanter Path Features

**Inspire by Example (11th level):** When you spend an action point to take an extra action, each ally within 5 squares of you gains a bonus to attack rolls and damage rolls equal to your Constitution modifier until the end of your next turn.

The number of temporary hit points equals 8 + your Constitution modifier at 21st level.

**Class Features:** Balance of Nature, Primal Aspect, Ritual Casting, *wild shape*

Secretive and enigmatic, druids call the wilderness their home. They are capable of running with a wolf pack, speaking with the most ancient trees, and watching thunderstorms from atop the clouds themselves. They regard challenges as tests, both of their fitness and of their connection with the wild places of the world. And though many druids project an outward calm, they have the cunning of the beast and the fury of the storm.

Whether you were born to the wilds or retreated from civilization, whether you chose your path or answered a call that whispered in your heart, you share a bond with the primal spirits of nature. You are neither their servant nor their master, but winds, trees, and beasts heed your words, for they recognize you as kin.

Call to the spirits, and they will entangle your foes or smite your enemies with the storm. Unleash your own spirit, and you will become the Primal Beast, uncaged and untamed.

WILLIAM O'CONNOR

# Druid Class Features

Druids have the following class features.

## Balance of Nature

Some druids favor being in beast form, while others prefer being in humanoid form. However, just as druids seek balance in the world between divine and primordial forces, druids pursue balance within their own minds and bodies.

You begin with three at-will attack powers. Throughout your career, at least one of those powers, and no more than two, must have the beast form keyword. By this means, you have access to useful attacks in either beast form or humanoid form.

## Primal Aspect

Druidic lore speaks of the Primal Beast, the first spirit of the world's noble predators. A formless thing of shadows, fur, feathers, and claws, this creature appears in many druids' visions, and they speak of channeling the Primal Beast when using their *wild shape* and beast form powers. As a druid, you choose which aspect of the Primal Beast you most strongly manifest with your powers.

Choose one of these options. Your choice provides bonuses to certain druid powers, as detailed in those powers.

**Primal Guardian:** While you are not wearing heavy armor, you can use your Constitution modifier in place of your Dexterity or Intelligence modifier to determine your AC.

**Primal Predator:** While you are not wearing heavy armor, you gain a +1 bonus to your speed.

## Ritual Casting

You gain the Ritual Caster feat as a bonus feat, allowing you to use magical rituals. You own a ritual book, and it contains two rituals of your choice that you have mastered: Animal Messenger (*Player's Handbook*, page 300) and another 1st-level ritual.

Once per day, you can use Animal Messenger without expending components.

## Wild Shape

As a druid, you have the ability to channel the primal energy of beasts into your physical form and transform into a beast. You have an at-will power, *wild shape*, that allows you to assume the form of a beast, and many druid powers have the beast form keyword (page 219) and therefore can be used only while you are in beast form.

The *wild shape* power lets you assume a form of your size that resembles a natural or a fey beast, usually a four-legged mammalian predator such as a bear, a boar, a panther, a wolf, or a wolverine. Your beast form might also be an indistinct shape of shadowy fur and claws, an incarnation of the Primal Beast of which all earthly beasts are fractured images. You choose a specific form whenever you use *wild shape*, and that form has no effect on your game statistics or movement modes.

Your choice of Primal Aspect might suggest a specific form you prefer to assume, and certain beast form powers specify changes to your form when you use them. You might also resemble a more exotic beast when you're in beast form: a reptile such as a rage drake or a crocodile, or a fantastic beast such as an owlbear or a bulette.

# Implements

Druids employ staffs and totems as a means of focusing their primal energy. When you wield a magic staff or a magic totem, you can add its enhancement bonus to the attack rolls and the damage rolls of druid powers and druid paragon path powers that have the implement keyword. Without an implement, you can still use these powers.

# Creating a Druid

Druids rely on Wisdom, Dexterity, and Constitution for their powers. You can choose any powers you like, but many druids choose powers that complement their choice of Primal Aspect.

## Guardian Druid

As a guardian druid, you are a protector of the land and those who rely on it. Yours is the magic of earth, forest, and sky, the enduring aspects of nature that outlive any mortal tyrant. Your powers incline you toward leader as a secondary role. Wisdom should be your highest ability score, since your attack powers rely on it, but make Constitution your second-best

### Druid Overview

**Characteristics:** You combine a number of potent ranged and area powers with the ability to take beast form and bring the fight directly to your foes. Depending on the powers you choose, you can spend more combat time in beast form or more in your humanoid form.

**Religion:** Most druids do not worship the gods of the Astral Sea, instead orienting their lives and beliefs around the primal spirits of nature. It might be misleading to call their relationship with these spirits worship, but druids invoke the spirits in times of passage, implore them for aid, and appease them with offerings of burned food or spilled blood.

**Races:** Elves and razorclaw shifters make excellent predator druids, combining native insight and attunement to nature with grace and agility. Dwarves excel as guardian druids; goliath and human druids often follow that path as well.

score to heighten your endurance and your guardian powers.

**Suggested Class Feature:** Primal Guardian

**Suggested Skills:** Arcana, Heal, Insight, Nature
**Suggested At-Will Powers:** *call of the beast*, *chill wind*, *grasping claws*
**Suggested Encounter Power:** *frost flash*
**Suggested Daily Power:** *fires of life*

### Predator Druid

As a predator druid, you hunt down and destroy those who despoil the natural world. Yours is the magic of the bared fang, the stalking wolf pack, and the blood-red moon. Your powers make striker your secondary role, with a focus on dealing significant damage along with your control effects. Make Wisdom your highest ability score to get the most out of your attacks, followed by Dexterity to enhance your predator powers.

**Suggested Class Feature:** Primal Predator
**Suggested Feat:** Primal Fury
**Suggested Skills:** Arcana, Athletics, Nature, Perception
**Suggested At-Will Powers:** *flame seed*, *pounce*, *savage rend*
**Suggested Encounter Power:** *darting bite*
**Suggested Daily Power:** *savage frenzy*

### Choosing Druid Powers

As you choose druid powers, you have two factors to consider. One is how the powers fit into your character concept—whether you imagine your character as more of a guardian or more of a predator. The other is how much time you envision spending in beast form. This factor is independent of your choice of build; both guardian druids and predator druids can choose powers that are mostly used in beast form or mostly used in humanoid form. But it's important for how your druid feels during play.

The easiest strategy is to choose the power at each level that appeals to you most. If most of those powers are beast form powers, then you'll spend a lot of time in beast form, using powers that you enjoy. If most of those powers are ranged and area powers you use in humanoid form, that will change the way you play your character. As long as you enjoy the powers you're using, that's fine.

If you need more guidance, choose beast form powers for about half of your powers. At 1st level, choose one or two beast form at-will attack powers, then choose either a beast form encounter power or a beast form daily power. As you advance in levels, continue trying to balance your power selections between beast form powers and other powers.

Remember that you can use retraining (*Player's Handbook*, page 28) to change your power selections if you find your choices unsatisfying.

## Druid Powers

Your powers are evocations that call on primal spirits to alter your physical form and hamper your enemies. You call up roots and vines from the ground, summon lightning from the sky, engulf your enemies in fire, or transform yourself into a fierce predator whose howl can shake your foes with fear.

### Class Features

Each druid has the power *wild shape*.

**Wild Shape** — Druid Feature

*You assume an aspect of the Primal Beast or return to your humanoid form.*

**At-Will ✦ Polymorph, Primal**
**Minor Action (Special)** **Personal**

**Effect:** You change from your humanoid form to beast form or vice versa. When you change from beast form back to your humanoid form, you shift 1 square. While you are in beast form, you can't use attack, utility, or feat powers that lack the beast form keyword, although you can sustain such powers.

You choose a specific form whenever you use *wild shape* to change into beast form. The beast form is your size, resembles a natural beast or a fey beast, and normally doesn't change your game statistics or movement modes. Your equipment becomes part of your beast form, but you drop anything you are holding, except implements you can use. You continue to gain the benefits of the equipment you wear.

You can use the properties and the powers of implements as well as magic items that you wear, but not the properties or the powers of weapons or the powers of wondrous items. While equipment is part of your beast form, it cannot be removed, and anything in a container that is part of your beast form is inaccessible.

## Blood Moon Stalker

*"Tonight, the full moon rises red over the mountains. This is the night of the blood moon—my night."*

**Prerequisite:** Druid, *wild shape* power

Several legends tell of the blood moon, a night or sometimes a season when the Primal Beast stalks the wilderness of the world in physical form. During the blood moon, the predators of the world are said to be more dangerous and to have an insatiable hunger. According to some legends, the blood moon is a perversion of the world's natural state, brought about by the gods or by the fierce response of the primal spirits to some violation of their precepts. Whatever the cause and exact effects of the blood moon, some druids use these legends as a symbol for their own ferocious zeal in protecting the natural balance of the world.

You are a blood moon stalker, favoring your beast form and choosing powers that make you more dangerous in that form. As your body transforms into beast form, so too your mind embraces your bestial side. You take pride and pleasure in fighting without conscious thought, drawing on bestial instinct and wisdom to guide your attacks upon your prey. You are a fierce hunter, a silent stalker of the wilds, but you are also a crusader for the primal spirits, ensuring that neither gods nor primordials overstep the bounds set for them at the dawn of time.

Through the power of the blood moon, you and your spirit brothers, sisters, and ancestors are the custodians of the world.

# Guardian of the Living Gate

*"There are creatures from beyond this world that seek to destroy all that we have built. My task is to destroy them first."*

**Prerequisite:** Druid

Ancient compacts and edicts protect the natural world from too much interference by gods and primordials. As much as primordials, as well as demons, might like to tear the world apart and draw it back into the Elemental Chaos from which it was made, their power is limited. To many druids' eyes, the greatest threat that now faces the world is not god or primordial, but alien creatures from the Far Realm that are not bound by the ancient laws. These creatures don't necessarily want to destroy the world, but whether or not they mean to, they corrupt it simply by being in it.

As a guardian of the Living Gate, you have sworn to seek out and kill aberrant creatures that have ties to the Far Realm and to seal any portals between that plane and the world. You might have joined an order of like-minded druids (the organization known as the Circle of the True is the largest such order), or you might have found your own way into the esoteric knowledge of the Living Gate. The mystical powers you learn on this path, starting with the *first ward of the Living Gate*, are generally useful for protecting your allies and bringing ruin to your enemies, but your charge is to use them to defend the natural world from forces that would corrupt and destroy it.

## Guardian of the Living Gate Path Features

**Enduring Spirit (16th level):** Once per round, when you fail a saving throw, an ally within 5 squares of you can make a saving throw.

# Keeper of the Hidden Flame

*"The Hidden Flame burns within us all. Draw on it for your fury, or I will call it out for your doom."*

**Prerequisite:** Druid

According to druidic legend, the Hidden Flame is a spark of vigor and vitality that exists within every creature. Beasts, especially predatory mammals, are said to live in harmony with the Hidden Flame within them, calling upon it to fuel their hunting fury. When a creature lets the Hidden Flame burn out of control, the result is a mad savagery that is no more in harmony with the natural way of things than the behavior of those civilized folk who act as if no flame burns within them at all.

You are a keeper of the Hidden Flame, able to tap into this wellspring of strength and bestial fury. By calling to the Hidden Flame in a creature, you can spur that creature into a frenzy that leaves no room for strategic or tactical thinking. You draw on the Hidden Flame in yourself and your allies to perfect your predatory instinct, helping you fight with terrible ferocity.

## Keeper of the Hidden Flame Path Features

**Keeper's Action (11th level):** When you spend an action point to take an extra action, you can also reroll the next attack you make that misses before the end of your turn, and you must use the second roll.

**Fury of the Hidden Flame (11th level):** You gain a +1 bonus to ranged, area, and close attack rolls against the enemy nearest to you.

**Leap to the Fray (16th level):** Whenever an ally within 5 squares of you charges, you and each other ally within 5 squares of you can shift 1 square as a free action.

EVA WIDERMANN

# Sky Hunter

*"The eagle is the perfect predator. Not bound to earth, it hunts like a primal spirit in the world."*

**Prerequisite:** Druid, *wild shape* power

Although the Primal Beast usually appears as a mammalian predator, some aspects of the Primal Beast soar through the sky on feathered wings, hunting prey from the air. Eagles, hawks, and falcons are no less fierce predators than panthers and wolves, and some druids assume their forms to fly after their own prey.

You are such a druid, a sky hunter who emulates birds of prey in your beast form. Your beast form can't always fly, but it can take to the air from time to time. Some sky hunters assume a beast form a little like a cockatrice—a stalking predator with primitive wings that allow it to fly in short bursts. Others retain their normal beast form but change momentarily into a bird form when they use their sky hunter powers.

## Sky Hunter Path Features

**Sky Hunter's Action (11th level):** When you spend an action point to take an extra action, you can fly your speed before taking that action.

**Master of Wings (11th level):** You gain a +2 bonus to attack rolls against flying creatures.

**Beast Senses (16th level):** Whenever you use a beast form daily power, you gain a +5 power bonus to Perception checks until the end of the encounter.

MATIAS TAPIA

# INVOKER

***"The only thing stronger than my faith is the fire I use to burn away those who stand against the will of the gods."***

**CLASS TRAITS**

*Class Skills:* Arcana (Int), Diplomacy (Cha), Endurance (Con), History (Int), Insight (Wis), Intimidate (Cha), Religion (Int)

**Class Features:** Channel Divinity, Divine Covenant, Ritual Casting

At the dawn of time, the gods who inhabited the Astral Sea warred with the primordials of the Elemental Chaos, the mighty beings who shaped the world out of formless void. The greatest of the gods' mortal agents in that war were invokers, imbued with a fragment of the gods' own might to fight alongside them. No other mortal servant of the gods can claim the same kind of power. Through rites of investiture, avengers, clerics, and paladins gain the ability to manifest echoes of that power, uttering careful prayers and channeling divine energy through their holy symbols. You, however, channel your god's power directly. No mere symbol can contain it, for you speak the words of creation, shaping the universe to your and your god's will.

Perhaps you were trained in a secret monastery, or you studied in a library where the universe's oldest lore was preserved. Or perhaps you experienced the presence of your god firsthand and took a shard of

WILLIAM O'CONNOR

divine power into yourself. You might even be an immortal born into flesh, slowly awakening to the awesome divine power that is your birthright. Whatever your past, you are among the gods' most trusted servants, bound to a covenant in which you swore to use divine power with great care. To what end will you wield that might?

## Invoker Class Features

Invokers have the following class features.

### Channel Divinity

Once per encounter, you can use a Channel Divinity power. You start with two Channel Divinity powers: *rebuke undead* and a power determined by your Divine Covenant. You can gain additional Channel Divinity powers by taking divinity feats.

### Divine Covenant

Invokers wield ancient divine power that is not accessible to most mortals—only to those who enter into a personal covenant with a god. Invokers undergo long years of study and testing. Only after that time are they allowed to enter into the final covenant that grants them access to this class's powers. Some say that, in the final swearing of the covenant, the invoker's god briefly manifests, but the details of an invoker's initiation are a closely held secret.

Choose one of the options described below. The Divine Covenant you choose provides you with a Channel Divinity power and a covenant manifestation that takes effect whenever you use a divine encounter or daily attack power. Your choice also provides bonuses to certain invoker powers, as detailed in those powers.

#### Covenant of Preservation

The gods have charged you to defend the faithful and to ally with those who seek to defeat the gods' enemies.

**Channel Divinity:** You gain the Channel Divinity power *preserver's rebuke*.

**Covenant Manifestation:** When you use a divine encounter or daily attack power on your turn, you can slide an ally within 10 squares of you 1 square.

#### Covenant of Wrath

You have sworn to seek out and destroy those that oppose the gods. Primordials, demons, and devils fall before your magic like wheat before a scythe.

**Channel Divinity:** You gain the Channel Divinity power *armor of wrath*.

**Covenant Manifestation:** When you use a divine encounter or daily attack power on your turn, you gain a bonus to the damage roll equal to 1 for each enemy you attack with the power.

### Ritual Casting

You gain the Ritual Caster feat as a bonus feat, allowing you to use magical rituals (see Chapter 10 of the *Player's Handbook*). You own a ritual book, and it contains two rituals of your choice that you have mastered: Hand of Fate and one 1st-level ritual.

Once per day, you can use Hand of Fate without expending components.

## Implements

Invokers do not make use of holy symbols, since they believe that their magic predates and transcends such representations of divine power. Instead, invokers make use of rods and staffs as representations of the gods' dominion over the world. When you wield a magic rod or a magic staff, you can add its enhancement bonus to the attack rolls and the damage rolls of invoker powers and invoker paragon path powers that have the implement keyword. Without an implement, you can still use these powers.

## Invokers and Deities

**Choice of Deity:** Like other divine characters, invokers are dedicated servants of one or more deities. Most invokers devote themselves to a single deity, but all invokers recognize the entire pantheon as worthy of respect (see "Deities," *Player's Handbook*, page 20). Whereas a cleric might revere Corellon and despise Lolth as a rival and enemy, an invoker dedicated to Corellon recognizes Lolth and her servants

### Invoker Overview

**Characteristics:** Your powers are aimed at controlling your foes: slowing, stopping, or compelling their movement; weakening their attacks; or hedging them in zones of divine fire. You summon angelic beings to face your enemies, and you empower your allies to fight with divine fervor.

**Religion:** Like clerics, invokers can worship any deity, but few invokers serve gods who are newer arrivals to the pantheon, such as the Raven Queen and Vecna. Invokers dedicated to Bahamut often revere Tiamat as well, worshiping those two gods as the two halves of the slain dragon-god Io. More than most other divine characters, invokers offer prayers to and call on favors from the entire pantheon, for all the gods, whatever their alignments, fought together against the primordials.

**Races:** Dwarves and devas make particularly good invokers; both the dwarven devotion to the gods and the devas' heritage lend themselves to the invoker's worldview. Ancient and long-lived, eladrin and elves have a racial memory that keeps alive the legends of the first wars between the gods and the primordials, and the two races often follow in the paths of the first invokers. Invokers can be found among all races, however.

as comrades in arms against the forces that seek to destroy the world and the gods. That's not to say that you can't oppose the evil schemes of Lolth's followers if you're dedicated to Corellon, only that you shouldn't lose sight of the grander scheme of things.

**Choice of Alignment:** Invokers don't gain their power through rites of investiture or ordination, as avengers, clerics, and paladins do. You bear the touch of your god's own hand on your soul, a direct channel through which divine power can flow into the world, shaped by your will. Because you strive to bring your will into perfect accordance with your deity's, your alignment must match your deity's. For instance, an invoker of Moradin must be lawful good, an invoker of Pelor must be good, and an invoker of Ioun must be unaligned.

## Creating an Invoker

Invokers rely on Wisdom—as an expression of their link to the divine will—for the accuracy and potency of their attacks. Each invoker enters into a covenant with a god, a sworn pact in which the invoker agrees to fulfill certain duties in exchange for the divine power he or she will use to carry out those duties. The two most common covenants—the Covenant of Preservation and the Covenant of Wrath—lend themselves to two common invoker builds. Even though you must choose a covenant, you can choose any powers you like to help you fulfill it.

### Preserving Invoker

You defend your allies, combining defensive magic with prayers that hinder or prevent your enemies' attacks. Wisdom should be your highest ability score, followed by Intelligence, since you need foresight and cunning to protect your allies. Choose powers that grant defensive benefits to your allies or penalties to your enemies. The preserving invoker leans toward leader as a secondary role.

**Suggested Class Feature:** Covenant of Preservation

**Suggested Feat:** Insightful Preservation

**Suggested Skills:** Arcana, Diplomacy, History, Religion

**Suggested At-Will Powers:** *sun strike*, *vanguard's lightning*

**Suggested Encounter Power:** *blades of astral fire*

**Suggested Daily Power:** *binding invocation of chains*

### Wrathful Invoker

You are an instrument of divine wrath, smiting those who have the temerity to doubt the reach of your god's power. Make Wisdom your highest ability score, followed by Constitution, since your physical durability allows you to withstand and channel divine wrath. Focus on powers that bring ruin to your foes. The wrathful invoker leans toward striker as a secondary role.

**Suggested Class Feature:** Covenant of Wrath

**Suggested Feat:** Invoker Defense

**Suggested Skills:** Endurance, Insight, Intimidate, Religion

**Suggested At-Will Powers:** *avenging light*, *grasping shards*

**Suggested Encounter Power:** *thunder of judgment*

**Suggested Daily Power:** *purging flame*

## Invoker Powers

Your invoker powers are called prayers, but they are not as much supplications to the gods as direct manifestations of divine power.

MIKE MAY

## Angelic Aspect

*"I am one with the angels that serve my god."*

**Prerequisite:** Invoker

During the gods' ancient war against the primordials, invokers were their most trusted mortal servants, allowed to wield the raw divine power typically reserved for the gods' immortal agents, the angels. Over time, the distinction between the most favored mortal invokers and the angels themselves became hard to define. Some invokers drew so much divine energy into themselves that they took on angelic aspects. Some angels, conversely, emptied themselves of divine essence and clothed themselves in mortal flesh as invokers, voluntarily limiting their own power in order to serve as more effective divine agents in the world.

One of those paths is yours, and it has led you to this point: You are neither fully mortal nor fully angel, but some of both. As an angelic aspect, you can channel divine energy through your mortal body to take on angelic characteristics: resistance to the forces of dark and light, an awesome presence that strikes fear into the hearts of those who try to strike you, wings to fly across the field of battle, and mighty attacks akin to those of angels.

If you were born mortal, your transformation is beginning; you are on the threshold of becoming something more, and immortality awaits. If you have always been an angelic being veiled in flesh, the veil is beginning to part and your true nature is being revealed. Either way, your enemies have much to fear.

### Angelic Aspect Path Features

**Wings of Action (11th level):** When you spend an action point to take an extra action, you can fly 8 squares as a free action, and you gain a +2 bonus to AC until the start of your next turn.

**Angelic Resistance (11th level):** You gain resist 10 necrotic and resist 10 radiant. If you already have either resistance, that resistance increases by 5.

**Angelic Emanation (16th level):** While you aren't bloodied, attackers take a -2 penalty to attack rolls against you.

**Shielding Nimbus** — Angelic Aspect Utility 12

*Divine power surges through you, giving you an angelic visage and shielding you from damage.*

VINCENT DUTRAIT

# Blightspeaker

*"Pelor is compassionate, but the wicked deserve the punishment I bring to them in his name."*

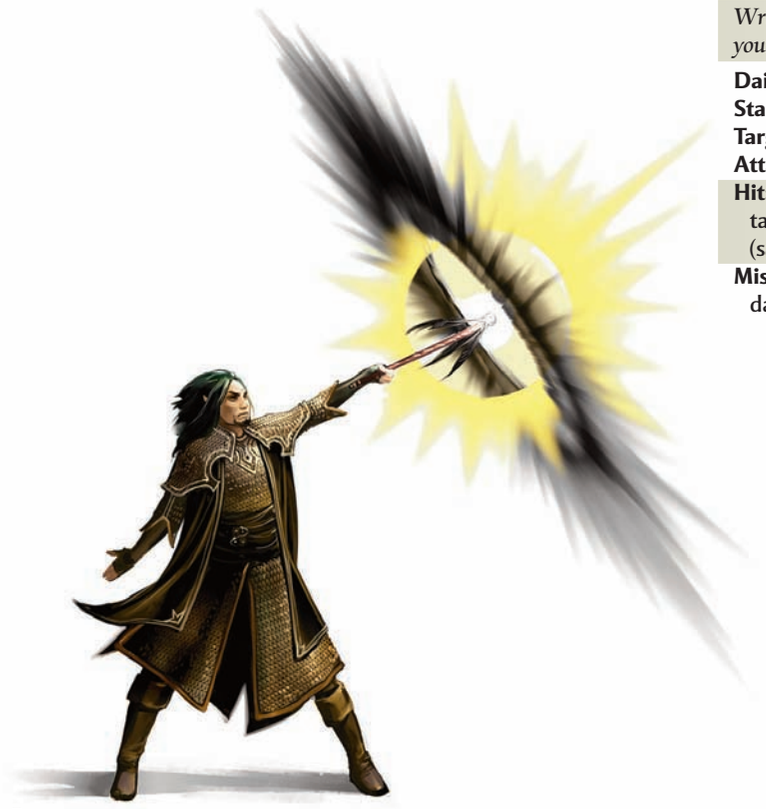
**Prerequisite:** Invoker

Divine wrath can manifest as punishing blasts of radiant light, as fire from the heavens, or as thunder and lightning that smite the gods' foes. Sometimes, though, the gods' anger is manifested in plagues and curses upon the wicked. Even good deities can resort to extreme methods to purge the world of corruption.

As a blightspeaker, you wield such extreme methods in your god's name. Like an angel of death, you wield the scythe of necrotic power and harvest life from your enemies to fuel your own strength. To the common folk, you are a frightful presence, a grim reminder of your god's darker side. To your enemies, you are a terror, a manifestation of the judgment that has been pronounced upon them and of the punishment that awaits.

## Blightspeaker Path Features

**Blighting Action (11th level):** When you spend an action point to take an extra action, each enemy within 5 squares of you gains vulnerable 5 necrotic until the end of your next turn. In addition, all damage you deal during this turn is necrotic in addition to its other damage types.



EVA WIDERMANN

# Flame of Hope

*"I do not aspire to greatness. I hope instead that my actions can kindle the flame of greatness in others."*

**Prerequisite:** Invoker

When the gods warred with the primordials at the dawn of time, the gods fought to bring hope to the world they had helped to create. If the world had been left to the primordials, it would have been a fearsome place, dominated by tyrants who might destroy and remake any part of the world without warning. All the mortal inhabitants of the world might have been slaves, as the dwarves were enslaved by the titan servitors of the primordials. At best, they might have been terrified fugitives, hiding in despair from the wanton destruction of the world's elemental rulers.

Because the gods fought the primordials and freed the world from their dominion, the mortal races can live in hope. It is your sacred trust to nurture the embers of hope in the world and stir them into great bonfires that shed light into the world's darkest places. As a flame of hope, you wield powers of fiery radiance that heal and inspire your allies while burning and blinding your foes.

HECTOR ORTIZ

## Flame of Hope Path Features

# Hammer of Vengeance

*"By the hammer Guldarak, Moradin will have vengeance against his foes. And I will deliver it."*

**Prerequisite:** Invoker

CHRIS SEAMAN

During the war against the primordials, Moradin and Kord worked together to forge Guldarak, "the God Hammer." They crafted the hammer out of raw thunder and bound its handle with rings of lightning. Moradin was the first to wield the hammer, taking it into the Great Dismal Delve in the heart of the Elemental Chaos. Moradin used the God Hammer to shatter the stone that protected the primordial Zurtharak, who was called the Vein of Iron for the way he burrowed and twisted through solid stone. With Kord and Bahamut at his side, Moradin then used the hammer to shatter the primordial's body.

Several other gods wielded Guldarak during the war, and the hammer became a symbol of divine vengeance. Each time the primordials scored a victory against the gods, a god lay a hand on Guldarak, swore an oath of vengeance, and then took up the hammer and carried out that oath.

Like Guldarak, you are an instrument of divine vengeance, wielding thunder to smite your god's foes. Thunder wards your allies and dazes your enemies, and can even teleport your allies to your side.

## Hammer of Vengeance Path Features

**Target:** One or two allies in burst
**Effect:** You teleport each target to a space adjacent to you.

**Class Features:** Companion Spirit, *healing spirit, speak with spirits*

Shamans are inspiring and dangerous battle leaders. They command powerful spirit guides, and through them lead their allies. These nature spirits bolster their allies' attacks and offer protection and healing when needed.

In a rite of passage or initiation, you pledged yourself to the spirits, to be their voice and hands in the world. Through ancient song and sacred ceremony, you have called a powerful spirit companion to your side. The primal spirits of nature affirm your will, guide the actions of your allies, and deal mighty attacks against your foes. You might be a venerable advisor to a tribal leader, a young traveler seeking to bring tales of a wider world back to your people, or a scholar devoted to the pursuit of nearly forgotten lore.

The spirits and voices of nature guide your every step. Their power flows through you, calling you to lead, to fight, and to triumph.

WILLIAM O'CONNOR

## Shaman Class Features

Shamans have the following class features.

### Companion Spirit

As part of your initiation as a shaman, you acquired a spirit companion, an animal spirit that accompanies and assists you. Many shaman powers have the spirit keyword (page 220). Your spirit companion must be present when you use such a power.

You gain the *call spirit companion* power, which allows you to call your spirit companion to your side. In addition, choose one of the following Companion Spirit options. Your choice provides you with a Spirit Boon as well as a special attack made through your spirit companion, and your choice determines one of your at-will attack powers. Your choice also provides bonuses to certain shaman powers, as detailed in those powers.

#### Protector Spirit

You draw on the strength of the bear or a similar protective spirit to defend and bolster your allies.

**Spirit Boon:** Any ally adjacent to your spirit companion regains additional hit points equal to your Constitution modifier when he or she uses second wind or when you use a healing power on him or her.

**Spirit's Shield:** You gain the *spirit's shield* power, an attack you make through your spirit companion as an opportunity action.

**At-Will Attack Power:** You gain the *protecting strike* power. You choose a second at-will attack power as normal.

#### Stalker Spirit

You call on the stealth and cunning of the panther or a similar stalking spirit to empower and position your allies.

**Spirit Boon:** Any ally adjacent to your spirit companion gains a bonus to damage rolls against bloodied enemies equal to your Intelligence modifier.

**Spirit's Fangs:** You gain the *spirit's fangs* power, an attack you make through your spirit companion as an opportunity action.

**At-Will Attack Power:** You gain the *stalker's strike* power. You choose a second at-will attack power as normal.

### Custom Spirit Companions

Whichever type of spirit companion you choose, it can have any appearance you like. If your character's culture reveres the basilisk as the embodiment of the stalker spirit, your spirit companion might resemble a basilisk. Or you could decide that your dragonborn shaman's protector spirit looks like a rage drake. A drow shaman's spirit companion might look like a spider or a lizard.

### Healing Spirit

You gain the *healing spirit* power. Through this power, you grant your allies additional resilience with a short evocation of primal power.

### Speak with Spirits

You gain the *speak with spirits* power. You are aware of the constant presence of spirits that float at the edges of reality. You can focus your inner energy and open your mind to these spirits, letting them guide your actions or fill you with insights.

## Implements

Shamans use totems carved to resemble the spirits they most commonly call upon, particularly their spirit companions. When you wield a magic totem, you can add its enhancement bonus to the attack rolls and the damage rolls of shaman powers and shaman paragon path powers that have the implement keyword. Without an implement, you can still use these powers.

## Creating a Shaman

All shamans rely on Wisdom, and they also benefit from a high Constitution or Intelligence. You can choose any shaman powers you like for your character, though many shamans favor one of two different builds, letting their power choices be shaped by the form of their spirit companions.

### Bear Shaman

You excel at protecting your allies and preserving life. Make Wisdom your highest ability score, followed by Constitution so that you can better lend health to

### Shaman Overview

**Characteristics:** You lead your adventuring party from a position of relative safety, sending your spirit companion to the front of the battle while you linger behind. Your powers fall into two broad categories: melee attacks your spirit companion makes, and ranged attacks. Your daily powers include a number of conjurations and zones, representing your ability to call on additional spirits for aid.

**Religion:** Shamans draw their power from the primal power source and therefore don't usually worship gods. They view themselves as agents—not servants or masters—of the spirits of nature and instruct others how to live their lives in harmony with those spirits. Like druids, shamans call on the spirits to witness significant events but don't worship them.

**Races:** Elves, humans, and shifters are the most common shamans, putting their high Wisdom and innate connection to nature to good use in this class. Dwarves make excellent bear shamans, and devas excel as panther shamans.

your allies. You'll want a good Intelligence score to improve your AC as well. Choose powers that help guard your allies against attacks, restore hit points, or provide temporary hit points. Your secondary role is defender.

**Suggested Class Feature:** Protector Spirit
**Suggested Feat:** Shared Healing Spirit
**Suggested Skills:** Endurance, Heal, Nature, Perception
**Suggested At-Will Powers:** *defending strike*, *protecting strike*
**Suggested Encounter Power:** *thunder bear's warding*

### Panther Shaman

You wield the spirits' power to see events before they unfold and to shape them as you like, guiding your allies' actions in battle. Wisdom should be your best ability score, then Intelligence so that you can increase your allies' tactical advantage. A high Constitution will improve your hit points and Fortitude. Choose powers that support your allies in melee, particularly allies who seek combat advantage and who relish quick movement. Your secondary role is striker.

**Suggested Class Feature:** Stalker Spirit
**Suggested Feat:** Stalker Spirit Adept
**Suggested Skills:** Athletics, Heal, Nature, Perception
**Suggested At-Will Powers:** *stalker's strike*, *watcher's strike*
**Suggested Encounter Power:** *twin panthers*

## Shaman Powers

Your powers evoke primal spirits that you view as partners and revered elders. Many of your powers channel primal energy through your spirit companion and have the spirit keyword (page 220), including powers that have "spirit" as part of the range. Those powers treat your spirit companion's space as the origin square for the power, so "melee spirit 1" means you can target a creature adjacent to your spirit.

Other shaman powers call on other spirits to intervene in the course of battle on your behalf, and many of those spirits then channel their energy through your spirit companion either to benefit allies or to harm enemies.

### Class Features

Each shaman has the powers *call spirit companion*, *healing spirit*, and *speak with spirits*. Your choice of Companion Spirit determines whether you have the power *spirit's fangs* or *spirit's shield*.

# Disciple of the World Serpent

*"The whole world rests in the coils of the great serpent. You would be wise to learn its ways."*

**Prerequisite:** Shaman, *call spirit companion* power

The World Serpent, legend says, is among the greatest of the primal spirits that established the natural laws of the world and is one of the staunchest defenders of those laws. When a divine exarch and the servant of a primordial joined forces in an attempt to tamper with the natural order, the World Serpent simultaneously crushed the life from them both. The earth is said to rest in this mighty serpent's coils, the motion of which shakes the ground.

As a disciple of the World Serpent, you are charged with maintaining the balance of the natural order and ensuring that creatures from beyond the mortal realm keep to their place. You wield the World Serpent's power, using it to pierce your foes with its fangs or crush them in its coils. Your spirit companion hinders the movement of your enemies as the World Serpent's coils echo through the space around it. The World Serpent's venom empowers your evocations, poisoning creatures that break free of your power.

# Ghost Panther

*"Do not trouble us again, or you will feed the panther spirits that stalk between the worlds."*

**Prerequisite:** Shaman, *call spirit companion* power

The mystery of the primal stalker is that death is a constant presence in the midst of life; the death of the prey brings life to the predator. And when death comes to the predator, it brings life to scavengers and carrion feeders. Death is part of the great wheel of mortal existence, and an important part of the shaman's communion with the spirit world.

As a shaman, you have always walked close to death. Now you have set out on the path of the ghost panther, where life and death twine together still closer. You stalk the wild, hiding from your prey, leaping and climbing like the most agile of cats. CHRIS SEAMAN

# Great Bear Shaman

*"Foulspawn cannot match the ancient powers of our land."*

**Prerequisite:** Shaman, *call spirit companion* power

Many shaman traditions revere the Great Bear as the perfect example of the protector spirit. As a mother bear furiously guards her cubs against danger, so the Great Bear stands guard over the world, protecting it from those who would destroy or corrupt it, and so too do you, as a Great Bear shaman, protect your adventuring companions. Your spirit companion is your link to the Great Bear, channeling its strength and endurance to you through your evocations.

Your main purpose is to stand alongside other warriors and make them stronger. When you can, protect the weak. When you cannot, strengthen the strong to make them better protectors. As you pursue the path of the Great Bear shaman, your spirit companion channels the power of the Great Bear to harry your enemies, punishing them when they attack your friends. Your companion roars with the ferocious strength of the Great Bear, galvanizing your allies into action. You give your allies additional attacks whenever you spur yourself to greater action, and you empower the attacks they make when enemies drop their guard.

You are the world's protector, and the Great Bear's roar echoes in every word you speak.

MATIAS TAPIA

# Spirit Tempest

*"The spirit wind is always blowing through the world. You need but feel it to draw on its power."*

**Prerequisite:** Shaman, *call spirit companion* power

What is a spirit but an exhalation of the world, a distillation of life lived in the drawing and releasing of breath? The spirits of the world are alive, and that means they are in motion. They are a wind that blows through the world, even in the solid rock of the earth's deepest reaches.

As a spirit tempest, you tap into the movement of the spirit world, the wind that blows through all things. You draw on that movement to bring motion to the field of battle: You call spirit winds to transport yourself and your allies in the blink of an eye, to carry your healing power and the power of your attacks into larger areas, and to empower the attacks of your allies.

The spirits are the breath of the world. Breathe deeply, and let them move and guide you.

# SORCERER

*"I am in the arcane, and the arcane is in me."*

**CLASS TRAITS**

**Role:** Striker. You channel powerful magical energy through your body, exerting control over wild arcane magic to blast foes. You lean toward controller as a secondary role.

**Power Source:** Arcane. Arcane magic is in your blood, as a touch of either ancient draconic power or untamed chaos energy, and you unleash it through sheer force of will and physical discipline.

**Key Abilities:** Charisma, Dexterity, Strength

**Armor Proficiencies:** Cloth
**Weapon Proficiencies:** Simple melee, simple ranged
**Implements:** Daggers, staffs
**Bonus to Defense:** +2 Will

**Hit Points at 1st Level:** 12 + Constitution score
**Hit Points per Level Gained:** 5
**Healing Surges per Day:** 6 + Constitution modifier

*Class Skills:* Arcana (Int), Athletics (Str), Bluff (Cha), Diplomacy (Cha), Dungeoneering (Wis), Endurance (Con), History (Int), Insight (Wis), Intimidate (Cha), Nature (Wis)

**Class Features:** Spell Source

The sorcerer is the arcane antithesis of the wizard. Wielding raw, barely contained magical power, sorcerers channel bursts and blasts of arcane energy through their bodies. They gain their power not through rigorous study of esoteric tomes, but by harnessing magic in their blood, waiting to be tapped and shaped. If wizards wield magic as fighters wield swords, a sorcerer's magic is the arcing greataxe of a raging barbarian.

You might be a proud dragonborn scion of ancient Arkhosia, calling on the draconic power of your heritage, or perhaps you were bathed in dragon blood as an infant to fill you with that power. You might have been born in a place where planar forces converged in strange eddies, infusing you with chaos, or perhaps you survived implantation of a slaad embryo, which left the taint of chaos upon you.

Magic pulses through your veins, calling on you to give it expression. As it grows ever stronger, will it consume you or transform you into magic incarnate?

WILLIAM O'CONNOR

# Sorcerer Class Features

Sorcerers have the following class features.

## Spell Source

As a sorcerer, you gain power through an instinctive or inborn connection to an ancient arcane source. Choose either Dragon Magic or Wild Magic. The choice you make grants you specific features and also provides bonuses to certain sorcerer powers, as detailed in those powers.

### Dragon Magic

The elemental power of dragons flows through you, infusing your spells with draconic strength. Through force of will, you tap into the arcane might of dragons.

**Draconic Power:** You gain a bonus to the damage rolls of arcane powers equal to your Strength modifier. The bonus increases to your Strength modifier + 2 at 11th level and your Strength modifier + 4 at 21st level.

**Draconic Resilience:** While you are not wearing heavy armor, you can use your Strength modifier in place of your Dexterity or Intelligence modifier to determine your AC.

**Dragon Soul:** Choose a damage type: acid, cold, fire, lightning, poison, or thunder. You gain resist 5 to that damage type. The resistance increases to 10 at 11th level and 15 at 21st level.

Your arcane powers ignore any target's resistance to that damage type up to the value of your resistance.

**Scales of the Dragon:** The first time you become bloodied during an encounter, you gain a +2 bonus to AC until the end of the encounter.

### Sorcerer Overview

**Characteristics:** As an arcane striker, you have a resemblance to the warlock. However, more of your powers create bursts or blasts of elemental forces to damage multiple foes, and your magic is the result of powerful arcane forces in your blood rather than the result of pacts you have made with mysterious entities.

**Religion:** If the diverse lot of sorcerers has one quality in common, it's a high opinion of themselves. Many sorcerers dream of becoming gods one day, and the majority find it hard to supplicate any being more powerful than themselves. That said, dragon sorcerers often nod to Bahamut or Tiamat, and some chaos sorcerers acknowledge Avandra, Corellon, and Sehanine for their inclinations toward wild magic.

**Races:** Dragonborn are the iconic dragon sorcerers, giving arcane expression to the draconic blood that flows in their veins. Half-elves are also often dragon sorcerers. Halflings and drow make excellent chaos sorcerers. Gnomes and tieflings are often sorcerers as well.

### Wild Magic

You draw your spells from the entropic forces of the Elemental Chaos. Whether tapping into the power of primordial beings or drawing strength directly from that plane, you unleash magic in wild surges.

**Chaos Burst:** Your first attack roll during each of your turns determines a benefit you gain in that round. If you roll an even number, you gain a +1 bonus to AC until the start of your next turn. If you roll an odd number, you make a saving throw.

**Chaos Power:** You gain a bonus to the damage rolls of arcane powers equal to your Dexterity modifier. The bonus increases to your Dexterity modifier + 2 at 11th level and your Dexterity modifier + 4 at 21st level.

**Unfettered Power:** When you roll a natural 20 on an attack roll for an arcane power, you slide the target 1 square and knock it prone after applying the attack's other effects.

When you roll a natural 1 on an attack roll for an arcane power, you must push each creature within 5 squares of you 1 square.

**Wild Soul:** When you finish an extended rest, roll a d10 to determine a damage type.

| d10 | Damage Type |
|---|---|
| 1 | Acid |
| 2 | Cold |
| 3 | Fire |
| 4 | Force |
| 5 | Lightning |
| 6 | Necrotic |
| 7 | Poison |
| 8 | Psychic |
| 9 | Radiant |
| 10 | Thunder |

You gain resist 5 to that damage type until the end of your next extended rest. The resistance increases to 10 at 11th level and 15 at 21st level.

While you have resistance to that damage type, your arcane powers ignore any target's resistance to that damage type up to the value of your resistance.

# Implements

Sorcerers wield daggers and staffs to channel their wild arcane power. When you wield a magic dagger or a magic staff, you can add its enhancement bonus to the attack rolls and the damage rolls of sorcerer powers and sorcerer paragon path powers that have the implement keyword. Without an implement, you can still use these powers.

Any dagger can function as a sorcerer implement. However, you don't gain a dagger's proficiency bonus when using the dagger as an implement.

# Creating a Sorcerer

Charisma, Dexterity, and Strength are the most important ability scores for a sorcerer. You can choose any powers you like, but many sorcerers choose feats, skills, and powers to complement their Spell Source choice.

## Chaos Sorcerer

Like the arcane power you wield, you can be reckless and hard to control. Charisma should be your highest ability score, followed by Dexterity. Select powers that use your high Dexterity to move your enemies, deal extra damage, or impose penalties on your foes.

**Suggested Class Feature:** Wild Magic
**Suggested Feat:** Arcane Spellfury
**Suggested Skills:** Arcana, Bluff, Endurance, Insight
**Suggested At-Will Powers:** *chaos bolt*, *storm walk*
**Suggested Encounter Power:** *bedeviling burst*
**Suggested Daily Power:** *dazzling ray*

## Dragon Sorcerer

You command the ancient arcane power that flows through dragons. Make Charisma your highest ability score, followed by Strength. Select powers that use your high Strength to deal extra damage, grant yourself a bonus, or hinder your enemies.

**Suggested Class Feature:** Dragon Magic
**Suggested Feat:** Implement Expertise
**Suggested Skills:** Arcana, Athletics, History, Intimidate
**Suggested At-Will Powers:** *burning spray*, *dragonfrost*
**Suggested Encounter Power:** *tempest breath*
**Suggested Daily Power:** *lightning breath*

# Sorcerer Powers

Like other arcane classes' powers, your powers are called spells. A sorcerer's arsenal is an eclectic mixture of deadly spells drawn from enigmatic or reckless traditions of magic. More studious arcane practitioners sometimes regard sorcerers as novices who play with dangerous power beyond their control, but the proof of their worth is in the havoc they wreak on their foes.

# Arcane Wellspring

*"I don't care why it works. I just know it does."*

**Prerequisite:** Sorcerer

Arcane power flows in all sorcerers, an innate part of them. For you, however, that power is like a geyser building up beneath the earth before it finally erupts with devastating and glorious force. Your connection to that power has always been easy, almost instinctual. It's so much a part of you that it slowly transforms you, making you into a being as much of the forces you channel as of flesh and soul.

As you walk the path of the arcane wellspring, you master a second damage type. You learn spells that channel both damage types or that surround you with swirling arcane energy. Ultimately, you gain the ability to transform yourself into arcane energy for a brief time.

## Arcane Wellspring Path Features

**Double Resistance (11th level):** If you have Dragon Magic, choose a second damage type for your Dragon Soul class feature. If you have Wild Magic, roll twice on the Wild Soul table after each extended rest. (If you get the same result a second time, roll again.) Whichever of these two Spell Source options you have, you gain resistance to both damage types, and your arcane powers ignore any target's resistance to both types up to the value of your resistance.

**Split Spell Action (11th level):** You can spend an action point to target an additional creature when you use an arcane power that normally targets only one, instead of taking an extra action.

**Antagonistic Transposition (16th level):** When you use an arcane power that is an area or a close attack, you can teleport two creatures hit by the attack, swapping their positions before resolving the attack.

## Arcane Wellspring Spells

**Twin Bolt** — Arcane Wellspring Attack 11

*Summoning internal reserves, you hurl a bolt of magic that reflects the two forces that infuse you.*

**Encounter ✦ Arcane, Implement; Varies**
**Standard Action** **Ranged** 10
**Target:** One creature
**Attack:** Charisma vs. Reflex
**Hit:** 3d10 + Charisma modifier damage. The damage is the two types you resist with your Dragon Soul or Wild Soul class feature and with your Double Resistance path feature.
**Special:** You can choose to lose both of the resistances provided by your Dragon Soul or Wild Soul class feature and by your Double Resistance path feature for the rest of the encounter. If you do so, you can make two attacks with this power, each against a different target. Each target the attack hits takes 3d12 + your Charisma modifier damage, instead of 3d10 + your Charisma modifier.

**Sorcerous Wings** — Arcane Wellspring Utility 12

*Arcane power surrounds you and spreads out behind you to form wings.*

**Encounter ✦ Arcane; Varies**
**Minor Action** **Personal**
**Effect:** Until the end of your next turn, you gain a fly speed of 6, and you can hover, and whenever an enemy makes an opportunity attack against you, that enemy takes 2d10 + your Charisma modifier damage. **Sorcerous Metamorphosis** — Arcane Wellspring Attack 20

*Your body becomes the energy that courses through you.*

**Daily ✦ Arcane, Implement; Varies**
**Standard Action** **Personal**
**Effect:** Until the end of your next turn, you become insubstantial, and you gain phasing. In addition, when any creature makes a melee attack against you or when you first enter a creature's space on your turn, the creature takes 3d6 + your Charisma modifier damage. The damage is the two types you resist with your Dragon Soul or Wild Soul class feature and with your Double Resistance path feature.

FRANZ VOHWINKEL

# Demonskin Adept

*"You see for yourself what becomes of my enemies."*

**Prerequisite:** Sorcerer

Arcane magic is a form of power wielded for purposes both benevolent and malevolent. There is nothing inherently good or evil about it. Its moral value depends on the purpose to which it is put. At least, that is usually the case.

As a demonskin adept, you wield arcane power ripped from the depths of the Abyss, the home of demons. You incorporate the ritually treated skins of demons into your clothes and armor, and you use those skins to open conduits through which your spells are warped by the Abyss's unutterable evil. Perhaps you believe that good ends justify evil means, but how long can you maintain your desire for good when you allow such evil to touch your soul?

The power you wield is stolen, and the lords of the Abyss do not take kindly to being robbed. Although this path brings great power, it is power that comes at a sometimes terrible price. Count yourself lucky if the worst price you pay is your life.

## Demonskin Adept Path Features

**Demon Fury (11th level):** When you spend an action point to take an extra action, you and your allies gain a +3 bonus to attack rolls until the start of your next turn, and your enemies gain a +3 bonus to their attack rolls against you until the start of your next turn.

MIKE MAY

**Variable Resistance (11th level):** Once per encounter as a minor action, you can change the damage type that you resist through your Dragon Soul or Wild Soul class feature. Choose the new damage type from those available in the class feature.

**Glimpse of the Abyss (16th level):** When you score a critical hit, you and the target are blinded until the start of your next turn.

**Demonic Wrath** Demonskin Adept Utility 12

*Like a howling demon, you channel your pain into greater power for your spells.*

**Requirement:** You must be bloodied.
**Effect:** Until the end of the encounter, while you're bloodied, your arcane attacks deal 1d6 extra damage on a hit.

**Swords of the Marilith** Demonskin Adept Attack 20

*With a gesture, you fill the air about you with a marilith's slashing swords.*

**Daily ✦ Arcane, Implement, Zone**
**Standard Action** **Close** burst 3
**Target:** Each enemy in burst
**Attack:** Charisma vs. Reflex
**Hit:** 3d6 + Charisma modifier damage
**Effect:** The burst creates a zone of whirling blades that lasts until the end of your next turn. When the zone appears, choose its effect:
- ✦ Any enemy takes 3d6 + your Charisma modifier damage if it starts its turn within the zone.
- ✦ Any enemy takes 1d6 + your Charisma modifier damage if it starts its turn within the zone. While within the zone, you and your allies gain a +4 power bonus to AC.

**Sustain Minor:** The zone persists, and you can change its effect.

# Dragonsoul Heir

*"That's no dragon—it's a slug, content to sleep on a pile of coins. See my power, the same power wielded by the dragon lords of ancient Arkhosia: I, my friend, am truly a dragon."*

**Prerequisite:** Sorcerer, Dragon Magic class feature

In the early years of the world, the mightiest sorcerers were dragons, powerful spellcasters who used the elemental magic churning in their blood to create devastating spells that cemented their hold over vast empires. Even as recently as the dragonborn empire of Arkhosia, dragons were the exemplars of the draconic sorcerer's path. In the present age, however, few dragons practice the art that their ancestors created.

Your path follows in the ancient footsteps of the greatest sorcerers the world has ever known, drawing on the traditions preserved from Arkhosia's dragon lords and the sorcerers before them, back almost to the beginning of the world. Wielding the same power as the dragons of old, you inure yourself to the dangers of battle, making your mere presence a threat to your foes as you wreathe yourself in flames or lightning, acid or poison, cold or thunder, according to the nature of the draconic magic in your blood.

The dragons of old are alive in your soul, and their power is yours to command.

## Dragonsoul Heir Path Features

**Draconic Durability (11th level):** Your number of healing surges per day increases by two.

**Draconic Resilience Action (11th level):** When you spend an action point to take an extra action, you also gain a number of temporary hit points equal to one-half your level.

**Dragon Soul Resistance (16th level):** The resistance provided by your Dragon Soul class feature increases by 10.

HOWARD LYON

# Wild Mage

*"If you can control your power, you don't have enough."*

**Prerequisite:** Sorcerer, Wild Magic class feature

The entropy of the Elemental Chaos flows in your veins. Your spells open arcane conduits to that plane and draw energy through—whatever energy is convenient, impelled and empowered by the force of chaos itself. Your spells might be unpredictable, but their randomness gives them power.

## Wild Mage Path Features

**Chaos Action (11th level):** When you spend an action point to take an extra action, you can roll a d6 to also gain one of the benefits below.

| d6 | Chaos Action Effect |
|---|---|

| 6 | You and each ally within 5 squares of you each make a saving throw. |

**Wild Surge (11th level):** When you roll a natural 1 on an attack roll for an arcane power, you can take the miss result and your Unfettered Power class feature, or you can roll a d6 to substitute one of the results below.

| d6 | Wild Surge Effect |
|---|---|
| 1 | The attack misses, and you and the target teleport, swapping positions after you resolve the rest of the attack. |
| 2 | The attack misses, and you drop prone and slide 3 squares away from the target. |
| 3 | The attack misses, and both you and the target are dazed (save ends). |
| 4 | Reroll the attack roll. If you roll a natural 1 again, you take 2d10 + your Charisma modifier damage, and you can't use Wild Surge again during this encounter. |
| 5 | The attack hits instead of misses, and you are stunned until the end of your next turn. |
| 6 | The attack hits instead of misses. |

**Critical Surge (16th level):** When you score a critical hit, it deals 1d10 extra damage.

# WARDEN

*"Get past me? You might as well try to push the mountains aside."*

**Power Source:** Primal. You are a primal champion, a guardian of the natural world and custodian of all living things.

**Key Abilities:** Strength, Constitution, Wisdom

**Armor Proficiencies:** Cloth, leather, hide; light shield, heavy shield

**Weapon Proficiencies:** Simple melee, military melee, simple ranged

*Class Skills:* Athletics (Str), Dungeoneering (Wis), Endurance (Con), Heal (Wis), Intimidate (Cha), Nature (Wis), Perception (Wis)

**Class Features:** Font of Life, Guardian Might, Nature's Wrath

As mountains stand fast against the buffeting wind and trees bend but do not break in the storm, wardens are stalwart protectors who draw on the primal spirits of nature to defend the natural world from those who would corrupt or destroy it. Some wardens use the power of earth and stone to shield their allies from harm, whereas others summon the primal strength within themselves to increase their ferocity and tenacity.

As a warden, you might be the staunch defender of a tribe, chosen by the spirits to be your people's champion. Perhaps you were visited by spirits at a sacred grove and charged with protecting it against a spreading corruption. You might have been raised by a bear or nurtured by dryads, chosen from infancy to stand fast against nature's enemies.

Primal power waits in the ground beneath your feet, surges with every beat of your heart, and flows through your lungs with every breath. The world cries out to you, calling for a champion to defend it. Will you heed its call?

WILLIAM O'CONNOR

# Warden Class Features

Wardens have the following class features.

## Font of Life

At the start of your turn, you can make a saving throw against one effect that a save can end. On a save, the effect immediately ends, preventing it from affecting you on your current turn. If you save against being stunned or dazed, you can act normally on your turn. If you save against ongoing damage, you avoid taking the damage.

If you fail the saving throw, you still make a saving throw against the effect at the end of your turn.

## Guardian Might

Wardens connect with the natural world in a variety of ways to augment their fighting abilities. Choose one of the following options.

**Earthstrength:** While you are not wearing heavy armor, you can use your Constitution modifier in place of your Dexterity or Intelligence modifier to determine your AC.

In addition, when you use your second wind, you gain an additional bonus to AC equal to your Constitution modifier. The bonus lasts until the end of your next turn.

**Wildblood:** While you are not wearing heavy armor, you can use your Wisdom modifier in place of your Dexterity or Intelligence modifier to determine your AC.

In addition, when you use your second wind, each enemy marked by you takes an additional penalty to attack rolls for attacks that don't include you as a target. The penalty equals your Wisdom modifier and lasts until the end of your next turn.

## Nature's Wrath

Once during each of your turns, you can mark each adjacent enemy as a free action. This mark lasts until the end of your next turn.

### Guardian Form Powers

Many of your daily powers are polymorph powers, which change your body into a guardian form, allowing you to take on the qualities of a beast spirit or a tree spirit. You remain in this form until the end of the encounter or until you choose to assume a new form. While you are in this form, you retain the ability to use your equipment and other powers.

In addition to a physical transformation, each guardian form power also grants you an attack you can make as a separate action (the action type is specified in the power description). You can use this attack once during the same encounter in which you use the guardian form power and only while you remain in that guardian form.

In addition, you gain the *warden's fury* and *warden's grasp* powers. You can use these powers against enemies to prevent them from harming those you protect.

# Creating a Warden

You can choose any warden powers you like for your character, though many wardens focus on powers that complement their choice of Guardian Might. All wardens rely on Strength. Wardens also benefit from a high Constitution or Wisdom, depending on which expression of warden they favor.

## Earth Warden

You draw primal power through a link with the land, and the power of the earth strengthens and sustains you. Make Strength your highest ability score, followed by Constitution, which increases your AC as well as your hit points if you choose the Earthstrength version of Guardian Might. Select powers that channel primal energy through the land around you, hindering your foes' movement or knocking them prone. You lean toward controller as a secondary role.

**Suggested Class Feature:** Earthstrength
**Suggested Feat:** Crushing Earthstrength
**Suggested Skills:** Athletics, Heal, Nature, Perception
**Suggested At-Will Powers:** *earth shield strike, strength of stone*
**Suggested Encounter Power:** *thunder ram assault*
**Suggested Daily Power:** *form of the willow sentinel*

### Warden Overview

**Characteristics:** Boasting more hit points than most other characters of your level, you sometimes stand up to your foes by staunchly taking whatever punishment they throw at you. Thanks to the primal power coursing through you, you can throw it right back at them, manipulating the earth around you or altering your own form to hinder and punish your foes.

**Religion:** Like other primal classes, wardens generally disdain worship of the gods, which they view as interlopers in the natural world. Instead, they live in harmony with the spirits of beasts, trees, and stone that infuse the world. Some wardens, though, acknowledge some gods as peaceful partners of the primal spirits and look kindly upon such deities as Melora, Corellon, Kord, Moradin, and Pelor.

**Races:** Goliaths make ideal earth wardens, combining natural strength and endurance with a love of earth and stone. Longtooth shifters embody the ideals of the wild warden, channeling the beast within as a manifestation of the primal spirits. Humans, dwarves, dragonborn, and half-orcs are also commonly wardens.

### Wild Warden

Your blood is a medium of primal power; nature's vigor pulses in your veins. Strength should be your highest ability score, followed by Wisdom, which increases your Armor Class if you choose the Wildblood version of Guardian Might. Select powers that awaken the primal power within you, turning you into a vicious predator. You lean toward striker as a secondary role.

**Suggested Class Feature:** Wildblood

# Bloodwrath Guardian

*"We are all animals. Only our arrogance separates us from our more wild kin."*

**Prerequisite:** Warden

The primal power you wield has formed a bond between you and the natural creatures of the world. In their myriad forms, you see fractured reflections of a greater being: the Primal Beast, who was the world's first predator. All the hunting animals of the world—mighty lions and howling wolves, lowly ferrets and soaring eagles—hold a distant echo of the Primal Beast in their hearts.

In your commitment to protect the world from demons, aberrations, and other beings that would corrupt the balance of nature, you find yourself growing closer to the Primal Beast's perfection. That growth is reflected in your bloodwrath—the heightened speed you gain when you adopt a guardian form, and the fury that punishes the enemies you mark. At the pinnacle of your path, you at last gain the ability to take on the form of the Primal Beast.

# Horned Champion

*"Don't speak to me of your petty concerns—speak to me of the world's needs."*

**Prerequisite:** Warden

You have communed with the spirits of the land and have been found worthy of the horned champion's mantle. You transcend the flesh you were born with to become the chosen vessel of nature's spirits. Your duty is to take up arms against the fell creatures of the land, to put an end to their destruction, and to restore the splendor of the untamed wilds.

Becoming a horned champion is a transformative experience. Gone are the simple concerns that bound you to the world. You see the world on a grander scale, as an organism that must be protected against the abominations that would siphon its strength for dark purposes. You appear to have no ties to people or places, only to your weighty mission, leading many to feel as though you lack understanding of the individual's plight. Although it's true that you care little for the individual's suffering, giving no more attention to a mortal's difficulties than one would show to an insect, your concern encompasses the natural world and all things living in it. Thus, in a way, your ties to others are deeper than friendship, for they are forged from the bonds that connect all living things.

# Storm Sentinel

*"Feel the wrath of the storm unleashed, for I am nature's champion and none shall stand against me."*

**Prerequisite:** Warden

To many, there is no clearer expression of the power of nature than the raging fury of the storm. Churning clouds, crashing thunder, and blasting lightning are manifestations of the rage coursing through the world when its natural laws are violated and its purity corrupted. When gods or primordials overstep their bounds, when demons or aberrant beings try to tear the fabric of reality, the fury of a storm—and its cleansing rain—are part of nature's response.

Most wardens draw power from the earth. As an incarnation of the storm's wrath, your greatest primal power comes from the sky. Lightning flows in your veins, and thunder booms in your footsteps. As you advance along this path, you can transform yourself into wind and rain and can ultimately take on the aspect of storm's wrath.

# Verdant Lord

*"I am one with the forest, and the forest is one with me."*

**Prerequisite:** Warden

Like the trees of the forest, you draw strength from the loamy earth, from the water that spills from the sky and flows across the land, and from the radiance of the sun. When you use your primal powers, shoots of new growth emerge from the ground, flowers bloom, and trees straighten with renewed vigor.

You favor guardian form powers that let you take on treelike forms (such as *form of the willow sentinel*, *form of the oak sentinel*, and *form of the rowan sentinel*), but even when you take on other aspects, the earth responds with growth. As the culmination of this path, you can take on a form like that of a treant, smashing foes and objects alike with a weapon held in your branchlike fists.

## Fatesinger

*The Song of Heroes resonates in your soul. Until you can join the chorus, you share the wonder of its music with the world.*

**Prerequisite:** 21st-level bard

In the darkest days of the divine war against the primordials, when those agents of oblivion seemed fated to tear down the divine works and unravel creation itself, the gods' heralds joined voices and spurred mortal champions to fight back. Their song made heroes of common folk, giving them the resolve to stand fast against the tide of enemies around them. These early heralds live on still in the legends and tales of their descendants, and without their emboldening song, the world might have come to an end.

VINCENT DUTRAIT

You have studied the Song of Heroes, and you know that all great champions still hear its melody. They might not be aware of it, but at some point they, like you, caught a faint note of it. The distant strains of this ancient song—hidden in an uplifting tune, perhaps, or half-remembered in a stirring call to action—provide the inspiration that mortals need to rise above the mundane and become legends.

### Immortality

You have heard the haunting melody of that ancient song. In that moment, when the words of creation echoed in the harmony of the cosmos, your life's purpose and final fate became clear. Now, your course changed, you devote your time to teasing out the fragments of this ancient song and binding them into a single work, restoring the Song of Heroes to the world to stir new champions to fight against the enemies of creation and safeguard the world for the future.

**The Eternal Chorus:** When you complete your Destiny Quest, you unlock the fullness of the glorious work, each elusive note captured in the proper order, the music clear. For the first time, you can perform the Song of Heroes in its entirety. The song's purity dissolves your form until you join the singers of yore in body and voice, blending your resonant tones with the rest of the chorus to carry the song forward into eternity.

### Fatesinger Features

**Destiny Fulfilled (21st level):** You can spend an action point to allow an ally within 20 squares of you to make an attack as a free action, instead of taking an extra action yourself. If the ally's attack hits, you regain the action point.

**Fate's Clarity (24th level):** Whenever you use your *majestic word* power, the target can roll twice on all attack rolls, saving throws, skill checks, and ability checks and use the result he or she prefers until the start of your next turn.

**Heroic Inspiration (30th level):** Whenever an ally within 5 squares of you spends an action point to make an attack, you and all allies can spend a healing surge as a free action.

### Fatesinger Power

**Fragment of the Song** Fatesinger Utility 26

*You sing a verse of the Song of Heroes, honoring champions past, present, and yet to come. Surrounded by its melodies, you and your allies are spurred to incredible heroism.*

**Daily ✦ Arcane, Zone**
**Minor Action** **Close** burst 5

**Effect:** The burst creates a zone of emboldening music that lasts until the end of your next turn. While within the zone, you and each ally can spend an action point to take two extra actions, instead of one. As a move action, you can move the zone 3 squares.

**Sustain Minor:** The zone persists.

# Glorious Spirit

*Glorious deeds live forever. You have been marked for immortality as a warrior spirit to guide future generations.*

**Prerequisite:** 21st level, any primal class

Among the host of primal spirits that guard the world and maintain its natural order, the revered spirits of great mortal heroes stand as proud beacons guiding their living descendants to follow their paths. It is your destiny to stand with them, proving your worth by earning glory in battle. While you still live, you are not yet a Glorious Spirit, but your immortal kindred exult in your triumphs and strengthen you with some portion of their own power, awaiting the appointed day when you fight your last mortal battle and join them in the spirit world.

Battle against any worthy adversary fills your heart with joy and wins the acclaim of your unseen comrades. You harbor a special enmity for foes who would cheat death or inflict inglorious deaths on others. These foes above all you seek to send ahead of you into the dark.

## Immortality

The great ancestral spirits you revere are those who take joy in mortal examples of valor and great endurance. Through your love of battle, you have won the approval of these spirits, and in return they offer you the chance to aid your descendants and those of like mind when your days are done.

**Eternal Glory:** You distinguish yourself during your final battle, fighting with unmatched valor. Whether you stand or fall, you finally behold the great company of Glorious Spirits, gathered to welcome you into their shining ranks. In a flight of wild joy, they lead you into the spirit world, where a great feast has been prepared in your honor. Leaving your mortal life behind, you become a true Glorious Spirit, an unseen presence on the battlefields of the world who fills living warriors with the courage and might needed to overcome their enemies.

## Glorious Spirit Features

**Worthy Foe (21st level):** Once per encounter as a minor action, you can designate the enemy nearest to you as a worthy foe until the end of the encounter. Until the start of your next turn, your attacks against the worthy foe ignore any resistance and the insubstantial quality.

In addition, once per round, you can deal 2d8 extra damage to the worthy foe on a hit. If you can make multiple attacks against the worthy foe during your turn, you decide which attack to apply the extra damage to after all the attacks are rolled.

Finally, if you reduce the worthy foe to 0 hit points, you can spend a healing surge as a free action.

**Seeker of Foes (24th level):** Once per encounter as a move action, you can teleport to a space adjacent to any creature that you can see.

**Bearer of Doom (30th level):** If your worthy foe is the only target of your attack and that attack misses, you retain the use of that attack power. Any effect that normally occurs when you miss with the power still applies.

## Glorious Spirit Power

**Spirit Steed** — Glorious Spirit Utility 26

*Appearing from nowhere, a winged spirit steed carries you beside your foe.*

**At-Will**
**Immediate Reaction** **Personal**
**Trigger:** The enemy designated by your Worthy Foe feature ends its movement within 6 squares of you
**Effect:** You fly and land in a space adjacent to the triggering enemy. This movement doesn't provoke opportunity attacks.

EVA WIDERMANN

# Harbinger of Doom

*Ill fortune follows in your wake.*

**Prerequisite:** 21st level

You are an omen of storms, a herald of destruction, a spreader of calamity—wherever you go, destinies are unraveled and woven anew. You have broken free of the bonds of fate, and for you, nothing is written. Every step along your path, every decision you make, forces the future to shape itself accordingly. The ripples spreading from your choices can topple kings, wake ancient terrors, ruin kingdoms, and thwart the designs of the gods themselves.

The most dire consequences of your choices befall those people, realms, or causes to which you choose to give battle. Misfortunes, accidents, and natural disasters gather around your enemies when you are near—minor flukes at first, such as a hailstorm that ruins a crop, a messenger delayed by a few important hours when his horse throws a shoe, or a servant who forgets to secure a gate. You can't control these happenings, or even guess how they might take shape. In fact, ill chance often falls upon those you do not wish to harm, although not in the same measure as your enemies suffer. You dare not linger in places you love, lest you inadvertently destroy the things you hold dear.

## Immortality

No one can know for sure what doom your existence portends. You might battle a dark overlord as a valiant champion of good. Your failure might cause the destruction of the kingdom you fought to defend, and your success might lead to the rise of an inflexible tyranny every bit as dangerous as the dark overlord you overthrew. Only at the end of your mortal life does your true purpose become clear.

**Doom Fulfilled:** You are drawn irresistibly to fulfill some ultimate doom—usually the catastrophic destruction of a great creature, a mighty realm, or a legendary artifact. When you triumph, fate repairs itself around you, and a new skein of destiny takes shape. In such a weaving, you no longer have a place, and you are hurled out of existence. Nothing remains of you, but you are remembered in the world's myths and legends as an agent of change and destruction. In some future time and place, you awaken with the dreadful knowledge that once again you must serve as doom's harbinger.

## Harbinger of Doom Features

**Shield of Ill Fortune (21st level):** Whenever you roll a natural 1 on an attack roll, you can reroll it. If you roll a second natural 1, you can't reroll it. In addition, when any enemy rolls a natural 1 on an attack roll against you, that enemy is stunned until the end of your next turn, and you can slide the enemy 3 squares as an immediate reaction.

**Master of Ill Fortune (24th level):** Once per encounter, when a creature within 10 squares of you drops to 0 hit points or fewer, you can make a saving throw or spend a healing surge.

**Doom's Reward (30th level):** Whenever you make an attack and miss every target, you gain temporary hit points equal to one-half your level.

## Harbinger of Doom Power

**Cloak of Doom** Harbinger of Doom Utility 26

*A storm of disaster surrounds you, bringing doom to your foes.*

**Daily**
**Minor Action** **Personal**

**Effect:** Until the end of the encounter, any enemy within 3 squares of you grants combat advantage to your allies, cannot teleport, and takes 5 damage whenever it misses with an attack.

MIKE MAY

# Lorekeeper

*All knowledge must be preserved. It must be saved and protected, for knowledge holds the key to who we are, what we were, and what we shall become.*

**Prerequisite:** 21st level, Intelligence 21 or Wisdom 21, training in two knowledge skills

You are a font of knowledge, a peerless scholar, and a custodian of legends, myths, and, above all, truth. Though you content yourself with study and reflection, people come to you from all over the world, and beyond it, for an audience. They seek to apply your keen intellect and wisdom to any number of problems: locating a long-lost artifact, solving an impossible riddle, or devising a strategy to overcome a horde of raging berserkers. Others seek you out just to talk, learn, and expand their own understanding.

With such knowledge comes grave responsibility, for some truths are best kept secret. If you glibly reveal the location of a powerful weapon lost since the fall of an ancient civilization, you might very well doom the world to witnessing firsthand that weapon's power. If you withhold the cure to a plague, the deaths of its victims rest upon your shoulders. Ultimately, you must decide whether you hoard your knowledge or dispense it freely, and whether you have the wisdom to know what to reveal and what to hide.

## Immortality

Lorekeepers are among the most learned people in the world, and they rely on their vast knowledge to battle those who embrace ignorance and reject civilization.

**Grand Library:** The ultimate expression of your temporal power is the construction of a grand library to hold your collection. By the time you complete your Destiny Quest, you have acquired more books, manuscripts, and other texts than you can catalog. The only way to prevent certain suspect writings from falling into the wrong hands is to construct a place to protect them. Whether you build your edifice in the mortal world, adrift in the Astral Sea, or hidden within the City of Brass, Sigil, or Gloomwrought, this grand library ensures your immortality. The library reminds all who behold its wonders of your single-minded commitment to preserving lore and your great deeds in pursuit of knowledge.

## Lorekeeper Features

**Lorekeeper's Wisdom (21st level):** Whenever you make a knowledge check or a monster knowledge check, you can roll twice and use either result.

In addition, your attacks deal 2 extra damage on a hit against creatures whose origins are within the purview of your trained skills. For example, if you are trained in Arcana, your attacks deal 2 extra damage on a hit against elemental, fey, and shadow creatures.

WAYNE ENGLAND

**Lorekeeper's Cunning (24th level):** When you are making a skill check for any ritual, you can roll twice and use either result.

You can double the time it takes to perform a ritual to reduce the component cost of that ritual by half.

In addition, whenever you score a critical hit against a creature whose origin is within the purview of one of your trained skills, you gain a +2 bonus to attack rolls against that creature until the end of your next turn.

**Lorekeeper's Revelation (30th level):** Choose two of your daily utility powers. Those two powers are now encounter powers for you. If you do not have two daily utility powers, you can immediately retrain your utility powers until you have two daily utility powers that then become encounter powers.

## Lorekeeper Power

**True Name** Lorekeeper Utility 26

*You speak your foe's true name, revealing its weaknesses to your allies.*

**Encounter**
**Standard Action** **Close** burst 10
**Target:** One creature in burst
**Effect:** Until the end of your next turn, you and your allies gain a bonus to damage rolls against the target equal to your Intelligence or Wisdom modifier.

# Primal Avatar

*You are the living embodiment of nature's power, a mighty primal spirit veiled in living flesh.*

**Prerequisite:** 21st level, any primal class

You are one with the world around you. You hear the whispers of the trees as they speak of their ancient dreams, you taste the change of seasons carried on the four winds, and you understand the thoughts of beasts nearby. The world of spirit that exists alongside the physical world is as real to you as your own body; you perceive and move in both realms at the same time. Like the wisest and most powerful barbarians, druids, shamans, and wardens who have gone before you, you have no fear of death, for when you die, you will reside in the spirit world that you already know.

Many primal spirits are benign. Some are heedless of mortal concerns, and others are actively malevolent. Your power and attunement to their world draws these spirits' attention, for they perceive you even as you perceive them. Hostile spirits see you as a threat and seek to hamper your progress. But you have allies in the spirit realm too, friendly powers who nurture you, lending a measure of their own strength to support your cause. As your power grows, so too does your connection to the spirits of nature, until its sustaining power accompanies you wherever you go.

Your presence in the world has such resonance that a great primal spirit might seek you out to recruit you for a greater purpose. Whether you choose to bind yourself to the entity or not has no effect on your abilities, but service might result in physical manifestations that evoke qualities held by your patron. For example, if you ally yourself with a spirit of the woodlands, your hair might take on a leafy appearance that changes with the passing of the seasons; if you choose to serve a spirit of the hunt, you might acquire a bestial appearance and a shaggy mane; and if you serve an animal spirit of wisdom and guidance, you might grow a stag's antlers or develop hooves for feet.

## Immortality

When your body's life comes to its end, you will continue to exist as one of the spirits of nature.

**Mighty Among the Spirits:** As you near the completion of your Destiny Quest, you feel the tug of something greater, some deeper force drawing you on and goading you to bring your mission to its conclusion quickly. Not long after finishing your final task, you walk from the world into the spirit realm, leaving your mortality behind. Freed from the bonds of your body, you join the host of spirits that protect the natural order and guide new champions to follow the trail you blazed.

## Primal Avatar Features

**Primal Travel (21st level):** When any enemy hits you with a melee attack, you can teleport 3 squares as an immediate reaction.

**Spirit Boon (24th level):** After each extended rest, choose one ability score. Until the end of your next extended rest, you gain a +1 bonus to attack rolls, skill checks, and ability checks related to that ability.

**Eternal Return (30th level):** Once per day, when you die and have at least two healing surges remaining, you can will yourself back to life. At the start of one of your turns within 10 rounds of your death, you can spend two healing surges to return to life. You return with hit points equal to your bloodied value and free of any effects that a save can end. You then take your turn normally.

## Primal Avatar Power

**Walk with the Spirits** Primal Avatar Utility 26

*Your spirit slips free from your body, revealing your true nature.*

**Daily ✦ Primal**
**Minor Action** **Personal**

**Effect:** Your body disappears, and you appear in spirit form in an adjacent space. While you are in this form, you are insubstantial and gain phasing. You also gain a fly speed equal to your speed, and you can hover. You can use at-will powers and encounter powers, but you cannot use daily powers, magic item powers, or rituals. You can remain in this form until you end it as a standard action, until you drop to 0 hit points or fewer, or until you take a short rest or an extended rest. When you leave this form, your body reappears, rejoined by your spirit, in your current space.

ERIC BELISLE

# Revered One

*You peer beyond the mortal veil to apprehend a deeper, fundamental truth.*

**Prerequisite:** 21st level, any divine class

As the result of long reflection, unflinching morals, and a lifetime of pious service to the gods, you have developed a powerful new philosophy of the mortal place in the cosmos. You have glimpsed the truth of the infinite, the timeless expanse to which mortal souls eventually go, and your insights have the power to change the world. Your teachings are destined to bring hope and enlightenment to people for centuries to come, for glimpses of truth lie within the words you have set down and within the story of your deeds.

Your philosophy might seem, at first glance, to trivialize the gods and their dominions, but you recognize that the gods are necessary intermediaries between mortals and the infinite. You therefore honor all deities as examples for mortals to learn from. Your sermons, your writings, or the stories of your life have the power to help followers of many different gods to understand the lessons of the mortal world.

The exact nature of your revelations is up to you. You might be a visionary who perceives the eventual fate of mortal souls and teaches others how their actions in this world influence their ultimate destinies. You might be a reformer whose teachings challenge inflexible, age-old doctrines of great temples. You might be a philosopher who maintains a creed of stoicism, a fiery condemnation of evil, or an ethical system of obligation to others. Or perhaps you instruct your initiates in darker truths that incite greed, hedonism, or tyranny—not all who follow this path find philosophies of peace and enlightenment, after all.

## Immortality

The Revered One walks a perilous road, for not all powerful entities wish for enlightenment and understanding to dawn on the mortal world.

**Truth Revealed:** You have traveled to the farthest corners of the universe, stood fast against heavenly legions, battled armies of devils, and thwarted demonic hordes. You have traveled the Astral Sea's dominions and explored the Elemental Chaos in your search for understanding. At last you are within reach of the wellspring of all existence. Upon completing your Destiny Quest, you receive a vision, a golden path stretching into infinity. Unshakable in the power of your convictions, you take the first step on this final journey, slipping beyond this reality and vanishing from view. The road ahead is long and strange, but your journey is only beginning. For ages to come, mortals will follow in your footsteps, guided by your teachings and inspired by your example.

MIKE MAY

## Revered One Features

**Immortal Foe (21st level):** Immortal creatures take a –2 penalty to attack rolls against you. In addition, you gain a bonus to damage rolls against immortal creatures equal to your Wisdom modifier.

**Manifest the Divine (24th level):** You can use each of your Channel Divinity powers once per encounter. In addition, you can select any Channel Divinity feat, even if you do not worship the required god.

**Bestow Grace (30th level):** When any ally within 20 squares of you drops to 0 hit points or fewer, you can spend a healing surge as an immediate interrupt. You regain no hit points from spending the surge, but the ally regains hit points as if he or she had spent a healing surge.

## Revered One Power

**Serene Protection** Revered One Utility 26

*Once you understand a thing, it becomes a simple matter to ignore it. Sharing your understanding with your allies, you ward yourself and them from harm.*

**Daily ✦ Divine**
**Minor Action** **Close** burst 5
**Target:** You and each ally in burst
**Effect:** Choose a damage type: acid, cold, fire, force, lightning, necrotic, poison, psychic, radiant, or thunder. Each target gains resist 30 to that damage type until the end of your next turn.
**Sustain Minor:** The resistance persists.

CHAPTER 3

# Character Options

HOWARD LYON

**Taken together,** class and race define most of your character's capabilities—but there's more to a character than capabilities. Your character's feats and equipment complement your powers and class features, while a developed background helps to flesh out your character into a three-dimensional person.

Backgrounds give only minor benefits in the game, but they're an important part of defining who your character is, not just what he or she can do. They suggest elements of personality and story that you can use while you play your character, and they're also a great hook your DM can use to connect your character to the adventures that await you.

Feats are a great way to customize your character, to tweak your abilities so they're just right for the character you want to play. The feats in this chapter are aimed primarily at the new classes and races that appear in this book.

Mundane and magic items guard your weaknesses and enhance your strengths. They ensure that your attacks and defenses keep pace with the increasingly dangerous monsters you face in your adventures.

Rituals extend your capabilities, giving you new ways to overcome obstacles and handle problems outside combat. A careful selection of rituals helps round off your character, making you ready to tackle whatever adversity comes your way.

This chapter includes the following sections.

- **Backgrounds:** Rules and extensive story ideas for fleshing out your character's past and its effect on the present.
- **Feats:** A wide selection of new feats for characters of every tier.
- **Adventuring Gear:** Basic equipment your character might need.
- **Magic Items:** New armor, weapons, implements, and other items geared toward the classes in this book.
- **Rituals:** New rituals, including some exclusively for bards and those that provide new options for all ritual casters.

# BACKGROUNDS

The *Player's Handbook* provides questions to help you think about your character's background. The suggestions here are resources you can use when you create a character, offering a wider variety of story hooks and adding a game benefit that reflects your character's history.

This section describes a number of background elements you can use as inspiration for fleshing out your character. You can choose any number of these background elements, but a good way to create a rich yet manageable background is to choose one element from each of three different categories. This book includes five categories: geography, society, birth, occupation, and racial backgrounds.

Regardless of how many background elements you use, when you create a character you can (with your DM's consent) select one of the following background benefits:

- Gain a +2 bonus to checks with a skill associated with your background.
- Add a skill associated with your background to your class's skills list before you choose your trained skills.
- Choose one language connected to your background. You can speak, read, and write that language fluently.
- If you are using a campaign setting that offers regional benefits (such as the Forgotten Realms setting), gain a regional benefit.

The background elements presented here are not the only ones possible. Use these ideas for inspiration in creating a background as unique as your character. Above all, remember that a background is more than a game benefit. It forms the foundation of your character, provides hints of what lies ahead in the campaign, and informs your character's personality.

## Geography

This element describes the basic environment of the region in which you were raised.

**Desert:** You were raised in an arid wasteland, such as a sandy desert or rocky badlands. How did you and your family survive? Do you long for the simple life of the desert, or are you thankful to be free of its constant hardships? How do you cope with the overwhelming variety of sights and smells in urban environments?

*Associated Skills:* Endurance, Nature

**Forest:** You were raised in a wooded region, such as a forest or a jungle. Did you survive by foraging, or were you and your family hunters? Do you feel at one with the forest, or is it merely a source of food to be harvested?

*Associated Skills:* Nature, Perception

**Mountains:** You were raised among the cold, craggy peaks of a mountain range. How often did you visit the lowlands as you were growing up? What brought you out of the mountains to become an adventurer?

*Associated Skills:* Athletics, Dungeoneering

**Urban:** You were raised in a large city. What part of the city did you grow up in? Did you stick to that area, or did you explore all the quarters of the city? Do you still have ties to your old neighborhood, or are you happy to forget your childhood?

*Associated Skills:* History, Streetwise

**Wetlands:** You were raised in a swamp, a river delta, or another marshy area. Which did you learn first—to walk or to swim? Do you distrust the feel of solid ground, or are you happy finally to have dry feet?

*Associated Skills:* Athletics, Nature

## Society

This background element indicates your social and economic standing.

**Poor:** You grew up without a steady income. Were your family members peasants, servants, or unskilled laborers? Did you and your family have to beg in the streets to stay fed? What was the biggest sacrifice you or your family had to make to survive? How did you come to own your starting possessions?

*Associated Skill:* Streetwise

**Wealthy:** You grew up rich, never wanting for anything. What was the source of this wealth? Was it inherited, or did your family work for its riches? Was it obtained legitimately, or through underhanded methods? What kind of home did you live in? Was there ever a time when you knew what it was like to be hungry or desperate?

*Associated Skill:* History

**Noble:** You are a member of the aristocracy. Does your family have a noble rank? Are you the heir to a title, and if so, how many people stand between you and that title? Under what circumstances did you become an adventurer?

*Associated Skills:* Diplomacy, Insight

## Birth

If one background element is common to many heroes, it is an unusual birth circumstance.

**Among Another Race:** You were born among a race other than your own. Did you grow up among the trees of an elven forest, deep in a dwarven

mountain fortress, or in a halfling caravan? Did your family live among that race when you were born, or did some other circumstance bring you there?

*Associated Skill:* A skill the other race gains a bonus to

**Blessed:** You received a great blessing from a complete stranger when you were born. What type of person blessed you? Was he or she associated with a particular religion? If so, are you a member of that faith? Did you stay in contact with this person, or do you distrust the motives behind the blessing? How does the blessing affect you?

*Associated Skills:* Insight, Religion

**Cursed:** You received a dire curse from a complete stranger when you were born. What type of person cursed you, and why? Did you ever see the stranger again? Were you shunned because of the curse? Do you carry an obvious mark of it? How does the curse affect you?

*Associated Skills:* Bluff, Religion

**Omen:** Your birth was marked by an unusual occurrence—perhaps a great storm, an eclipse, or the start or end of a battle. What was the omen? How was it interpreted? Were others born under the same omen, and if so, do you have any special relationships with them?

*Associated Skills:* Arcana, History

**On Another Plane:** You were not born in the world, but rather on another plane, such as the Feywild. What circumstances brought your ancestors to that plane? Were they natives of that plane, taken there against their will, or just visitors? When did you leave that plane, and what did you have to accomplish to escape it? Do you miss your birth plane, or do you dread returning to it?

*Associated Skill:* Arcana

**Prophecy:** Your birth was foretold in a prophecy. What does the prophecy say about you and about your future? Who, if anyone, believes the prophecy? Are you trying to fulfill the prophecy or to thwart it? The details of the prophecy might suggest further adventures to the DM.

*Associated Skills:* History, Religion

## Occupation

Before you became an adventurer, this was the way you earned your keep.

**Artisan:** You had a skilled occupation dedicated to a particular craft, such as baking, blacksmithing, carpentry, or cobbling. What did you make? Did you enjoy your work, or was it only a means of supporting yourself? What was your finest creation, and what happened to that item?

*Associated Skills:* Athletics, Diplomacy

**Criminal:** You lived on the wrong side of the law. What sorts of crimes did you commit? Did you enter a life of crime by necessity or by choice? Did you belong to a gang? Do you still engage in occasional wrongdoing, or have you left that life behind? If the latter, what caused you to give up your criminal ways? Do you still have contacts among the criminal underworld? Do your former associates now consider you an enemy?

*Associated Skills:* Stealth, Thievery

**Entertainer:** You were a dancer, a singer, an acrobat, a storyteller, or another kind of performer. Were you a solo entertainer, or did you perform as part of a group? Were you well known? If so, do you still encounter admirers?

*Associated Skills:* Bluff, History

**Farmer:** You worked on a farm, learning the ways of the natural world. Did you raise livestock, crops, or both? Did your farm have a specialty? Did you or your family own the farm, or were you a hired hand? Do you miss those days, or were you eager to escape?

*Associated Skills:* Endurance, Nature

### Background Examples

Following are two examples of how to use the material in this section to craft a cohesive background for a character.

Born and raised in the grimy streets of a large city, Neris developed a knack for getting others to follow her lead. Once she was old enough to help support her family, this talent enabled her to rise to the rank of sergeant in the city militia. With her parents and younger siblings taken care of and a little extra copper for herself, Nerys was more comfortable than she ever thought she would be. But when one of her childhood friends needed a favor, Nerys found herself on the wrong side of one of the city's smuggling syndicates. On the run from a crime boss with a grudge, Nerys has fallen in with a band of adventurers and is putting her street smarts to good use.

Nerys's player chose three background elements: urban (geography), poor (society), and military (occupation). Nerys added Streetwise to her class skills list.

Jahan is the only child of a noble house and was his parents' treasure from the day he was born. Indeed, at the moment of his birth, a pair of cranes appeared and circled the roof of his tower room three times. Jahan became a respected scholar while still young, focusing his studies on the history of his land. As dawn broke on the day when he would enter adulthood and become next in line for his family's title, the rising sun revealed a terrible scene: thousands of dead cranes lay strewn over the countryside. Weeks later, their crops mysteriously failing and their wells gone dry, commoners have begun to whisper that Jahan is the cause. The time has come for him to abandon his books and search for answers in the outside world.

Jahan's player chose three background elements: noble (society), omen (birth), and scholar (occupation). Jahan gains a +2 bonus to History checks.

**Mariner:** You worked aboard a ship. Was it a riverboat or a sailing ship? Were you a deckhand, a pilot, a marine, or an officer? How extensively did you travel? Where did you go? Was your vessel a merchant craft, a pleasure yacht, a transport vessel, or a pirate ship?

*Associated Skills:* Acrobatics, Perception

**Merchant:** You were engaged in the buying and selling of goods. What kinds of goods did you buy or sell? Were you an honest merchant, or did you take advantage of your customers? Did you or your family own the business, or did you work for someone else? Did you travel, or did you work at a shop or inn?

*Associated Skills:* Bluff, Diplomacy

**Military:** You served in a military organization, such as an army or a city guard. Were you conscripted, or did you volunteer? What was your rank? How did you leave the service? If you haven't left, describe the circumstances under which you still serve while also adventuring.

*Associated Skills:* Athletics, Endurance

**Scholar:** Your life once revolved around knowledge. What area of scholarship was your domain? Were you a teacher or a scribe, an architect or an astrologer, a barrister or a sage? Did others respect your theories, or did they scoff at your ideas? Do you still seek to learn and to teach, or have you given up academia for a life of adventure?

*Skills:* Arcana, Religion

## Racial Backgrounds

Something in your background sets you apart from others of your race.

### Deva

**Brink of Enlightenment:** You were an incredibly advanced soul during your most recent past life, close to achieving the epic transcendence that your spirit has sought through a thousand lifetimes. What interrupted your spiritual journey and led to your rebirth as an adventurer?

*Associated Skill:* Arcana

**Brink of Corruption:** In your most recent past life, your spirit was corrupted. Your evil was so great that you were nearly reborn as a rakshasa. Although your rebirth washed most of the taint from your soul, you still experience flashes of violent anger or sadistic thoughts. What led to your corruption? Were you tempted by power, or were you seeking to avert a larger evil by your actions?

*Associated Skills:* Intimidate, Stealth

**Forgotten Lifetime:** Although your memory of your past lives is vague, there is one—your most recent—that you can't remember at all. As far as you can tell, there is a gap of nearly a century during which you didn't exist. Did something interfere with your reincarnation, or did something happen during that lifetime that prevents you from remembering it?

*Associated Skills:* Endurance, Thievery

### Dragonborn

**Dishonored:** Some magnificent failure on your part resulted in the utter loss of your honor. Many dragonborn in your position would seek death, but you have not. Why? Were you wrongly accused? If not, what did you do that cost you your honor? Would you do it again? How might you regain your honor?

*Associated Skills:* Bluff, Streetwise

**Rare Egg:** The egg that you hatched from was unusual in a way that dragonborn consider auspicious. It might have had the appearance of burnished gold, carried a pattern that resembled a significant symbol, or broken cleanly into two pieces when you emerged. How much weight do you attach to this phenomenon? What do you think it means, and what did your parents think?

*Associated Skills:* Arcana, Religion

**Brush with the Past:** At some point in your life, you encountered some element of dragonborn history. You might have found a weapon forged in the lost empire of Arkhosia, discovered a fragment of parchment dating from that age, or dreamed of an ancient battle as if you had been there. How much of an impact did this encounter have on you? How does it motivate you now? Are you driven to rebuild the ancient glory of your race? Or are you embittered by the fall of Arkhosia and prepared to carve yourself a place in a new empire?

*Associated Skills:* History, Insight

### Drow

**Outcast:** You were cast out from the city of your birth, most likely because of your failure to comply with the evil customs of your people or the terrible whims of Lolth's priests. Do you dream of returning and gaining revenge, or are you fleeing for your life?

*Associated Skills:* Dungeoneering, Perception

**Orphan:** The drow community in which you were born no longer exists. Perhaps an army of dwarves or elves wiped it from the Underdark, or it was exterminated by another drow city. Somehow, you survived this event. Did something about you prompt a member of the invading force to spare you and bring you to the surface?

*Associated Skills:* Dungeoneering, Endurance

### Dwarf

**Outcast:** Your family and clan have cast you out, severing the ties that are so important to the members of your race. What did you do to deserve this fate? Are you trying to earn your way back into your clan, or to make a great name for yourself and establish a new clan of your own? Are your fellow

adventurers a surrogate family for you, or are you a loner at heart?

*Associated Skill:* Bluff

**Dedicated to an Ancestor:** You were born on the same day of the year as one of your clan's ancestral heroes, and your parents dedicated you to that hero, whose name you share. What was that hero known for? Do you feel called to emulate your namesake's great deeds, or are you driven to make a name for yourself in a different way? Do you ever dream of your ancestor, or have feelings of déjà vu, as if you're walking in that hero's footsteps?

*Associated Skills:* Diplomacy, History

**Ancestral Home Lost:** During your youth, your clan's ancestral home was conquered by enemies or destroyed in a natural disaster. You were among the displaced survivors who built a new life, most likely in a nearby human settlement. Did your parents survive the disaster? If not, who raised you? Were the survivors welcomed into the new community, or were you ostracized? Do you dream of someday rebuilding your ancestral home?

*Associated Skills:* Nature, Perception

## Eladrin

**Noble Birth:** One of your parents is a noble eladrin. What was your noble parent's title? (Brallani of autumn winds, ghaele of winter, and coure of mischief and strife are examples of the many possible titles.) Do you feel a special affinity for a season, passion, or other natural or emotional phenomenon associated with your parent's title? You probably have much stronger ties to the Feywild than to the world. Why are you now adventuring in the world? When was the first time you visited the world, and what was your reaction to it?

*Associated Skills:* Intimidate, Nature

**Estranged Fey:** You were born in the world and never visited the Feywild before the start of your adventuring career. Were your parents exiled or killed? Were you raised by members of another race? Perhaps your trance is haunted by visions of the Feywild's lush landscapes. Or is the Feywild foreign to you, as strange as some distant nation?

*Associated Skills:* Endurance, Nature

**Drowscarred:** You carry a personal mark of an encounter with the drow—perhaps a physical scar, but more likely an emotional one. What happened? No doubt this encounter intensified your hatred of the drow. But is your hatred now mixed with fear? Or is it a burning drive to exact revenge? Perhaps something about the encounter gave you a trace of compassion for the drow. Do you hope that they might one day be redeemed and rejoin the eladrin fold?

*Associated Skills:* Dungeoneering, Heal

THOMAS DENMARK

## Elf

**Fey Ally:** You are very familiar with the Feywild and have close ties to your eladrin cousins or to other fey creatures. How did you end up with such ties? Perhaps invaders destroyed your family or your home, forcing you to flee to the Feywild. Did the eladrin take you in? It is possible that you have never lived among other elves. Why did you leave the Feywild? Were you cast out, or did you strike out on your own to see the world?

*Associated Skills:* Arcana, Insight

**Wild Elf:** You come from a particularly wild tribe, considered primitive by other elves. Why is your tribe so isolated? Did you lose contact with the outside world, or did your people shun civilization? Have you ever been to a city, or are such places the stuff of campfire tales?

*Associated Skills:* Acrobatics, Athletics

**Urban Elf:** You were raised in a city where another race was dominant. What drove your family to the city? Do your people live as humans do, or did you grow up in an elven enclave? Are you happy there, or do you long to return to the wild?

*Associated Skills:* Streetwise, Thievery

## Genasi

**Chaos Born:** You spent some part of your early life in the Elemental Chaos—perhaps living in the efreets' City of Brass or in a githzerai monastery. Fond of traveling in the Elemental Chaos, you recently found yourself thrust through a portal into the world. Are you stranded in the world, or have you decided to stay for a while? Are you eager to return, or enjoying a life less plagued by elemental dangers?

*Associated Skills:* Arcana, Endurance

**Academic Exhibit:** Perhaps they created you, perhaps they summoned you, or perhaps they simply found you—however they acquired you, a cabal of arcane scholars treated you as the subject of fascinating study. You might have been on display, or you might have been kept hidden away from everyone except members of the cabal. Were you well treated, or were you locked in a cage? Did some catastrophe befall the scholars, allowing you to escape? Were you the catastrophe?

*Associated Skills:* Arcana, Thievery

### Gnome

**Fomorian Captivity:** You were the captive of a fomorian overlord. Was your family captured, or were you born into captivity? How did you escape? Are you driven by revenge, or by a deep desire to stay as far away from fomorians as possible?

*Associated Skills:* Endurance, Stealth

**Estranged Fey:** Your parents abandoned the Feywild before your birth and never returned. Did your family leave the Feywild by choice or through necessity? Do you plan to return to the homeland you have never seen, or are you content with the place you have found in the world?

*Associated Skills:* Endurance, Nature

### Goliath

**Skywatcher:** You were a respected advisor to your tribe. You helped your people avoid overhunting and overharvesting, scouted new territory, and oversaw seasonal celebrations. Now you are separated from your tribe, either by choice or by necessity. What happened? Did you make a decision that earned you bitter enemies in your tribe? Did a younger member rise to favor over you? Or did you feel a call to the world beyond your tribal lands?

*Associated Skills:* History, Religion

**Lightlost:** Your tribe members, brought near starvation by drought, followed a mountain spring to an underground river and found the food they needed to survive. Eventually forging an alliance with a nearby clan of dwarves, they adapted to a subterranean life and haven't emerged since. You are the first member of your tribe to see the sun in generations. Why have you emerged from the caves?

*Associated Skills:* Athletics, Dungeoneering

### Half-Elf

**Wanderer:** You have never lived in one place for more than a few months at a time. Why do you travel so much? Are you and your family on the run from something? Or were you a foundling who was raised by another wayfarer? Do you know where your family members are now, or have you lost touch with them in your travels?

*Associated Skill:* Streetwise

**Cultural Half-Elf:** Unlike most half-elves, you were raised as part of a half-elf community. Your parents were half-elves, and the mingling of elf and human blood in your veins goes back generations. Why did this community form? Did your people face prejudice from humans, elves, or both? Or have you had almost no contact with either race until now?

*Associated Skill:* History

**Outcast:** You were born in circumstances that made you unwelcome—in a community of elves where humans were hated, for example, or vice versa. What was the circumstance of your birth? How did your parents fit into the community? Did you leave by choice, or were you forced out? Do any lingering rivalries or enemies from your home still plague you?

*Associated Skills:* Endurance, Nature

### Half-Orc

**Orc Birth:** The child of an orc and a half-orc, you were born and spent your early years among orcs. You might have been destined for greatness, but something happened. Perhaps the tribe was slaughtered in an ill-fated raid or by a group of adventurers. Or perhaps a full-blooded orc challenged your half-orc parent's leadership, and you fled to avoid certain death. How do you feel about orcs now?

*Associated Skill:* Athletics

**Stormtouched:** Many half-orcs hold Kord in particular respect, even if they don't acknowledge him as the creator of their race. You had a brush with

### Other Benefits in Play

Your DM might decide to give your character a bonus to certain skill checks or other rolls in situations when your character's background could conceivably provide an edge. If your character's background includes an apprenticeship to a blacksmith, for example, the DM might give a bonus to Diplomacy checks when your character interacts with the baron's blacksmith, or a bonus to a Perception check when particular training could help your character notice something awry. Feel free to ask the DM about a "background bonus" if you see a possible connection.

Your character's background might also mean that he or she knows how to do certain things that have nothing to do with the game's skill system or other rules elements. If your character worked as a blacksmith, you don't need to make a skill check for your character to produce a horseshoe, or to earn a subsistence living as a blacksmith. There might be circumstances in which a well-defined background can give your character an edge in the game, even when the rules don't cover the situation.

Details of your background almost always involve other people—such as friends, enemies, family members, and former teachers. These bits of history offer a good opportunity for the DM to create nonplayer characters and situations that can be used later in the campaign.

a storm; perhaps you were born during a thunderstorm, or maybe you were struck by lightning as a young adult. Now Kord's touch is on you, and it's clear that he has some particular destiny in mind for you. But what is it?

*Associated Skills:* Nature, Religion

**First Generation:** One of your parents was a human, and the other was an orc. What circumstances brought them together? Who raised you? Were you welcome in your home village or city, or treated as an outcast?

*Associated Skill:* Bluff

## Halfling

**Storyteller:** You are a font of halfling folklore, able to spin fables and legends relevant to virtually any situation. Hidden in these tales is a wealth of useful information about halfling history and culture. How did you learn them? Which of the stories do you consider most important? Did the stories spur you to a life of adventure, and if so, why?

*Associated Skills:* History, Religion

**Avandra's Kiss:** Your birth was accompanied by an unusual occurrence that your family regarded as a sign of Avandra's favor. Perhaps a bird perched on the windowsill of the room where you were born, or you have a birthmark resembling Avandra's holy symbol. What is the mark or occurrence that reveals this favor? How did it affect your childhood and training? Does it affect your plans for the future?

*Associated Skills:* Acrobatics, Heal

**Banned:** You have been cast out of your community, and members of your own family are forbidden to speak to you or even breathe your name. What did you do to earn this shame? Does anyone back home miss you or sympathize with your plight? Is there a price on your head, or does your past otherwise threaten to overshadow your future?

*Associated Skills:* Bluff, Stealth

## Human

**Ancestral Holdings:** Your family carried a significant noble title during the height of the empire of Nerath, but the lands your family once held are now a dangerous wilderness. Do you dream of clearing the lands and making them fit for human habitation once again? Or are you fleeing the ever-shabbier pretensions of your family of nobles-in-exile?

*Associated Skills:* Diplomacy, History

**Heir of the Forgotten Gods:** A sign at your birth or some event in your life pointed to the influence of a god that is either dead or forgotten. Are you destined to revive the worship of this long-forgotten deity, or to take the place of a god that has lain dead since the dawn of time? Do you view the other gods as potential allies or as dangerous competitors?

*Associated Skills:* Insight, Religion

## Shifter

**Moonspeaker:** You were a moonspeaker, a religious leader who traveled among different shifter communities. That background gave you a much broader experience of the world than most shifters enjoy. Do you plan to return to your tribe one day, or is the endless variety of a life of adventure what you seek?

*Associated Skills:* Heal, Religion

**City Shifter:** Your tribe was forced off its lands at some point during the last century, and you were born and raised in a large human city. You might have been born to a life of crime, or your family might have established itself in a prominent position. How do you feel about urban life? Do you dream of open fields and untamed forests, or are the twisting alleys and crowded markets your true home?

*Associated Skills:* Acrobatics, Streetwise

**Persecution:** You or your family endured a period of persecution, during which shifters were imprisoned or killed because of their perceived ties to lycanthropes. Were you arrested? Did you live in hiding? Has the experience made you ashamed of your origin, or defiantly proud?

*Associated Skills:* Bluff, Stealth

## Tiefling

**Merchant Dynasty:** You grew up in a conclave of other tieflings, part of a large merchant family, surrounded by wealth if not prestige. It was a sheltered life, and you're unaccustomed to either hardship or prejudice. Why did you leave the comforts of your home to become an adventurer?

*Associated Skill:* Streetwise

**Dark Secret:** At some point in your past, you did something truly evil. You escaped punishment, but if you were ever to be identified as the perpetrator of that deed, you could still be put to death for it. Are you adventuring to forget the horror of your deed and stay away from those who still hunt you, or to try to atone for the wrong you committed? Whatever your crime, it was a clear demonstration of the evil of which you are capable because of the infernal taint in your soul. Will you transcend that evil, or will it ultimately claim you?

*Associated Skills:* Arcana, Dungeoneering

**Infernal Nightmares:** You are plagued by nightmarish visions that haunt your sleep. In your dreams, you have vivid glimpses of the Nine Hells and the torments they offer, as well as of the splendor of Asmodeus's palace and the luxurious lives of his most favored servants. What message do you take from these visions? What connection, if any, do you feel to the Nine Hells and their denizens? Does some infernal patron want something from you, or is some divine force reminding you of the punishment you risk if you stray from the path of righteousness?

Feats are useful tools to customize your character, covering weaknesses or enhancing strengths. The feats presented here focus on the new races and classes in this book, but many of the feats are open to any character.

You must meet a feat's prerequisites, if any, to take the feat. If you ever lose a prerequisite for a feat, you can't use the feat until you meet the prerequisite again. A feat that has a class as a prerequisite is available only to members of that class, including characters who have joined the class through a class-specific multiclass feat.

# ADVENTURING GEAR

In addition to the gear presented in the *Player's Handbook* and in the *Adventurer's Vault* supplement, musical instruments and totems are available for purchase.

### ADVENTURING GEAR

| Item | Price | Weight |
|---|---|---|
| **Musical instrument** | | |
| Drum | 3 gp | 1 lb. |
| Flute | 5 gp | 1 lb. |
| Harp | 15 gp | 4 lb. |
| Horn | 7 gp | 3 lb. |
| Lute | 12 gp | 2 lb. |
| Lyre | 9 gp | 2 lb. |
| Woodwind | 10 gp | 1 lb. |
| **Totem** | 5 gp | 2 lb. |

**Musical Instrument:** Bards and other characters use instruments for art and entertainment. A nonmagical musical instrument confers no game benefit but can be enchanted later. The instruments on the table are portable instruments.

**Totem:** Druids and shamans use totems as focuses for their evocations. A totem is a short length of wood or bone, similar to a rod, which is carved to resemble a nature spirit and is adorned with feathers, fur, leaves, bones, teeth, and the like. A nonmagical totem confers no game benefit but can be enchanted later.

# MAGIC ITEMS

The magic items presented in this chapter use the same rules as those in the *Player's Handbook* and in the *Adventurer's Vault* supplement.

This chapter introduces two kinds of magic items: totems and musical instruments. Totems (page 207) are implements for certain primal classes, and musical instruments are wondrous items (page 209) that are especially useful to bards.

## Armor

Magic armor increases your Armor Class by adding an enhancement bonus to the armor's armor bonus.

**Masterwork Armor:** Masterwork armor grants a higher armor bonus than non-masterwork armor and is always magical. The type and level of magic armor determines if it can be masterwork, as detailed in the tables below. The cost of masterwork armor is included in the cost of magic armor, so higher-level characters should seek out masterwork armor instead of normal magic armor. Some masterwork armor grants a resistance or an armor bonus to Fortitude, Reflex, or Will, instead of granting a higher armor bonus to AC. The *Player's Handbook* and *Adventurer's Vault* describe various types of masterwork armor.

### MAGIC CLOTH ARMOR

If you can wield a staff as an implement, you can add its enhancement bonus to the attack rolls and the damage rolls of implement powers you use through the staff, and you can use its properties and powers. Otherwise, you treat a staff as a magic quarterstaff and cannot use its properties or powers.

**Using a Musical Instrument:** Like other wondrous items, a musical instrument doesn't take up an item slot. However, to use an instrument's properties and powers, you must be holding and playing the instrument as appropriate: strumming a lute, sounding a horn, and so on.

# RITUALS

From ancient rites and ceremonies to arcane forces bound to music, rituals have many forms and functions in the Dungeons & Dragons game. Rituals create magical effects through the recitation and performance of magical formulas drawn from ritual scrolls and books. This section provides a variety of rituals, many of which are tailored for the new classes in this book. Although these rituals evoke arcane, divine, and primal themes, any adventurer who has the Ritual Caster feat can master and perform most of them.

## Prerequisite

Some rituals in this chapter include a "Prerequisite" entry. You must meet a ritual's prerequisite to master or perform the ritual, although you can assist another character in performing a ritual even if you don't meet the prerequisite.

## Category

Each ritual category in the *Player's Handbook* is associated with one or more key skills. Some of the rituals in this book have key skills other than the ones normally associated with some ritual categories.

## Variant Ritual Books

Although the ritual books described in the *Player's Handbook* contain all the instructions necessary to master and perform a ritual, their form may be unappealing to characters who have forsaken the traditional trappings of civilization. Variant ritual book options can reconcile a character's background with his or her desire to use ritual magic.

Some ritual casters record their rituals in an unorthodox manner. They inscribe rituals on cured hides, etch them into stone tablets, or paint them onto armor or weapons. Remote cultures and isolated ritual casters have even more esoteric methods of storing and encoding their rituals, from patterns of knots tied in rope to tiny statuettes displaying the required body motions, or even tubes of glass that convey the ritual through shape and color. No matter what form it takes, a variant ritual book still requires a 50 gp investment. In addition, a ritual caster must spend the same amount of time to create it and to master the rituals within it as described in "Creating a Ritual Book" on page 298 of the *Player's Handbook*. Each of these unusual methods of storing rituals contains the same amount of space for recording rituals as a traditional ritual book.

# Ritual Descriptions

## Affect Normal Fire

*Fire leaps and dances at your command, brightening or dimming.*

**Level:** 3
**Category:** Exploration
**Time:** 1 minute
**Duration:** 8 hours
**Component Cost:** 25 gp
**Market Price:** 125 gp
**Key Skill:** Arcana or Nature (no check)

You gain mastery over nonmagical fire. For the ritual's duration, or until you take an extended rest, you can manipulate nonmagical flames within 10 squares of you as a minor action. You can make a fire that normally provides dim light produce an equal amount of bright light, or you can double the radius of bright light a fire produces. Alternatively, you can diminish a fire's light, reducing its area of bright light to an equal amount of dim light, or reducing its area of dim light to darkness. Reducing a fire's light to produce no light does not extinguish the flame. You can extinguish 1 square of nonmagical fire as a minor action.

## Animal Friendship

*The animal nuzzles your hand, returning the friendship you offer.*

**Level:** 5
**Category:** Binding
**Time:** 1 minute
**Duration:** Special
**Component Cost:** 50 gp
**Market Price:** 250 gp
**Key Skill:** Nature

When you perform this ritual, choose a nonhostile Tiny natural beast, such as a cat, a fox, a fish, a mouse, or a sparrow. This animal must remain within 5 squares of you for the time necessary to perform the ritual. Once the ritual is complete, the animal regards you as a friend and performs simple tasks on your behalf. The tasks are limited to the options below, and assigning a task requires a standard action.

*Fetch:* The animal retrieves a Tiny object of 10 pounds or less that you and it can see. If the animal is unable to carry the object due to the item's size or weight, the animal enlists the aid of other creatures of its kind to fulfill the task.

*Perform:* The animal performs a simple trick, such as rolling over or playing dead.

*Seek:* The animal scouts ahead and examines an area for anything that's alive or animate. The animal can travel up to 20 squares away from you and uses your passive Perception check to determine if it notices hidden creatures in the area. When the animal returns, you learn from it whether a creature occupies the area. The animal cannot communicate any other information aside from the presence or absence of a creature.

*Watch:* The animal remains in its current location and watches that area. When you assign the animal the task, you designate creatures that are allowed to enter the location. If a creature that you have not designated enters the location, the watching animal informs you by coming to you and making a noise. If you move more than 20 squares away from the area, the animal leaves its post and rejoins you.

Unless otherwise commanded, the animal accompanies you for the ritual's duration, perching on your shoulder, hiding in your pocket, or walking alongside you. The animal has AC 14, Fortitude 12, Reflex 12, and Will 12. The animal has 1 hit point, and a missed attack never damages the animal.

Your Nature check determines the length of time the animal remains in your service, but you can release an animal from your service as a minor action.

| Nature Check Result | Duration |
|---|---|
| 19 or lower | 1 hour |
| 20–29 | 8 hours |
| 30–39 | 1 day |
| 40 or higher | 1 week |

At the heroic tier, you can have one animal at a time bound to your service using the ritual. At the paragon tier, you can have two animals bound using the ritual. At the epic tier, you can have three animals bound using the ritual. You must complete a separate ritual for each animal you bind.

## Aria of Revelation

*Your operatic notes spark new ideas, helping your allies overcome a challenging problem.*

**Level:** 10
**Category:** Divination
**Time:** 10 minutes
**Duration:** Instantaneous
**Prerequisite:** Bard
**Component Cost:** 400 gp, plus a focus worth 1,000 gp
**Market Price:** 1,000 gp
**Key Skill:** Arcana

When you finish performing the ritual, each ally who heard it can make an Arcana, a Dungeoneering, a History, a Nature, or a Religion check to uncover a clue or recall a bit of useful information. The ally must be trained in the skill and gains a bonus to the check based on your Arcana check result.

| Arcana Check Result | Bonus |
|---|---|
| 19 or lower | +5 |
| 20–29 | +10 |
| 30–39 | +15 |
| 40 or higher | +20 |

The information learned is equivalent to that gained from a successful knowledge check or monster knowledge check.

**Focus:** A musical instrument you play as part of performing the ritual.

## Bloom

*Grass grows, trees bear fruit, and the land's bounty is available to all.*

**Level:** 2
**Category:** Exploration
**Time:** 10 minutes
**Duration:** Instantaneous
**Component Cost:** 20 gp
**Market Price:** 100 gp
**Key Skill:** Nature (no check)

Upon completion of the ritual, you cause all outdoor terrain within 20 squares of you to bloom with new growth and foliage. The entire area becomes difficult terrain.

Alternatively, the ritual causes crops and fruit-bearing plants within 20 squares of you to yield food. The plants produce enough food to feed five people for a week.

## Call Wilderness Guide

*An animal native to the local wilderness answers your call, approaching you and then walking away. A moment later it pauses, looking over its shoulder as if to make sure you are following.*

**Level:** 6
**Category:** Exploration
**Time:** 30 minutes
**Duration:** Special
**Component Cost:** 144 gp
**Market Price:** 360 gp
**Key Skill:** Nature

You call a nature spirit into your service to act as a guide. The guide takes the form of a Medium or smaller natural beast, with defenses equal to yours at the time you perform the ritual. The guide has 1 hit point, and a missed attack never damages it. It has a speed of 8, but it measures its pace so that you and your party can keep up with it.

The guide leads you to a location you name as you perform the ritual. The destination must be a specific place, such as Shathrax's Lair or the Tower of Kettenor. The guide cannot lead you to a general location, such as "a cave full of treasure," or to an unknown place, such as "the secret lair of the dragon Arrythis." For the ritual's duration, the guide leads you to the destination by the shortest (although not necessarily the safest) route.

Your Nature check determines how long the guide serves you. If you can't reach the specified destination within the allotted time, the guide leads you as far as it can along the way and then vanishes.

| Nature Check Result | Duration |
|---|---|
| 19 or lower | 1 hour |
| 20–29 | 4 hours |
| 30–39 | 8 hours |
| 40 or higher | 16 hours |

**Prerequisite:** Bard
**Component Cost:** 200 gp, plus a focus worth 1,000 gp
**Market Price:** 1,000 gp
**Key Skill:** Arcana

Make an Arcana check. Creatures within 5 squares of you while you perform the ritual take a penalty to Bluff checks determined by your check result. The penalty lasts for the duration of the ritual.

## Control Weather

*Thunderheads form on the horizon and race across the sky, bringing with them curtains of rain and slashing lightning.*

**Level:** 14
**Category:** Exploration
**Time:** 1 hour
**Duration:** Special
**Component Cost:** 1,800 gp
**Market Price:** 4,500 gp
**Key Skill:** Nature

You change the weather outside in a 2-mile radius centered on you. The change is limited by the current season. Choose from the options below based on the season.

| Season | Weather Results |
|---|---|
| Spring | Heat wave, sleet storm, or thunderstorm |
| Summer | Hailstorm, heat wave, or rainstorm |
| Autumn | Cold snap, fog, sleet, or windstorm |
| Winter | Blizzard, windstorm, or thaw |

You control the weather's general tendencies, such as the direction and intensity of the wind or the degree of obscurity from fog, hail, rain, and snow. You cannot control specific applications of the weather, such as where lightning strikes. You can alter the weather among the available options as a standard action for the duration of the ritual, which is determined by your Nature check. Each time you choose to change the weather result, the new weather conditions take 10 minutes to manifest.

| Nature Check Result | Duration |
|---|---|
| 19 or lower | 2 hours |
| 20–29 | 4 hours |
| 30–39 | 16 hours |
| 40 or higher | 24 hours |

## Create Campsite

*A crackling fire, a hot meal, and a warm bedroll await you after a long day of adventuring.*

**Level:** 1
**Category:** Exploration
**Time:** 10 minutes
**Duration:** 8 hours
**Component Cost:** 15 gp
**Market Price:** 50 gp
**Key Skill:** Nature

You summon hundreds of diminutive nature spirits to assemble a campsite in a 5-square radius around you. The spirits clear the area, set up tents, unroll bedrolls, gather water, and prepare a nourishing meal. They also conceal the campsite, with your Nature check result serving as the DC for Perception checks to notice the hidden camp.

The spirits utilize your and your allies' gear to make the campsite. If you and your allies lack the appropriate gear, the spirits gather raw materials from the environment to make the campsite.

At the end of the ritual's duration, the spirits break down the campsite, pack up your gear, and restore the site to its original state, removing evidence that you and your allies camped there.

DEVON CADY-LEE

## Fool's Speech

*What did you say?*

**Level:** 6
**Category:** Deception
**Time:** 10 minutes
**Duration:** 1 hour
**Prerequisite:** Bard
**Component Cost:** 50 gp, plus a focus worth 360 gp
**Market Price:** 360 gp
**Key Skill:** Arcana (no check)

When you finish performing the ritual, you and up to five allies who heard it can use a secret language to communicate with each other. To other creatures, your speech is incomprehensible, a string of nonsense words. Affected characters can speak in Fool's Speech or another language at their discretion.

**Focus:** A musical instrument you play as part of performing the ritual.

## Glib Limerick

*You recite a short rhyme and feel your tongue loosen so the lies can flow freely.*

**Level:** 1
**Category:** Deception
**Time:** 1 minute
**Duration:** 10 minutes
**Prerequisite:** Bard
**Component Cost:** 10 gp, plus a focus worth 5 gp
**Market Price:** 50 gp
**Key Skill:** Arcana (no check)

For the ritual's duration, whenever you make a Bluff check, you can roll twice and use either result. The ritual's effect automatically ends when you roll initiative.

**Focus:** A musical instrument you play as part of performing the ritual.

## Ironwood

*The wood beneath your hand hardens, assuming an almost metallic sheen.*

**Category:** Creation
**Time:** 1 hour
**Duration:** Permanent

**Market Price:** 360 gp
**Key Skill:** Nature

You alter a quantity of wood to have the strength and consistency of steel. The DC to burst or break the wood increases by 5. The wood also gains resist 10 to all damage.

Your Nature check determines the amount of wood you can affect with this ritual.

| Nature Check Result | Size |
|---|---|
| 19 or lower | Medium object |
| 20–29 | Large object |
| 30–39 | Huge object |
| 40 or higher | Gargantuan object |

## Lullaby

*Your audience grows sleepy with your soothing performance.*

**Level:** 3
**Category:** Exploration
**Time:** 10 minutes
**Duration:** As long as you play plus 10 minutes
**Prerequisite:** Bard
**Component Cost:** 25 gp, plus a focus worth 20 gp
**Market Price:** 125 gp
**Key Skill:** Arcana

Your performance makes your audience drowsy. Make an Arcana check. The result determines the penalty to Insight checks and Perception checks of each creature that can hear you other than you and your allies.

| Arcana Check Result | Penalty |
|---|---|
| 19 or lower | -2 |
| 20–29 | -4 |
| 30–39 | -6 |
| 40 or higher | -10 |

Affected creatures are also considered distracted, which might allow an ally (or you, after you stop playing) to make Stealth checks to hide from them even without superior cover or total concealment.

**Focus:** A musical instrument you play as part of performing the ritual.

## Pyrotechnics

*A flare soars into the night sky and explodes with brilliant color.*

**Level:** 2
**Category:** Creation
**Time:** 1 minute
**Duration:** 10 minutes
**Component Cost:** 20 gp
**Market Price:** 50 gp
**Key Skill:** Arcana (no check)

You send a barrage of small, colorful explosions into the sky. The explosions blossom into whatever color or shape you choose for 1 minute. At the end of each minute of the ritual's duration, you can choose a new color and shape. At night, the lights are visible within a 10-mile radius. During the day, the lights are visible within a 1-mile radius.

## Reverse Portal

*You open a portal not from here to there, but from there to here.*

**Level:** 12
**Category:** Travel
**Time:** 10 minutes
**Duration:** Special
**Component Cost:** 500 gp
**Market Price:** 2,600 gp
**Key Skill:** Arcana

You create a shortcut across the fabric of the world, linking your location with a permanent teleportation circle elsewhere on the same plane (see the Linked Portal ritual, *Player's Handbook*, page 307). As part of performing this ritual, you sketch out a 10-foot-diameter circle in rare chalks and inks. Alternatively, you can use a permanent teleportation circle, which reduces the component cost to 150 gp and grants you a +5 bonus to your Arcana check.

At the ritual's completion, make an Arcana check. The result determines the duration that the portal remains open.

| Arcana Check Result | Portal Duration |
|---|---|
| 19 or lower | 1 round |
| 20–39 | 3 rounds |
| 40 or higher | 5 rounds |

The portal displays views of the other location in the same way as that created by the Linked Portal ritual, but creatures cannot enter the origin point and appear at the other location. Instead, creatures can only step into the distant end of the portal to appear at the origin point with you.

## Snare

*A barely visible circle appears on the ground, ready to entrap any enemies that enter the area.*

**Level:** 4
**Category:** Warding
**Time:** 10 minutes
**Duration:** 8 hours or until discharged
**Component Cost:** 25 gp
**Market Price:** 150 gp
**Key Skill:** Nature

You create a magical snare in a 2-square-by-2-square area adjacent to you. When you complete the ritual, make a Nature check. The check result is the Perception DC to detect the snare and the Thievery DC to disable it. As part of the ritual, you can name creatures that can pass freely through the snare's area, and you can set conditions that allow a creature to bypass the snare. Any other creature that enters the snare's area is subject to an attack equal to your level + 4 vs. Reflex. On a hit, the target is immobilized (save ends). When the snare is triggered, you become aware that it has been triggered regardless of your distance from it. The ritual is also discharged.

## Song of Restfulness

*As you play your instrument, your allies nod off one by one. When you finish, they awaken, refreshed and filled with resolve to continue the quest.*

**Level:** 10
**Category:** Exploration
**Time:** 10 minutes
**Duration:** Instantaneous
**Prerequisite:** Bard
**Component Cost:** 400 gp, plus a focus worth 1,000 gp
**Market Price:** 1,200 gp
**Key Skill:** Arcana (no check)

When you perform this ritual at the beginning of an extended rest, you reduce the time needed for the extended rest by 2 hours for yourself and any allies who hear the performance. A character can benefit from this ritual only once during any 24-hour period.

**Focus:** A musical instrument you play as part of performing the ritual.

## Song of Sustenance

*Your audience finds your dulcet tones as nourishing as the finest fare.*

**Component Cost:** 135 gp, plus a focus worth 680 gp
**Market Price:** 680 gp
**Key Skill:** Arcana (no check)

Your performance nourishes up to ten Small or Medium creatures for the duration, as if they had enjoyed a great feast. The creatures also gain a +5 bonus to Endurance checks for the duration. You designate the affected creatures as part of performing the ritual, and they must hear all of it.

**Focus:** A musical instrument you play as part of performing the ritual.

## Speak with Nature

*Animals and plants respond to your queries, revealing what they have seen and what they know.*

**Level:** 5
**Category:** Divination
**Time:** 10 minutes
**Duration:** 10 minutes
**Component Cost:** 80 gp
**Market Price:** 250 gp
**Key Skill:** Nature

For the ritual's duration, you can communicate with natural beasts and mundane plants (but not plant creatures). The ritual does not make animals friendly, and the animals or plants are limited in their knowledge by their experiences and mobility. For example, a plant knows only about its immediate surroundings, and a fish can describe only what it has seen or experienced underwater.

Your Nature check result determines the number of questions you can ask.

| Nature Check Result | Number of Questions |
|---|---|
| 9 or lower | Zero |
| 10–19 | One |
| 20–29 | Two |
| 30 or higher | Three |

## Traveler's Chant

**Time:** 10 minutes
**Duration:** 8 hours
**Prerequisite:** Bard
**Component Cost:** 10 gp, plus a focus worth 5 gp
**Market Price:** 75 gp
**Key Skill:** Arcana (no check)

For the ritual's duration, you and up to eight allies who heard the whole performance of the ritual can travel farther than normal. For the purpose of determining how far you and the allies can travel in an hour or a day, treat the group's speed as the slowest member's speed + 2.

**Focus:** A musical instrument you play as part of performing the ritual.

## Tree Shape

*You assume the form of a tree, blending into the forest around you.*

**Level:** 2
**Category:** Exploration
**Time:** 10 minutes
**Duration:** 6 hours
**Component Cost:** 20 gp
**Market Price:** 100 gp
**Key Skill:** Nature (no check)

You transform into a Large tree or shrub. While you are in this state, you perceive everything around you as normal. You retain all of your statistics, though you cannot use powers or perform rituals. All your clothing and gear transforms along with you. The ritual ends and you revert to your normal form if you take any damage or take an action, or at the end of the ritual's duration.

## Tree Stride

*Stepping into one plant, you instantly emerge from another some distance away.*

**Level:** 6
**Category:** Travel
**Time:** 30 minutes
**Duration:** Special
**Component Cost:** 50 gp
**Market Price:** 360 gp
**Key Skill:** Nature

You open a magical portal in a tree adjacent to you, connecting it to a second tree that you can see. You and up to eight allies can move through the portal and emerge instantly from the second tree, and return by stepping into the second tree. The portal remains in place for a duration determined by your Nature check result, but only you and the designated allies can pass through the portal in either direction.

| Nature Check Result | Duration |
|---|---|
| 19 or lower | 1 hour |
| 20–29 | 4 hours |
| 30–39 | 12 hours |
| 40 or higher | 24 hours |

**Prerequisite:** Bard
**Component Cost:** 160 gp, plus a focus worth 840 gp
**Market Price:** 900 gp
**Key Skill:** Arcana (no check)

For the ritual's duration, you and any ally who heard the whole performance of the ritual can roll twice and use either result when making Diplomacy checks to influence anyone else who heard all of it.

**Focus:** A musical instrument you play as part of performing the ritual.

## Wyvern Watch

*A wyvern-shaped presence formed from mist fills the area, promising doom to those who stumble into its demesne.*

**Level:** 6
**Category:** Warding
**Time:** 1 hour
**Duration:** 8 hours or until discharged
**Component Cost:** 100 gp
**Market Price:** 360 gp
**Key Skill:** Arcana

You place a ward in a 4-square-by-4-square area. The ghostly form of a wyvern appears in that area. Your Arcana check determines the Perception DC to notice the wyvern's presence.

As part of the ritual, you can name creatures that can pass freely through the warded area, and you can set conditions that allow a creature to bypass the ward. Any other creature that enters the area is subject to an attack equal to your level + 4 vs. Will. On a hit, the target is immobilized (save ends). When the attack is triggered, you become aware that it has been triggered regardless of your distance from the ritual's area. The ritual is also discharged.

# Appendix: Rule Updates

This appendix contains rule updates for powers and the Stealth skill. Visit the Wizards of the Coast website for other updates.

## Reading a Power

The *Player's Handbook* introduces how to read a power, starting on page 54 of that book. This section touches on some of the information discussed there: the format of player character powers and their keywords. The information here incorporates clarifications and new rules, and it supersedes previous sources.

### The Power Format

Player character powers are designed to be easily referenced during play. Even though other kinds of powers, such as monster powers, have different formats, many of the guidelines here also apply to them.

**Sequence:** The order of information in a power description is a general guide to the sequence in which the power's various effects occur. For example, an "Effect" entry might appear above attack information in a power description to indicate that something happens before you make the attack.

**Indentation:** When information is indented in a power description, that means the information is contingent on the information directly above it. For example, a "Secondary Attack" entry indented below a "Hit" entry is a reminder that you can make the secondary attack only if you hit with the primary attack.

### The Power Description

A power description contains various entries, some of which appear in every power description, whereas other entries appear only when needed by a particular power. Here are explanations of the various entries, presented in their typical order.

**Power Name and Level:** The name of a power and the power's level appear in a colored bar on the first line of the power's description. The color of the bar indicates how often you can use the power; green means the power is an at-will power, red means it's an encounter power, and black means it's a daily power.

**Flavor Text:** The next line, in italicized text, briefly explains what the power does, from the perspective of your character in the world. The rest of the power description is rules text, but this material is intended to help you narrate what your character is doing.

**Usage:** The first word on the next line tells you how often you can use the power, that is, whether it is an at-will, an encounter, or a daily power.

**Keywords:** The power's keywords appear next. The keywords tell you the power source, any damage types associated with the power, accessories you can use with it, and other associated effects. If "Varies" appears among the keywords, that means the power has variable keywords, which you or circumstances determine.

**Action Type:** The next line begins with the type of action required to use the power: standard, move, minor, free, immediate reaction, immediate interrupt, or opportunity. Some powers require no action to use. See the *Player's Handbook*, page 267, for more information about action types.

**Trigger:** Powers that are immediate actions (interrupts or reactions) or opportunity actions have a trigger, which defines when you're allowed to use the power. Some powers that are free actions, or that require no action to use, have a trigger as well.

**Attack Type and Range:** The power's attack type and range appear on the same line as its action type. The attack types are melee, ranged, area, and close. Each attack type has rules for range and targeting, detailed on pages 270–273 of the *Player's Handbook*.

**Prerequisite or Requirement:** Some powers are usable only if you meet a precondition. You must meet a *prerequisite* to select a power. You must meet a *requirement* to use a power.

**Target:** If a power directly affects one or more creatures or objects, it has a "Target" entry, specifying whom and what the power affects.

**Attack:** A power's attack entry specifies the ability score you use to make the attack, any special modifiers that apply to the attack roll, and which of the target's defenses you check against.

**Hit:** This entry describes what happens to each target that you hit with the power's attack.

**Miss:** This entry describes what happens to each target that you miss with the power's attack. In

#### The Marked Condition

When you mark a creature, you force it to engage you or suffer the consequences. While that creature is marked by you, it takes a –2 penalty to attack rolls for any attack that doesn't include you as a target. In addition, powers, class features, magic item properties, and feats might have effects that trigger when the creature takes certain actions.

A creature can be subject to only one mark at a time, and a new mark supersedes a mark that was already in place. The effect you use to mark a creature determines how long the creature remains marked by you. Regardless of the mark's duration, it ends if someone else marks that creature, unless an effect says otherwise.

contrast to the *Player's Handbook*, the "Miss" entries in this book specify only what happens when you miss, not what doesn't happen.

"Half damage" in this entry refers to rolled damage. Roll the damage specified in the "Hit" entry and deal half of that damage to each target you miss. "Half damage" does not apply to ongoing damage or any other damaging effects in the "Hit" entry.

**Effect:** Anything that appears in an "Effect" entry occurs when you use the power, whether or not you hit with it, if it is an attack power.

**Secondary Target and Secondary Attack:** Some powers allow you to make secondary (or even tertiary) attacks. A "Hit," a "Miss," or an "Effect" entry tells you when to make a secondary attack. Unless otherwise noted, the attack type and the range of a secondary attack are the same as the power's, and the secondary attack doesn't require a separate action.

Some powers give you the ability to make a secondary attack at a point later in an encounter, after the initial effect takes place. These powers include information about the secondary attack's action type, attack type, range, and effect.

**Sustain:** If a power has a "Sustain" entry, you can keep that power active by taking a specified action during your turn. See "Durations," page 278 in the *Player's Handbook,* for more about sustaining a power.

**Class Feature Names:** When a class feature name appears as a header in a power description, the associated entry describes an additional or a replacement effect that applies if you have that class feature.

**Aftereffect:** An aftereffect automatically occurs after another effect ends. An "Aftereffect" entry is beneath the effect it applies to, which is typically in a "Hit" or an "Effect" entry.

A target is sometimes subject to an aftereffect after a save. If that save occurs when the target is making multiple saving throws, the aftereffect takes effect after the target has made all of them.

### MOVEMENT EFFECTS

Many powers allow you and your allies to move or allow you to move your enemies forcibly. If a power notes a distance that you or an ally moves (for example, "you shift 2 squares"), the character allowed to move can decide to move all, some, or none of that distance. Similarly, if a power forcibly moves an enemy (for example, "you push the target 3 squares"), you can decide to move the enemy all, some, or none of that distance.

If a power notes the destination for your or an ally's move (for example, "a space adjacent to the target"), the character allowed to move decides either to move to that destination or not. You can't move partway. Similarly, if a power specifies where you force an enemy to move, you decide either to move the enemy there or not.

**Failed Saving Throw:** Sometimes an effect changes as a target fails saving throws against it. The new effect, specified in a "First Failed Saving Throw" or a "Second Failed Saving Throw" entry, takes effect after the target fails a saving throw against the previous effect at the end of the target's turn. The effect doesn't change if the creature fails a saving throw against it at a time other than the end of its turn.

**Special:** Any unusual information about the use of a power appears in this entry. For example, some powers can be used as basic attacks, which is noted in a "Special" entry.

**Level:** This entry tells you if some part of the power—often its damage—increases at a specific level.

## Keywords

Here is a list of keywords currently used in PC powers. Some of these keywords—beast form, rage, spirit, and summoning—are introduced in this book. Others are used in books, like *Martial Power*, that have been published since the *Player's Handbook*. Following the list are keywords that have special rules.

### Beast

A power that has the beast keyword can be used only while your beast companion is conscious and present in an encounter.

### Beast Form

You can use a beast form power only while you are in beast form.

### Conjuration

Powers that have the conjuration keyword create conjurations, objects or creatures of magical energy.

**CONJURATION**

A conjuration you create uses these rules, unless a power description says otherwise.

- **Occupies No Squares:** The conjuration occupies no squares.
- **Unaffected by the Environment:** Terrain and environmental phenomena have no effect on the conjuration. For example, a conjuration that is an icy hand functions in an inferno without penalty. The conjuration does not need to be supported by a solid surface, so it can float in the air.
- **Your Defenses:** Normally, a conjuration cannot be attacked or physically affected. If a conjuration can be attacked or physically affected, it uses your defenses. Unless an attack specifically targets conjurations, only the attack's damage (not including ongoing damage) affects the conjuration.
- **Attacking with a Conjuration:** If you can attack with a conjuration, you make the attack. You determine line of sight normally, but you determine line of effect from the conjuration.
- **Movable Conjurations:** If the power you use to create a conjuration allows you to move it, it's a movable conjuration. At the end of your turn, the movable conjuration ends if you are not within range of at least 1 square it's in (using the power's range) or if you don't have line of effect to at least 1 square it's in.

  When you move a conjuration, you can't move it through a solid obstacle.
- **Death Ends:** If you die, the conjuration ends immediately.

## Implement

Implements are items wielded by certain characters to channel their powers. Your class description or a feat tells you which implements you can wield, if any. To use the powers and the properties of a magic implement, you must be able to wield that implement.

The implement keyword identifies a power that can be used through an implement, and the implement must be a type wielded by the power's class. You can use implement powers without an implement, and wielding a nonmagical implement confers no benefit. If you wield a magic implement, you can add its enhancement bonus to the attack rolls and the damage rolls of implement powers you use through it (Chapter 3 contains various magic implements, as does Chapter 7 in the *Player's Handbook*).

## Invigorating

If you are trained in Endurance, you gain temporary hit points equal to your Constitution modifier when you hit with a power that has the invigorating keyword. No invigorating power grants temporary hit points more than once during a turn, even if you hit more than once with that power.

## Polymorph

Polymorph powers change a target's physical form in some way.

**POLYMORPH**

You use these rules when you're affected by a polymorph power.

- **One Polymorph at a Time:** If you are affected by more than one polymorph power, only the most recent one has any effect. The other powers' effects remain on you and their durations expire as normal, but those effects don't apply. However, when the most recent effect ends, the next most recent one that is still active applies to you.
- **Changing Size:** If a polymorph power reduces your space, you do not provoke opportunity attacks for leaving squares as you shrink.

  If a polymorph effect makes you too large to fit in the available space, the effect fails against you, but you are stunned (save ends). For example, if you are crawling through a narrow tunnel and a polymorph effect tries to turn you into a creature that is too large for the tunnel, the effect fails, but you are stunned until you save.
- **Death Ends:** If you die, polymorph effects end on you immediately.

## Rage

A rage power allows you to enter a rage specified in the power. A rage lasts until you enter a new rage or until the end of the encounter.

## Rattling

If you are trained in Intimidate and deal damage with a power that has the rattling keyword, the target takes a –2 penalty to attack rolls until the end of your next turn. A creature that is immune to fear is not subject to this penalty.

## Reliable

If you miss every target when using a reliable power, you don't expend the use of that power.

## Spirit

You can use a spirit power only if your spirit companion is present in the encounter. If a spirit power includes "spirit" in its range, you determine line of sight and line of effect from your spirit companion's space, which is the power's origin square.

## Stance

When you use a stance power, you assume a stance that lasts until you assume another stance or until the end of the encounter.

## Summoning

Powers that have the summoning keyword bring creatures from elsewhere, often other planes, to serve you in a variety of ways.

### SUMMONED CREATURE

A creature you summon uses these rules, unless a power description says otherwise.

- **Allied Creature:** When you use a summoning power, you create a creature that is an ally to you and your allies. The power determines where the summoned creature appears.
- **Your Defenses:** The summoned creature's defenses equal yours when you summon it, not including any temporary bonuses or penalties.
- **Hit Points:** The summoned creature's maximum hit points equal your bloodied value. When the summoned creature drops to 0 hit points, it is destroyed, and you lose a healing surge. If you have no healing surges left, you instead take damage equal to half your bloodied value.
- **No Healing Surges:** The summoned creature lacks healing surges, but if a power allows it to spend a healing surge, you can spend a healing surge for it. The summoned creature then gains the benefit of the healing surge, instead of your gaining it.
- **Speed:** The summoning power determines the summoned creature's speed.
- **Commanding the Creature:** The summoned creature has no actions of its own; you spend actions to command it mentally. You can command the creature only if you have line of effect to it. When you command the creature, the two of you share knowledge but not senses.

  As a minor action, you can command the summoned creature to take one of the following actions, if it is physically capable of taking that action: crawl, escape, fly, open or close a door or a container, pick up or drop an item, run, stand up, shift, squeeze, or walk.

  The summoning power determines any special commands you can give the summoned creature and gives an action type for each command. If a special command is a minor action, you can give that command only once during each of your turns.
- **Attacks and Checks:** If a summoning power allows the summoned creature to attack, you make an attack through the creature, as specified in the power description. If the summoned creature can make a skill check or an ability check, you make the check. Attacks and checks you make through the creature do not include temporary bonuses or penalties to your statistics.
- **Duration:** Unless the summoning power states otherwise, the summoned creature lasts until the end of the encounter and then disappears. As a minor action, you can dismiss the summoned creature.

## Teleportation

A teleportation power transports creatures or objects instantaneously from one location to another.

### TELEPORTATION

You use these rules when you use a teleportation power.

- **Line of Sight:** You must have line of sight to the destination space.
- **No Line of Effect:** Neither you nor the creature or object being teleported needs line of effect to the destination space.
- **Destination Space:** The destination must be a space that the creature or object being teleported can occupy without squeezing.
- **Instantaneous:** Teleportation is instantaneous. The creature or object being teleported disappears and immediately appears in the destination space you choose. The movement is unhindered by intervening creatures, objects, or terrain.
- **No Opportunity Actions:** The creature or object being teleported doesn't provoke opportunity actions for leaving its space.
- **Immobilized or Restrained:** Being immobilized or restrained doesn't prevent a creature from teleporting. If a creature teleports away from a physical restraint, a monster's grasp, or some other immobilizing effect that is located in a specific space, the creature is no longer immobilized or restrained. Otherwise, the creature teleports but is still immobilized or restrained when it reaches the destination space.

## Weapon

The weapon keyword identifies a power that is used with a weapon, including an improvised weapon such as an unarmed strike (see "Weapons," *Player's Handbook*, page 215). The range and the damage of a weapon power is usually determined by the weapon you use with it. A [W] in a power's damage expression stands for your weapon's damage dice (see "Damage," *Player's Handbook*, page 276).

If you use a weapon power with a weapon you're proficient with, you add the weapon's proficiency bonus to the attack rolls of that power. Your class and feats determine your weapon proficiencies. If you use a weapon power with a magic weapon, you can

### EXTRA DAMAGE

**Many effects grant you the ability to deal extra damage, including powers, feats, and magic item properties. Extra damage is always in addition to other damage. For example, if you have a feat that causes your area attacks to deal extra damage, the extra damage doesn't apply when you use an area attack that deals no damage, such as the wizard's *sleep* power.**

add the magic weapon's enhancement bonus to the power's attack rolls and damage rolls.

### Zone

Powers that have the zone keyword create zones, magical areas that last for a round or more.

**ZONE**

A zone you create uses these rules, unless a power description says otherwise.

- **Fills an Area of Effect:** The zone is created by an area of effect and fills each square in the area that is within line of effect of the origin square.
- **Unaffected by Attacks and the Environment:** The zone cannot be attacked or physically affected, and terrain and environmental phenomena have no effect on it. For example, a zone that deals fire damage is unaffected by cold damage.
- **Movable Zones:** If the power you use to create a zone allows you to move it, it's a movable zone. At the end of your turn, the movable zone ends if you are not within range of at least 1 square of it (using the power's range) or if you don't have line of effect to at least 1 square of it.

  When you move a zone, you can't move it through a solid obstacle.
- **Overlapping Zones:** If zones overlap and impose penalties to the same roll or game statistic, a creature affected by the overlapping zones is subject to the worst penalty. Similarly, a creature in the overlapping area takes damage only from the zone that deals the most damage, regardless of damage type.
- **Death Ends:** If you die, the zone ends immediately.

## New Stealth Rules

This section presents updates to the Stealth skill and to rules related to that skill, as presented in the first printing of the *Player's Handbook*.

### Bluff

The following paragraph replaces the "Create a Diversion to Hide" paragraph in the Bluff skill's shaded box (*Player's Handbook*, page 183).

- **Create a Diversion to Hide:** Once per combat encounter, you can create a diversion to hide. As a standard action, make a Bluff check opposed by the passive Insight check of any enemy that can see you. If you succeed, make a Stealth check opposed by the passive Perception check of any enemy present. If the Stealth check succeeds against an enemy, you are hidden from that enemy until the end of your turn or until you attack.

### Stealth

The following shaded box replaces the Stealth skill's shaded box and the table underneath it (*Player's Handbook*, page 188).

**Stealth:** At the end of a move action.

- **Opposed Check:** Stealth vs. passive Perception. If multiple enemies are present, your Stealth check is opposed by each enemy's passive Perception check. If you move more than 2 squares during the move action, you take a -5 penalty to the Stealth check. If you run, the penalty is -10.
- **Becoming Hidden:** You can make a Stealth check against an enemy only if you have superior cover or total concealment against the enemy or if you're outside the enemy's line of sight. Outside combat, the DM can allow you to make a Stealth check against a distracted enemy, even if you don't have superior cover or total concealment and aren't outside the enemy's line of sight. The distracted enemy might be focused on something in a different direction, allowing you to sneak up.
- **Success:** You are hidden, which means you are silent and invisible to the enemy (see "Concealment" and "Targeting What You Can't See," page 281).
- **Failure:** You can try again at the end of another move action.
- **Remaining Hidden:** You remain hidden as long as you meet these requirements.

  *Keep Out of Sight:* If you no longer have any cover or concealment against an enemy, you don't remain hidden from that enemy. You don't need superior cover, total concealment, or to stay outside line of sight, but you do need some degree of cover or concealment to remain hidden. You can't use another creature as cover to remain hidden.

  *Keep Quiet:* If you speak louder than a whisper or otherwise draw attention to yourself, you don't remain hidden from any enemy that can hear you.

  *Keep Still:* If you move more than 2 squares during an action, you must make a new Stealth check with a -5 penalty. If you run, the penalty is -10. If any enemy's passive Perception check beats your check result, you don't remain hidden from that enemy.

  *Don't Attack:* If you attack, you don't remain hidden.
- **Not Remaining Hidden:** If you take an action that causes you not to remain hidden, you retain the benefits of being hidden until you resolve the action. You can't become hidden again as part of that same action.
- **Enemy Activity:** An enemy can try to find you on its turn. If an enemy makes an active Perception check and beats your Stealth check result (don't make a new check), you don't remain hidden from that enemy. Also, if an enemy tries to enter your space, you don't remain hidden from that enemy.

## Perception

Using the Perception skill actively is a minor action, not a standard action (*Player's Handbook*, page 186).

## Targeting What You Can't See

The following paragraphs replace the second and third paragraphs in the "Targeting What You Can't See" sidebar (*Player's Handbook*, page 281).

**Invisible Creatures and Stealth:** If an invisible creature is hidden from you ("Stealth," page 188), you can neither hear nor see it, and you have to guess what space it occupies. If an invisible creature is not hidden from you, you can hear it or sense some other sign of its presence and therefore know what space it occupies, although you still can't see it.

**Make a Perception Check:** On your turn, you can make a Perception check as a minor action (page 186) to try to determine the location of an invisible creature that is hidden from you.

# Glossary

This brief glossary contains game terms that appear in this book and are defined in a book other than a *Player's Handbook*.

**attacking objects:** With your DM's permission, you can use a power that normally attacks creatures to attack objects. See the *Dungeon Master's Guide,* page 65, for how to damage objects.

**blindsight:** If you have blindsight, you can clearly see creatures or objects within a specified range and within line of effect, even if they are invisible or obscured. You otherwise rely on your normal vision.

**fly speed:** If you have a fly speed, you can fly a number of squares up to that speed as a move action. To remain in the air, you must move at least 2 squares during your turn, or you crash at the end of your turn. While flying, you can't shift or make opportunity attacks, and you crash if you're knocked prone. See the *Dungeon Master's Guide*, page 47, for more about flying.

**hover:** If you have a fly speed and can hover, you can remain in the air without moving during your turn. You can also shift and make opportunity attacks while flying.

**overland flight:** An overland flight speed works like a fly speed with one exception: While you are in the air using your overland flight speed, you crash if you take any action other than a move action to use overland flight or a free action.

**tremorsense:** If you have tremorsense, you can clearly see creatures or objects within a specified range, even if they are invisible, obscured, or outside line of effect, but you and they must be in contact with the ground or the same substance, such as water or a web. You otherwise rely on your normal vision.

# Introduction

This volume, the third *Player's Handbook* for the current edition of the Dungeons & Dragons® game, offers a wealth of new character options, including new races and classes, a new way to combine classes, new skill powers, and a wide array of new feats. It introduces the psionic power source, used by four of the classes in these pages, along with a new approach to power acquisition and management that allows certain psionic characters unprecedented flexibility with their powers.

Chapter 1 introduces four additional races. The githzerai and the minotaur from the *Monster Manual*® appear here in player-friendly form with some additional and revised abilities. Wilden are a newborn race of plantlike fey arisen to combat the threat of the Far Realm. Shardminds are crystalline living constructs imbued with psionic power.

Six new classes make up most of Chapter 2. The users of the psionic power source are the psion, the battlemind, the monk, and the ardent. The seeker (a primal controller) and the runepriest (a divine leader) round out the new classes. New rules for hybrid characters, who combine powers and features from two classes, also appear in Chapter 2, along with six new epic destinies.

Chapter 3 includes a variety of new options for characters of every class. First are skill powers, a new category of utility powers that characters of any class can gain to make better use of their skills. New feats provide additional opportunities for characters to specialize in certain types of weapons, maneuvers, or powers. Finally, the chapter includes new equipment, notably superior implements.

The book's appendix summarizes how to read a power and includes updated definitions of the keywords used in the book's powers. The best way to stay on top of updates to the game's rules is by visiting the Wizards of the Coast website.

*Player's Handbook* 3 concludes with a glossary of game terms that are used in this book.

## The Psionic Power Source

***"The Far Realm is a disease, and we are its cure."***

Long ago, before the Dawn War between the gods and the primordials changed the face of the universe, a gateway lay hidden in the depths of the Astral Sea, a Living Gate that slept through the ages. A powerful being, said to be neither god nor primordial but kin to both, guarded the Living Gate so that none could open it or peer into the madness beyond.

An often-forgotten legend describes how three gods came to the Living Gate. Pelor, who shined light into all shadows, first found the gate, though he later wished he had not. Ioun, whose mind hungered to understand all things, awoke the sleeping gate. And a third, nameless god, who feared no danger and doubted all authority, distracted the guardian so that all three gods could catch a glimpse through the Living Gate. The three gods left, changed by the knowledge they had gained and linked by a terrible secret, and swore never to seek the gate again or share what they had seen.

Through many long ages the Living Gate rested peacefully. Even as the Dawn War sundered the fabric of the Astral Sea and its dominions, the gate's guardian kept it shut. As the war raged on, however, one of the three gods who had peered beyond the gate broke the shared vow they had all sworn, returned to the gate, and killed the guardian. Probably it was the nameless god, for it is hard to imagine Pelor or Ioun doing anything so foolish or malign. In any event, the Living Gate awoke from its eons of sleep . . . and opened.

The alien creatures and defiling energy of the Far Realm erupted into reality, and its terrors emerged across the Astral Sea and spilled into the world. Many astral realms were consumed, forcing the gods to turn their attention away from the Dawn War and defend their homes. Finally, Ioun and Pelor shattered the Living Gate, sealing the passage to the Far Realm and protecting the fabric of reality, although at the cost of Pelor's verdant dominion.

It was at that time, sages in the world's oldest monasteries claim, that the gods' mortal servants first learned to harness psionic power. Monks dedicated to Ioun learned to harness the tiny fragments of psionic power set loose in the world as a result of the Far Realm incursion. Through rigorous discipline and self-control, monks trained themselves to access this rare and mysterious power.

Some speculate that psionic magic is a force that originates in the Far Realm and came into the universe with the sundering of the Living Gate. Others, including most practitioners of psionic ways, believe that their power is the world's response to the intrusion of the Far Realm, similar to a mortal body's reaction to disease. Perhaps Ioun herself learned the mysteries of the psionic way when she peered through the Living Gate, and foreseeing a future incursion of Far Realm monstrosities into the world, she taught her mortal followers the use of psionics so that they might have a defense prepared.

In more recent years, the presence of the Far Realm has had an increasing influence on the world. Perhaps Pelor and Ioun failed to completely seal the rift where the Living Gate once stood, and the passage of uncounted centuries has allowed the slow seepage of the Far Realm's defiling energy into the universe. Or perhaps another rift has opened, allowing aberrant monstrosities to stream into the world and spread their corruption. Whatever the cause, the heightened presence of Far Realm energy has provoked a stronger response from the psionic forces of the world, making psionic magic more common, stronger, and easier to control.

Monks continue to study their disciplined techniques of harnessing psionic magic as though it were still a precious resource to be husbanded. Psions share a similar approach, using careful study and rigorous self-control to measure and direct the powerful stream of psionic magic at their command. Ardents and battleminds, though, seem to acquire psionic powers at the whim of the universe, channeling their power with little effort and carrying it on the tides of their emotions.

Psionic characters aren't necessarily driven by a knowledge of their purpose in the defense of the world or their place in Ioun's visions of the future. Most of them begin their careers with the same sorts of motivations that drive other adventurers: a thirst for revenge, a desire to protect their villages, a hunger for gold or glory, or simple wanderlust. Depending on your DM's campaign, your psionic character might have a very different role to play in protecting the world—defending it, perhaps, against a demonic invasion or the reawakening of slumbering primordials. However, the various psionic philosophies all agree on one thing: by simply practicing psionic magic, you are increasing the world's ability to defend itself against the Far Realm.

## PSIONIC PHILOSOPHIES

As psionic power has matured and strengthened, several competing philosophies have arisen regarding its use and purpose. Powerful wielders of psionic magic naturally gather disciples and devotees who seek to learn from them, forming the basis of what amount to philosophical schools or sects.

The key philosophies that dominate discussion and debate about psionics include the following.

**Fists of Zuoken:** Zuoken was a human monk who achieved perfect harmony of body, mind, and spirit through knowledge, meditation, and decisive action. Ioun rewarded his service and dedication by making him an immortal exarch in her service, and the disciples he gathered around him in life remain a significant monastic order dedicated to preserving knowledge of the psionic arts. The Fists of Zuoken believe that psionic powers are to be nurtured in all who possess them. Adherents of the Fists of Zuoken are generally good.

**Guiding Hand:** The philosophy of the Guiding Hand teaches that psionic power is a gift from the cosmos intended to help protect the universe from destruction. The natural extension of this philosophy is that those who are blessed with psionic power have a responsibility to protect the weak and innocent from marauding monsters and other dangers. Most followers of the Guiding Hand are good or lawful good.

**School of Unmatched Excellence:** The masters of this school teach that those who wield psionic power are a superior class of beings. Their inherent superiority gives them the right and even responsibility to assume dominion over their lesser kindred. A few students of the School of Unmatched Excellence are unaligned, relatively benign individuals who seek to benevolently guide lesser mortals, but most are evil.

**The Path of Thirty-Seven Obstacles:** This philosophy stresses the importance of personal excellence and mastery, which is most clearly demonstrated by seeking out and defeating powerful opponents. Most commonly, adherents of this path live as adventurers, proving their worth against powerful monsters and claiming the treasure and other trophies that rightfully belong to them. Most followers of this philosophy are unaligned.

CHAPTER 1

# Character Races

JASON A. ENGLE

THE MOST common races in the world of the DUNGEONS & DRAGONS game appear in the *Player's Handbook* and *Player's Handbook 2*. This chapter introduces four new and more unusual races. Heroic adventurers of these races are rare; if you choose to play one, your character is exceptional and perhaps marked for a special destiny.

The githzerai and the minotaur appear in the *Monster Manual*, but here they're fleshed out and presented for use as player characters. The other two races—the shardmind and the wilden—are new to the game. Wilden, in fact, are new to the world, only recently appearing in the Feywild in response to the growing threat of the Far Realm.

This chapter's races follow the same format as the ones in the *Player's Handbook*. However, instead of describing example adventurers, the entries in this book provide racial backgrounds, following the background rules in *Player's Handbook 2*.

**Githzerai** are disciplined ascetics living amid the tumult of the Elemental Chaos. They are not a numerous people even on their home plane. They are sworn foes of their kindred race, the githyanki, as well as of the mind flayers that once enslaved them. These twin hatreds fuel most githzerai adventurers.

**Minotaurs** are hulking, beast-headed folk, whose physical form represents the internal war they wage between civilization and the rampaging beast in their inmost nature. Some minotaurs give in to their innate savagery, following the path of the demon lord Baphomet. Minotaur characters, though, along with the best elements of minotaur civilization, rein in the beast and rise above their violent impulses.

**Shardminds** are crystalline creatures formed of physical and psychic fragments of an ancient entity called the Living Gate. With logic and discipline, they harness magical power with the goal of rebuilding the Living Gate, although factions among them hold different ideas of how best to pursue that goal.

**Wilden** are plantlike fey creatures, newly arisen in the Feywild to combat the spread of the Far Realm's influence. They can take on different aspects of nature's essence, altering their appearance and even their personality with each change of aspect.

The githzerai are descended from an ancient race once held in thrall by mind flayer overlords. After the bloody uprising that won these people their freedom, ideological differences split them into two races: the githzerai and the githyanki. The githzerai rejected the cruel warmongering of the githyanki and withdrew to the Elemental Chaos and to remote locations in the world to follow a path of self-reflection, harnessing the power of the mind and the soul. Centuries later, the githzerai remain in such locations, leading disciplined lives and observing their surroundings to determine their place in the universe.

Play a githzerai if you want . . .

- to be a character who has strong planar ties.
- to avoid attacks and stay one step ahead of your enemies.
- to be a member of a race that favors the avenger, monk, ranger, and seeker classes.

ADAM GILLESPIE

## Physical Qualities

Characterized by spare frames and an exotic appearance, githzerai are taller than humans and slender to the point of being gaunt. Their skin tends toward yellow tones, occasionally shading into brown or green. They have distinctive angular features and pointed ears, as well as eyes set in deep sockets and flattened noses set high on their faces.

Male githzerai usually keep their heads shaved or tonsured and braided, and they grow controlled facial hair. A typical style is a shaved pate with a long braid trailing from the back of the head. Females wear their long hair close to the head in braids or tight buns. Githzerai hair is typically russet, but black and gray sometimes occur.

The githzerai commitment to asceticism means that individuals generally disdain displays of wealth. Their clothing is practical, simple in design, and accentuated only by simple jewelry. They indulge their artistic nature through body painting or tattoos. Even these expressions incorporate a functional purpose: Tattoos serve as identifiers, helping githzerai recognize the tradition and location from which a fellow githzerai hails.

Githzerai live about as long as humans.

## Playing a Githzerai

Githzerai value their heritage. It informs their philosophy, their behavior, and their intolerance for githyanki and mind flayers. Where githyanki crave battle and conquest, githzerai seek inner harmony and self-mastery. They often travel great distances to explore the self and to give up mortal attachments by witnessing the possibilities that existence has to offer.

Although githzerai are willing to explore and experience the cosmos, they maintain a worldview centered on personal responsibility and accomplishment. The race's social hierarchy is based entirely on merit, and each githzerai must earn a place in history. Great heroes, leaders, and teachers are immortalized as revered ancestors, with important techniques and cultural elements bearing their names. The unworthy remain lowly and are forgotten.

Austerity, prudence, pragmatism, and tenacity also run strong in the githzerai persona. Githzerai rarely own more than they need. They don't speak at length when a brief statement will do. Although githzerai have fiery souls, reflected by their fierce resolve and strong loyalties, they rarely display strong emotions. The trust of a githzerai must be earned, and most githzerai expect weakness and lack of discipline in others. However, githzerai readily make use of any resources at hand, including members of other races, to solve problems or shore up defenses. A githzerai rarely backs down from a challenge in which success seems possible.

Few relationships hold any sway over githzerai. Religion, nationalism, and even familial loyalties are less important than personal seeking and enlightenment. Githzerai place value on proven methods and associates, rather than on those that tradition or dogma might dictate. Githzerai seek out capable teachers, students, and companions, and they are unwavering allies to those who prove worthy.

To discover whether someone or something is worthy, githzerai must be open-minded as well as willing to learn and to take risks. The fact that githzerai find it easier to trust other githzerai than they do members of other races tempers this measure of tolerance. Only a member of the race can truly understand the struggles that the githzerai have undergone.

**Githzerai Characteristics:** Ascetic, calculating, calm, cautious, cynical, disciplined, introspective, pragmatic, quiet, secretive, suspicious, terse

**Male Names:** Dak, Durth, Ferzth, Greth, Hurm, Kalla, Murg, Nurm, Shrakk

**Female Names:** Adaka, Adeya, Ella, Ezhelya, Immilzin, Izera, Uweya

## Githzerai Backgrounds

Here are background elements for githzerai.

**Cenobite Initiate:** You were raised and trained in a githzerai monastery in the Elemental Chaos or a remote part of the world. You might have stayed there for all your early years, contemplating the dangers around you and binding your mind in discipline. Then, something drew you away from your home. Perhaps you sought the answers to questions about your race's origin. Maybe a visitor aroused your curiosity about the world beyond the monastery's walls. Now you find yourself outside the disciplined civilization of the githzerai. How are you adjusting? Is the experience intriguing or frustrating? Are new companions a suitable replacement for those you left behind?

*Associated Skills:* Arcana, History

**War Band Survivor:** You joined a githzerai war band that either traveled to the world or originated in it. Your band sought enemies of the githzerai and found foes beyond your group's capabilities. You were the only survivor of the battle. What happened to the rest of your band? You might be stranded in the world with no easy route home, but do you want to go home? Is the shame of your band's defeat, or perhaps the shame of your survival, too great? Do you seek vengeance for the death of your companions or absolution for the guilt you feel as a survivor?

*Associated Skills:* Dungeoneering, Perception

Minotaurs embody the tension between civilization and savagery, discipline and madness, for they stand in two worlds. Tugged toward violence but bound by conscience, numerous minotaurs are driven to rise above their dark impulses. Such a minotaur seeks the balance between the monstrous and the refined. Innumerable minotaurs give in to the temptations staining their souls and find themselves thralls to Baphomet, the Horned King. Minotaurs must struggle to become more than the beasts they resemble or else succumb to the demonic brutality they despise.

Play a minotaur if you want . . .

ADAM GILLESPIE

- to be a mighty warrior who has amazing strength and endurance.
- to be a monstrous adventurer struggling against villainous tendencies.
- to be a member of a race that favors the barbarian, fighter, and warden classes.

## Physical Qualities

A minotaur combines the features of human and bull, with the build and musculature of a hulking humanoid, but with cloven hooves, a bovine tail, and, most distinctive of all, a bull's head. Fur covers a minotaur's upper body, coarse and thick on the head and neck, gradually thinning around the shoulders until it becomes humanlike hair over the arms and upper torso. The thick hair turns shaggy once more at the minotaur's waist and thickens around the loins and legs, with tufts at the end of the tail and around the powerful hooves. Minotaurs take pride in their horns, the sharpness, size, and color of which are related to an individual's place in minotaur society. Fur and skin coloring runs from albino white to coal black, though most minotaurs have red or brown fur and hair.

Labyrinthine patterns are important to minotaurs, and these decorations appear on their clothing, armor, and weapons, and sometimes even on their hides. Each pattern is particular to a clan, and the pattern's size and complexity help minotaurs identify family allegiance and caste. The patterns evolve through the generations, growing more expansive based on clan members' deeds and a clan's history.

Minotaurs live as long as humans do.

## Playing a Minotaur

The minotaur preference for labyrinths is legendary, and is more than a quirk. It is central to what minotaurs believe and how they see the world around them. A labyrinth is a physical representation of the spiritual and psychological journey each minotaur must undertake to make peace with his or her conflicted nature.

Each minotaur must navigate the perils of the self to transcend bestial impulses. One minotaur might achieve this easily. Another might wander the corridors of his or her mind and soul for a lifetime, trapped within the circuitous passages of self-deception and monstrous desire. Those who fail might descend into depravity, becoming the thralls of the Horned King, whose presence looms over every minotaur community.

Perhaps as a result of this inner struggle, minotaurs seek structure and order in all they do. They take great pleasure from perfecting their talents, and many spend lifetimes mastering trades, artistic styles, magic, and fighting techniques. Once minotaurs commit themselves to a task, they see it through. Failure is not perceived as a personal flaw, but as an opportunity for growth. Giving up when faced with challenges, however, is seen as a weakness of character. The greatest challenge for minotaurs is to remain vigilant against their inner corruption, and so to capitulate in any effort is more than dangerous; it is the first step on the road to spiritual corruption.

Although many minotaurs are civilized, they are the objects of suspicion and hatred from other races. This animosity stems not only from minotaurs' monstrous appearance, but also from their infamy. Wicked minotaurs are remorseless raiders and killers, and these are often the only minotaurs known in a given area.

**Minotaur Characteristics:** Bloodthirsty, cruel, disciplined, enlightened, frustrated, militant, mystical, polite, savage, spiritual, tortured

**Male Names:** Asteron, Bjorkus, Codrus, Foostus, Goeban, Jak, Minron, Noostoron, Podrus, Terios

**Female Names:** Duula, Esteru, Hester, Kuonu, Loodra, Oestra, Raastred, Seestra, Uovana, Weoren

## Minotaur Backgrounds

Here are background elements for minotaurs.

**Baphomet Clan Exile:** Your clan succumbed to the lies and promises of Baphomet's cultists, and all your living relations are in the thrall of the demon lord. You alone refused to bow to the Horned King, choosing to flee into exile rather than become a sacrifice on Baphomet's altars. Perhaps you swore to fight Baphomet in order to purify your people, or to exterminate your entire clan. Or perhaps you seek only to put that disaster behind you, to move on with your life and keep the beast in your heart contained.

Associated Skills: Religion, Stealth

**Silenced Beast:** The voice of the beast within you is silent. Its savagery has no hold over you, and its call has no appeal. You have transcended it and moved to a higher consciousness, something akin to enlightenment. You are at peace with yourself, with who you are, and with the world around you. When you need to fight, you can fight fiercely, but you don't lose control—the beast is at your command. How did you find such peace? Was it through religious devotion, disciplined martial practice, arcane study, or psionic meditation? Is there anything that can shatter your tranquility and loose the beast again?

*Associated Skills:* Diplomacy, Insight

# SHARDMIND

*Raw psionic energy barely contained in a body of gleaming crystalline shards*

**RACIAL TRAITS**

**Average Height:** 5′ 9″-6′ 2″
**Average Weight:** 180-230 lb.

**Ability Scores:** +2 Intelligence; +2 Wisdom or Charisma
**Size:** Medium
**Speed:** 6 squares
**Vision:** Normal

**Languages:** Common, Deep Speech, choice of one other
**Skill Bonuses:** +2 Arcana, +2 Endurance, +2 to one other skill
**Telepathy:** You can communicate telepathically with any creature within 5 squares of you that has a language.
**Crystalline Mind:** You have resist 5 psychic. The resistance increases to 10 at 11th level and 15 at 21st level.
**Living Construct:** You are a living construct. You don't need to eat, drink, breathe, or sleep. You never have to make Endurance checks to resist the effects of starvation, thirst, or suffocation.
**Immortal Origin:** You are native to the Astral Sea, so you are considered an immortal creature for the purpose of effects that relate to creature origin.
**Shard Swarm:** You have the *shard swarm* power.

**Shard Swarm** — Shardmind Racial Power

*You loosen your mental grip on your physical form, distracting your foes with a swarm of shards. You then re-form elsewhere.*

**Encounter ✦ Teleportation**
**Move Action** **Close** burst 1
**Target:** Each enemy in burst
**Effect:** Each target grants combat advantage to you until the end of your next turn. You then teleport half your speed.

Shardminds are sentient fragments of the Living Gate, which once stood at the pinnacle of the intricate lattice of the Astral Sea. Beyond that gate lay the alien Far Realm, and the gate's destruction during the Dawn War resulted in the rise of the mind flayer empire. Though Ioun's power holds the portal closed, shardminds seek to rebuild the gate and forever cut off the Far Realm's ability to influence the world.

Play a shardmind if you want . . .

- ✦ to play a strange, intellectual character who has a strong psionic flavor.

ADAM GILLESPIE

- to embody an ancient history that makes you an enemy of the Far Realm and its denizens.
- to be a member of a race that favors the psion, wizard, and invoker classes.

## Physical Qualities

Shardminds are crystalline creatures consisting of hundreds of small shards of translucent green, white, red, or amber crystal assembled into humanoid form and animated by a force of pure psionic energy. Shardminds choose their forms to mimic the shapes of humanoids; some take on forms that seem more masculine, while others appear more feminine. A shardmind's animating force glows dimly from within each of its component shards, emanating most brightly from where the eyes of a natural humanoid would be. This inner light sheds dim light in a shardmind's space, but a shardmind individual can squelch the light with an instant's concentration—in order to hide in the dark, for example.

The crystalline fragments making up a shardmind's body are in constant, silent motion, almost like the circulation of blood. When a shardmind is stunned or unconscious, it might lose control of the tight mental reins that keep its body in humanoid form, a few shards slipping free into orbits around its body until the shardmind regains control.

Shardminds are living creatures only in the loosest sense. Their crystalline bodies require no sustenance, and they don't breathe. They don't need sleep, though they must still rest for six hours to gain the benefits of an extended rest. They don't have gender and don't reproduce, but the shardminds alive today aren't the same ones that sprang to life during the Dawn War. Shardminds say that the Living Gate shattered into countless fragments, and each time an awakened shardmind is killed, another one somewhere in the universe stirs to consciousness.

## Playing a Shardmind

Shardminds are fragments of pure thought given life and substance. They are logical, emotionally distant, and naive to the ways of society in the world. Some approach life with innocent curiosity, eager to embrace the wealth of experiences the world has to offer, while others remain reserved and aloof, bearing a higher purpose in mind at all times. Though they often seem dispassionate, when a strong emotion seizes them, they experience it powerfully. For example, shardminds don't get annoyed; they become enraged.

Although the race as a whole shares a common goal of rebuilding the Living Gate, several philosophies disagree on how to accomplish that goal. The three most important sects are the Thought Builders, the God Shards, and the Shard Slayers. See "Shardmind Backgrounds" below for more information about each philosophy.

**Shardmind Characteristics:** Detached, insightful, intellectual, logical, thoughtful, volatile

**Shardmind Names:** Amata, Arshaka, Arwia, Balashi, Bashanu, Belessunu, Dipana, Erishti, Eshunu, Hunzu, Iltani, Ishmea, Kuaya, Kubaba, Kuri, Manishtu, Naram, Nuraya, Seluku, Tabni, Ubashu, Utua, Zakiti

## Shardmind Backgrounds

These shardmind background elements each represent a distinct philosophy, so it is unlikely that a shardmind would have more than one of them.

**Thought Builder:** You seek to create a new Living Gate and to imbue it with the psionic power necessary to keep the influence of the Far Realm at bay. The sect is prominent in the planar metropolis of Hestavar (see *Manual of the Planes*, page 94). Most members of the Thought Builders are dedicated to Ioun. They tend to be unaligned or good.

*Associated Skills:* Arcana, Religion

**God Shard:** You believe that each shardmind must seek to acquire as much personal power as possible. Since you are a fragment of the Living Gate, your own power is the force that keeps the Far Realm from destroying the universe; each shardmind, in fact, is a fragment of divine power and carries a responsibility to nurture that power. Most God Shards are unaligned and revere no deity.

*Associated Skills:* History, Religion

**Shard Slayer:** You believe that when a shardmind dies, its animating life force returns to the site of the Living Gate, where it shores up the universe's defenses against the Far Realm's intrusion. Thus, you seek to kill as many shardminds as possible, starting with the adherents of other philosophies. As a precautionary measure, you also seek out fragments of the Living Gate that have not yet awakened to sentience, and you destroy them as well, hoping to reduce the number of shardminds that will exist in the future. Most Shard Slayers are evil, and many are devoted to Vecna.

*Associated Skills:* Arcana, Intimidate

**Skill Bonuses:** +2 Nature, +2 Stealth
**Fey Origin:** You are native to the Feywild, so you are considered a fey creature for the purpose of effects that relate to creature origin.
**Hardy Form:** Choose Fortitude, Reflex, or Will. You gain a +1 racial bonus to that defense.
**Nature's Aspect:** Whenever you complete an extended rest, choose one of the following aspects of nature to manifest.

*Aspect of the Ancients:* You can use the *voyage of the ancients* power while you are in this aspect.

*Aspect of the Destroyer:* You can use the *wrath of the destroyer* power while you are in this aspect.

*Aspect of the Hunter:* You can use the *pursuit of the hunter* power while you are in this aspect.

**Encounter**

**Encounter**
**Immediate Reaction** **Personal**
**Trigger:** An enemy within 2 squares of you moves on its turn
**Effect:** You shift 3 squares. Until the end of your next turn, you deal 1d6 extra damage to the triggering enemy when you hit it, and you ignore the -2 penalty to attack rolls for attacking it when it has cover or concealment.

ADAM GILLESPIE

The wilden emerged from the unspoiled reaches, ancient bogs, and primeval forests of the Feywild. Awakened to fight the growing corruption plaguing the land, they strive to restore the natural order and to purge aberrant horrors from the world.

Play a wilden if you want . . .

- ✦ to embody nature's ability to right its own course.
- ✦ to adapt to the challenges you face by altering your essential nature.
- ✦ to be a member of a race that favors the battlemind, druid, invoker, and shaman classes.

## Physical Qualities

Wilden are plantlike fey creatures. Their bones are hardwood, and their supple, barklike skin trails into viny tendrils and a cloak of leaves.

Within each wilden lies nature's spirit, and all can manifest this spirit in different aspects. Each aspect triggers a transformation, reflecting the purpose for which the wilden were created. A wilden in the aspect of the ancients has eyes and leaves of white. When a wilden is in the aspect of the destroyer, jagged spurs break through the skin, and the eyes darken to black. The hunter's aspect camouflages a wilden's body with green and brown patterns, while the eyes take on an emerald color.

As wilden age, their bodies move through the seasons. Young wilden are like trees in spring, filled with life and vigor, their bodies a green hue. In the summer phase, a wilden's body is brown or tan, while the cloak of leaves remains vibrant green. Wilden in the autumn phase undergo a profound change, their skin darkening as their leaves turn color to reds, yellows, and oranges. Finally, the winter phase heralds the end of a wilden's life, as the body grows thinner and the wilden's leaves wither and fall.

A typical wilden lives more than a century.

## Playing a Wilden

The wilden are a race in its infancy. Wilden believe that they awoke to meet a threat moving across the Feywild and into the world: the rising power of the Far Realm and its incursions into the rest of the known universe, in the form of aberrant creatures.

Central to wilden existence are nature's three aspects: the keeper of ancient secrets, the destroyer, and the hunter. As keepers of ancient secrets, wilden act as stewards, preserving the land against any who would defile it. The destroyer aspect is nature's fury incarnate—the destruction embodied by hurricanes, tornadoes, and lightning strikes. The aspect of the hunter seeks out and eradicates aberrant corruption.

Individuality has no place in a wilden's life. Males and females display differences in personality and appearance, but all wilden regard themselves as parts of a greater whole. When speaking of themselves, wilden use the plural, saying "we" instead of "I."

As a new people, wilden lack grudges toward other races. Most wilden are eager to learn about other societies, beliefs, and cultures, and they might adopt the values of other races as their own.

Wilden can experience shifts in personality when they assume their aspects. They become thoughtful and cautious when in the aspect of the ancients, aggressive in the aspect of the destroyer, and secretive and withdrawn in the aspect of the hunter.

Even as wilden shape their beliefs through exposure to other cultures, they maintain that their purpose is to secure the Feywild and the natural world from harm. Wilden who worship gods venerate deities who cherish nature, such as Corellon, Melora, and Sehanine. Wilden also honor the primal spirits.

Wilden have no kingdoms or cities, but they regard all of nature as their home. When they gather, they do so in communities where the borders between the Feywild and the natural world are thinnest. Wilden live in harmony with nature, so even in these settlements, it is difficult to distinguish where the wilderness leaves off and the community begins.

**Wilden Characteristics:** Accepting, ambitious, contradictory, curious, driven, enigmatic, intolerant, measured, savage, violent

**Male Names:** Banmarden, Fiddenmar, Durmindin, Kettenbar, Midnorten, Rodmennar, Vennerzad

**Female Names:** Dannamai, Ennimbel, Kalkennash, Nementah, Shallahai, Tellorda, Zazenna

## Wilden Backgrounds

Here are background elements for wilden.

**Born of Ruin:** You were born in a place defiled by the Far Realm. You might have been born to wilden parents, or simply emerged from the dying plant life at the edges of the defilement. Perhaps you hope to return there and purge that place of its corruption when your power is great enough. Or perhaps there is no hope for it, and you can strive only to prevent such a catastrophe from occurring elsewhere.

*Associated Skills:* Arcana, Nature

**Hunted:** Something seems to know of you—and to want you dead. Destruction has followed you for your entire life, and the fact that you are alive seems to be proof that you are being preserved for some greater purpose. Are aberrant monsters drawn to try to destroy you? Is there a widespread cult devoted to a Far Realm overlord that seeks to kill you? Or is there simply a curse on you that brings destruction to everyone and everything you love?

*Associated Skills:* Bluff, Stealth

Building on the racial paragon paths presented in *Player's Handbook 2*, the paragon paths in the rest of this chapter are intended for this book's races.

## Blooded Champion

*"I do what I was made to do, for the causes I choose."*

**Prerequisite:** Minotaur

The warrior caste within minotaur society doesn't admit just anyone to its ranks. To be recognized as a champion, a blooded warrior, you must demonstrate both skill at arms and an unfailing discipline to master the beast that rages to be released. Time and again, you proved your mastery over your weapons and yourself until that day when you finally gained the recognition you rightly deserved.

Continuous training has done more for you than simply gaining you greater standing among your people. Your devotion to your craft elevates your fighting style beyond that of most warriors. Your weapons are extensions of your will, razor-sharp appendages that slice and hew as you direct them.

More important, you meld the spiritual forces guiding you on your life's journey with your own fighting spirit until you become a honed machine of war. The thrill of the fight rises with your adrenaline, but it doesn't master you. The urge to kill lends strength to your attacks, but doesn't overtake your self-control. You recognize the taint afflicting your people, and you know that to give in to these dark impulses is to step into the trap of bestial savagery that all your people must face. So each battle and each contest is a chance to demonstrate your resolve and your mind's focus on rising above the shadow that darkens your soul.

# Nature's Avatar

*"I am every aspect of nature, its power taken shape in me."*

**Prerequisite:** Wilden

Every wilden manifests the changing face of nature. Each day, a wilden chooses to embody one of nature's aspects.

For you, these aspects are not just transient states. They are reflections of nature's versatility and power. As you fight for the preservation of the world, you draw deeply from each aspect. You gain an additional benefit from each aspect while you are bloodied. You have learned ways to funnel the power of nature's aspects into your attacks. Eventually, you master the ability to quickly change your aspect to meet any challenge with the best tools at your command.

## Nature's Avatar Path Features

BETH TROTT

# Rrathmal

*"The search for enlightenment and the freedom we now possess do not allow us the luxury of quietly suffering our enemies."*

**Prerequisite:** Githzerai

Untold years of slavery shaped your people. Freedom molded them further during the split from those who became the githyanki. In the centuries since the githzerai gained independence, they have struggled to master themselves and prepared themselves against any threat to the liberty they earned so long ago. They will not be enslaved again.

Defense is not enough, however. Your people have always formed war bands to deal with menaces close and far. Highest among these groups is a rrakkma—a vengeance band. Mighty githzerai called rrathmals gather in these elite cadres to hunt those who still watch the free githzerai with covetous eyes. Each rrakkma sets out on a hunt, bringing destruction to mind flayers, githyanki, and other threats wherever they are found.

At times, a rrakkma has a goal, such as hindering ferreting out a hive of mind flayers. Sometimes the members of a rrakkmas wander until they have faced a number of foes sufficient to call the mission a success. To serve in a rrakkma is a great privilege, and githzerai preparing to join such a group receive special training. Even a githzerai who has proven worthy while traveling among nongithzerai might be so honored.

You are such a one. You have served your people well, proven yourself worthy of special training, or found a teacher who knows the techniques of the vengeance warriors of the githzerai. You have learned to make assaults decisively, pursue enemies relentlessly, and defeat foes utterly.

## Rrathmal Path Features

**Psychic Resistance (11th level):** You gain resist 10 psychic. The resistance increases to 15 at 21st level.

**Unfettered Action (11th level):** When you spend an action point to take an extra action, any effects on you that daze, restrain, slow, or immobilize end.

**Preternatural Instinct (16th level):** When you roll initiative, you can roll twice and use either result.

## Rrathmal Powers

**Trace Chance** — Rrathmal Attack 11

*By peering into the future, you pick through the possibilities to anticipate your enemy's next action.*

**Encounter**
**Standard Action** **Ranged** 5
**Target:** One creature
**Effect:** You gain a +2 bonus to the next melee attack roll you make against the target with an at-will power before the end of your next turn. If that attack hits, it is a critical hit.

**Rrathmal Pursuit** — Rrathmal Utility 12

*Even as your opponent withdraws, you are in motion, cutting off its retreat.*

**At-Will**
**Immediate Reaction** **Personal**
**Trigger:** An adjacent enemy shifts away from you
**Effect:** You shift your speed to a square adjacent to the triggering enemy.

**Vengeance Shroud** — Rrathmal Attack 20

**Target:** Each enemy in burst

**Hit:** 2d10 + Dexterity or Wisdom modifier psychic damage. The first time the target hits or misses during each of its turns, it takes 10 psychic damage (save ends).
**Miss:** Half damage.
**Effect:** The burst creates a zone that lasts until the end of your next turn. While within the zone, any ally can take 10 on the first attack roll of his or her turn, rather than rolling a d20.
**Sustain Minor:** The zone persists.

RALPH BEISNER

# Shard Disciple

*"My body is but one of many possible configurations of substance."*

**Prerequisite:** Shardmind

A shardmind's physical form is an amalgamation of crystalline shards that shardminds believe are fragments of the Living Gate, bound together by force of will into a humanoid form. Every shardmind has a limited ability to alter that form.

You, however, are a shard disciple; you have learned how to relax the bonds of your form to the point where your body becomes a swirling storm of crystalline fragments. You can disperse your body to protect yourself from attacks, and your *shard swarm* racial power lets you form yourself into a lethal cloud of crystals. As you advance in level, you learn to disperse your consciousness into your component fragments, allowing you to quickly recover from mortal injury or even maintain your consciousness in the form of a swirling storm of shards and psionic energy.

## Shard Disciple Path Features

**Perfect Shard Swarm (11th level):** Your *shard swarm* racial power becomes a close burst 2, instead of a close burst 1. In addition, you can use *shard swarm* to teleport your speed, instead of half your speed.

**Paragon Power Points (11th level):** You gain 2 additional power points.

**Swarm Action (11th level):** When you spend an action point to take an extra action, you take half damage from melee attacks and ranged attacks until the end of your next turn.

**Constant Swarm (16th level):** You can use your *shard swarm* racial power one additional time during each encounter.

## Shard Disciple Powers

**Irruption of the Living Gate** — Shard Disciple Attack 11

*Ruby shards explode around your foes. With the expenditure of psionic energy, you can transport yourself into the middle of the storm.*

**Encounter ✦ Implement, Psionic, Zone**
**Standard Action** **Area** burst 1 within 10 squares
**Target:** Each creature in burst
**Attack:** Intelligence vs. Reflex
**Hit:** 2d10 + Intelligence modifier damage.
**Effect:** The burst creates a zone that lasts until the end of your next turn. The zone is difficult terrain for your enemies.
**Augment 2 (Teleportation)**
**Area** burst 2 within 10 squares
**Effect:** As above, and while the zone persists, you can teleport to a square within it as a move action.

**Recrystallize** — Shard Disciple Utility 12

*Your wounds have broken your mental hold on your physical form, but a flicker of psionic energy within you lets you reconstitute your body elsewhere.*

**Daily ✦ Healing, Psionic, Teleportation**
**No Action** **Personal**
**Trigger:** You drop to 0 hit points or fewer
**Effect:** You spend a healing surge and then teleport 10 squares.

**Shard Storm** — Shard Disciple Attack 20

*The crystalline fragments of your body explode in a swirling whirlwind of psionic energy, forming a terrible storm to batter your enemies.*

**Daily ✦ Implement, Polymorph, Psionic, Teleportation, Zone**
**Standard Action** **Close** burst 3
**Target:** Each enemy in burst
**Attack:** Intelligence vs. Fortitude
**Hit:** 3d6 + Intelligence modifier damage.
**Effect:** The burst creates a zone that lasts until the end of your next turn or until you leave it. The zone is difficult terrain for your enemies, and any enemy that ends its turn within the zone takes 10 damage. While the zone persists, you take half damage from melee attacks and ranged attacks, and those attacks can't pull, push, or slide you. As a move action, you can teleport to a square within the zone.
**Sustain Minor:** The zone persists.

CHAPTER 2

# Character Classes

**Choosing a** class is the most important decision you make in creating a character, because it determines so much of what you can do. From armor and weapon proficiencies to power selection, your class is an important determinant of your character's capabilities, and it has a tremendous impact on your experience of the game.

This chapter introduces six classes to the D&D game, representing three power sources and all four character roles. The seeker expands the roster of primal classes first introduced in *Player's Handbook 2*. The runepriest provides a very different take on the divine leader from the cleric in the first *Player's Handbook*. The psionic power source is represented here by one class for each role: ardent, battlemind, monk, and psion.

Here you'll find descriptions of these six classes, along with four new paragon paths for each one. Following those classes are rules for hybrid characters, which combine two classes to bring a unique arsenal of powers and talents to an adventuring party.

**Ardent (page 22):** A psionic leader who manipulates the emotions of allies and enemies alike.

**Battlemind (page 42):** A psionic defender who exercises the power of the mind to control the body.

**Monk (page 62):** A psionic striker who combines focused melee attacks, often made unarmed, with incredible feats of movement and agility.

**Psion (page 80):** A psionic controller who uses mental powers to move objects or opponents, or to bend foes' minds to his or her will.

**Runepriest (page 98):** A divine leader who uses the mystical runes of the gods to form prayers of warding or destruction.

**Seeker (page 116):** A controller who calls on nature spirits to imbue arrows or other projectiles with primal power.

**Hybrid Characters (page 134):** New rules for combining the features and powers of two classes in a manner far more flexible than multiclassing.

**Epic Destinies (page 156):** The Diamond Soul, Godmind, Invincible Mind, Master of the Eternal Hunt, Rune Maker, and War Master destinies provide new epic options.

# ARDENT

***"The fate of the world rests on the fire of your passions."***

**CLASS TRAITS**

**Role:** Leader. You fill your allies with the will to fight and the clarity of purpose needed for victory. When you attack, you loose thoughts that intensify emotions and lay bare truths. Depending on your choice of class features, you lean toward either defender or striker as a secondary role.

**Power Source:** Psionic. You are a spiritual warrior whose thoughts swirl about you to infect your enemies with doubt and fill your allies with confidence.

**Key Abilities:** Charisma, Constitution, Wisdom

**Armor Proficiencies:** Cloth, leather, hide, chainmail

**Weapon Proficiencies:** Simple melee, military melee, simple ranged

**Bonus to Defense:** +1 Fortitude, +1 Will

**Hit Points at 1st Level:** 12 + Constitution score

**Hit Points per Level Gained:** 5

**Healing Surges per Day:** 7 + Constitution modifier

**Trained Skills:** From the class skills list below, choose four trained skills at 1st level.
*Class Skills:* Arcana (Int), Athletics (Str), Bluff (Cha), Diplomacy (Cha), Endurance (Con), Heal (Wis), Insight (Wis), Intimidate (Cha), Streetwise (Cha)

**Class Features:** Ardent Mantle, *ardent surge*, Psionic Augmentation

Those who let their base emotions rule them invite madness and destruction. Prolonged feelings of fear, greed, lust, or hatred can weaken the mind's defenses against manipulation. Wielding psionic power, you excite such emotions in your enemies, creating gaps in their defenses and frustrating their attacks, all while filling your allies with encouraging thoughts and guarding them against despair and other negative emotions.

Ardents rarely learn their art through formal training. In many ways, they are incidental leaders, having stumbled onto psionic power at some point earlier in their lives. How you discovered your psionic talent can shape how you wield this power now. You might have awakened to your talent in the heat of battle, experiencing a mental breakthrough that allowed you to augment your attacks by rending your enemies' minds. Or your friends might reflect your power when your mood bleeds into theirs, altering their emotional states to match your own. Regardless of the revelation, you learned to harness this power to support your fighting prowess and to guide your allies to victory.

WILLIAM O'CONNOR

# Ardent Class Features

Ardents have the following class features.

## Ardent Mantle

A person's state of mind can be armor against the decay and madness born from base emotions, and thus ardents gird themselves by donning particular mindsets to ward off the perils brought on by fear, despair, and hatred. Various emotional states, called mantles, can safeguard the mind. Ardents most commonly use the mantles of clarity and elation.

Choose one of the following options. Your choice gives a power to you as well as a benefit to you and your allies.

**Mantle of Clarity:** You and each ally within 5 squares of you gain a bonus to all defenses against opportunity attacks. The bonus equals your Wisdom modifier.

In addition, each ally within 5 squares of you gains a +2 bonus to Insight checks and Perception checks.

You also gain the *ardent alacrity* power.

**Mantle of Elation:** You and each ally within 5 squares of you gain a bonus to damage rolls for opportunity attacks. The bonus equals your Constitution modifier.

In addition, each ally within 5 squares of you gains a +2 bonus to Diplomacy checks and Intimidate checks.

You also gain the *ardent outrage* power.

## Ardent Surge

You gain the *ardent surge* power. Your advanced emotional state is inspirational, motivating your allies and helping them to recover from injuries.

## Psionic Augmentation

Through discipline and careful study, you have mastered a form of psionic magic that offers greater versatility than other characters command. You know a broad array of at-will powers, each of which is a conduit through which you can pour as much or as little psionic energy as you choose. You channel psionic energy into a reservoir of personal power—represented in the game as power points—that you can use to augment your at-will attack powers, replacing the encounter attack powers that other characters use.

Because of this class feature, you acquire and use powers in a slightly different manner from how most other classes do.

**At-Will Attack Powers:** At 1st level, you choose two at-will attack powers and one daily attack power from your class, but you don't start with any encounter attack powers from your class. You can instead augment your class at-will attack powers using power points. These powers have the augmentable keyword.

You gain new at-will attack powers from this class, instead of new encounter attack powers, as you increase in level. At 3rd level, you choose a new at-will attack power from this class. At 7th, 13th, 17th, 23rd, and 27th level, you can replace one of your at-will attack powers with another one of your level or lower. Both powers must be augmentable and from this class.

**Power Points:** You start with 2 power points. You gain 2 additional power points at 3rd and 7th level, 1 additional power point at 13th level, and 2 additional power points at 17th, 21st, 23rd, and 27th level. If you gain power points from another source (such as your paragon path), add them to your power point total. You can use your power points to augment any augmentable power you have, regardless of how you gained the power.

You regain all your power points when you take a short or an extended rest.

| Level | At-Will Attack Powers | Power Points |
|---|---|---|
| 1 | Choose two | Gain 2 |
| 3 | Choose one | Gain 2 (4 total) |
| 7 | Replace one | Gain 2 (6 total) |
| 13 | Replace one | Gain 1 (7 total) |
| 17 | Replace one | Gain 2 (9 total) |
| 21 | — | Gain 2 (11 total) |
| 23 | Replace one | Gain 2 (13 total) |
| 27 | Replace one | Gain 2 (15 total) |

# Creating an Ardent

Ardents depend on Charisma more than other abilities. Constitution is important for powers that improve your allies' attacks, and Wisdom is important if you want to foil your enemies' attacks. You can choose any powers you like, though many ardents favor one of the two builds described here.

## Ardent Overview

**Characteristics:** You lead your group from the front lines, mixing strong melee attacks with equally strong mental assaults. Your strikes can dismantle your enemies' defenses and make them more vulnerable to your allies' attacks. In addition, you can provoke allies to perform daring stunts and maneuvers, helping them gain better positions, leap across the battlefield to close with distant foes, or shrug off deadly afflictions.

**Religion:** Ardents gravitate toward wild and unpredictable gods, favoring those who represent war or wilderness. Kord and Melora are the most popular, with more independent ardents following Avandra. Evil ardents find much to like in Bane and Gruumsh.

**Races:** Humans, half-elves, and kalashtar are the most common ardents, though dragonborn, halflings, gnomes, and tieflings also excel in this class, having the natural charisma needed to focus their inner strength.

### Enlightened Ardent

You read your enemies' weaknesses and reveal them to your allies, and your keen insight helps your allies overcome damaging effects. Make Charisma your highest ability score. You should also consider investing in Wisdom to take advantage of powers that confuse your enemies. A high Constitution not only grants you more hit points and increases your Fortitude, but it also lets you employ powers normally used by euphoric ardents. Your secondary role is defender, and your leadership helps protect allies from harm.

**Suggested Class Feature:** Mantle of Clarity
**Suggested Feat:** Bolstering Mantle
**Suggested Skills:** Bluff, Diplomacy, Heal, Insight
**Suggested At-Will Powers:** *focusing strike*, *psionic shield*
**Suggested Daily Power:** *wormhole plunge*

### Euphoric Ardent

You can scarcely contain the emotions that strain against your will like a crashing tide. When you make your attacks, they flood out of you, increasing your allies' confidence and washing away your enemies' courage. Charisma should be your highest ability score, followed by a high Constitution score to improve those effects that raise your allies' spirits and diminish your enemies' capabilities. If you want to diversify your powers, a high Wisdom can't hurt, but you should also look to Dexterity for initiative checks and Reflex. Your secondary role is striker, and your powers can augment your allies' attacks.

**Suggested Class Feature:** Mantle of Elation
**Suggested Feat:** Heartening Surge
**Suggested Skills:** Athletics, Endurance, Intimidate, Streetwise
**Suggested At-Will Powers:** *demoralizing strike*, *ire strike*
**Suggested Daily Power:** *battleborn acuity*

## Ardent Powers

When you use your ardent disciplines, you transmit your thoughts and emotions to those around you. These sensations bleed into nearby creatures, either filling them with despair and pain or hope and vigor. Your powers are accompanied by visual signs, contained in a sudden corona of light that swirls out from your head and flares around you. The light's color reflects your mood, with brilliant scarlet flashes representing anger; green, health and vigor; black, fear and death; and so on. When you augment your powers by spending power points, the corona intensifies.

### Class Features

You have the *ardent surge* power and either *ardent outrage* or *ardent alacrity*, depending on your choice of Ardent Mantle.

**Ardent Alacrity** — Ardent Feature

*As you take a hit, your emotional energy inspires your allies.*

**Encounter ✦ Psionic**
**No Action** **Close** burst 5
**Trigger:** You are bloodied by an attack
**Target:** Each ally in burst
**Effect:** Each target can use a free action either to shift 1 square or to move half his or her speed.

**Ardent Outrage** — Ardent Feature

*As you take a hit, your anger unbalances your foes.*

**Encounter ✦ Psionic**
**No Action** **Close** burst 5
**Trigger:** You are bloodied by an attack

You are a brilliant vessel; you embody hope, joy, and endless confidence, and your presence lifts your allies' spirits. On the battlefield, you wash away despair, dispel doubt, and fuel your allies' passions. As an argent soul, you have an uncommonly pure spirit. You see the best in every situation, finding solutions where others find only defeat. Melancholy has no hold on you, for optimism's light burns away grief. Others find your good nature infectious and strive to rise to your example.

The road to becoming an argent soul is varied. You can simply be a good and wholesome person, untouched by the horrors you have witnessed, or you might have been touched by a god, your soul purified and claimed for a higher purpose. Regardless of the cause of your transformation, it is profound.

Whenever you attack with your ardent powers, a silver corona glimmers around you. Those it touches feel their confidence building, the pain from their injuries falling away so that they can keep fighting no matter the odds.

Though no chains bind them, your enemies become your prisoners. You are a psionic binder, a living prison whose thoughts are as strong as adamantine bonds. When you engage your foes, you redirect their thoughts inward, forming mental walls to constrain their thoughts and root them to the spot. You can keep your enemy imprisoned long enough for your allies to close in and deliver whatever justice the foe deserves.

The aberrant menace is a wily threat, slipping unseen into the mortal world and spreading its corrupting influence to foment unrest and mutation wherever it goes. No matter how many aberrant monsters are destroyed, others spawn to spread wickedness. The only answer is containment. By pinning down the threat, you can destroy it, one monster at a time.

By no means are your efforts exclusive to aberrant enemies. Any who stand against you in your single-minded pursuit deserve your dread attention.

# Stygian Adept

*"There are no fears but those of your own making."*

**Prerequisite:** Ardent

There are shadows in the mind. Unnerving memories, old fears, and crushing disappointments all lie ready to be exploited and manipulated. Those who know these fears can turn them into weapons, amplified until they unravel the consciousness. You are familiar with these fears, and you wield them like razors.

As a stygian adept, you sense the fear and terror in your enemies, harnessing these emotions and using them to attack your foes' minds. With your powers you can create phantom terrors that only your opponent can perceive, distracting the enemy from your allies as they move into position. A foe firmly in your grasp finds itself lost in a maze of half-realized imaginings, each more terrible than the last.

## Stygian Adept Path Features

**Fleeing Fear (11th level):** Whenever you hit an enemy with a fear power, you can slide the enemy 1 square.

**Paragon Power Points (11th level):** You gain 2 additional power points.

**Unraveling Action (11th level):** When you spend an action point to make a fear attack, each target hit by the attack has vulnerability to all damage until the end of your next turn. The vulnerability equals your Constitution modifier.

**Fearsome Zone (16th level):** Enemies in any zone created by your psionic powers take a –2 penalty to attack rolls. Enemies that are immune to fear ignore this penalty.

## Stygian Adept Disciplines

**Hit:** 1[W] + Charisma modifier psychic damage, and you push the target a number of squares equal to your Constitution modifier.
**Augment 2**
**Hit:** As above, and you or one ally can make a melee basic attack against the target as an opportunity action at any point during the push.

**Haunting Shadows** Stygian Adept Utility 12

*Doubts blur your enemies' vision, making it hard for your foes to see the true threat before them.*

**Daily ✦ Psionic, Zone**
**Minor Action** **Close** burst 3
**Effect:** The burst creates a zone that lasts until the end of your next turn. When you move, the zone moves with you, remaining centered on you. Your allies have concealment against enemies that are within the zone.

**Miss:** Half damage.
**Effect:** You conjure a subconscious horror in an unoccupied square within 5 squares of you. The horror lasts until the end of your next turn. The horror is invisible to everyone but you and the target. **Sustain Minor:** The horror persists, and you can move it 4 squares.

CHRIS SEAMAN

# Talaric Strategist

*"Your thoughts betray you."*

**Prerequisite:** Ardent

Long ago, when aberrant monsters first spilled into the mortal world, a warrior society was formed to protect the world from the Far Realm's corrupting influence. The society's members recorded their techniques in a volume known as the *Talaric Codex*. In it were the forms and disciplines needed to master their psionic fighting art. In the countless years since its formation, the society has decayed and dissolved. Its monasteries have fallen, and the writings of its adepts have been scattered across the world.

You have found fragments of writing from this ancient society and learned to focus your psionic powers to give you a tactical advantage in battle. Because your training was haphazard and pieced together from fragments of lore, you improvise where your training is incomplete, drawing from your ardent powers to fill your gaps in knowledge. Still, the teachings you uncovered proved instructive, and you can take charge of nearly any battlefield.

Central to your learning is the ability to read your enemies' intent and turn it against them. You translate the clarity of your vision and your openness to the thoughts and experiences of those around you into a decided tactical advantage. You can warn allies against impending attacks, move companions to adapt to enemy formations, and help your allies scatter when they are faced with devastating magic.

**Class Features:** Psionic Augmentation, Psionic Defense, Psionic Study

As wanderers, mercenaries, and adventurers, battleminds are carefree warriors who seek only to test their skill against the mightiest and most dangerous opponents. Battleminds possess a potent combination of psionic and physical skill, allowing them to use their magic to manipulate and deceive their foes even as their fighting skill lets them carve a swath through enemy ranks. Battleminds tend to be bold and sometimes arrogant, an attitude earned through bringing ruin to enemies over the course of many conflicts.

You might not share your fellow battleminds' arrogance, but you do have access to an array of combat abilities that let you manipulate, baffle, and defeat your enemies. Your mind is as deadly as your weapon, and with the aid of your psionic magic, your body can turn aside attacks as effectively as a suit of plate armor can.

Let those who would stand against your might quiver in terror when you approach, for you are a battlemind, and supremacy in combat is your birthright.

WILLIAM O'CONNOR

# Battlemind Class Features

Battleminds have the following class features.

## Psionic Augmentation

Through discipline and careful study, you have mastered a form of psionic magic that offers greater versatility than other characters command. You know a broad array of at-will powers, each of which is a conduit through which you can pour as much or as little psionic energy as you choose. You channel psionic energy into a reservoir of personal power—represented in the game as power points—that you can use to augment your at-will attack powers, replacing the encounter attack powers that other characters use.

Because of this class feature, you acquire and use powers in a slightly different manner from how most other classes do.

**At-Will Attack Powers:** At 1st level, you choose two at-will attack powers and one daily attack power from your class, but you don't start with any encounter attack powers from your class. You can instead augment your class at-will attack powers using power points. These powers have the augmentable keyword.

You gain new at-will attack powers from this class, instead of new encounter attack powers, as you increase in level. At 3rd level, you choose a new at-will attack power from this class. At 7th, 13th, 17th, 23rd, and 27th level, you can replace one of your at-will attack powers with another one of your level or lower. Both powers must be augmentable and from this class.

### Battlemind Overview

**Characteristics:** Your heavy armor allows you to take on your enemies' attacks without fear, and your melee attacks that are augmented by psionic magic let you control your enemies like puppets and set them up for defeat. You excel at controlling the battle line and forcing enemies to fight you while your allies wreak havoc.

**Religion:** Battleminds who live up to this class's renowned arrogance rarely pray to the gods, and stories abound of battleminds whose ill luck could be placed at the feet of their impiety. Those battleminds who do follow the gods typically revere Kord for his martial skill and strength, Bahamut for his practice of justice, or Ioun for being the originator of psionic magic.

**Races:** Dwarves and wilden make excellent resilient battleminds, putting their Constitution and Wisdom to great use in shaping their bodies to meet the needs of combat. Half-elves are ideal quick battleminds, channeling their natural Charisma into psionic alacrity. Goliaths' sheer physical power makes them well suited for this class, and many gnome and tiefling warriors are drawn to the guile and trickery of some battlemind powers.

**Power Points:** You start with 2 power points. You gain 2 additional power points at 3rd and 7th level, 1 additional power point at 13th level, and 2 additional power points at 17th, 21st, 23rd, and 27th level. If you gain power points from another source (such as your paragon path), add them to your power point total. You can use your power points to augment any augmentable power you have, regardless of how you gained the power.

You regain all your power points when you take a short or an extended rest.

| Level | At-Will Attack Powers | Power Points |
|---|---|---|
| 1 | Choose two | Gain 2 |
| 3 | Choose one | Gain 2 (4 total) |
| 7 | Replace one | Gain 2 (6 total) |
| 13 | Replace one | Gain 1 (7 total) |
| 17 | Replace one | Gain 2 (9 total) |
| 21 | — | Gain 2 (11 total) |
| 23 | Replace one | Gain 2 (13 total) |
| 27 | Replace one | Gain 2 (15 total) |

## Psionic Defense

Three powers—*battlemind's demand*, *blurred step*, and *mind spike*—help you maintain tactical superiority in combat. You can use these psionic powers to demand your enemies' attention, follow them if they try to avoid you, and punish them if they attack your allies. This combination of mental compulsion and psionic enhancement of your own capabilities makes you a force to be reckoned with in battle.

## Psionic Study

Battleminds learn to fight using their bodies as weapons. Some battleminds alter their own form to fit their needs. Other battleminds use their psionic power to predict the best position for launching an attack.

Choose one of these options.

**Battle Resilience:** You gain the *battle resilience* power, which reflects your ability to use your psionic power to bend your own body to protect yourself.

**Speed of Thought:** You gain the *speed of thought* power, which allows you to be always ready for a fight.

# Creating a Battlemind

Battleminds rely on Constitution, Charisma, and Wisdom for their powers. You can choose any powers you like, but many battleminds choose powers that complement their choice of combat style.

### Resilient Battlemind

You use your psionic power to transform your body, altering it to take on the qualities of iron or stone, or to transform your weapon so it hits harder or bypasses your foes' protections. Make Constitution your highest ability score, followed by Wisdom to reflect the strong mental control you have over your physical state. Charisma is a good third choice. For daily powers, consider those that alter your form and provide additional augmentations you can use for your other powers.

**Suggested Class Feature:** Battle Resilience
**Suggested Feat:** Deceptive Mind
**Suggested Skills:** Arcana, Endurance, Intimidate
**Suggested At-Will Powers:** *iron fist*, *bull's strength*
**Suggested Daily Power:** *aspect of elevated harmony*

### Quick Battlemind

You use your psionic power to make yourself faster, increasing your speed and agility in combat. Make Constitution your highest ability score, followed by Charisma to reflect your ability to project your psionic power into the world. Wisdom should be your third-best ability. For daily powers, consider those that grant new opportunity actions to you, ensuring that your foes can't outmaneuver you.

**Suggested Class Feature:** Speed of Thought
**Suggested Feat:** Improved Speed of Thought
**Suggested Skills:** Arcana, Athletics, Insight
**Suggested At-Will Powers:** *demon dance*, *whirling defense*
**Suggested Daily Power:** *steel unity strike*

Your unmatched endurance allows you to stand at the forefront of any battle. You exult in the look of despair that crosses your enemy's face as blade, arrow, and claw rebound harmlessly off you. JASON A. ENGLE

# Zephyr Blade

*"Can you stop the wind? Can you grasp it in your hands? If not, you stand no chance of stopping me."*

**Prerequisite:** Battlemind

Without formal training, you learned your techniques in a haphazard fashion, unlocking your potential with each contest, awakening new techniques as you blended psionic power with your weapon strikes. At some point during your battles, you began to hear a faint wailing—subtle, quiet, but definitely present. Now when you fight, the breeze whips up into a storm, lending new strength to your attacks.

What you hear are psionic winds swirling around you. Your crude methods cause psionic power to bleed from you. Instead of dissipating, it swirls, blowing around you, unseen and unnoticed by any but you and the enemies who stand against you. When you reclaim this power, your body undergoes a strange transformation, becoming disjoined from reality for a moment or two before you snap back into place.

The more you work with this loosed psionic power, the more ephemeral you become. You can stir up the power to rip through your enemies' minds, or you can draw it into yourself to vanish and reappear where least expected.

**Class Features:** Monastic Tradition, Unarmed Combatant, Unarmored Defense

From high in forbidding mountains to deep in the alleys of a city's meanest district, the ascetic warriors known as monks practice their art. By focusing on their minds and bodies, honing both to near perfection, they master a psionic fighting art that allows them to deliver a punch with the force of a giant's club and to absorb attacks as easily as a heavily armored knight. Monks tap into the psionic potential that rests within themselves, turning that energy further inward to fortify their bodies and sharpen their minds.

Perhaps you set out on this path to put a dark past behind you. Or your village was victimized one time too many by an evil lord or marauding beasts, and you now seek justice. No matter what your motivation, the path of the monk transforms you into a living weapon.

WILLIAM O'CONNOR

The road opens wide before you. With little more than a walking stick and perhaps a satchel of food, you are ready to take on whatever the world can throw at you. Your years of training taught you to turn your eye inward. Now it is time to look outward and test yourself against the world's dangers.

# Monk Class Features

Monks have the following class features.

## Monastic Tradition

Monks train in a number of traditional techniques, with each monastery focusing on a specific style. Choose either Centered Breath or Stone Fist as your tradition. The choice you make grants you a Flurry of Blows power and a defensive benefit.

### Centered Breath

The Centered Breath tradition emphasizes honing your mental awareness to better harness psionic magic. This tradition teaches that only by controlling yourself can you control your environment. The tradition's adherents are typically ascetics, whose monasteries stand in quiet corners of the world where the monks can train and study without distraction. In some of these monasteries, speech is forbidden except for one hour each day.

**Flurry of Blows:** You gain the *centered flurry of blows* power.

**Mental Equilibrium:** You gain a +1 bonus to Fortitude. This bonus increases to +2 at 11th level and +3 at 21st level.

### Monk Overview

**Characteristics:** You use powers that combine movement with powerful strikes, allowing you to dart in and out of battle without risking attack from your foes. Compared to other strikers, you are better at taking on small groups of enemies. You hit, move, and fade away before your enemies can respond.

**Religion:** Bahamut attracts monks who serve as champions of good. Other monks revere Kord, seeing in his battle prowess an example they can aspire to. Contemplative monks devote themselves to Ioun, seeking to hone their minds and bring their entire beings into balance. A few monks forgo devotion to the gods, preferring to find strength in rigorous adherence to their ascetic principles and the training needed to unlock their psionic powers.

**Races:** Humans are the most common monks and master a greater variety of fighting styles than monks of other races. Githzerai society is built around monastic communities, and many members of that race adopt the monk class. Elves are talented monks, since their awareness and agility are both useful tools in studying monastic disciplines.

### Stone Fist

The Stone Fist tradition is one of physical mastery, relentless exercise, and athletic perfection. Its adherents seek to master their bodies, turning themselves into living weapons capable of supernatural feats of strength, agility, and speed. Monks of the Stone Fist prefer to study among the trappings of civilization. Some Stone Fist monasteries are small schools built in towns and villages, where students work as laborers and artisans when they aren't training. Other Stone Fist monasteries stand in the most forbidding regions of the world—from the bitter cold of the tundra to the edge of a rumbling volcano—to test their students' endurance day after day.

**Flurry of Blows:** You gain the *stone fist flurry of blows* power.

**Mental Bastion:** You gain a +1 bonus to Will. This bonus increases to +2 at 11th level and +3 at 21st level.

## Unarmed Combatant

You can make unarmed attacks with much greater effectiveness than most other combatants can. When you make a weapon attack such as a melee basic attack, you can use the monk unarmed strike, which is a weapon in the unarmed weapon group. This weapon has the off-hand weapon property and a +3 proficiency bonus, and it deals 1d8 damage. You must have a hand free to use your monk unarmed strike, even if you're kicking, kneeing, elbowing, or headbutting a target. Your monk unarmed strike can't be turned into a magic weapon, but it can benefit from a magic ki focus if you have one (see "Implements" below).

## Unarmored Defense

While you are wearing cloth armor or no armor and aren't using a shield, you gain a +2 bonus to AC.

# Implements

Monks usually channel their psionic energy through an item called a ki focus, which is a wooden practice weapon, prayer beads, a manual of lore, or some other object a monk studies or uses during training or meditation. After you attune yourself to a ki focus, you can use it as an implement when it is on your person (see "Ki Focuses," page 203).

When you wear or hold your ki focus, you can add its enhancement bonus to the attack rolls and the damage rolls of monk powers and monk paragon path powers that have the implement keyword. You can also add its enhancement bonus to the attack rolls and the damage rolls of weapon attacks you make using a weapon with which you have proficiency.

You can also use a weapon with which you have proficiency as an implement. When wielding the weapon as an implement, the weapon's characteristics—proficiency bonus, damage die, and weapon properties like defensive or high crit—are irrelevant to your implement powers.

If you have both a magic ki focus and a magic weapon, you choose before you use an attack power whether to draw on the magic of the ki focus or the weapon. Your choice determines which enhancement bonus, critical hit effects, and magic item properties and powers you can apply to that power. You can't, for example, use the enhancement bonus of your ki focus and the critical hit effect of your magic weapon with the same attack.

# Creating a Monk

You can make your monk however you like. The builds here provide suggestions based on the monastic traditions of Centered Breath and Stone Fist. All monks use Dexterity for their attacks. Wisdom increases the effect of attacks associated with the Centered Breath tradition, and Strength is important for attacks associated with the Stone Fist tradition.

## Centered Breath Monk

You search for the flow of energy within yourself, the world, and each battle. Calmly anticipating your enemy's attacks, you move swiftly across the battlefield and excel at projecting your psionic energy outward to control your enemies and foil their plans. Dexterity should be your highest score, Wisdom should be your second, and Strength can be your third, since you will probably want to select a mix of powers that use Wisdom and Strength.

**Suggested Class Feature:** Centered Breath

**Suggested Feat:** Pointed Step Style

**Suggested Skills:** Acrobatics, Athletics, Insight, Perception

**Suggested At-Will Powers:** *dancing cobra, five storms*

**Suggested Encounter Power:** *drunken monkey*

**Suggested Daily Power:** *masterful spiral*

## Stone Fist Monk

Your fighting style is aggressive, emphasizing powers that eliminate your enemy quickly, rather than powers that help you control the battle. Though capable of rapid movement, your combat maneuvers are more likely to consist of a couple of quick steps, rather than a rapid shift across the entire battle. As with other monks, Dexterity should be your highest score. Choose Strength as your second-highest ability score, followed by Wisdom.

**Suggested Class Feature:** Stone Fist

**Suggested Feat:** Crashing Tempest Style

**Suggested Skills:** Acrobatics, Athletics, Endurance, Perception

**Suggested At-Will Powers:** *crane's wings, dragon's tail*

**Suggested Encounter Power:** *awaken the slumbering hurt*

**Suggested Daily Power:** *spinning leopard maneuver*

### Monks and Weapons

Your monk attack powers are implement powers, meaning they are enhanced by the powers, properties, and enhancement bonus of your ki focus or a weapon you use as an implement. All your monk attacks can involve the use of a weapon, whether it's your monk unarmed strike or a manufactured object. Because the attacks can draw on the magic of your ki focus, they are equally effective whether you wield a quarterstaff or batter your foes with punches and kicks.

You might want to use a weapon so that you can take advantage of feats such as Shielding Whirlwind Style or Crashing Tempest Style. You can switch weapons with ease or pick up whatever is at hand to attack your foes, drawing on the power of your ki focus instead of relying on the strength of magically enhanced steel.

You might also want to carry a sling or some shuriken so that you can make ranged basic attacks.

# Monk Powers

Your monk powers are called disciplines. They rely on your physical training, mental focus, and mastery of psionic magic to function.

### Full Discipline

Many monk powers have the full discipline keyword (page 217). A full discipline power gives you at least two actions to choose from, usually an attack technique and a movement technique. Attack techniques usually require a standard action, and movement techniques are options for your move actions. For a monk, a full discipline power represents a fighting style, a unique combination of a move and an attack.

Proximity to the darkened plane informed the monastery's fighting techniques as they developed into their current forms.

# Initiate of the Dragon

*"The dragon holds many secrets, and with those secrets, I battle the forces of darkness."*

Your monastery teaches that with the right focus and discipline, you too can master the secrets of the dragon.

You learn to focus your psionic power outward, unleashing the dragon's fiery breath and turning your skin into an armored hide of dragon scales. # Radiant Fist

*"My power comes from within, and I wield it in the name of the gods."*

**Prerequisite:** Monk, trained in Religion

You studied in a monastery devoted to the gods, guiding your mastery of psionic magic with the discipline and study of your faith. You likely worship Pelor or Bahamut, but most non-evil deities have at least one monastery dedicated to the fighting arts.

Your monk abilities are touched by divine power, allowing you to channel radiant energy and tap into the astral realm. Like other monks, you move with incredible speed and hit with unmatched power. In addition, the gods provide you with the ability to quash those who follow the gods of evil.

Dwarf monks are frequently drawn to this paragon path, since their piety and endurance allow them to withstand the mental and physical demands placed on a radiant fist.

## Radiant Fist Path Features

**Channel Divinity (11th level):** You gain the Channel Divinity class feature, which means you can use a single Channel Divinity power once per encounter. You also gain a divinity feat of your choice.

**Radiant Fist's Action (11th level):** When you spend an action point to take an extra action, you regain 15 hit points. Until the end of your next turn, your attacks deal extra radiant damage equal to your Wisdom modifier.

**Radiant Hammer Fists (16th level):** Whenever your Flurry of Blows power deals damage, you can make that damage radiant, instead of any other damage type. In addition, whenever you score a critical hit with a monk power or a radiant fist power, each enemy adjacent to you is blinded until the end of your next turn.

**Class Features:** Discipline Focus, Psionic Augmentation, Ritual Casting

Psions are the quintessential manipulators of psionic power. Psions unleash the potential locked within every conscious mind, move objects with just a thought, and assume command of even the least desire of their foes. Psions make manifest their secret wishes when others can only dream.

You know the mental pathways that lead to amazing edifices of altered reality. You could be a brash human youth flush with your mental ability's first flowering, a tattooed cenobite enrolled in a secret psionic academy, a fey enchanter using ancient techniques to beguile your foes, or perhaps a specially trained inquisitor who has learned one secret too many.

A flare of mental energy warms you, the thoughts of friends and foes glitter like stars all about you, and your thoughts themselves are weapons half sheathed. If a god can reshape the world and you can enthrall a god, what does that make you?

# Psion Class Features

Psions have the following class features.

## Discipline Focus

Psions focus their studies and meditations toward perfecting or understanding a particular concept or manifestation of psionic power. Choose one of these options. Your choice represents the focus of your studies.

**Telekinesis Focus:** You gain the powers *far hand* and *forceful push*.

**Telepathy Focus:** You gain the powers *distract* and *send thoughts*.

## Psionic Augmentation

Through discipline and careful study, you have mastered a form of psionic magic that offers greater versatility than other characters command. You know a broad array of at-will powers, each of which is a conduit through which you can pour as much or as little psionic energy as you choose. You channel psionic energy into a reservoir of personal power—represented in the game as power points—that you can use to augment your at-will attack powers, replacing the encounter attack powers that other characters use.

Because of this class feature, you acquire and use powers in a slightly different manner from how most other classes do.

**At-Will Attack Powers:** At 1st level, you choose two at-will attack powers and one daily attack power from your class, but you don't start with any encounter attack powers from your class. You can instead augment your class at-will attack powers using power points. These powers have the augmentable keyword.

You gain new at-will attack powers from this class, instead of new encounter attack powers, as you increase in level. At 3rd level, you choose a new at-will attack power from this class. At 7th, 13th, 17th, 23rd, and 27th level, you can replace one of your at-will attack powers with another one of your level or lower. Both powers must be augmentable and from this class.

**Power Points:** You start with 2 power points. You gain 2 additional power points at 3rd and 7th level, 1 additional power point at 13th level, and 2 additional power points at 17th, 21st, 23rd, and 27th level. If you gain power points from another source (such as your paragon path), add them to your power point total. You can use your power points to augment any augmentable power you have, regardless of how you gained the power.

You regain all your power points when you take a short or an extended rest.

| Level | At-Will Attack Powers | Power Points |
|---|---|---|
| 1 | Choose two | Gain 2 |
| 3 | Choose one | Gain 2 (4 total) |
| 7 | Replace one | Gain 2 (6 total) |
| 13 | Replace one | Gain 1 (7 total) |
| 17 | Replace one | Gain 2 (9 total) |
| 21 | — | Gain 2 (11 total) |
| 23 | Replace one | Gain 2 (13 total) |
| 27 | Replace one | Gain 2 (15 total) |

## Ritual Casting

You gain the Ritual Caster feat as a bonus feat, allowing you to use magical rituals (see Chapter 10 of the *Player's Handbook*). You own a ritual book. Choose either Sending or Tenser's Floating Disk. Your book contains that ritual, which you can use without expending components once per day. It also contains another 1st-level ritual of your choice.

# Implements

Psions employ orbs and staffs to focus their psionic energy into their powers. When you wield a magic orb or staff, you can add its enhancement bonus to the attack rolls and the damage rolls of psion powers and psion paragon path powers that have the implement keyword. Without an implement, you can still use these powers.

## Psion Overview

**Characteristics:** Brandishing the might of your mind, you unleash psionic powers against your foes. Your powers allow you to manipulate a foe's mind with telepathic commands and scatter a group of enemies with telekinetic bursts. You can augment your at-will powers by spending power points, providing you more options than nearly any other class has.

**Religion:** Ioun, the god of knowledge, is often considered the patron of psionic magic, and many psions worship her. Telepathic psions who live by tricking their foes often follow Sehanine, and psions who view the practice of psionic magic as an art form pray to Corellon. Other psions choose deities based on ideals beyond their choice of class: Psions who believe fiercely in justice worship Bahamut, and those who seek to expand the power of civilization worship Erathis, for example. Evil psions (and a few unaligned ones as well) often worship Vecna, the god of secrets.

**Races:** Psionic power is most prevalent among humans, who are quick to exploit even a hint of latent psionic talent. However, many fey adventurers use psionics to beguile and bewilder their enemies, and both gnomes and eladrin are commonly telepathic psions. Tieflings, perhaps as an expression of their diabolic heritage, also enjoy manipulating the minds of their foes.

# Creating a Psion

All psions rely on Intelligence. Psions also benefit from a high Charisma or Wisdom, depending on which expression of the class they favor. Psions often choose feats, skills, and powers to complement the ability score related to their choice of focus.

## Telekinetic Psion

As a telekinetic psion, you prefer to use mental force on creatures and objects. You choose powers that let you manipulate foes by flinging them around the battlefield or by binding them in place, as well as powers that create defensive barriers. Intelligence is the key ability for your attacks, so make it your highest score. Choose Wisdom as your next-highest score to increase the effects of your telekinetic abilities. Select powers that allow you to reorder the battlefield and that make the best use of your high Intelligence and Wisdom scores.

**Suggested Class Feature:** Telekinesis Focus
**Suggested Feat:** Controlling Advantage
**Suggested Skills:** Arcana, Dungeoneering, Insight, Perception
**Suggested At-Will Powers:** *kinetic trawl*, *force punch*
**Suggested Daily Power:** *telekinetic anchor*

## Telepathic Psion

As a telepathic psion, you focus on influencing your enemies' minds. You choose powers that persuade foes to mistake friend for foe, that crush minds in your psychic grip, and that take control of an enemy's will. Your attack powers use Intelligence; make it your highest ability score. Powers tailored for your build often use Charisma, so it should be your second-best score. Select powers that help you control your enemies and make the best use of your high Intelligence and Charisma scores.

**Suggested Class Feature:** Telepathy Focus
**Suggested Feat:** Precise Mind
**Suggested Skills:** Arcana, Bluff, Diplomacy, Insight
**Suggested At-Will Powers:** *memory hole*, *mind thrust*
**Suggested Daily Power:** *mental trauma*

## Cerulean Adept

*"The walls of the world are thinner than most suspect. Demons and undead are bad enough, but things far worse seek to break through and feast on reality. I won't allow it."*

**Prerequisite:** Psion

An order of protectors called the Keepers of the Cerulean Sign formed long ago to face the threat of the Far Realm's collision with reality. The keepers achieved a great victory and fenced out an invading sovereignty of madness behind potent seals. But as often happens, without an imminent threat to face, the protectors slowly faded from history, and their most potent weapons, artifacts known as the Seven Cerulean Seals, were lost or destroyed.

But the Far Realm remains. Its presence is a barb in reality's side. Some say psionic power itself is the world's answer to the Far Realm. Just as a body unconsciously fights off sickness, the universe prepares for some future battle by sowing psionic potential among its denizens.

Your psionic ability alerted you to the growing aberrant threat at a young age. Despite being a psionic weapon against aberrant spawn, you sought out even more potent weapons. While in the depths of a psionic trance, you glimpsed the original Cerulean Seals. There is little hope of recovering them, but you formed an image of them in your mind and created a copy. Like one of the seals, your copy—a Cerulean Sign—consists of a stylized white tree on a sky-blue background. You have taken up the sign and pledged yourself to the world's defense.

Your dream form occupies its square, and you and your allies can move through it. When you take a move action, you can also move your dream form a number of squares equal to your speed. You can see and hear as if you were in your dream form's square, and you can use powers as if you were there. Your dream form can flank with your allies, and you gain combat advantage against any target your dream form is flanking.

# Time Bender

*"When you talk about the passage of time, how little you really understand. For me, time and space are interchangeable."*

**Prerequisite:** Psion

Psions, especially those who prefer telekinetic powers to telepathic ones, instinctively recognize how the fabric of space is just one side of the swath; the other side is time. Objects, creatures, and worlds travel through both, though time is a direction that has only a single route—forward—while space allows movement any which way.

Or so it seems to most. But for those who are able to literally grasp the fabric of space to stretch, compact, and shape it, time is more malleable, within limits. Understanding this fact opens up new possibilities.

You recognize time's pliability. You already have an arsenal of mental tools capable of gripping the seams in the material of space. You have discovered that you can also use your understanding of the nature of time as a springboard to greater power. As your knowledge of time's intricacies has grown, so has your ability to affect time. You believe you'll soon be wielding time like a sword to cut down your foes before they even understand they're in danger.

## Time Bender Path Features

**Time-Lapse (11th level):** When you spend an action point to make an attack with a psionic power, you gain a +1 bonus to the attack roll and can teleport 6 squares as a free action after the attack.

**Loan from the Past (11th level):** Whenever you roll initiative, roll an additional d20. Once during that encounter, you can replace an attack roll, a skill check, an ability check, or a saving throw with that roll.

**Paragon Power Points (11th level):** You gain 2 additional power points.

**Borrow from the Future (16th level):** You can take an extra move action during your turn, but if you do so, you lose your move action on your next turn. You can't use this feature on consecutive rounds.

## Time Bender Disciplines

JIM NELSON

# Uncarnate

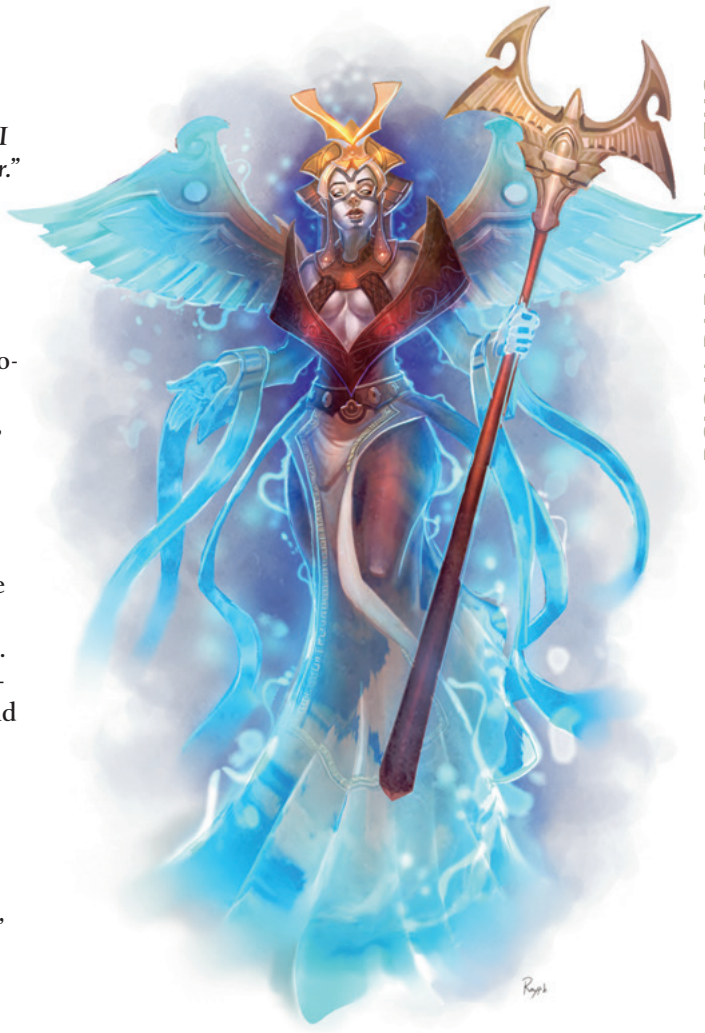
*"This shell of skin, organs, and bones is only a vessel—one I yearn to leave behind to be free of the limitations of matter."*

**Prerequisite:** Psion

An uncarnate's ultimate goal is to become a being of pure mind, unbound by the limits of corporeality. "The flesh is weak, but the mind is strong" is an aphorism among many psions, but uncarnates take it as their guiding truth. They seek to become discarnate, to grow into creatures of pure thought held together by psionic will.

Uncarnates don't seek the paths of undeath that some arcanists choose. Though uncarnates using their abilities are sometimes mistaken for wraithlike spirits, such spirits are bound by the chill chains of undeath, not the self-generated will of psionic might.

You set yourself possibly the greatest psionic challenge: to maintain the clarity and power of your mind as you slowly work at forgetting the flesh that supports it. In the end, it's only the mind that matters.



## Uncarnate Path Features

**Flicker into Nothing (11th level):** When you spend an action point to attack with a psionic power, you become insubstantial until the end of your next turn.

**Misty Step (11th level):** Your psionic attacks ignore the insubstantial quality.

**Paragon Power Points (11th level):** You gain 2 additional power points.

**Discarnate Form (16th level):** When you spend at least 4 power points to augment a psionic power, you become insubstantial until the end of your next turn.

## Uncarnate Disciplines

**Phantom Hook** Uncarnate Attack 11

*You let fly a psychic harpoon, which disrupts both flesh and incorporeal matter with equal reliability.*

**Encounter ✦ Augmentable, Implement, Psionic, Psychic**
**Standard Action** **Ranged** 20
**Target:** One creature
**Attack:** Intelligence vs. Fortitude
**Hit:** 2d10 + Intelligence modifier psychic damage, and you pull the target 1 square. If the target is insubstantial, it loses the insubstantial quality until the end of your next turn.
**Augment 2**
**Hit:** 2d12 + Intelligence modifier psychic damage, and you pull the target 5 squares. If you pull the target to a square adjacent to you, the target is immobilized until the end of your next turn. If the target is insubstantial, it loses the insubstantial quality until the end of your next turn.

**Shed Body** Uncarnate Utility 12

*You cast aside your body, briefly becoming a creature of pure thought.*

**Daily ✦ Psionic**
**Minor Action** **Personal**
**Effect:** You become a being of thought until the end of the encounter. In this form, you are insubstantial, gain fly 6 (hover; altitude limit 2) and a +2 power bonus to AC and Reflex, and can't take standard actions. You can end the effect as a minor action.

**Dissolve the Flesh** Uncarnate Attack 20

*You concentrate on the matter making up your foe. With a psionic strike, you destabilize that matter, and your foe begins to dissolve away.*

**Daily ✦ Implement, Psionic**
**Standard Action** **Area** burst 1 within 20 squares
**Target:** Each enemy in burst
**Attack:** Intelligence vs. Fortitude
**Hit:** 3d6 + Intelligence modifier damage, and ongoing 10 damage (save ends).
**First Failed Saving Throw:** The target is also dazed (save ends).
**Miss:** Half damage, and ongoing 5 damage (save ends).

# RUNEPRIEST

*"The divine runes of might are stronger than any steel, more dangerous than any spell."*

*Class Skills:* Arcana (Int), Athletics (Str), Endurance (Con), Heal (Wis), History (Int), Insight (Wis), Religion (Int), Thievery (Dex)

**Class Features:** Rune Master, *rune of mending*, Runic Artistry

Isolated in sacred forges and holy libraries, runepriests seek to unlock the secrets of the runes of divine power. Legend holds that the gods crafted a set of powerful runes, each imbued with a core of divine power, to help create the world and give it order. During the long war against the primordials, many of these runes were lost. Even the gods only dimly recall the runes of power. Somewhere in the forgotten depths of a dungeon or the isolated corner of the planes, those ancient runes wait to be discovered. A runepriest can learn much in the peaceful halls of a temple, but sooner or later he or she must put on armor and go forth to find or create a new rune, and in so doing earn a name among the masters of rune magic.

You learned the art of rune smithing from your master. Perhaps you sweated over a forge deep within a dwarven stronghold, crafting weapons and armor for the faithful as part of your apprenticeship. Or you might have helped inscribe runes in the living wood of the forest, crafting signs to warn of approaching enemies. Along the way, you learned how to take

WILLIAM O'CONNOR

inscribed runes and turn them into words and signs of power that you can incorporate into your prayers. But now, the time for learning is at an end. Now is the time for adventure.

Merge the runes of power with your weapons and armor. Call to the gods and channel their might against your enemies. The runes are your weapons, and the gods' foes await your judgment.

## Runepriest Class Features

Runepriests have the following class features.

### Rune Master

Some of your powers have the runic keyword. When you are going to use a runic power, you first choose one of the runes noted in the power—either the rune of destruction or the rune of protection—and then use the power, applying the chosen rune's effects. The moment you choose the rune, you enter its rune state. You remain in that rune state until you enter another rune state or until the end of the encounter.

Whenever you enter the rune state of the rune of destruction or the rune of protection, you gain an additional benefit, specified below. The benefit lasts while you're in the rune state.

**Rune of Destruction:** Allies gain a +1 bonus to attack rolls against enemies that are adjacent to you or to any other runepriests who are in this rune state.

**Rune of Protection:** While adjacent to you, allies gain resist 2 to all damage. The resistance increases to 4 at 11th level and 6 at 21st level.

### Rune of Mending

You gain the *rune of mending* power. This rune restores your allies' health and grants them additional power based on your rune state.

### Runic Artistry

Many runepriests follow one of the two major traditions of rune magic: the path of the Wrathful Hammer or the way of the Defiant Word. The two traditions use the same runes but differ in their practices and teachings. Choose one of the following options.

**Defiant Word:** Whenever an enemy misses you with an attack, you gain a bonus to damage rolls against that enemy until the end of your next turn. The bonus equals your Wisdom modifier, regardless of the number of times the enemy misses you in a round.

**Wrathful Hammer:** You gain proficiency with military hammers and military maces. In addition, whenever an enemy deals damage to you with an attack, you gain a bonus to damage rolls against that enemy until the end of your next turn. The bonus equals your Constitution modifier, regardless of the number of times the enemy damages you in a round.

### Runepriest Overview

**Characteristics:** You use melee attacks to harass your enemies and leave them vulnerable to your allies' attacks. With your heavy armor and your ability to heal, you are ideally suited for standing on the front line.

**Religion:** Runepriests are found among the followers of all the gods, but they most commonly worship Corellon, Erathis, Ioun, or Moradin. Moradin is a patron of smiths and other artisans who seek to master a craft. Many runepriests create fine goods as they practice their ability to forge runes. Corellon attracts runepriests who view the inscribing of runes as an art. Ioun values the protective aspects of rune magic and the knowledge contained in the runes. Erathis favors inventors and others who seek knowledge, a perfect match for runepriests who seek to uncover or create new runes.

**Races:** Deva runepriests favor the way of the Defiant Word and create beautiful illuminated manuscripts of religious lore, building libraries that grow for generations in hidden corners of the Astral Sea. Elf runepriests also embrace this path, tending trees and other plants to grow in runic patterns to honor the gods. Dwarves, minotaurs, and goliaths commonly follow the path of the Wrathful Hammer. In great caverns, divine runes decorate dwarven chapels as well as secluded minotaur shrines. Goliath runepriests carve massive runes atop their holy peaks, marking the territory as warded by the gods and serving as landmarks for their people as they migrate from one mountain to the next.

## Creating a Runepriest

Your choice of ability scores, powers, and Runic Artistry tradition suggests one of two builds based on the two most ancient runepriest traditions, the path of the Wrathful Hammer and the way of the Defiant Word. All runepriests use Strength for their attacks. Constitution increases the effect of certain runepriest powers, while Wisdom bolsters others.

### Defiant Runepriest

A length of paper inscribed with runes might appear fragile, yet it hangs from the eaves of a temple day after day, shrugging off rain, snow, cold, and heat. The way of the Defiant Word holds that runes, wherever they are inscribed, provide strength not merely by the power they employ, but by binding together an object or a person and the concept held within a rune. As a defiant runepriest, you fight on the front lines, sustaining and aiding your allies with divine runes. You focus your efforts on the most dangerous enemies, using your magic to restrict their attacks and shield your allies from harm. Strength should be your highest ability score, followed by Wisdom. Choose the Defiant Word as your path of Runic

Artistry, and select powers that don't simply destroy your foes with brute force, but foil their efforts. These choices incline you toward controller as your secondary role.

**Suggested Class Feature:** Defiant Word
**Suggested Feat:** Rune of Hope
**Suggested Skills:** Arcana, History, Insight, Religion
**Suggested At-Will Powers:** *word of binding, word of exchange*
**Suggested Encounter Power:** *divine rune of thunder*
**Suggested Daily Power:** *rune of the undeniable dawn*

### Wrathful Runepriest

Runepriests who follow the path of the Wrathful Hammer inscribe their runes in stone, metal, and ironwood, materials that can withstand the punishing forces that the runes channel. As a wrathful runepriest, you lead the attack against the forces of evil. Your place is at the forefront of any battle, using your hammer to smite your enemies. Strength should be your highest ability score, followed by Constitution. Choose the path of the Wrathful Hammer as your form of Runic Artistry, and select powers that inspire allies around you and wrap your foes in magic that punishes them for not following your edicts. These choices incline you toward defender as your secondary role.

**Suggested Class Feature:** Wrathful Hammer
**Suggested Feat:** Rune of Vengeance
**Suggested Skills:** Athletics, Endurance, Heal, Religion
**Suggested At-Will Powers:** *word of diminishment, word of shielding*
**Suggested Encounter Power:** *anvil of battle*
**Suggested Daily Power:** *rune of endless fire*

## Runepriest Powers

Your powers are prayers that evoke the power of divine runes to smite your enemies and protect your allies. You brand your foes with runes and other markings, leaving them vulnerable to your allies' attacks. Many of your powers have the runic keyword (see the sidebar).

### The Runic Keyword

When you are going to use a runic power, you first choose one of the runes noted in the power and then use the power, applying the chosen rune's effects. The moment you choose the rune, you enter its rune state. You remain in that rune state until you enter another rune state or until the end of the encounter.

## Class Features

Each runepriest has the *rune of mending* power.

**Rune of Mending** — Runepriest Feature

*The healing rune flares with a cold blue fire as you trace it in the air. The rune then appears on your allies' armor.*

**Encounter (Special)** ✦ **Divine, Healing, Runic**

**Special:** You can use this power twice per encounter, but only once per round. At 16th level, you can use this power three times per encounter, but only once per round.

### Rune Magic

A runepriest handles the least powerful divine runes, those that a mortal can inscribe without risking body and soul. Only the gods and their mightiest servants can truly master the greatest divine runes. Two lesser runic syllabaries are presented here, those of protection and destruction.

Runes of protection fortify defenses, strengthen the spirit, preserve resolve, and deflect an enemy's attacks. Runes of destruction are also known as sigils of unmaking. They weaken steel and stone, degrade flesh and bone, disrupt order, and fray thought.

When you use a runic power, you choose one of the runic alphabets with which to empower your prayers, often tracing a rune in the air as you use a power. Your choice of runic alphabet alters the workings of the power. Using runes of protection might enhance the power's bonus to defense, whereas using runes of destruction boosts its damage.

After you use the power, a rune might glow over your head, on your weapon, or on your armor—a sign of the rune state you have entered.

## Hammer of Vengeance

*"Your crimes have been recorded in the runes. Now it is time to forge your doom."*

**Prerequisite:** Runepriest

Runepriests study not only the divine runes and the craft needed to shape them, but also the history and story behind each rune. Many runes have been lost over the centuries, usually due to the acts of demons, devils, and primordials. Some runepriests swear to avenge these wrongs, dedicating themselves to crushing those who would stand against the gods. You are one of these runepriests.

Your rune-enhanced prayers harm those who injure your allies. Those fool enough to incite your anger soon learn the error of their ways.

Dragonborn and minotaur runepriests are the most common followers of this path. Both races have developed a keen sense of vengeance for past crimes, and thus this path fits them well.

### Hammer of Vengeance Path Features

**Bloody Vengeance (11th level):** Whenever you enter a new rune state, you can enter the rune state of vengeance instead. When any ally hits an enemy adjacent to you while you are in this rune state, you can make a melee basic attack against that enemy as an immediate reaction. This rune state then ends.

**Avenging Action (11th level):** When you spend an action point to take an extra action, enemies take radiant damage equal to your Constitution modifier when they make attacks while they're within 5 squares of you and damage your allies with those attacks. This effect lasts until the end of your next turn.

FRANCIS TSAI

# Light Bringer

*"I carry the runes of light to the darkest places."*

**Prerequisite:** Runepriest

The runes have long been a potent weapon for the gods, and few runes are as mighty as the twelve sigils of the sun. These runes embody concepts of hope, the coming dawn, protection, and endurance. You have studied them in hopes of mastering the divine magic they offer. Few can unlock these runes' power, since they demand a heavy toll from those who study them. You spent hours staring into the sun, almost going blind in the process, to purge your mind of all shadow. Only in such a condition can a runepriest master these runes.

As a light bringer, you carry the sun's radiance to places that have never been blessed with its cleansing light. You harbor a particular hatred of the Shadowfell and the undead creatures that spawn there. There are many creatures that hide from the sun's cleansing light. You have sworn to carry that light to them.

## Light Bringer Path Features

**Holy Radiance (11th level):** As a minor action, you can shed bright light in a radius of up to 10 squares. You can change this radius, or extinguish the light, with another minor action.

KIERAN YANNER

# Master of the Forge

*"Bring forth your sword, so that I can bless it with the fury of the gods."*

**Prerequisite:** Runepriest

The forge rune is a rare divine rune that few runepriests learn to master. Only by toiling at a forge for years in training can one hope to learn its secrets. You are one such runepriest. During your apprenticeship, you learned not only the mysteries of divine magic but also the subtle powers of the forge. Guided by the gods and your teachers, you crafted weapons and armor and learned to care for the spiritual and material needs of those who fight for the gods.

A master of the forge draws power from the forge rune, imbuing allies' weapons and armor with divine power. At your behest, blades slice through stone with ease, and armor deflects even a dragon's claws.

Dwarf runepriests are the most common followers of this path. The dwarven heritage of metalwork makes the forge rune a common topic of study among them.

## Master of the Forge Path Features

**Runes of the Blade Smith (11th level):** When you take a short or an extended rest, you can touch one weapon that you or an ally carries. That weapon then gains a +1 bonus to damage rolls until you grant this bonus to a different weapon.

# Rune Shield

*"The runes of the gods are stronger than any steel."*

**Prerequisite:** Runepriest

You see in the runes a strength greater than that of any mortal power, and you maintain a stern resolution to bring the power of the gods to bear on those who would threaten the world and the astral domains. The first rune of shielding remains carved into the stone at the heart of the world, where members of your order delved into the darkest shadows to defeat primordials of earth and lava. Someday you might make a pilgrimage to that sacred place, but until then you stand at the forefront of any battle. Your runes echo across the battlefield, scattering your foes and fortifying your allies.

As a rune shield, you master a series of secret runes that allow you to cloak your allies in a protective sphere of divine magic. The runes have such power that merely speaking them turns aside arrows, knocks swords and axes away from your friends, and blunts your enemies' most reckless charge.

## Rune Shield Path Features

**Guardian Shield (11th level):** Whenever you enter a new rune state, you can enter the rune state of the iron shield instead. While you are in this rune state, each ally gains a +2 bonus to all defenses while adjacent to you. This rune state ends when you move.

BETH TROTT

# SEEKER

*"I am the lightning strike, the earth's upheaval, the unruly sea. I am the bringer of your destruction."*

**CLASS TRAITS**

**Role:** Controller. You are a primal hunter who forges bonds with mysterious spirits to gain their aid in bringing down your prey. Depending on your choice of class features, you lean toward either defender or striker as a secondary role.

**Armor Proficiencies:** Cloth, leather
**Weapon Proficiencies:** Simple melee, simple ranged, military ranged

*Class Skills:* Acrobatics (Dex), Athletics (Str), Endurance (Con), Heal (Wis), Insight (Wis), Intimidate (Cha), Nature (Wis), Perception (Wis), Stealth (Dex)

**Class Features:** *Inevitable shot*, Seeker's Bond

Seekers are primal champions who scour the wilderness in search of those who would defile it. Versed in hunting techniques handed down through the generations, seekers combine thrown weapon and bow techniques with primal evocations. The combination allows seekers great range in which to deliver deadly attacks that confound and hamper their enemies. When a seeker looses a missile, the primal spirits bound to it through ancient evocations are freed, sometimes as terrifying beasts and sometimes as nature's raw destructive potential.

As a seeker, you are both a hunter and a mystic. You attune yourself to the wilderness you call your home, but you are equally tied to the spirits that dwell in the world around you. With your people's traditions and whispered advice from the spirits, you navigate the wilds with ease, at home in that environment as any beast. If an enemy appears, you have nothing to fear, both because you have mastered your weapons and because the spirits to whom you have bound yourself add their savage might to your attacks. Whether you use lightning strikes, grasping vines, or spectral beasts, your enemies cannot stand against your assault.

WILLIAM O'CONNOR

# Seeker Class Features

Seekers have the following class features.

## Inevitable Shot

You gain the *inevitable shot* power. You can use this power to call on spirits to send your projectile hurling toward another enemy when you miss with a ranged attack.

## Seeker's Bond

Seekers develop special bonds with primal spirits by offering solemn vows to further the spirits' purposes. In exchange for these vows, the spirits bestow a measure of their strength to aid their champions' cause.

Choose one of these options. Your choice provides bonuses to certain seeker powers, as detailed in those powers.

**Bloodbond:** You gain the *encaging spirits* power. In addition, while you are not wearing heavy armor, you can shift as a minor action.

**Spiritbond:** You gain the *spirits' rebuke* power. You also gain a +1 bonus to attack rolls with both light thrown and heavy thrown weapons, and when you make an attack by throwing a weapon with which you have proficiency, the weapon returns to your hand after the attack. In addition, while you are not wearing heavy armor, you can use your Strength modifier in place of your Dexterity or Intelligence modifier to determine your AC.

# Creating a Seeker

All seekers depend on Wisdom to commune with the spirits to guide them and aid in their attacks. Seekers bind themselves with spirits through their Seeker's Bond. Bloodbond and Spiritbond are the most common, and your choice corresponds with one of two seeker builds. Regardless of your particular bond, however, you can choose whatever powers best help you to keep your vow.

## Protecting Seeker

The natural world stands in peril thanks to numerous and widespread enemies. You spoke your vow and forged a bond with the primal spirits, swearing to safeguard the land from harm. Wisdom is your most important ability, so it should be your highest score. Strength adds weight to your attacks and punishes those enemies that draw too close. Consider powers that conjure spirits to harry your enemies. You lean toward defender as a secondary role.

**Suggested Class Feature:** Spiritbond
**Suggested Feat:** Spiritbond Defense
**Suggested Skills:** Heal, Insight, Nature, Perception
**Suggested At-Will Powers:** *biting swarm, guardian harrier*
**Suggested Encounter Power:** *serpent arrow*
**Suggested Daily Power:** *spirit rider*

## Vengeful Seeker

You have witnessed nature's destruction and its plunder by cruel and careless mortals. No longer will you wait; vengeance demands blood. A blood oath compels you to hunt down and destroy the world's enemies, and those who despoil it will find no mercy from you. Wisdom is your most important ability, followed by Dexterity to help keep you one step ahead of your enemies and avoid their attacks. You lean toward striker as a secondary role.

**Suggested Class Feature:** Bloodbond
**Suggested Feat:** Bloodied Elusion
**Suggested Skills:** Acrobatics, Athletics, Nature, Stealth
**Suggested At-Will Powers:** *biting swarm, elemental spirits*
**Suggested Encounter Power:** *flickering arrow*
**Suggested Daily Power:** *storm of spirit shards*

# Seeker Powers

Your powers are evocations gained from the bonds you forge with primal spirits. Unlike most other controllers, you use weapons to direct your spirit allies and their destructive wrath, launching arrows or throwing other ranged weapons into your enemies' midst, only to watch your weapons explode in scorching lightning or booming thunder. Your attacks can also herald the appearance of the spirits themselves, calling them forth to assail your enemies.

### Seeker Overview

**Characteristics:** Your arrows or thrown weapons loose primal power when used. They might manifest as primal spirits hungering for revenge or as icy winds or crackling lightning. Your powers control your enemies, interfering with their movement, holding them in place, or injuring them for their actions. Also, your attacks might call forth spirits to worry your enemies and pursue them across the battlefield.

**Religion:** Like other primal characters, seekers view the world's primal spirits as kindred and partners, and they venerate them more than they worship the gods. Seekers who do follow deities commonly worship Melora for her dominion over the forces of nature, Corellon (who is sometimes depicted as the founder of archery), Kord, or Sehanine. Evil seekers sometimes follow Gruumsh or Zehir.

**Races:** Elves and shifters are the most common seekers, since both their natural inclinations toward primal paths and their inherent abilities make them well matched with the capabilities of the class. Goliaths who favor ranged combat sometimes become seekers (preferring thrown weapons over bows or crossbows), and wilden seekers are also fairly common.

**Prerequisite:** Seeker

The spirits demand recompense for crimes committed against the natural world, and they accept payment only in blood. You are their collector. You range the land to exact the price your enemies must pay for violating the world. You are a relentless hunter, ruthless in your mien and efficient in your methods.

The spirits aid you in your efforts by imparting to you the ancient hunting methods of your people. Though your ancestors used these techniques to bring down game, you find them equally effective in eliminating your foes. Each time an enemy falls, you reaffirm your bond to your spirit guides, offering the fallen enemy as a sacrifice to slake their thirst until you next come upon a deserving foe.

As a crimson hunter, you focus on the striker elements found in many seeker evocations. The smell of blood provokes you, letting you move more quickly to engage your enemies. These techniques allow you to close the distance to bring an enemy in range or to skirt the battlefield for your next strike.

# Death Arrow

*"Let my black arrow be the answer to your violation."*

**Prerequisite:** Seeker, Bloodbond class feature

Through ancient ceremonies and whispers of vengeance, you bind within your arrows all the rage and indignation you possess. The process transforms each arrow into a macabre length of polished bone capped with a jagged tip and fitted with black fletching. When you fire these wicked barbs from your bow, they bite deep, delivering death's fatal message.

By walking the path of the death arrow, you deliver punishing damage when you attack single targets and can wreak havoc when you spread your attacks among several foes at once. For you, destroying an enemy eclipses any other concern, and thus you commit yourself to annihilating your foes, no matter the cost.

To master the death arrow ceremonies, you must deal with the most unnerving and violent primal spirits. Such contact leaves an indelible mark on you, such that your features grow severe, your eyes wild, and your temper fragile. More than anything, your unwillingness to grant quarter to those who ask it and your single-minded devotion to utterly ruining your foes can prove unnerving to your companions.

MATIAS TAPIA

# Seven Fates Archer

*"Go forth, spirits, and make true the portents of my enemies' defeat."*

**Prerequisite:** Seeker

Spirits are everywhere in the world, from haunted forests to windswept mountains. These entities can be nothing more than wild emotions given half-realized form, or they can possess vast intelligence, with memories stretching back to the world's earliest days. You turn to these spirits to help you protect the world, drawing from their vast and mysterious power to glimpse your enemies' fates and bring about their final ends.

Communing with the land's spirits reveals possible futures, from which you pluck the strands of fate that coincide best with your travels, and you weave those strands into your bowstring. Arrows fired from the bow carry with them the fates your enemies deserve.

This paragon path is one of guardianship. Just as you can harry enemies by loosing spirits at them, so too can you alter the fates of those around you. These techniques help keep your allies from harm, even as you frustrate and confound your foes.

# Swift Strider

*"I stand in two worlds: the world you see and the world you don't."*

**Prerequisite:** Seeker, Spiritbond class feature

You move with liquid grace and in a way that shows that you are unhindered by your environment. The primal spirits with whom you ally yourself guide your steps so that you can move without fear, boldly moving faster than your foes can track. You might use hidden pathways and shortcuts through the world. Or you might have taken your first step into the spirit world and, by doing so, now have the same freedom enjoyed by the land's spirit custodians.

Becoming a swift strider allows you to move with astonishing speed. You can anticipate your enemy's attacks and spring to safety. As you follow this path, your body begins to blur when you move, making it hard for foes to protect themselves from your strikes.

You attack while moving, spin away when your enemies hit you, and, eventually, speed through their ranks, delivering strikes that rob them of their mobility and increase your speed. By moving just outside the reach of your foes, you can deliver punishing attacks with your seeker powers to contain and control them so that your allies can move in for the kill.

## Swift Strider Path Features

**Defensive Shift (11th level):** The first time you shift on each of your turns, you gain a +2 bonus to AC and Reflex until the start of your next turn.

# HYBRID CHARACTERS

*A young apprentice wizard is forced into the military when her hometown is sacked by orcs. After leading a squadron in the baron's army for three months to drive back the invading horde, she retires from military service to enter an adventuring career as a warlord/wizard.*

*A lone barbarian from the far north travels to the gleaming cities of the south, where a local thieves' guild recruits him as hired muscle. Along the way, he picks up several tricks of cunning and wit, all the better to defeat those who think him nothing more than a savage. When he later becomes an adventurer, this barbarian/rogue relies on both his talents as a burglar and his ability to unleash the raging beast that still lurks within his heart.*

The hybrid character rules allow you to combine elements of two character classes into a whole. Effectively, you create a brand-new class from portions of two classes. Like the multiclass feats introduced in the *Player's Handbook*, these rules let you reflect a more varied array of character abilities than traditional classes do. Whether you're doing this to reflect your character's elaborate backstory, to combine different mechanical elements to create a potent new combination, or to fill out a group that needs just a little something extra, the end result is the same: Your hybrid character gives up depth of ability in exchange for greater flexibility.

## Hybrids and Roles

When you combine two classes of the same role (such as fighter and paladin), you can expect your character to be about as effective in filling that role as a single-class character of the same role.

Combining two classes of different roles, however, creates a character who can operate reasonably well in two different roles in certain situations. This flexibility lets you adjust your tactics—and your contribution—from round to round, based on the particular challenges you face.

A potential downside is that you probably can't fill either role through an entire encounter. A cleric/rogue, for example, might be able to heal half as often as a normal cleric and deal striker-level damage with only some attacks.

## Group Building

When adding a hybrid character to an adventuring group, it's best if at least one (if not both) of the roles normally filled by your two classes are also filled by another character in the group. For example, your cleric/rogue won't feel quite as lacking in healing or damage output if you also have a warlord and a

WILLIAM O'CONNOR

ranger in the group. A hybrid character makes a great fifth or sixth group member, since key roles are likely covered by your allies.

A hybrid character can also be a great way to deal with a smaller-than-normal group. If your group has only two or three characters, having one or two hybrid characters can help you fill the missing roles. Your group won't fill the roles as completely as a full-sized group would, but half a leader is usually better than no leader at all.

## Creating a Hybrid Character

If you want to make a hybrid character, pick the two classes that you want to combine, and then read the entries for the hybrid versions of them. This section provides hybrid versions of the classes in the *Player's Handbook*, *Player's Handbook 2*, and *Player's Handbook 3* as well as the swordmage class from the *Forgotten Realms Player's Guide* and the artificer class from the *Eberron Player's Guide*. The information below details how to combine the elements of the two hybrid classes you choose.

**Armor Proficiencies:** You start with only the armor proficiencies that are possessed by both of your classes. For example, a fighter/rogue initially has proficiency with cloth armor and leather armor only.

**Weapon Proficiencies:** Combine the weapon proficiencies given for each of your classes. For example, a cleric/rogue starts with proficiency with simple melee weapons (including the dagger), simple ranged weapons (including the crossbow and the sling), shuriken, and short swords.

**Implements:** You can wield the implements of both classes, and you can use implement powers from either class (and from those classes' paragon paths) through the implements of either class. For example, a cleric/warlock can use implement powers from either class through holy symbols, rods, and wands.

**Bonus to Defense:** You gain the bonuses to defenses noted in both hybrid class entries. Bonuses to the same defense add together. Some hybrid class entries give you a choice of which defense to apply a bonus to.

**Hit Points at 1st Level:** To determine your hit points at 1st level, add together the hit points at 1st level noted in both hybrid class entries, and round fractions down. Then add your Constitution score to the result.

**Hit Points per Level Gained:** To determine the hit points you gain at each new level, add together the values noted in each of your hybrid class entries, and round fractions down. For example, a cleric/fighter gains 5 hit points at each new level (2.5 for cleric + 3 for fighter, rounded down).

**Healing Surges per Day:** Add together the healing surges per day noted in both hybrid class entries, and round fractions down. Then add your Constitution modifier to the result.

**Class Skills:** To create your list of class skills, combine the class skills noted for the two hybrid classes.

**Trained Skills:** You gain three trained skills, chosen from your list of class skills. Some hybrid class entries grant extra trained skills, which must be taken from that class's skills list, not from the combined list.

**Class Features:** You gain all the class features in both hybrid class entries.

If a class feature has the word "hybrid" in parentheses after its name, it is a modified version of the class feature but still counts as that class feature for the purpose of meeting prerequisites.

**Hybrid Talent Options:** Each hybrid class entry includes one or more Hybrid Talent options. These options become available when you select the Hybrid Talent feat (page 181).

**Starting Powers:** As a hybrid character, you start with the following powers.

*At-Will:* Choose two 1st-level at-will attack powers, one from each class.

*Encounter:* You gain one 1st-level encounter attack power, chosen from either of your hybrid classes. If either of those classes has the Psionic Augmentation class feature, see "Psionic Augmentation and Hybrid Characters," page 137.

*Daily:* You gain one 1st-level daily attack power, chosen from either of your hybrid classes.

**Gaining Additional Powers:** When you reach a new level and gain an encounter attack power, a daily attack power, or a utility power, you can choose that power from either class. However, if you have at least two powers in the same category (at-will attack, encounter attack, daily attack, or utility), at least one of those powers must come from each of your hybrid

### How Does It Work?

The hybrid character rules break down each class into parts. The hybrid version of a class provides a portion of the game benefits of the normal class (hit points, defenses, proficiencies, class features, and so forth). When combined with the hybrid version of another class, these two partial classes create a whole class.

Because character classes aren't designed to be broken down and recombined in this way, not every hybrid is equally effective. Different combinations of roles, key ability scores, types of attacks, and other elements can result in different degrees of efficacy.

For that reason, this section provides advice on how to build an effective hybrid character. You can ignore this advice in order to create a hybrid that fits your mental image of your character precisely, but that character might prove less effective than your nonhybrid allies.

classes. For example, if you have two encounter attack powers, one of the powers must be from one of your hybrid classes, and the other power must be from your other hybrid class.

Even if you later change your powers through retraining, power-swap feats, or some other means, you must retain at least one power in each of those four categories from both of your classes (see "Retraining," page 137, for how hybrid characters use the retraining rules).

*Example:* Bergen, a 1st-level fighter/rogue, wants a mixture of powers from his two classes. He selects *cleave* (fighter) and *deft strike* (rogue) as his at-will attack powers. He then selects *steel serpent strike* (fighter) as his 1st-level encounter attack power and *blinding barrage* (rogue) as his 1st-level daily attack power.

When Bergen reaches 3rd level and gains another encounter attack power, he must select the new power from the rogue class, since he already has a fighter encounter attack power. Alternatively, he could use retraining to replace *steel serpent strike* with *king's castle*, a 1st-level rogue encounter attack power, and then choose a 3rd-level fighter encounter attack power.

When Bergen reaches 7th level, he can choose his new encounter attack power from either class, since he already has an encounter attack power from each.

# Special Rules

Hybrid characters interact with some game rules in exceptional ways.

## Meeting Prerequisites

A hybrid character is considered a member of both classes, and has those classes' roles. For example, a fighter/wizard can take feats and paragon paths that have the fighter or the wizard class as a prerequisite.

As noted in some hybrid class entries, a hybrid character receives a modified version of a class feature. Such a class feature counts as the full-fledged feature for the purpose of meeting prerequisites and applying various game options.

## Multiclass Feats

A hybrid character can select multiclass feats. The rules for multiclassing still apply: You can't take multiclass feats for a class you already belong to, which includes both of your hybrid classes.

## Paragon Tier Hybrids

Rather than take a paragon path at 11th level, a hybrid character can choose to gain more powers from his or her classes. If you choose this option, you gain several benefits.

At 11th level, you gain Hybrid Talent (page 181) as a bonus feat, even if you already have it.

## Assigning Ability Scores

When you combine two classes to build your hybrid character, try to choose classes that have complementary key abilities, secondary abilities, or both. Doing this helps your character remain effective.

For example, fighters and paladins share a key ability: Strength. This means a fighter/paladin hybrid character can select and use attack powers from both classes easily. The two classes also share a secondary ability: Wisdom. If the hybrid character has a high Wisdom score, he or she can benefit from various Wisdom-based options available to both classes, such as the paladin's *radiant smite* power and the fighter's Combat Superiority class feature.

If you choose two classes that have different key abilities, make sure that both of the ability scores are high enough that you can use your powers and class features effectively. For instance, a fighter/rogue needs a good Dexterity score (to use rogue attack powers) as well as a good Strength score (to use fighter powers).

When you play a hybrid character, it becomes even more important to use your racial ability score bonuses to their best effect. You'll get the most value if you match your two classes' key abilities to a set of racial ability score bonuses (such as a half-orc fighter/rogue).

Something to consider when assigning ability scores: If you select two classes whose key abilities are in the same defense pair (such as Dexterity and Intelligence), one or two of your defenses are likely to be lower than normal. This disadvantage can be overcome through feats and magic items, or you can play it up as a character quirk.

Here are some good ability score arrays to use when creating a hybrid character:

**18 14 11 10 10 8**
If your key abilities match, you can probably get away with this top-heavy ability score array, though you're probably sacrificing benefits derived from secondary abilities. A swordmage/wizard using this array would likely place the 18 in Intelligence and the 14 in whichever secondary ability mattered most.

**16 16 12 11 10 8**
This array works well for hybrid characters who have two key abilities, particularly if those overlap with secondary abilities. A fighter/swordmage might like this array, putting one 16 in Strength and the other in Intelligence.

**16 14 14 13 10 8**
This array is good for hybrid characters who want attack powers drawing on three or more abilities, such as a rogue/warlock who wants to select attack powers based on Dexterity, Constitution, and Charisma.

In place of the paragon path encounter attack power gained at 11th level, you can select an encounter attack power of 7th level or lower from either of your hybrid classes.

In place of the paragon path utility power gained at 12th level, you can select a utility power of 10th level or lower from either of your hybrid classes.

In place of the paragon path daily attack power gained at 20th level, you can select a daily attack power of 19th level or lower from either of your hybrid classes.

### Racial Traits

Some races grant benefits based on a class. As long as you remember that you are a member of both of your classes, these benefits should be easy to adjudicate. Here are two examples.

**Dilettante (Half-Elf):** You can't choose the 1st-level at-will attack power from either of your hybrid classes.

**Bonus At-Will Power (Human):** You choose the extra 1st-level at-will attack power from either of your hybrid classes.

### Retraining

When you use retraining (*Player's Handbook*, page 28) to replace a power from one of your hybrid classes, the new power can be from either of your hybrid classes, as long as the new power is of the same type and of the same level or lower as the old power. In addition, the replacement must follow the rules for a hybrid character gaining powers (see "Creating a Hybrid Character," above).

If only one of your hybrid classes has the Psionic Augmentation class feature, you can use retraining to replace an augmentable at-will attack power with an encounter attack power and vice versa, but you must always have two at-will attack powers, one from each class. Making such a replacement will change your power point total (see "Psionic Augmentation and Hybrid Characters" below).

You cannot use retraining to replace one of your hybrid classes with a different hybrid class. You cannot, for example, use retraining to change from cleric/fighter to fighter/paladin.

### Trading Class Features

A hybrid character can't trade a hybrid version of a class feature for a nonhybrid version of a class feature, unless a hybrid class entry expressly allows the trade.

## Psionic Augmentation and Hybrid Characters

If either of your hybrid classes has the Psionic Augmentation class feature, you follow slightly different rules to build your character.

### Both Classes Have Psionic Augmentation

If both of your hybrid classes have Psionic Augmentation, you gain powers and power points at the same rate as a normal class that has the class feature. Follow the rules for choosing powers as detailed in "Creating a Hybrid Character" above, but ignore references to encounter attack powers, since you don't gain any from either class.

### Only One Class Has Psionic Augmentation

If only one of your classes has Psionic Augmentation, you use the rules for choosing powers as detailed in "Creating a Hybrid Character" above, except that you follow different rules for choosing encounter attack powers.

At 1st level, you choose either the hybrid power point option (see below) or a 1st-level encounter attack power from the class that includes such powers. You start with no power points unless you either choose the hybrid power point option or gain them from a source other than your classes.

When you reach 3rd level, see "Gaining Encounter Attack Powers" below for how to proceed.

#### Hybrid Power Point Option

When you choose the hybrid power point option, you gain a number of power points based on the levels of the augmentable at-will attack powers that you have.

To determine your power point total, consult the table for how many power points each of the powers is worth, and then add those points together.

| Power Level | Power Points |
|---|---|
| 1-10 | 2 |
| 11-20 | 4 |
| 20-30 | 6 |

Whenever you gain, retrain, or swap an augmentable at-will attack power from your class, recalculate your power point total. Only augmentable at-will attack powers from your class count when you determine the total.

### Gaining Encounter Attack Powers

At 3rd level, whether you gain an encounter attack power or power points is determined by your choice at 1st level.

- If you chose to gain an encounter attack power at 1st level, you gain the hybrid power point option at 3rd level and can swap your augmentable 1st-level at-will attack power for a new augmentable at-will attack power of 3rd level or lower.
- If you chose the hybrid power point option at 1st level, at 3rd level you must choose a 3rd-level encounter attack power from your class that includes such powers.

At 7th level, you choose one of the following options, regardless of what you chose before.

- You gain a 7th-level encounter attack power from your class that includes such powers.
- You gain an augmentable 7th-level at-will attack power, and your power point total increases accordingly.

When you reach a higher level at which you can swap an encounter attack power, you can instead swap an augmentable at-will attack power, but you must still keep at least one encounter attack power from your class that includes them.

*Example:* At 1st level, the battlemind/fighter Dolora chooses *iron fist* (battlemind) and *sure strike* (fighter) as her at-will attack powers and *psionic anchor* (battlemind) as her 1st-level daily attack power.

She chooses *passing attack* (fighter) as her 1st-level encounter attack power. This means she starts with no power points to augment *iron fist*.

At 3rd level, Dolora must take the hybrid power point option. She also chooses to swap *iron fist* for *mind snare* (battlemind), an augmentable 3rd-level at-will attack power. Her power point total is now 2.

At 5th level, she chooses *rain of steel* (fighter) as her 5th-level daily attack power. She had to select a fighter power because she didn't have a fighter daily attack power yet.

At 7th level, she chooses *stone squire* (battlemind), an augmentable 7th-level at-will attack power, rather than gaining another encounter attack power. Her power point total is now 4.

At 9th level, she chooses *victorious surge* (fighter) as her new daily attack power. Since she already had one daily attack power from each class, she could have selected one from either class.

At 10th level, she decides to retrain, replacing *mind snare* with *dance of steel* (fighter), a 3rd-level encounter attack power. Her power point total drops to 2 as a result.

At 13th level, she replaces *passing attack* with *overwhelming lunge* (battlemind), an augmentable 13th-level at-will attack power. Her power point total is now 6. She still has one fighter encounter attack power, *dance of steel*.

## Proceed with Care

The system of classes and roles in D&D is designed to ensure that every character has a clear purpose at the table and that no character can easily become marginalized by poor choices made in character creation.

The hybrid character system discards many of the safeguards built into the normal class system. Even though every effort has been made to craft a hybrid system that creates characters that are as viable as their single-class comrades, the sheer number of combinations available ensures that some combinations might feel less effective than others.

If you find that your hybrid character isn't as effective as you had expected, work with your DM to find a solution. You might choose to combine a different pair of classes, to use the multiclass system, or to change to a nonhybrid character.

## Hybrid vs. Multiclass

Both the hybrid character system and the multiclass system allow a character to select powers and class features from multiple classes. However, these two systems offer different advantages and disadvantages, which help make both choices interesting.

- A multiclass character doesn't give up any class features. However, he or she must spend feats to dabble in a second class, whereas a hybrid character doesn't need to spend any feats to do so.
- A hybrid character can begin play with a more varied array of class features and powers than a multiclass character can.
- A hybrid character whose classes have different roles is capable of temporarily but effectively stepping into either role, but can't replace a nonhybrid character in either role. A multiclass character fills one role entirely—the role of his or her main class—and can occasionally fill another role, but not as well as a hybrid character can.
- The hybrid character system is a more effective way of describing a character who has an unusual backstory than the multiclass system is. A hybrid character can begin his or her adventuring career having already mixed two very different classes. In contrast, a multiclass character starts out concentrated on a single class and slowly expands into another class.

It's up to you to decide which of these two systems better describes your character's unique mixture of class features, powers, and backstory.

# Hybrid Artificer

Whether student or tinkerer, you have learned many tricks for imbuing magic into objects and creatures. Your expertise is spotty, however, with many gaps that a true artificer might scoff at. Of course, you know plenty of tricks beyond the skill of that artificer.

Why does your knowledge have such gaps? Do you lack the discipline or talent to master some of the formulas and recipes of the artificer? Or have you recognized that technical skills must be supplemented with other abilities?

As a hybrid artificer, you retain some of the artificer's healing ability, but you trade away magic item manipulation in exchange for another class's abilities.

**CLASS TRAITS**
**Role:** Leader
**Power Source:** Arcane
**Key Abilities:** Intelligence, Constitution, Wisdom

**Armor Proficiencies:** Cloth, leather
**Weapon Proficiencies:** Simple melee, simple ranged
**Implements:** Rods, staffs, wands
**Bonus to Defense:** +1 Fortitude or Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3

**Class Skills:** Arcana (Int), Diplomacy (Cha), Dungeoneering (Wis), Heal (Wis), History (Int), Perception (Wis), Thievery (Dex)

**Class Features:** Healing Infusion (hybrid)
**Hybrid Talent Options:** Arcane Empowerment, Arcane Rejuvenation

## Class Feature

Hybrid artificers have the following class feature.

**Healing Infusion (Hybrid):** This class feature functions as the artificer class feature (*Eberron Player's Guide*, page 45), except that you can create only one healing infusion at the end of each extended rest.

## Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Arcane Empowerment:** This class feature functions exactly as the artificer class feature (*Eberron Player's Guide*, page 44).

**Arcane Rejuvenation:** This class feature functions exactly as the artificer class feature (*Eberron Player's Guide*, page 44).

## Suggested Combinations

The artificer/wizard is a master of arcane secrets, using Intelligence to attack enemies and heal allies. The artificer/psion functions similarly, but by mixing arcane and psionic powers.

The artificer/swordmage might prefer melee powers. Choose Constitution as your secondary ability score to maximize synergy between the two classes.

The artificer/warlock can be an effective mix of leadership and damage-dealing, particularly if you set Intelligence and Constitution as your two highest ability scores.

# Hybrid Ardent

Like most ardents, your psionic power comes from self-discovered potential rather than training. Why did you choose not to focus on honing your talent for harnessing emotion? Do you fear this ability, preferring to supplement it with the abilities of another class? Have you only begun to unlock this mysterious power?

As a hybrid ardent, you provide occasional but timely bursts of emotion to allies and enemies alike. However, by blending this power with the talents of another class, you give up the depth of your control over others' emotions.

**CLASS TRAITS**
**Role:** Leader
**Power Source:** Psionic
**Key Abilities:** Charisma, Constitution, Wisdom

**Armor Proficiencies:** Cloth, leather, hide, chainmail
**Weapon Proficiencies:** Simple melee, military melee, simple ranged
**Bonus to Defense:** +1 Fortitude or Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3.5

**Class Skills:** Arcana (Int), Athletics (Str), Bluff (Cha), Diplomacy (Cha), Endurance (Con), Heal (Wis), Insight (Wis), Intimidate (Cha), Streetwise (Cha)

**Class Features:** Ardent Mantle (hybrid), *ardent surge* (hybrid), Psionic Augmentation (hybrid)
**Hybrid Talent Options:** Ardent Armor Proficiency, Mantle Power

## Class Features

Hybrid ardents have the following class features.

**Ardent Mantle (Hybrid):** This class feature functions as the ardent class feature (page 23), except that you don't gain the power associated with the mantle you choose.

**Ardent Surge (Hybrid):** You gain the ardent power *ardent surge* (page 24). The power functions as normal, except that you can use it only once per encounter.

**Psionic Augmentation (Hybrid):** This class feature functions as the ardent class feature (page 23), except that your power point total varies depending on your selection of powers. See "Psionic Augmentation and Hybrid Characters" (page 137) to determine the number of power points you have.

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Ardent Armor Proficiency:** You gain proficiency with leather armor, hide armor, and chainmail.

**Mantle Power:** You gain the power associated with the Ardent Mantle option you chose (page 23).

### Suggested Combinations

The ardent/bard is a great combination thematically, and the two classes' roles and key ability scores match. It's easy to imagine a character who taps into others' emotions through both mental manipulation and song.

If you prefer to stay fully psionic, the ardent/battlemind delivers durability in battle and retains important leader functions.

One can easily compare the emotional discipline of an ardent to that required to be a paladin, and mixing these two classes creates an interesting hybrid. Charisma should be your best ability score, with Strength, Constitution, and Wisdom all vying for second place.

## Hybrid Avenger

You blend secret monastic training with other talents to become a special servant of the gods. Do your vows represent an earlier stage of your life, all but left behind, or a newfound mission?

As a hybrid avenger, you pursue your foes with great skill, but you must sacrifice some of your offensive and defensive capabilities to dabble in a second class.

**CLASS TRAITS**

**Role:** Striker
**Power Source:** Divine
**Key Abilities:** Wisdom, Dexterity, Intelligence

**Armor Proficiencies:** Cloth
**Weapon Proficiencies:** Simple melee, military melee, simple ranged
**Implements:** Holy symbols
**Bonus to Defense:** +1 Fortitude, Reflex, or Will

**Hit Points at 1st Level:** 7
**Hit Points per Level Gained:** 3
**Healing Surges per Day:** 3.5

**Class Skills:** Acrobatics (Dex), Athletics (Str), Endurance (Con), Heal (Wis), Intimidate (Cha), Perception (Wis), Religion (Int), Stealth (Dex), Streetwise (Cha)

**Class Features:** *Oath of enmity* (hybrid)
**Hybrid Talent Options:** Armor of Faith, Avenger's Censure (hybrid), Channel Divinity (hybrid)

### Class Feature

Hybrid avengers have the following class feature.

**Oath of Enmity (Hybrid):** You gain the avenger power *oath of enmity* (*Player's Handbook 2*, page 34). The power functions as normal, except that you can apply the effect only when you make a melee attack using an avenger power or an avenger paragon path power.

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Armor of Faith:** This class feature functions exactly as the avenger class feature (*Player's Handbook 2*, page 33).

**Avenger's Censure (Hybrid):** This class feature functions as the avenger class feature (*Player's Handbook 2*, page 33), except that the bonus to damage rolls applies only to your avenger powers and avenger paragon path powers.

**Channel Divinity (Hybrid):** This class feature functions as the avenger class feature (*Player's Handbook 2*, page 33), except that you start with a single avenger Channel Divinity power of your choice.

CHRIS SEAMAN

### Suggested Combinations

The avenger/invoker enjoys a variety of melee and nonmelee attacks, all based on Wisdom. You can control enemies at a distance, making it even easier for you to hunt down your prey.

The avenger/monk uses a high Wisdom score and great mobility to pursue enemies with deadly efficiency.

The avenger/wizard seems like an unusual combination at first glance, but both classes suggest the study of secret lore. With good Wisdom and Intelligence scores, you can achieve the same variety of attacks as an avenger/invoker can.

## Hybrid Barbarian

In your heart, you know the power of rage. However, your link to the primal spirits that unleash these rages isn't quite as strong as a typical barbarian's. Perhaps you have been away from the tribe for too long, or maybe you have only begun to harness primal power.

Regardless of the reason, as a hybrid barbarian you can't unleash the primal rage in your heart quite as easily as a full member of that class can, but you remain capable of occasional frenzied bursts of energy.

**CLASS TRAITS**

**Role:** Striker
**Power Source:** Primal
**Key Abilities:** Strength, Constitution, Charisma

**Armor Proficiencies:** Cloth, leather, hide
**Weapon Proficiencies:** Simple melee, military melee
**Bonus to Defense:** +1 Fortitude

**Hit Points at 1st Level:** 7.5
**Hit Points per Level Gained:** 3
**Healing Surges per Day:** 4

**Class Skills:** Acrobatics (Dex), Athletics (Str), Endurance (Con), Heal (Wis), Intimidate (Cha), Nature (Wis), Perception (Wis)

**Class Features:** Rampage
**Hybrid Talent Options:** Barbarian Armored Agility, Feral Might

### Class Feature

Hybrid barbarians have the following class feature.

**Rampage:** This class feature functions exactly as the barbarian class feature (*Player's Handbook 2*, page 49).

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Barbarian Armored Agility:** You gain the Barbarian Agility class feature (*Player's Handbook 2*, page 49). You also gain proficiency with leather armor and hide armor.

**Feral Might:** This class feature functions exactly as the barbarian class feature (*Player's Handbook 2*, page 49).

### Suggested Combinations

The hybrid barbarian can be joined with the hybrid fighter for great durability and melee prowess. Choose a Hybrid Talent option to improve your AC, either Barbarian Armored Agility or Fighter Armor Proficiency.

If you are a barbarian/cleric who chooses Strength-based healing powers, you gain valuable healing capability that you can use to keep yourself fighting.

A barbarian/ranger is a potent combatant. Such a character can use barbarian powers requiring a two-handed weapon as well as ranger powers requiring two melee weapons.

## Hybrid Bard

You are a dabbler among dabblers. The versatility of the typical bard isn't enough for you, so you have branched out even further. Alternatively, you might have been incapable of mastering the bard's full repertoire of performance and inspiration and have chosen to explore other areas to expand your abilities.

As a hybrid bard, you retain some of the bard's healing power, but trade away much of that class's innate versatility in exchange for access to another class's tricks.

**CLASS TRAITS**

**Role:** Leader
**Power Source:** Arcane
**Key Abilities:** Charisma, Intelligence, Constitution

**Armor Proficiencies:** Cloth, leather, hide, chainmail; light shield
**Weapon Proficiencies:** Simple melee, longsword, scimitar, short sword, simple ranged, military ranged
**Implements:** Wands
**Bonus to Defense:** +1 Reflex or Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3.5

**Class Skills:** Acrobatics (Dex), Arcana (Int), Athletics (Str), Bluff (Cha), Diplomacy (Cha), Dungeoneering (Wis), Heal (Wis), History (Int), Insight (Wis), Intimidate (Cha), Nature (Wis), Perception (Wis), Religion (Int), Streetwise (Cha)
**Extra Trained Skill:** Choose an extra trained skill from the class skills list above.

**Class Features:** *Majestic word* (hybrid), Skill Versatility
**Hybrid Talent Options:** Bard Armor Proficiency, Bardic Virtue, Song of Rest, *words of friendship*

### Class Features

Hybrid bards have the following class features.

**Majestic Word (Hybrid):** You gain the bard power *majestic word* (*Player's Handbook 2*, page 68). The power functions as normal, except that you can use it only once per encounter.

**Skill Versatility:** This class feature functions exactly as the bard class feature (*Player's Handbook 2*, page 67).

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Bard Armor Proficiency:** You gain proficiency with leather armor, hide armor, chainmail, and light shields.

**Bardic Virtue:** This class feature functions exactly as the bard class feature (*Player's Handbook 2*, page 67).

**Song of Rest:** This class feature functions exactly as the bard class feature (*Player's Handbook 2*, page 67).

**Words of Friendship:** You gain the bard power *words of friendship* (*Player's Handbook 2*, page 68).

### Suggested Combinations

The bard and warlock classes make a good hybrid combination, with complete overlap between primary and secondary abilities. Focus on ranged implement attacks when choosing bard powers.

A bard/paladin can mix leadership and defense and maintain accuracy with Charisma attack powers. You'll need a little help with AC, particularly if you're the only defender in the group.

Combining a bard with a warlord can create a leader who has powers that move allies and enemies around the battlefield with ease.

## Hybrid Battlemind

When you start with a sturdy mind and body, you can add almost any other set of talents to achieve a strong whole—or so you like to tell yourself.

What led you to add another class's abilities to your own mental and physical perfection as a battlemind? Do you secretly believe your psionic talents to be unreliable, at least compared to a strong blade or a reliance on other forms of magic? Or have you only recently discovered your psionic capabilities?

As a hybrid battlemind, you give up some battlefield control and psionic tricks in order to add another class's features and powers to your arsenal.

**CLASS TRAITS**
**Role:** Defender
**Power Source:** Psionic
**Key Abilities:** Constitution, Wisdom, Charisma
**Armor Proficiencies:** Cloth, leather, hide, chainmail, scale; light shield, heavy shield
**Weapon Proficiencies:** Simple melee, military melee, simple ranged
**Bonus to Defense:** +1 Will

**Hit Points at 1st Level:** 7.5
**Hit Points per Level Gained:** 3
**Healing Surges per Day:** 4.5

**Class Skills:** Arcana (Int), Athletics (Str), Bluff (Cha), Diplomacy (Cha), Endurance (Con), Heal (Wis), Insight (Wis), Intimidate (Cha)

**Class Features:** Psionic Augmentation (hybrid), Psionic Defense (hybrid)
**Hybrid Talent Options:** Battlemind Armor Proficiency, Psionic Study

### Class Features

Hybrid battleminds have the following class features.

**Psionic Augmentation (Hybrid):** This class feature functions as the battlemind class feature (page 43), except that your power point total varies depending on your selection of powers. See "Psionic Augmentation and Hybrid Characters" (page 137) to determine the number of power points you have.

**Psionic Defense (Hybrid):** This class feature functions as the battlemind class feature (page 43), except that you must choose either *blurred step* or *mind spike*.

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Battlemind Armor Proficiency:** You gain proficiency with leather armor, hide armor, chainmail, scale armor, light shields, and heavy shields.

**Psionic Study:** This class feature functions exactly as the battlemind class feature (page 43).

### Suggested Combinations

The battlemind/fighter has plenty of durability, but you'll need to assign high scores to both Strength and Constitution, with Wisdom as your third-best score.

The ardent/battlemind also needs two high scores—Constitution and Charisma—but can manage without a third good score. This combination also gives you the full array of power points for your augmentable powers.

A battlemind/warlock can get away with only one high ability score (Constitution), and Charisma makes a great secondary score for both classes. Unfortunately, you're a little fragile for a defender, so either shore up those defenses or find a tough ally to stand next to.

# Hybrid Cleric

By learning talents beyond those taught to the typical cleric, you have honed yourself into a distinctive divine leader. Your cleric training might represent a youthful devotion or a newly discovered dedication to a god.

As a hybrid cleric, you offer useful healing to a group, although less than a full-fledged cleric could. You also give up the versatility of the Channel Divinity and Ritual Casting class features in order to master new talents.

**CLASS TRAITS**
**Role:** Leader
**Power Source:** Divine
**Key Abilities:** Wisdom, Strength, Charisma

**Armor Proficiencies:** Cloth, leather, hide, chainmail
**Weapon Proficiencies:** Simple melee, simple ranged
**Implements:** Holy symbols
**Bonus to Defense:** +1 Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3.5

**Class Skills:** Arcana (Int), Diplomacy (Cha), Heal (Wis), History (Int), Insight (Wis), Religion (Int)

**Class Features:** Healer's Lore, *healing word* (hybrid)
**Hybrid Talent Options:** Cleric Armor Proficiency, Channel Divinity (hybrid)

## Class Features

Hybrid clerics have the following class features.

**Healer's Lore:** This class feature functions exactly as the cleric class feature (*Player's Handbook*, page 61).

**Healing Word (Hybrid):** You gain the cleric power *healing word* (*Player's Handbook*, page 62). The power functions as normal, except that you can use it only once per encounter.

## Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Cleric Armor Proficiency:** You gain proficiency with leather armor, hide armor, and chainmail.

**Channel Divinity (Hybrid):** This class feature functions as the cleric class feature (*Player's Handbook*, page 61), except that you start with a single cleric Channel Divinity power of your choice.

## Suggested Combinations

Cleric/fighter and cleric/paladin offer similar benefits: a great mix of Strength-based melee attacks, high durability, and healing powers to keep yourself and your allies in the fight.

A cleric/invoker stays at the back of the party, launching helpful ranged attacks and devastating area blasts from a position of relative safety.

A cleric/warlord combines leader powers from two different classes to make an effective whole.

# Hybrid Druid

Your ability to take on the form of a beast marks you unmistakably as a druid, but your bond to the spirits of nature remains somewhat tenuous. Do your druid powers stem from an innate but undeveloped link to primal spirits? Or have you just begun to explore the mysteries of nature after a life spent in other pursuits?

As a hybrid druid, you can assume beast form and likely know powers useful in that form. However, you sacrifice some connections to the natural world—including Primal Aspect and Ritual Casting—to explore another class's talents.

**CLASS TRAITS**
**Role:** Controller
**Power Source:** Primal
**Key Abilities:** Wisdom, Dexterity, Constitution

**Armor Proficiencies:** Cloth, leather, hide
**Weapon Proficiencies:** Simple melee, simple ranged
**Implements:** Staffs, totems
**Bonus to Defense:** +1 Reflex or Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3.5

**Class Skills:** Arcana (Int), Athletics (Str), Diplomacy (Cha), Endurance (Con), Heal (Wis), History (Int), Insight (Wis), Nature (Wis), Perception (Wis)

**Class Features:** *Wild shape*
**Hybrid Talent Options:** Druid Armor Proficiency, Primal Aspect

### Class Feature

Hybrid druids have the following class feature.

**Wild Shape:** You gain the druid power *wild shape* (*Player's Handbook 2*, page 84).

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Druid Armor Proficiency:** You gain proficiency with leather armor and hide armor.

**Primal Aspect:** This class feature functions exactly as the druid class feature (*Player's Handbook 2*, page 83).

### Suggested Combinations

The druid/shaman is an ideal combination of primal classes, mixing the druid's control and melee powers with the shaman's leadership.

A druid/invoker mixes powers and features from two different Wisdom-based controller classes and can offer an interesting character background: What brought you to mesh the ancient power of the gods with the might of primal spirits?

Hybrid druids who want to increase their deadliness in melee should consider the avenger, ranger, and rogue classes.

### Selecting Druid Powers

Despite automatically gaining the *wild shape* power, a hybrid druid doesn't automatically come with beast form powers; you must select them.

At 1st level, you should consider selecting a beast form power as your lone druid at-will attack power. You can use your other at-will attack power in your humanoid form.

If you don't have any beast form powers, you're wasting *wild shape*, so include beast form powers among your attack powers and utility powers.

## Hybrid Fighter

You call on your martial training to guard allies and strike down enemies, and because of your hybrid training, you have tricks up your sleeve that your enemies don't expect.

Many hybrid fighters learned their martial talents in a military or a mercenary organization, but these experiences typically represent only a portion of the character's background. Perhaps your character has moved on from military service to a new area of expertise, or maybe you have taken up the sword as part of a new direction in your life after months or years of other studies.

As a hybrid fighter, you protect your comrades as any other defender does: with durability, martial prowess, and battlefield control. However, you give up some of the fighter's talent with weapons, and you can't mark enemies with all your powers.

**CLASS TRAITS**

**Role:** Defender
**Power Source:** Martial
**Key Abilities:** Strength, Dexterity, Wisdom, Constitution

**Armor Proficiencies:** Cloth, leather, hide, chainmail, scale; light shield, heavy shield
**Weapon Proficiencies:** Simple melee, military melee, simple ranged, military ranged
**Bonus to Defense:** +1 Fortitude

**Hit Points at 1st Level:** 7.5
**Hit Points per Level Gained:** 3
**Healing Surges per Day:** 4.5

**Class Skills:** Athletics (Str), Endurance (Con), Heal (Wis), Intimidate (Cha), Streetwise (Cha)

**Class Features:** Combat Challenge (hybrid)
**Hybrid Talent Options:** Combat Specialty, Fighter Armor Proficiency, Fighter Combat Talent

### Class Feature

Hybrid fighters have the following class feature.

**Combat Challenge (Hybrid):** This class feature functions as the fighter class feature (*Player's Handbook*, page 76), except that you can use it to mark only enemies you attack using fighter powers and fighter paragon path powers.

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Combat Specialty:** When you select this option, you choose one of the following class features.

*Combat Agility:* This class feature functions exactly as the fighter class feature (*Martial Power 2*, page 6).

*Combat Superiority:* This class feature functions exactly as the fighter class feature (*Player's Handbook*, page 76).

**Fighter Armor Proficiency:** You gain proficiency with leather armor, hide armor, chainmail, scale armor, light shields, and heavy shields.

**Fighter Combat Talent:** When you select this option, you choose one of the following class features.

*Battlerager Vigor (Hybrid):* This class feature functions as the fighter class feature (*Martial Power*, page 6), except that you don't gain the bonus to damage rolls when wearing light armor or chainmail.

*Brawler Style:* This class feature functions exactly as the fighter class feature (*Martial Power 2*, page 6).

*Fighter Weapon Talent:* This class feature functions exactly as the fighter class feature (*Player's Handbook*, page 76).

*Tempest Technique:* This class feature functions exactly as the fighter class feature (*Martial Power*, page 7).

### Suggested Combinations

A fighter/paladin draws on two different flavors of tenacity and resilience to create a single defender.

By adding hybrid warlord to hybrid fighter, you can dabble in either tactical genius or inspirational brilliance without giving up melee prowess.

If you're looking to add some nonmelee attacks to your hybrid fighter, consider the hybrid invoker. You don't give up much AC (particularly if you are going to wield a two-handed weapon), and it doesn't hurt for a fighter to have a high Wisdom score.

## Hybrid Invoker

You wield the might of the gods, mixed with powers more earthly. But why would you forsake pure devotion to the secrets of the invoker? Did you uncover a mystery that frightened you from wielding such unfettered power? Or has your understanding of divinity only recently awakened?

As a hybrid invoker, you wield the gods' own might to smite your foes. However, you forgo the versatility of Channel Divinity and Ritual Casting to gain the benefits of another class.

**CLASS TRAITS**

**Role:** Controller
**Power Source:** Divine
**Key Abilities:** Wisdom, Constitution, Intelligence

**Armor Proficiencies:** Cloth, leather, hide, chainmail
**Weapon Proficiencies:** Simple melee, simple ranged
**Implements:** Rods, staffs
**Bonus to Defense:** +1 Fortitude, Reflex, or Will

**Hit Points at 1st Level:** 5
**Hit Points per Level Gained:** 2
**Healing Surges per Day:** 3

**Class Skills:** Arcana (Int), Diplomacy (Cha), Endurance (Con), History (Int), Insight (Wis), Intimidate (Cha), Religion (Int)

**Class Features:** Covenant Manifestation
**Hybrid Talent Options:** Channel Divinity (hybrid), Invoker Armor Proficiency

### Class Feature

Hybrid invokers have the following class feature.

**Covenant Manifestation:** You gain the Covenant Manifestation of a Divine Covenant of your choice (*Player's Handbook 2*, page 101).

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Channel Divinity (Hybrid):** This class feature functions as the invoker class feature (*Player's Handbook 2*, page 101), except that you start with a single Channel Divinity power. That power is the Channel Divinity power associated with the same Divine Covenant as your Covenant Manifestation.

**Invoker Armor Proficiency:** You gain proficiency with leather armor, hide armor, and chainmail.

### Suggested Combinations

A cleric/invoker offers a divine combination of mass devastation and healing powers.

An invoker/wizard or invoker/psion has access to a vast array of controller powers. Consider taking the Hybrid Talent feat to get the Channel Divinity power *preserver's rebuke* in order to make optimal use of a high Intelligence score.

The invoker/shaman mixes two very different traditions of power to great effect on the battlefield.

## Hybrid Monk

You are an enigma, blending supreme discipline and focus with a multifaceted approach to victory in battle. How do you explain this seeming contradiction? Are you a failed student of monastic discipline, turning to alternative talents to stay alive? Or have you newly discovered an ascetic lifestyle and now seek to leave behind your former life?

As a hybrid monk, you sacrifice some of the training of your monastic tradition, including significant unarmed prowess, in order to gain aspects of a second class.

CHRIS SEAMAN

**CLASS TRAITS**
**Role:** Striker
**Power Source:** Psionic
**Key Abilities:** Dexterity, Strength, Wisdom

**Armor Proficiencies:** Cloth
**Weapon Proficiencies:** Club, dagger, quarterstaff, shuriken, sling, spear
**Implements:** Ki focus, weapons with which you have proficiency
**Bonus to Defense:** +1 Fortitude, Reflex, or Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3.5

**Class Skills:** Acrobatics (Dex), Athletics (Str), Diplomacy (Cha), Endurance (Con), Heal (Wis), Insight (Wis), Perception (Wis), Religion (Int), Stealth (Dex), Thievery (Dex)

**Class Features:** Monastic Tradition (hybrid)

**Hybrid Talent Options:** Expanded Tradition, Unarmed Combatant, Unarmored Defense

### Class Feature

Hybrid monks have the following class feature.

**Monastic Tradition (Hybrid):** Choose a Monastic Tradition option (page 63). You gain only the Flurry of Blows power associated with that option. Your Flurry of Blows power is triggered only when you hit with a monk power or monk paragon path power during your turn. You are considered to have that option for the purpose of meeting prerequisites.

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Expanded Tradition:** You gain all the features associated with your Monastic Tradition.

**Unarmed Combatant:** This class feature functions exactly as the monk class feature (page 63).

**Unarmored Defense:** This class feature functions exactly as the monk class feature (page 63).

### Suggested Combinations

The monk/rogue is an excellent combination, resulting in a character who can use a dagger to deliver flurries and sneak attacks alike. Focus on a good Dexterity score and make Strength second best.

The avenger/monk combination suggests years of training in a secret monastery dedicated to disciplined vengeance. You'll need a high score in both Dexterity and Wisdom to maximize accuracy.

The fighter/monk can call out foes for one-on-one battle, and then slip away when things get too rough. Put high scores in both Dexterity and Strength, with Wisdom a strong third score.

## Hybrid Paladin

You combine the divine authority of a paladin with the talents of another class to become a formidable protector. Many hybrid paladins have only recently pledged themselves to the path of the divine warrior after years spent in other pursuits. A few, however, have recognized that single-minded devotion isn't for them and have expanded their abilities accordingly.

As a hybrid paladin, you bring a useful marking ability and strong melee powers to a group. Like other defenders, you are durable and can protect allies well, but you give up some healing capability to gain the talents of another class.

**CLASS TRAITS**
**Role:** Defender
**Power Source:** Divine
**Key Abilities:** Strength, Charisma, Wisdom

**Armor Proficiencies:** Cloth, leather, hide, chainmail, scale, plate; light shield, heavy shield
**Weapon Proficiencies:** Simple melee, military melee, simple ranged
**Implements:** Holy symbols
**Bonus to Defense:** +1 Fortitude, Reflex, or Will

**Hit Points at 1st Level:** 7.5
**Hit Points per Level Gained:** 3
**Healing Surges per Day:** 5

**Class Skills:** Diplomacy (Cha), Endurance (Con), Heal (Wis), History (Int), Insight (Wis), Intimidate (Cha), Religion (Int)

**Class Features:** *Divine challenge* (hybrid)
**Hybrid Talent Options:** Channel Divinity (hybrid), Paladin Armor Proficiency

### Class Feature

Hybrid paladins have the following class feature.

**Divine Challenge (Hybrid):** You gain the paladin power *divine challenge* (*Player's Handbook*, page 91). The power functions as normal, except that the following text replaces the power's second paragraph.

> While a target is marked, it takes a –2 penalty to attack rolls for any attack that doesn't include you as a target. The first time it makes an attack that doesn't include you as a target before the start of your next turn, you can use an immediate reaction to deal radiant damage to the target equal to your Charisma modifier. The damage increases to 2 + your Charisma modifier at 11th level and 4 + your Charisma modifier at 21st level.

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Channel Divinity (Hybrid):** This class feature functions as the paladin class feature (*Player's Handbook*, page 91), except that you start with a single paladin Channel Divinity power of your choice.

**Paladin Armor Proficiency:** You gain proficiency with leather armor, hide armor, chainmail, scale armor, plate armor, light shields, and heavy shields.

### Suggested Combinations

Combining the hybrid fighter with the hybrid paladin keeps your AC up and mixes two different styles of melee control.

It's easy to see the value of combining paladin and cleric, but the paladin/warlord—favoring Charisma over Intelligence—might well be the most valiant battlefield leader imaginable.

Perhaps a strange combination, the paladin/warlock meshes melee prowess with deadly ranged attacks, as well as the ability to keep distant foes marked with *divine challenge*. For this combination, Paladin Armor Proficiency is a must-have option.

## Hybrid Psion

You can bend your enemies' wills to your own, yet that is not enough. What led you to meld the psion's powers of mental control with the powers of another class? Have you discovered a secret connection between psionics and another power source? Or do your mental talents represent the ace up your sleeve, an unexpected well of tricks that supplement your other abilities?

As a hybrid psion, you forgo that class's innate talent with rituals and minor psionic powers to gain features and powers from a second class.

**CLASS TRAITS**

**Role:** Controller
**Power Source:** Psionic
**Key Abilities:** Intelligence, Charisma, Wisdom

**Armor Proficiencies:** Cloth
**Weapon Proficiencies:** Simple melee, simple ranged
**Implements:** Orbs, staffs
**Bonus to Defense:** +1 Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2
**Healing Surges per Day:** 3

**Class Skills:** Arcana (Int), Bluff (Cha), Diplomacy (Cha), Dungeoneering (Wis), History (Int), Insight (Wis), Intimidate (Cha), Perception (Wis)

**Class Features:** Discipline Focus (hybrid), Psionic Augmentation (hybrid)
**Hybrid Talent Options:** Expanded Discipline Focus

### Class Features

Hybrid psions have the following class features.

**Discipline Focus (Hybrid):** Choose a Discipline Focus option (page 81). If you choose Telekinesis Focus, you gain the *far hand* power. If you choose Telepathy Focus, you gain the *send thoughts* power.

**Psionic Augmentation (Hybrid):** This class feature functions as the psion class feature (page 81), except that your power point total varies depending on your selection of powers. See "Psionic Augmentation and Hybrid Characters" (page 137) to determine the number of power points you have.

### Hybrid Talent Option

If you take the Hybrid Talent feat, you can select the following option.

**Expanded Discipline Focus:** If you have Telekinesis Focus, you gain the *forceful push* power. If you have Telepathy Focus, you gain the *distract* power.

### Suggested Combinations

The psion/wizard is a controller extraordinaire, using a high Intelligence to rain down arcane and psionic destruction on enemies.

A bard/psion combines discipline with guile to outfox enemies just long enough to defeat them. You'll want high Intelligence and Charisma scores.

The psion/warlock grasps for power from all sources, whether by mastering your own psionic potential or by drawing on bargains with otherworldly entities. With good Intelligence and Charisma scores, you should be able to gather all the power you need.

## Hybrid Ranger

You blend the hunter's dogged pursuit of a quarry with other talents to become a formidable warrior. You might have learned your ranger powers as a young wanderer or an independent scout before taking up new skills. Alternatively, you might have been driven only recently to a life in the wilderness.

You retain the ranger's damage-dealing capability. However, you initially give up the specialization of the ranger's Fighting Style class feature.

**CLASS TRAITS**

**Role:** Striker
**Power Source:** Martial
**Key Abilities:** Strength, Dexterity, Wisdom

**Armor Proficiencies:** Cloth, leather, hide
**Weapon Proficiencies:** Simple melee, military melee, simple ranged, military ranged
**Bonus to Defense:** +1 Fortitude or Reflex

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3

**Class Skills:** Acrobatics (Dex), Athletics (Str), Dungeoneering (Wis), Endurance (Con), Heal (Wis), Nature (Wis), Perception (Wis), Stealth (Dex)
**Extra Trained Skill:** Choose an extra trained skill from the class skills list above.

**Class Features:** Hunter's Quarry (hybrid)
**Hybrid Talent Options:** Ranger Armor Proficiency, Ranger Combat Talent, Ranger Fighting Style

### Class Feature

Hybrid rangers have the following class feature.

**Hunter's Quarry (Hybrid):** This class feature functions as the ranger class feature (*Player's Handbook*, page 104), except that you can deal the extra damage only when you hit your quarry with a ranger power or a ranger paragon path power.

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Ranger Armor Proficiency:** You gain proficiency with leather armor and hide armor.

**Ranger Combat Talent:** When you select this option, you choose one of the following class features.

*Prime Shot:* This class feature functions exactly as the ranger class feature (*Player's Handbook*, page 104).

*Running Attack:* This class feature functions exactly as the ranger class feature (*Martial Power 2*, page 32).

**Ranger Fighting Style:** When you select this option, you choose one of the following class features.

*Archer Fighting Style:* This class feature functions exactly as the ranger class feature (*Player's Handbook*, page 104).

*Beast Mastery (Hybrid):* This class feature functions as the ranger class feature (*Martial Power*, page 38), except that the beast takes a -1 penalty to attack rolls and all defenses.

*Hunter Fighting Style:* This class feature functions exactly as the ranger class feature (*Martial Power 2*, page 32).

*Marauder Fighting Style:* This class feature functions exactly as the ranger class feature (*Martial Power 2*, page 32).

*Two-Blade Fighting Style:* This class feature functions exactly as the ranger class feature (*Player's Handbook*, page 104).

### Suggested Combinations

Fighter/ranger is an effective combination if you focus on melee powers designed for two weapons.

A ranger/rogue is undoubtedly a master damage-dealer. However, when combining the ranger and rogue classes, choose your powers carefully; many of these powers have weapon requirements that don't match up well. For example, if you want to use ranged powers from both classes, you need a crossbow.

Even though the druid/ranger or ranger/seeker must balance multiple key abilities, these combinations add a fun primal flavor to the hybrid ranger.

## Hybrid Rogue

You know the value of a well-placed knife, even if you don't bring the rogue's full complement of talents to every situation.

The most common backstory for a hybrid rogue is a childhood spent on the mean streets of a city, learning enough tricks to stay alive and out of prison. Alternatively, you might have been a respected member of society once, driven to a rogue's life by cruel fate or the machinations of your enemies.

You can be just as sneaky and deadly as a non-hybrid rogue, but you must sacrifice some rogue options to gain options from another class.

**CLASS TRAITS**
**Role:** Striker
**Power Source:** Martial
**Key Abilities:** Dexterity, Strength, Charisma

**Armor Proficiencies:** Cloth, leather
**Weapon Proficiencies:** Dagger, hand crossbow, shuriken, sling, short sword
**Bonus to Defense:** +1 Reflex

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3

**Class Skills:** Acrobatics (Dex), Athletics (Str), Bluff (Cha), Dungeoneering (Wis), Insight (Wis), Intimidate (Cha), Perception (Wis), Stealth (Dex), Streetwise (Cha), Thievery (Dex)
**Extra Trained Skills:** Choose two extra trained skills from the class skills list above.

**Class Features:** Sneak Attack (hybrid)
**Hybrid Talent Options:** First Strike, Rogue Combat Talent, Rogue Tactics

### Class Feature

Hybrid rogues have the following class feature.

**Sneak Attack (Hybrid):** This class feature functions as the rogue class feature (*Player's Handbook*, page 117), except that you can deal the extra damage only when you hit with a rogue power or a rogue paragon path power.

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**First Strike:** This class feature functions exactly as the rogue class feature (*Player's Handbook*, page 117).

**Rogue Combat Talent:** When you select this option, you choose one of the following class features.

ROBERTO MARCHESI

*Sharpshooter Talent:* This class feature functions exactly as the rogue class feature (*Martial Power 2*, page 56).

*Rogue Weapon Talent:* This class feature functions exactly as the rogue class feature (*Player's Handbook*, page 117).

**Rogue Tactics:** This class feature functions exactly as the rogue class feature (*Player's Handbook*, page 117).

### Suggested Combinations

Most hybrid rogues need two good ability scores, making hybrid combinations tricky to build.

A rogue/sorcerer can add some devious ranged and burst attacks to a repertoire of melee powers.

Combining the hybrid rogue with the hybrid bard creates a master trickster, who uses Charisma and Dexterity to alternately befuddle and eviscerate foes.

If you prefer brawn over guile, combine the hybrid fighter with the hybrid rogue, choose Rogue Tactics through the Hybrid Talent feat, and then pick either the Brutal Scoundrel class feature (*Player's Handbook*, page 117) or the Ruthless Ruffian class feature (*Martial Power*, page 73).

## Hybrid Runepriest

You have begun to unlock the mysteries of divine runes, but you lack the focus needed for true mastery. What keeps you from achieving this focus? Have you recognized that runic study alone is insufficient to stand against the forces of evil? Or have you started dabbling in rune magic to enhance your already formidable talents in battle?

As a hybrid runepriest, you forgo some battlefield healing and mastery of basic runes in exchange for a second class's features and powers.

**CLASS TRAITS**

**Role:** Leader
**Power Source:** Divine
**Key Abilities:** Strength, Constitution, Wisdom

**Armor Proficiencies:** Cloth, leather, hide, chainmail, scale; light shield
**Weapon Proficiencies:** Simple melee, simple ranged
**Bonus to Defense:** +1 Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3.5

**Class Skills:** Arcana (Int), Athletics (Str), Endurance (Con), Heal (Wis), History (Int), Insight (Wis), Religion (Int), Thievery (Dex)

**Class Features:** *Rune of mending* (hybrid), Runic Artistry
**Hybrid Talent Options:** Rune Master, Runepriest Armor Proficiency

### Class Features

Hybrid runepriests have the following class features.

**Rune of Mending (Hybrid):** You gain the runepriest power *rune of mending* (page 100). The power functions as normal, except that you can use it only once per encounter.

**Runic Artistry:** This class feature functions exactly as the runepriest class feature (page 99).

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Rune Master:** This class feature functions exactly as the runepriest class feature (page 99).

**Runepriest Armor Proficiency:** You gain proficiency with leather armor, hide armor, chainmail, scale armor, and light shields.

### Suggested Combinations

The cleric/runepriest combines leadership from two divine classes, offering a wealth of story and tactical options. Make Strength and Wisdom your two best ability scores, with either Constitution or Charisma in third place.

Both the fighter/runepriest and the paladin/runepriest offer similar blends of the leader and defender roles, and also allow you to maximize your class armor proficiencies. Strength should be your primary ability score, with Constitution or Wisdom a good second choice.

The barbarian/runepriest provides a hefty dose of damage-dealing capability, allowing you to put the fear of your god into foes. Your highest ability score should be Strength, with Constitution second.

# Hybrid Seeker

You have forged a tenuous bond with primal spirits of the hunt. What keeps you from giving yourself fully to the primal spirits? Do you fear loss of control? Do you mistrust their motives? Or are you simply not spiritually strong enough to hold the power they offer?

As a hybrid seeker, you give up some battlefield control ability in exchange for features and powers of a second class.

**CLASS TRAITS**
**Role:** Controller
**Power Source:** Primal
**Key Abilities:** Wisdom, Strength, Dexterity

**Armor Proficiencies:** Cloth, leather
**Weapon Proficiencies:** Simple melee, simple ranged, military ranged
**Bonus to Defense:** +1 Reflex or Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3.5

**Class Skills:** Acrobatics (Dex), Athletics (Str), Endurance (Con), Heal (Wis), Insight (Wis), Intimidate (Cha), Nature (Wis), Perception (Wis), Stealth (Dex)

**Class Features:** *Inevitable shot* (hybrid), Seeker's Bond (hybrid)
**Hybrid Talent Options:** True Seeker's Bond

## Class Features

Hybrid seekers have the following class features.

**Inevitable Shot (Hybrid):** You gain the seeker power *inevitable shot* (page 118). The power functions as normal, except that it is triggered only by ranged attacks from seeker powers and seeker paragon path powers.

**Seeker's Bond (Hybrid):** Choose one of the Seeker's Bond options (page 117). You gain only the power associated with that option, and you can use the power only once per day. You are also considered to have that option for the purpose of meeting prerequisites and using the benefits tailored for it in certain powers.

## Hybrid Talent Option

If you take the Hybrid Talent feat, you can select the following option.

**True Seeker's Bond:** You gain the rest of the benefits of the Seeker's Bond option you chose (except that you can still use the power only once per day).

## Suggested Combinations

The best hybrid combination for this class is ranger/seeker, creating a ranged attack specialist. Your Wisdom and Dexterity scores should be equally high, with Strength a good third choice.

The rogue/seeker can pick up ranged attacks from both classes, using thrown daggers or a hand crossbow rather than a longbow. Ability score assignment is difficult; you'll need high Wisdom and Dexterity scores, and your secondary ability options require some tough choices.

The fighter/seeker can be a mighty warrior. Strength and Wisdom should be your top ability scores.

# Hybrid Shaman

You have learned to call a spirit companion to your side, yet your connection to primal spirits isn't as strong as a shaman's. What caused this deficiency? Did you flee or fail a rite of passage before its completion, weakening your link to the spirit world? Have you angered the spirits, causing their voices to quiet in your mind?

As a hybrid shaman, you have a spirit companion, as well as the ability to call on spirits for healing, but you give up many of your other talents to pursue a second class.

**CLASS TRAITS**
**Role:** Leader
**Power Source:** Primal
**Key Abilities:** Wisdom, Constitution, Intelligence

**Armor Proficiencies:** Cloth, leather
**Weapon Proficiencies:** Simple melee, longspear
**Implements:** Totems
**Bonus to Defense:** +1 Fortitude or Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3.5

**Class Skills:** Arcana (Int), Athletics (Str), Endurance (Con), Heal (Wis), History (Int), Insight (Wis), Nature (Wis), Perception (Wis), Religion (Int)

**Class Features:** Companion Spirit (hybrid), *healing spirit* (hybrid), *speak with spirits*
**Hybrid Talent Options:** Spirit Boon, Spirit's Power

## Class Features

Hybrid shamans have the following class features.

**Companion Spirit (Hybrid):** You gain the *call spirit companion* power (*Player's Handbook 2*, page 120).

In addition, choose one of the Companion Spirit options (*Player's Handbook 2*, page 119). You don't gain the Spirit Boon or any of the powers granted by that choice, but you are considered to have the class feature for the purpose of meeting prerequisites and using the benefits tailored for it in certain powers.

*Special:* To select the at-will attack power associated with a Companion Spirit, you must have the appropriate spirit. For example, you can't select the *stalker's strike* power unless you have Stalker Spirit.

**Healing Spirit (Hybrid):** You gain the shaman power *healing spirit* (*Player's Handbook 2*, page 120). The power functions as normal, except that you can use it only once per encounter.

**Speak with Spirits:** You gain the shaman power *speak with spirits* (*Player's Handbook 2*, page 120).

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Spirit Boon:** You gain the Spirit Boon of the Companion Spirit option you chose (*Player's Handbook 2*, page 119).

**Spirit's Power:** You gain the opportunity action power of the Companion Spirit option you chose (*Player's Handbook 2*, page 119).

### Suggested Combinations

A druid/shaman has a wide array of options on the battlefield, including area attacks and healing effects.

The hybrid shaman seeking to add melee prowess would do well to consider the hybrid warden.

A melee-focused hybrid shaman might add the hybrid avenger, favoring Intelligence as a secondary ability. Would such a character be more loyal to the primal spirits or to the divine patron who schooled him or her in the arts of retribution?

## Hybrid Sorcerer

You know the innate power of arcane magic flowing through your body and blood, yet it does not speak to you as strongly as it would if you were only a sorcerer.

Is your sorcerous bloodline diluted, requiring you to learn other talents to survive as an adventurer? Or do you fear what might happen if you gave yourself fully to the luring pulse of magic?

As a hybrid sorcerer, you're capable of unleashing powerful gouts of arcane fury. But you don't have the resilience of a nonhybrid sorcerer or the other quirks derived from a dedication to sorcerous ways.

**CLASS TRAITS**
**Role:** Striker
**Power Source:** Arcane
**Key Abilities:** Charisma, Dexterity, Strength

**Armor Proficiencies:** Cloth
**Weapon Proficiencies:** Simple melee, simple ranged
**Implements:** Daggers, staffs
**Bonus to Defense:** +1 Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3

**Class Skills:** Arcana (Int), Athletics (Str), Bluff (Cha), Diplomacy (Cha), Dungeoneering (Wis), Endurance (Con), History (Int), Insight (Wis), Intimidate (Cha), Nature (Wis)

**Class Features:** Sorcerous Power
**Hybrid Talent Options:** Soul of the Sorcerer

### Class Feature

Hybrid sorcerers have the following class feature.

**Sorcerous Power:** You gain a bonus to the damage rolls of sorcerer powers and sorcerer paragon path powers equal to your Strength or Dexterity modifier. This bonus increases by 2 at 11th level and by 2 again at 21st level.

You choose which modifier to use when you make your character. If you choose Strength, you can use your Strength modifier in place of your Dexterity or Intelligence modifier to determine your AC while you are not wearing heavy armor.

KIERAN YANNER

### Hybrid Talent Option

If you take the Hybrid Talent feat, you can select the following option.

**Soul of the Sorcerer:** Choose one of the following class features: Dragon Soul (*Player's Handbook 2*, page 137), Soul of the Cosmic Cycle (*Arcane Power*, page 27), Storm Soul (*Arcane Power*, page 26), or Wild Soul (*Player's Handbook 2*, page 137). You gain that class feature, and you are considered to have the associated Spell Source for the purpose of meeting prerequisites and using the benefits tailored for it in certain powers.

### Suggested Combinations

One can easily imagine a young sorcerer turning to an Eldritch Pact to gain access to even greater power. Indeed, the sorcerer/warlock is a potent striker who has a variety of attacks, though the classes' secondary abilities don't match up well.

Add the hybrid bard to your hybrid sorcerer to gain healing powers and to heighten your character's reputation as a valorous trickster.

A rogue/sorcerer gains some useful melee attack powers, as long as he or she favors Dexterity.

## Hybrid Swordmage

You are no stranger to discipline and training, but you don't have the single-minded commitment to arcane swordplay that a swordmage has. Perhaps in your youth you dabbled in the fundamentals of spell and blade but never dedicated yourself to these studies wholeheartedly. Some hybrid swordmages are new students of ancient magical traditions, coming most often from other arcane or martial traditions.

As a hybrid swordmage, you provide a good mix of melee prowess, battlefield control, and utility, but you can't hold back waves of enemies quite as well as a full-fledged swordmage can.

**CLASS TRAITS**
**Role:** Defender
**Power Source:** Arcane
**Key Abilities:** Intelligence, Strength, Constitution

**Armor Proficiencies:** Cloth, leather
**Weapon Proficiencies:** Simple melee, military light blades, military heavy blades, simple ranged
**Implements:** Light blades, heavy blades
**Bonus to Defense:** +1 Will

**Hit Points at 1st Level:** 7.5
**Hit Points per Level Gained:** 3
**Healing Surges per Day:** 4

**Class Skills:** Arcana (Int), Athletics (Str), Diplomacy (Cha), Endurance (Con), History (Int), Insight (Wis), Intimidate (Cha)

**Class Features:** Swordbond, Swordmage Aegis (hybrid)
**Hybrid Talent Options:** Swordmage Warding

### Class Features

Hybrid swordmages have the following class features.

**Swordbond:** This class feature functions exactly as the swordmage class feature (*Forgotten Realms Player's Guide*, page 26).

**Swordmage Aegis (Hybrid):** This class feature functions as the swordmage class feature (*Forgotten Realms Player's Guide*, page 26), except that you can use the power that you choose only once per encounter. However, you regain the use of that power when its target drops to 0 hit points or when its mark is superseded by another mark.

### Hybrid Talent Option

If you take the Hybrid Talent feat, you can select the following option.

**Swordmage Warding:** This class feature functions exactly as the swordmage class feature (*Forgotten Realms Player's Guide*, page 26).

### Suggested Combinations

Most hybrid swordmages sacrifice some of their defense for greater versatility. Combining the hybrid swordmage with the hybrid wizard or psion gives you a great breadth of powers that share the same key ability.

If you're dedicated to staying in melee, consider adding the hybrid warlord, and put your Intelligence to good use as a tactician.

Although the hybrid swordmage and the hybrid shaman might seem incompatible, the spirit companion and the *spirit's fangs* power give a swordmage an extra option for battlefield control that doesn't require you to stay in the forefront every round.

## Hybrid Warden

To stand strong against the defilers of the natural world, you have buttressed your primal tenacity with the capabilities of another class. These capabilities might be other ways of channeling primal spirits, or you might have decided that you can't count on the spirits for all your strength.

As a hybrid warden, you can still punish foes for attacking your allies. However, because you divide your focus between two classes, you must give up some of the class's innate durability (in the form of Font of Life and Guardian Might).

**CLASS TRAITS**
**Role:** Defender
**Power Source:** Primal
**Key Abilities:** Strength, Constitution, Wisdom

**Armor Proficiencies:** Cloth, leather, hide; light shield, heavy shield
**Weapon Proficiencies:** Simple melee, military melee, simple ranged
**Bonus to Defense:** +1 Fortitude or Will
**Hit Points at 1st Level:** 8.5
**Hit Points per Level Gained:** 3.5
**Healing Surges per Day:** 4.5

**Class Skills:** Athletics (Str), Dungeoneering (Wis), Endurance (Con), Heal (Wis), Intimidate (Cha), Nature (Wis), Perception (Wis)

**Class Features:** Nature's Wrath (hybrid)
**Hybrid Talent Options:** Font of Life, Warden's Armored Might

### Class Feature

Hybrid wardens have the following class feature.

**Nature's Wrath (Hybrid):** This class feature functions as the warden class feature (*Player's Handbook 2*, page 153), except that you mark only one adjacent enemy when you use the class feature's marking ability.

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Font of Life:** This class feature functions exactly as the warden class feature (*Player's Handbook 2*, page 153).

**Warden's Armored Might:** You gain the Guardian Might class feature (*Player's Handbook 2*, page 153). You also gain proficiency with leather armor, hide armor, light shields, and heavy shields.

### Suggested Combinations

The fighter/warden offers great durability and melee attacks, though this combination might need some help with AC; Warden's Armored Might or Fighter Armor Proficiency are good fixes.

Adding the hybrid cleric gives the hybrid warden useful healing powers; Wisdom is likely your secondary ability.

Combining the hybrid warden with the hybrid ranger increases your damage output without hurting your AC too much.

## Hybrid Warlock

You draw power from snippets of arcane lore wrested from dusty tomes and primeval entities, but these secrets do not wholly define or limit your abilities.

What keeps you from fully embracing the pacts of a warlock? Do you fear the price that such bargains might entail? Or have you not yet managed to pin down the final secret that would unleash your arcane destiny?

As a hybrid warlock, you command excellent damage-dealing ability along with some control powers, but you must give up some of the more notable features of the class, including Pact Boon and Shadow Walk.

**CLASS TRAITS**
**Role:** Striker
**Power Source:** Arcane
**Key Abilities:** Charisma, Constitution, Intelligence

**Armor Proficiencies:** Cloth, leather
**Weapon Proficiencies:** Simple melee, simple ranged
**Implements:** Rods, wands
**Bonus to Defense:** +1 Reflex or Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3

**Class Skills:** Arcana (Int), Bluff (Cha), History (Int), Insight (Wis), Intimidate (Cha), Religion (Int), Streetwise (Cha), Thievery (Dex)

**Class Features:** Eldritch Pact (hybrid), Warlock's Curse (hybrid)
**Hybrid Talent Options:** Prime Shot, Shadow Walk, Warlock Pact Boon

### Class Features

Hybrid warlocks have the following class features.

**Eldritch Pact (Hybrid):** This class feature functions as the warlock class feature (*Player's Handbook*, page 130), except that you don't gain the at-will attack power or the Pact Boon granted by it. This means you meet prerequisites that require the pact you choose, and you can use the benefits tailored for it in certain powers.

**Warlock's Curse (Hybrid):** This class feature functions as the warlock class feature (*Player's Handbook*, page 131), except that you can deal the extra damage only when you hit a cursed enemy with a warlock power or a warlock paragon path power.

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Prime Shot:** This class feature functions exactly as the warlock class feature (*Player's Handbook*, page 131).

**Shadow Walk:** This class feature functions exactly as the warlock class feature (*Player's Handbook*, page 131).

**Warlock Pact Boon:** You gain the Pact Boon associated with your Eldritch Pact.

To select this option, you must have selected the at-will attack power associated with your pact. If you later retrain that power, you lose the benefit of this option.

### Suggested Combinations

A sorcerer/warlock can be a potent striker, with Charisma as the highest ability score.

Combining the warlock with the wizard creates a synergistic power list, and the wizard's key ability, Intelligence, is a good secondary ability for the warlock.

A combination of warlock and bard works quite well, thanks to the ability score overlap of the two classes and the diversity of their power selection.

## Hybrid Warlord

You have combined your talent for command with other skills, rather than focusing entirely on leadership. How and where did you come to learn the intricacies of command? Did an early stint in the military or tutelage at the feet of a tribal leader inspire you to grasp the reins of authority? Or have you only recently donned the mantle of leadership?

As a hybrid warlord, you bring talents of combat leadership and healing to a group, although you give up the Commanding Presence class feature.

**CLASS TRAITS**
**Role:** Leader
**Power Source:** Martial
**Key Abilities:** Strength, Intelligence, Charisma

**Armor Proficiencies:** Cloth, leather, hide, chainmail; light shield
**Weapon Proficiencies:** Simple melee, military melee, simple ranged
**Bonus to Defense:** +1 Fortitude or Will

**Hit Points at 1st Level:** 6
**Hit Points per Level Gained:** 2.5
**Healing Surges per Day:** 3.5

**Class Skills:** Athletics (Str), Diplomacy (Cha), Endurance (Con), Heal (Wis), History (Int), Intimidate (Cha)
**Class Features:** *Inspiring word* (hybrid), Warlord Leadership
**Hybrid Talent Options:** Commanding Presence (hybrid), Warlord Armor Proficiency

### Class Features

Hybrid warlords have the following class features.

**Inspiring Word (Hybrid):** You gain the warlord power *inspiring word* (*Player's Handbook*, page 145). The power functions as normal, except that you can use it only once per encounter.

**Warlord Leadership:** You choose one of the following class features.

*Battlefront Leader:* This class feature functions exactly as the warlord class feature (*Martial Power 2*, page 83).

*Canny Leader:* This class feature functions exactly as the warlord class feature (*Martial Power 2*, page 82).

*Combat Leader:* This class feature functions exactly as the warlord class feature (*Player's Handbook*, page 144).

### Hybrid Talent Options

If you take the Hybrid Talent feat, you can select one of the following options.

**Commanding Presence (Hybrid):** This class feature functions as the warlord class feature (*Player's Handbook*, page 144), except that you can grant the benefit of your Commanding Presence option only once per encounter.

**Warlord Armor Proficiency:** You gain proficiency with leather armor, hide armor, chainmail, and light shields.

### Suggested Combinations

The paladin/warlord and fighter/warlord combinations provide durability and melee control as well as healing.

For a barbarian/warlord, what's more inspiring than charging into battle with a savage war cry? Make Charisma your second-highest ability score and pick powers from the two classes that take advantage of it.

A consummate leader, the cleric/warlord should focus on powers that use Strength and Charisma.

# Hybrid Wizard

The path of wizardry demands focus and study, yet you have mastered several elements of arcane magic while still having time for other learning.

Did you give up a promising academic life to pursue a less sheltered existence? Did your mentor abandon you before sharing the final secrets of arcane lore? Or have you only recently begun the long task of mastering the arcane power that permeates the cosmos?

As a hybrid wizard, you have much of a wizard's versatility in power selection, but you give up the flexibility provided by the Ritual Casting and Spellbook class features, as well as the Arcane Implement Mastery class feature.

JAKE MASBRUCH

**CLASS TRAITS**

**Role:** Controller
**Power Source:** Arcane
**Key Abilities:** Intelligence, Wisdom, Dexterity

**Armor Proficiencies:** Cloth
**Weapon Proficiencies:** Dagger, quarterstaff
**Implements:** Orbs, staffs, wands
**Bonus to Defense:** +1 Will

**Hit Points at 1st Level:** 5
**Hit Points per Level Gained:** 2
**Healing Surges per Day:** 3

**Class Skills:** Arcana (Int), Diplomacy (Cha), Dungeoneering (Wis), History (Int), Insight (Wis), Nature (Wis), Religion (Int)

**Class Features:** Cantrips
**Hybrid Talent Options:** Arcane Implement Mastery

## Class Feature

Hybrid wizards have the following class feature.

**Cantrips:** This class feature functions exactly as the wizard class feature (*Player's Handbook*, page 158).

## Hybrid Talent Option

If you take the Hybrid Talent feat, you can select the following option.

**Arcane Implement Mastery:** This class feature functions exactly as the wizard class feature (*Player's Handbook*, page 157).

## Suggested Combinations

As a hybrid wizard, you're not particularly durable, so you must choose your second hybrid class, as well as your powers, with care.

The swordmage shares the same key ability, but that class's predilection for melee combat is at odds with the typical wizard's preference for staying out of the fray. To keep up in melee, select a good mix of close attack powers and some feats that improve your survivability. Alternatively, focus your swordmage power selection on ranged powers and area powers and enter melee only as a last resort.

A cleric/wizard who has good Intelligence and Wisdom scores can safely and effectively remain in the back ranks while supporting allies with battlefield control and healing.

Adding the avenger class to your hybrid wizard allows you to surprise your enemies with the occasional deadly melee attack. Taking Armor of Faith through the Hybrid Talent feat gives you the boost to AC you need to stay close enough to deliver such an attack.

When you reach 21st level, you can choose an epic destiny. You're free to delay your choice until a later level or to forgo an epic destiny altogether. If you choose an epic destiny after 21st level, you gain all of the epic destiny's benefits that are for your level and lower.

# Diamond Soul

*The psionic energy that flows through you is more than a weapon. It is the essence of your soul.*

**Prerequisite:** 21st level, monk

At a young age, you knew that the monastic traditions of the fighting monks were your calling. As a youth, you watched the initiates practice and spotted errors in their technique. When you first presented yourself to the masters, their amusement at your observations turned to astonishment. Time and again, you were proven right. The masters expected ever more from you as they took you under their tutelage, putting the most daunting tasks and grueling training regimens before you. Again and again, you overcame these challenges.

Others have displayed this same talent, but few have achieved the same level of mastery. You stand on the brink of the final steps of your studies. True, you were the best student in your class, but you know enough of the fighting arts to understand how little you truly know.

Your greatest tests lie ahead of you. Will you finally achieve the ultimate mastery you seek, or will you find that your skills are less than perfect?

## Immortality

Life, death, fame, and power mean little to you. All monks seek to attain perfect mastery of their fighting art, and you are one of the few to achieve it. Your task done, you have little use for the material world.

**Perfect Master:** The lore you study transcends such trifling mortal concerns as the material body or the spark of life. When you have attained perfect mastery, you join the tiny group of monks who have founded new psionic philosophies. Monasteries sprout across the planes to study your teachings and pass them from generation to generation.

## Diamond Soul Features

**Monastic Perfection (21st level):** Choose two monk encounter attack powers of your level or lower. Those two powers become your reserve powers. Whenever you take a short rest, you can swap one of your monk encounter attack powers for a reserve power of the same level or lower. Each time you gain a level, you can change your reserve powers.

**Diamond Body (21st level):** Your Dexterity score increases by 2. In addition, you no longer age.

**Moving Perfection (24th level):** You gain a +2 bonus to speed, and when you shift, you can shift 1 extra square.

**Diamond Perfection (30th level):** Once per round when you miss with a monk attack, you can reroll the attack roll.

## Diamond Soul Power

**Flawless Maneuver** Diamond Soul Utility 26

*Above the din and chaos of battle, your mind focuses with absolute clarity as you spot the perfect moment for your next attack.*

**Encounter ✦ Psionic**
**Minor Action** **Personal**

**Effect:** You gain a +10 power bonus to your next attack roll. If that roll is a natural 1, the attack doesn't automatically miss.

JAKE MASBRUCH

# Godmind

*"It's all coming together. I understand. I understand . . . everything!"*

**Prerequisite:** 21st level, any psionic class

Your mind flows like a river during a storm surge, threatening to overflow with a torrent of thought. As your consciousness grows more charged with psionic power, your attention expands each day. Soon, you believe, little will lie beyond your comprehension. No mystery will veil the divide between your desire and reality. You have become the walking embodiment of mind over matter. In truth, your mind controls matter and the perceptions of others. You suspect that you have discovered a new path to divinity, one powered by your will alone. But this is not a divinity that requires the adoration of others; the intensity of your focus is enough to sustain your mounting abilities.

It used to be that an insight would come to you unbidden once in a great while and shine like a star in your mind; a connection you had failed to make before suddenly became clear. Those moments of clarity were wonderful, even more so for their rarity. But now an hour does not go by that you don't make such a startling association. All the components of existence are connected in far more fundamental ways than you had realized.

You now believe that much of what makes up reality is merely the consensus, albeit an unconscious one, of all the thinking beings within it. With your psionic abilities, you can influence how the minds around you see and understand their surroundings, and in so doing, you reshape the world according to your will.

## Immortality

You perfect your understanding of the great skein of existence and picture it as a self-reinforcing and self-generating construct of conception and thought. It seems as if all the lesser minds in the universe make up one universal mind, whose perceptions expand once per age. You decide to contribute consciously to that expansion.

**Universe Mind:** With a smile on your face, you expend all your psionic power in one dramatic flare. Your physical form drops away, a vessel that has served its purpose. You imprint your mind on the universe, becoming an eternal thought, a higher ideal, a meme that will forever reverberate through existence. When your name is spoken, you notice, and if the need is great enough, you provide a crucial insight. Finally, you know all, see all, and think all.

MATIAS TAPIA

## Godmind Features

**Lay Bare the Mind (21st level):** Once per encounter, you can use a minor action to cause a single enemy you can see to have vulnerable 5 psychic until the end of the encounter.

**Startling Insight (24th level):** After you use your second wind, you can roll twice when you make any attack rolls, saving throws, skill checks, and ability checks and use either result. This benefit lasts until the end of your next turn.

**Wellspring of Mental Power (30th level):** You gain 4 additional power points.

## Godmind Power

**Rejuvenate Mind** — Godmind Utility 26

*Light emanates from you as you reach into the collective unconscious and touch a font of mental power.*

**Daily ✦ Psionic**
**Minor Action** **Personal**

**Effect:** You regain either all your power points or the use of all your daily powers, except this one. You also gain a number of temporary hit points equal to your highest ability score.

# Invincible Mind

*You are no longer just a warrior. Now you are an aspect of war itself.*

**Prerequisite:** 21st level, battlemind

Across the world and beyond, you have sought the mightiest foes. Giants, dragons, orc kings, demons, and devils have fallen before you. Your skill is unmatched by mortals, and now you turn your attention to the mightiest beings in the cosmos. As you enter the epic tier, you have but one goal: to carve your name in the annals of history as the mightiest warrior of all time.

Many have attempted to travel this road, but few have seen it through to the end. You have searched for their names in ancient tomes. Here and there you find stories of champions who opposed the mightiest beings in the cosmos but died while trying to slay them. By studying their mistakes, you have learned to avoid those errors. When the time comes for you to batter down the gates of Bane's fortress or to cross swords with Asmodeus himself, you will be ready.

Wherever you wander, tales of your deeds spread. Some of those who hear the stories seek you out in hopes of proving their talents by defeating you. Others swear fealty to you, seeing in your crusade the chance for an immortality of their own. You accept both challengers and allies. The former give you the practice you need to hone your skills, while the latter form the army you will one day lead to crush your chosen quarry.

Your life has been a long battle, but now it nears its end. Will you carry the day and achieve undying fame, or will your example serve as a warning to those who travel this path in the future?

## Immortality

Your immortality lies not in extending your life beyond its normal limits, but in conquering a foe the world deems unbeatable. Some day, after you defeat a demon lord, an archdevil, or even a god, your victory will echo through history forever.

**Unconquered Master:** Once you have established that you are the greatest warrior who ever lived, what else is there for you to pursue? Challengers arise, but none can match you. In time, you fade from the world and become a creature of pure psionic magic, content to be the measuring stick for all who come after you. Your fighting style lives on as a new psionic philosophy.

## Invincible Mind Features

**Battle Sovereignty (21st level):** You gain a +10 bonus to initiative checks and a +2 bonus to weapon attack rolls.

**Reinvigorating Attack (24th level):** When you have 0 power points and hit an enemy with a battlemind at-will attack that is unaugmented, you regain 2 power points.

**Invincible (30th level):** When you drop to 0 hit points or fewer, you can spend a healing surge as an immediate interrupt.

## Invincible Mind Power

**Indomitable Stratagem** Invincible Mind Utility 26

*You spot a minor flaw in your foe's fighting style, one that you can exploit to deadly effect.*

**Daily ✦ Psionic**
**Minor Action** **Personal**

**Effect:** Choose one enemy you can see. Until the end of the encounter, you gain a +2 power bonus to attack rolls against that enemy, and when you use battlemind at-will attacks that are unaugmented against that enemy, you can treat them as if they were augmented by 1 power point (level 1, 3, 7, 13, and 17 powers) or 2 power points (level 23 and 27 powers).

FRANCIS TSAI

# Master of the Eternal Hunt

*Across the universe, those who would defile the world fear your wrath.*

**Prerequisite:** 21st level, seeker

As a seeker, it falls to you to search out those who would wreck the natural order. The primal spirits forced the gods and the primordials from the world following the Dawn War and still stand as sentinels against their incursions. You understand better than most the chaos and horror that such beings can unleash. Some gods are benevolent, but others are destructive and evil. The gods must attend to their own affairs and allow the mortal world to follow its own fate.

When you took your first steps along the seeker's path, you sought out demons, marauding orcs that burned and destroyed at Gruumsh's behest, and rampant elementals. As these enemies fell before you, your mastery grew. In time, the primal spirits called out to you. There were greater enemies to fight, and you took to the planes to slay them before they could release their horrors upon the world. Titans, aberrations, and other powerful threats fell before you.

Though you have fought and defeated many foes, more and more take their place. You must now seek a new path, one that can help ensure the world's safety forever. As your skills reach their peak, you must seek out the deadliest hunting grounds, planes where the primal might of the world is but a whisper.

You are a Master of the Eternal Hunt. It is your fate to travel far beyond the world to battle those that threaten it. You might die alone and forgotten in some terrible corner of the Abyss, but if you survive, you will join the spirits as an everlasting guardian of all you value.

## Immortality

Your quest is never truly complete, for as long as gods, demons, devils, and primordials battle in the planes, their struggles spill over to the natural world. Some day, when you have hunted the mightiest of the world's foes to extinction, you can finally find peace, but until then, you must fight on.

**Spirit of the Hunt:** In time, your body proves a hindrance to your efforts. The threats to the world far too often encompass more than physical destruction. The mightiest of creatures, particularly beasts that originate from beyond the bounds of the cosmos, seek not merely to destroy the world but to transform it. When your mortal life is at an end, you will join the spirits in safeguarding the world. In this form, you can hunt forever.

## Master of the Eternal Hunt Features

**Relentless Hunter (21st level):** Your Wisdom score increases by 2. You ignore all penalties from cover, superior cover, concealment, and total concealment when you make ranged attacks against enemies within 10 squares of you.

**Faultless Tracker (24th level):** You gain darkvision and tremorsense 10.

**Deathless Hunter (30th level):** Once per day when an enemy's attack reduces you to 0 hit points or fewer, your current hit point total changes to 1 instead, and you gain resist 20 against that enemy's attacks until the end of the encounter. When that enemy drops to 0 hit points, you drop to 0 hit points.

## Master of the Eternal Hunt Power

**Relentless Step** Master of the Eternal Hunt Utility 26

*No enemy can escape from you and your ally. All it takes is for one arrow to find its mark, and you can close in for the kill.*

**Encounter ✦ Primal, Teleportation**
**Minor Action** **Ranged** 5
**Target:** One ally
**Effect:** You teleport yourself and the target to different squares within 5 squares of an enemy within 20 squares of you. You must have hit the enemy with a seeker attack during this turn.

BEN WOOTTEN

# Rune Maker

*You no longer merely inscribe the runes of divine power. Now you create them.*

**Prerequisite:** 21st level, runepriest

For you, the divine runes were never merely inert symbols that channeled divine magic. Instead, the runes have always been more like living creatures to you. You don't simply mark a rune on stone or paper or trace it in the air. You breathe life into it, carefully forming its curves and lines while drawing divine magic into it.

Your deep understanding of the runes and the power they represent marks you as one of the greatest runepriests ever. As you enter the final stage of your career, your understanding of your art grows still deeper. At first in small, tantalizing hints and later in insights that come upon you like bolts from the heavens, you understand the fundamental structures of the runes. You are no longer content to learn of the runes created by the gods. Your ambition and mastery push you to create new runes, to find the markings that catalog, and perhaps even create, entirely new aspects of the world.

Should you prove worthy of this task, the very fiber of the cosmos might bend and shift at your command. The power you seek is far greater than any you previously imagined you could control, but with diligence, bravery, and faith, you know that you can achieve anything. Soon you will take your place beside the gods.

## Immortality

At the apex of your craft, you set aside mortal concerns and work alongside the gods to craft the runes of creation.

**Rune Forge:** You understand the deepest secrets of the runes, and you take your place among the gods as one who can forge reality. You create your own astral domain and from there gather some of the finest crafters from across the cosmos. Until the end of time, you build new divine runes.

## Rune Maker Features

**Rune of Might (21st level):** Your Strength score increases by 2. Once you are in a rune state, you can change the rune state as a minor action.

**Lord of All Runes (24th level):** Once per round, when you change your rune state on your turn, you or one adjacent ally can make a saving throw.

**Rune of Immortality (30th level):** When you fail your third death saving throw during an encounter, you don't die. You instead vanish, appearing in your god's dominion. All conditions and harmful effects on you end, you are considered to have failed no death saving throws, and you can spend a healing surge. At the start of your next turn, you reappear within 10 squares of the space you left.

## Rune Maker Power

**Persistent Runes** Rune Maker Utility 26

*As you master the secrets of rune crafting, you learn to forge runes that last longer than normal.*

**Encounter ✦ Divine**
**Free Action** **Personal**
**Trigger:** You miss with a runepriest encounter attack power
**Effect:** The attack power's rune state takes effect despite the miss.

HECTOR ORTIZ

# War Master

*An army you lead will not suffer defeat. When you take the field, your foes have already lost.*

**Prerequisite:** 21st level, ardent

It is one thing to excel at personal battlefield prowess. It is another to extend that skill to a group of allies, a phalanx of warriors, an entire army, or even an entire nation. You were always talented with a blade, but you learned early on that a dozen blades raised as one could defeat the mightiest lone warrior. Combining many individual efforts into one force is a daunting challenge, one surpassed only by the hazards of battle itself.

As a War Master, you seek to forge order from the chaos of battle. Under your command, your allies fight with unmatched coordination and skill. Your tactical skill and insight make you a daunting foe. Under your command, even a mob of ill-armed peasants is a daunting fighting force.

With each victory, you set your sights ever higher. As you grow in power, you seek to prove that no horde or army the cosmos can muster can best you and your forces on the field of battle.

## Immortality

You pursue not an escape from death's bonds, but the very conquest of death itself, for death is the only force that can stand against you and bring your armies to ruin. With death conquered, you will live forever in glory, hailed as a savior—or perhaps cursed by those no longer allowed death's release from a life of suffering.

**Conqueror of Death:** At some point in your career, only one foe remains to you, and you set out to conquer what no one has ever been able to defeat. Perhaps you marshal an army and lay siege to the Raven Queen's palace, or perhaps doing that would only install you as a new god of death. Instead, you might take only your trusted adventuring companions on a final quest to slay death itself. Your final conquest might be hopeless, but you stand forever as a shining example to those who rage against the bonds of mortality.

## War Master Features

**Unmatched Tactician (21st level):** You and allies within 5 squares of you gain a +5 bonus to initiative. When you make an attack, you gain a +1 bonus to the attack roll if at least one of your allies is adjacent to the target.

**Unyielding Inspiration (24th level):** Whenever you enable an ally to spend a healing surge, each ally adjacent to him or her gains 15 temporary hit points.

**Boundless Morale (30th level):** Whenever an ally within 5 squares of you drops to 0 hit points or fewer, you can spend a healing surge as an immediate interrupt. You regain no hit points for doing so, but the ally regains hit points as if he or she had spent a healing surge and regains 20 additional hit points.

## War Master Power

**Brilliant Strategy** War Master Utility 26

*You weave a skein of psionic magic, combining your allies' talents into a single, unbeatable force.*

**Daily ✦ Psionic**
**Minor Action** **Close** burst 5
**Target:** One enemy you can see in burst
**Effect:** Until the end of your next turn, you and your allies gain a bonus to attack rolls against the target equal to the number of your allies adjacent to it. If the target drops to 0 hit points, you can use this power again during this encounter.
**Sustain Minor:** The effect persists.

CHAPTER 3

# Character Options

The D&D game is all about options, and the material in this chapter is designed to expand those options beyond your choice of class and race. Whether you're playing a character using the new classes and races in this book or using material from the previous *Player's Handbook* volumes, you'll find powers, feats, and equipment here to appeal to you.

This chapter includes the following sections.

- **Skill Powers:** This new category of utility powers gives new meaning to your skill training. Having training in a skill gives you the ability to choose a skill power associated with that skill instead of a utility power from your class, giving you a variety of new ways to put your skills to use.
- **Feats:** Dozens of new feats offer not only support for the new classes and races in this book, but also a wide array of options for any characters. Multiclass and hybrid characters in particular will find useful feats to help them make better use of both of their classes' capabilities.
- **Superior Implements:** Orbs, totems, staffs, and other implements made with special materials and techniques can offer implement-wielding characters a variety of benefits comparable to the special qualities of weapons.
- **Magic Items:** The new magic items in this chapter are designed specifically for characters making use of the new options in this book. Here you'll find magic armor, weapons, implements (including ki focus implements for monks), and rings that provide ways to enhance psionic powers, contain augmentable powers, and otherwise appeal to characters who use the new classes found in Chapter 2.

RANDY GALLEGOS

*Mamindreth Starsong paused a moment as the Linked Portal ritual drew to an end. He had forgotten the powdered gatevine and couldn't remember the rest of the words. Of course, he couldn't stop now, so he scooped up some grass and dirt and intoned some mumbo jumbo, and the gate opened.*

*The ogre dealt Kraya a blow to the head that should have dropped her like a rag doll. She could barely see through the blood in her eyes but refused to fall. The dragonborn retaliated with a blast of icy breath and a charge, and then nearly collapsed from the pain.*

*Corrin brushed a hand past the duke's belt and stepped back. This act gave his companion the chance to run the man through while the duke was worrying about what had been stolen—which was nothing more than his attention.*

A skill power is a utility power that represents a degree of skillfulness surpassing that conferred by normal training. Having a skill power is a sign of your mastery of that skill or a mark of your natural aptitude for it. You must be trained in a skill to gain and use its powers (see "Skill Training," *Player's Handbook*, page 178).

## Gaining and Using a Skill Power

You can gain and use only the skill powers associated with your trained skills. Whenever you reach a level that grants you a utility power from your class, you can choose a skill power in place of a class power. The skill power you choose must be of the same level as or lower in level than the class power you would have gained.

You can use retraining (*Player's Handbook*, page 28) to replace a class power with a skill power and vice versa, as long as the new power is of the same level as or lower in level than the replaced power.

You cannot replace a utility power from a paragon path or an epic destiny with a skill power.

## Acrobatics

You can combine your speed and agility to cross treacherous terrain, keep your balance even in the most difficult situations, and maneuver past enemies. Acrobatics powers enhance your maneuverability, allowing you to catch your enemy by surprise or to evade attacks by tumbling to safety.

You must be trained in Acrobatics to gain and use Acrobatics powers.

### Level 2

**Tumbling Dodge** — Acrobatics Utility 6

*You deftly tumble away from a strike.*

**Encounter**
**Immediate Interrupt** **Personal**
**Trigger:** A melee attack hits you

### Level 10

**Drop and Roll** — Acrobatics Utility 10

*You fall off a ledge, but your training allows you to dash forward after landing safely.*

**At-Will**
**Immediate Reaction** **Personal**

**Rapid Escape** — Acrobatics Utility 10

*You suddenly slip from your enemy's grasp, leaving it briefly vulnerable to your attacks.*

**At-Will**
**Minor Action** **Personal**

*As the attack explodes toward you, your reflexes allow you to remain one step ahead of it.*

**Encounter**
**Immediate Interrupt** **Personal**

## Arcana

Long hours of studying magic and its related fields have prepared you well for a life of adventure. Ignorance is doom in dangerous situations; the correct bit of knowledge at the right time can save lives and turn sure defeat into a close victory. Arcana powers allow you to exploit critical lore about your enemies so that you can meddle in their attacks or have an edge in a fight.

You must be trained in Arcana to gain and use Arcana powers.

**Arcane Mutterings** — Arcana Utility 2

*You launch into a recitation of obscure lore on a subject to impress, cow, or trick your audience.*

**Encounter**

*You have discovered how to perform your magic rituals with fewer alchemical reagents than other magicians require.*

**Daily**
**Free Action** **Personal**
**Trigger:** You are performing an Arcana ritual of one-half your level or lower
**Effect:** You expend only half of the ritual's gold piece component cost (any focus item must still meet the minimum cost), although you cannot use this power to reduce the component cost of the rituals Brew Potion and Enchant Magic Item. If you make an Arcana check as part of the ritual and dislike the result, you can reroll the check with a +4 power bonus and use either result.

**Insightful Warning** — Arcana Utility 6

*As your foe unleashes its attack, you realize that you have read about this sort of danger and shout a warning to your friends.*

**Encounter**
**Immediate Interrupt** **Personal**
**Trigger:** A creature you can see makes an attack roll for an area or a close attack that includes you as a target
**Effect:** You and each ally included as a target of the triggering attack gain a +2 power bonus to all defenses against it.

### Level 16

**Elemental Countermeasures** — Arcana Utility 16

*As magical energy streaks toward you, you use your knowledge of that magic to counter some of it.*

**Encounter**
**Immediate Interrupt** **Personal**
**Trigger:** You take acid, cold, fire, lightning, or thunder damage
**Effect:** You make an Arcana check. The damage is reduced by the check result divided by 2.

## Athletics

Your physical strength helps you overcome many obstacles, whether you are swimming across a roaring river, scrambling up a cliff, or smashing through a door. Athletics powers exploit your physical prowess to let you bull your way through any situation, relying on brawn to reach your enemies no matter how remote they might be.

You must be trained in Athletics to gain and use Athletics powers.

Lies have many shades, and your palette holds them all. As an accomplished liar, you make the implausible seem true and the impossible possible. Bluff powers give you new techniques for fooling those around you. You can fill in gaps in conversation with whatever words roll off your tongue, deceive enemies to give your side an edge in battle, and talk your way out of sticky situations with a few quick words and an honest expression.

You must be trained in Bluff to gain and use Bluff powers.

## Level 2

**Battle Feint** — Bluff Utility 2

*Your sudden move causes the enemy to flinch, setting up your ally's next attack.*

**Encounter**
**Minor Action** **Melee** 1

**Daily**
**Free Action** **Personal**
**Trigger:** You are performing a ritual of one-half your level or lower

## Multiclass Feats

The following multiclass feats allow you to dabble in the classes presented in this book. See pages 208 and 209 of the *Player's Handbook* for rules on multiclassing.

### Class-Specific Feats

If you take a class-specific multiclass feat, you count as a member of that class for the purpose of meeting prerequisites.

### Demanding Talent [Multiclass Battlemind]

**Prerequisite:** Con 13

**Benefit:** You gain training in one skill from the battlemind's class skills list.

Once per encounter, you can use the *battlemind's demand* power, but the mark lasts until the end of your next turn.

### Disciplined Talent [Multiclass Psion]

**Prerequisite:** Int 13

**Benefit:** You gain training in one skill from the psion's class skills list.

Choose one 1st-level psion at-will attack power. You can use that power once per encounter, and you can't augment it.

In addition, you can wield psion implements when using psion powers and psion paragon path powers.

### Fervent Talent [Multiclass Ardent]

**Benefit:** You gain training in Religion.

Once per day, you can use the runepriest's *rune of mending* power.

## Power-Swap Feats

Because the ardent, the battlemind, and the psion don't have encounter attack powers, the power-swap feat Novice Power in the *Player's Handbook* doesn't do anything when those classes are involved. The following power-swap feats are alternatives for characters who multiclass into or out of classes that have the Psionic Augmentation class feature.

### Psionic Conventionalist [Multiclass Encounter]

**Prerequisite:** 4th level, any class-specific multiclass feat for a class that doesn't have the Psionic Augmentation class feature, Psionic Augmentation class feature

**Benefit:** You can swap one of your augmentable at-will attack powers for an encounter attack power of the same level or lower from the class you multiclassed into. You lose a number of power points based on the level of the at-will attack power: level 1–10, 2 power points; level 11–20, 4 power points; and level 21–30, 6 power points.

### Psionic Complement [Multiclass Encounter]

**Prerequisite:** 4th level, any class-specific multiclass feat for a class that has the Psionic Augmentation class feature, Psionic Augmentation class feature

**Benefit:** You can swap one of your augmentable at-will attack powers for an augmentable at-will attack power of the same level or lower from the class you multiclassed into. You can use that power once per encounter.

### Psionic Dabbler [Multiclass Encounter]

**Prerequisite:** 4th level, any class that doesn't have the Psionic Augmentation class feature, any class-specific multiclass feat for a class that has the Psionic Augmentation class feature

**Benefit:** You can swap one of your encounter attack powers for an augmentable at-will attack power of the same level or lower from the class you multiclassed into. You can use that power once per encounter. You gain a number of power points based on the level of the at-will attack power: level 1–10, 2 power points; level 11–20, 4 power points; and level 21–30, 6 power points.

WILLIAM O'CONNOR

## Paragon Multiclassing

This section expands on the paragon multiclassing rules on page 209 of the *Player's Handbook*.

**Qualifying:** To qualify for paragon multiclassing, you must have a multiclass encounter, a multiclass utility, and a multiclass daily feat, regardless of those feats' names. The three feats must be for the same class.

**Psionic Augmentation:** If either of your classes has the Psionic Augmentation class feature and you choose paragon multiclassing, the benefits you gain at 11th level are different from those noted in the *Player's Handbook*, whereas the benefits you gain at 12th level and 20th level are the same.

If your first and second classes both have the Psionic Augmentation class feature, at 11th level you gain 2 power points and an at-will attack power of 7th level or lower from your second class.

If your first class has the Psionic Augmentation class feature and your second class doesn't have it, at 11th level you gain an at-will attack power from your second class as well as an encounter attack power of 7th level or lower from that class.

If your first class doesn't have the Psionic Augmentation class feature and your second class does have it, at 11th level you lose one at-will attack power from your first class but gain 2 power points and an at-will attack power of 7th level or lower from your second class.

# SUPERIOR IMPLEMENTS

Formed of exotic materials and created using magical crafting techniques, superior implements enhance a wielder's magic. Despite their magical origin, superior implements aren't magic items per se, but like non-superior implements, they can be enchanted with the Enchant Magic Item ritual. Each type of superior implement has one or more properties that enhance its wielder's attack powers, such as granting improved accuracy or increasing forced movement. These properties are comparable to the properties that many weapons have.

## Wielding a Superior Implement

You need the Superior Implement Training feat (page 183) to gain the benefits of a specific superior implement. If you wield a superior implement and don't have the feat for it, you don't gain the benefits of its properties, but you can use it as a normal implement of its type, assuming you're able to use implements of that type.

**Weight:** The superior implement's weight in pounds.

## Superior Implement Descriptions

**Holy Symbols:** An accurate symbol is carved with symbols of power that channel divine energy more precisely. An astral symbol is crafted of solidified mist from the Astral Sea and glows with a faint silvery light. A warding symbol has protective glyphs carved into its adamantine surface. A wrathful symbol is made from black iron mined in Chernoggar and engraved with runes of divine fury.

**Orbs:** An accurate orb is made of clear blown glass, with tiny runes engraved around its equator. A crystal orb looks similar, but has a faceted surface and might appear in any color. A greenstone orb is carved from a heavy metallic stone that has an affinity for acid magic. A petrified orb is made from petrified wood.

**Rods:** An accurate rod is made from a shaft of silver, bound with golden bands. An ashen rod is made from fire-blackened hardwood and laced with veins of crystallized red sap. A deathbone rod is formed from the bone of an undead creature that is no longer animate. A defiant rod is made of white gold and studded with crystals or gemstones.

**Staffs:** An accurate staff is smooth and straight, balanced for easy handling and made of polished hardwood. A guardian staff is formed from an uncut branch of a watcher tree, a variety of oak that grows only in the Feywild. A mindwarp staff is made of light, strong wood, smoothed and polished and topped with a many-faceted crystal. A quickbeam staff is made of rowan wood cut from a tree that has been struck by lightning.

**Tomes:** The cover of an echo tome is a plate of iron inlaid with silver, and its pages are thin sheets of mithral engraved with arcane secrets. A forbidden tome has a heavy cover and binding, with a lock to keep it closed to prying eyes. An unspeakable tome is bound in straps of iron so that it cannot be opened, but it imparts the knowledge it contains through sinister whispers in the night.

**Totems:** An accurate totem is a short rod of light wood wrapped in snakeskin. A farseeing totem consists of eagle feathers tied at one end of a roc's bone. An icicle totem is a shaft of unmelting ice, freezing cold to the touch but wrapped with white fur to protect the wielder's hand. A storm totem is made from wood scorched by lightning and adorned with a thunderhawk's feather.

**Wands:** An accurate wand is a smooth and straight length of light wood, honed to a point at the tip. A cinder wand, in contrast, is blackened and crooked, and warm to the touch. A dragontooth wand is smooth ivory that is bound with bands of gold. A rowan wand is polished wood engraved with lightning motifs.

# MAGIC ITEMS

The magic items presented in this chapter use the same rules as those in the *Player's Handbook* and *Player's Handbook 2*. This chapter introduces a new kind of magic implement: the ki focus (page 203), which is used by monks.

## Armor

Magic armor increases your Armor Class by adding an enhancement bonus to the armor's armor bonus. See the *Player's Handbook* and *Player's Handbook 2* for information on masterwork armor.

# Ki Focuses

A ki focus is an implement that certain classes use as a focus for their inner magical energy, known as their ki. A ki focus might take the form of a training manual, a scroll of ancient secrets, or a blunt training weapon. To use a ki focus, you must first attune yourself to it. Some characters study their ki focus to attune themselves to it. Others meditate with it or wield it as they practice their fighting techniques. Once you have attuned yourself to a ki focus, you must either wear or hold it to use it as an implement.

When you attune yourself to a ki focus, you draw on magic within it to shape your ki. This attunement is temporary, fading away if you attune yourself to a different ki focus or if you die. The ki focus that you're attuned to occupies your ki focus item slot.

To attune yourself to a ki focus, you must have the item on your person during a short or an extended rest. Whenever you take a rest, you can attune yourself to a ki focus in your possession, but you can be attuned to only one ki focus at a time. Also, only one creature at a time can be attuned to a particular ki focus. Once you attune yourself to a ki focus, no one else can attune to it until you are no longer attuned to it.

If you can use a ki focus as an implement, you follow the normal rules for implement use (see "Implement," page 219).

Being able to use a ki focus as an implement means you can also use it with your weapon attacks. You can add its enhancement bonus to the attack rolls and the damage rolls of weapon attacks you make using a weapon with which you have proficiency. However, you must choose to use the enhancement bonus, properties, and powers of the ki focus, rather than the weapon you're wielding, or vice versa. You can't use both when you use a power.

## Staffs

A number of classes, including the psion, use staffs as implements. Often made of wood, staffs can also be crafted from metal and other materials. Many staffs are set with gems or crystals to focus magical energy from various sources.

If you can use a staff as an implement, you follow the normal rules for implement use (see "Implement," page 219).

You can use melee weapon powers through a staff. When you do so, the staff functions as a magic quarterstaff (see "Weapon," page 219).

# Appendix: Reading a Power

The *Player's Handbook* introduces how to read a power, starting on page 54 of that book. This appendix summarizes that information and defines keywords introduced in this book.

## The Power Format

Player character powers are formatted to be easily referenced during play.

**Sequence:** The order of information in a power description is a general guide to the sequence in which the power's effects occur. For example, an "Effect" entry might appear above attack information in a power description to indicate that something happens before you make the attack.

**Indentation:** When information is indented in a power description, that means the information is contingent on the information directly above it. For example, a "Secondary Attack" entry indented right below a "Hit" entry is a reminder that you can make the secondary attack only if you hit with the primary attack.

## Entries in a Power

A power description contains various entries, some of which appear in every power description, whereas other entries appear only when needed by a particular power. Here are explanations of the various entries, presented in their typical order.

**Power Name and Level:** The name of a power and the power's level appear in a colored bar on the first line of the power's description. The color of the bar indicates how often you can use the power; green means the power is an at-will power, red means it's an encounter power, and black means it's a daily power.

**Flavor Text:** The next entry, in italic text, briefly explains what the power does, from the perspective of your character in the world. The rest of the power description is rules text, but this flavor material is intended to help you narrate what your character is doing.

**Usage:** The first word on the next line tells you how often you can use the power, that is, whether it is an at-will, an encounter, or a daily power.

**Keywords:** The power's keywords appear next. The keywords tell you the power source, any damage types associated with the power, accessories you can use with it, and other associated effects. If "Varies" appears among the keywords, that means the power has variable damage types, which you or circumstances determine. See "Keywords" below for keyword definitions.

**Action Type:** The next line begins with the type of action required to use the power: standard, move, minor, free, immediate reaction, immediate interrupt, or opportunity. Some powers require no action to use. See page 267 of the *Player's Handbook* for more information about action types.

**Attack Type and Range:** The power's attack type and range appear on the same line as its action type. The attack types are melee, ranged, area, and close. Each attack type has rules for range and targeting, detailed on pages 270–273 of the *Player's Handbook*.

**Trigger:** Powers that are immediate actions (interrupts or reactions) or opportunity actions have a trigger, which defines when you're allowed to use the power. Some powers that are free actions, or that require no action to use, have a trigger as well.

**Prerequisite or Requirement:** Some powers are usable only if you meet a precondition. You must meet a *prerequisite* to select a power. You must meet a *requirement* to use a power.

**Target:** If a power directly affects one or more creatures or objects, it has a "Target" entry, specifying whom or what the power affects.

**Attack:** A power's attack entry specifies the ability score you use to make the attack, any special modifiers that apply to the attack roll, and which of the target's defenses you check against.

**Hit:** This entry describes what happens to each target that you hit with the power's attack.

**Miss:** This entry describes what happens to each target that you miss with the power's attack. In contrast to the *Player's Handbook*, the "Miss" entries in this book specify only what happens when you miss, not what doesn't happen.

"Half damage" in this entry refers to rolled damage. Roll the damage specified in the "Hit" entry and deal half of that damage to each target you miss. "Half damage" does not apply to ongoing damage or any other damaging effects in the "Hit" entry.

**Effect:** Anything that appears in an "Effect" entry occurs when you use the power, whether or not you hit with it.

**Secondary Target and Secondary Attack:** Some powers allow you to make secondary (or even tertiary) attacks. A "Hit," a "Miss," or an "Effect" entry tells you when to make a secondary attack. Unless otherwise noted, the attack type and the range of a secondary attack are the same as the power's, and the secondary attack doesn't require a separate action.

Some powers give you the ability to make a secondary attack at a point later in an encounter. These powers include information about the secondary attack's action type, attack type, range, and effect.

**Sustain:** If a power has a "Sustain" entry, you can keep that power active by taking a specified action during your turn. See "Durations," page 278 of the *Player's Handbook*, for more about sustaining a power.

**Class Feature Names:** When a class feature name appears as a header in a power description, the associated entry describes an additional or a replacement effect that applies if you have that class feature.

**Aftereffect:** An aftereffect automatically occurs after another effect ends. An "Aftereffect" entry is beneath the effect it applies to, which is typically in a "Hit" or an "Effect" entry.

A target is sometimes subjected to an aftereffect after a save. If that save occurs when the target is making multiple saving throws, the aftereffect takes effect after the target has made all of them.

**Failed Saving Throw:** Sometimes an effect changes as a target fails saving throws against it. The new effect, specified in a "Failed Saving Throw" entry, takes effect after the target fails a saving throw against the previous effect at the end of the target's turn. The effect doesn't change if the creature fails a saving throw against it at a time other than the end of its turn.

**Level:** This entry tells you if some part of the power—often its damage—increases when you reach a specific level.

**Special:** Any unusual information about the use of a power appears in this entry. For example, some powers can be used as basic attacks, which is noted in a "Special" entry.

# KEYWORDS

This book uses keywords from the standard four categories: power source, damage type, effect type, and accessory.

## Power Source

The source of a power is identified by its power source keyword: arcane, divine, martial, primal, psionic, or shadow. If a power has more than one power source keyword, the power counts as belonging to each of those power sources.

## Damage Type

Many attacks deal a specific type of damage: acid, cold, fire, force, lightning, necrotic, poison, psychic, radiant, or thunder. Each of these damage types has a keyword associated with it. If a power has such a keyword, the power deals that type of damage (the exception is poison, the keyword for which refers to damage, a nondamaging effect, or both).

**Changing Damage Types:** If the damage types in a power change, the power both loses the keywords for any damage types that are removed and gains the keywords for any damage types that are added (the poison keyword is removed from a power only if that power neither deals poison damage nor has any nondamaging effects).

CARL FRANK

For example, if a sorcerer casts *dragonfrost* through a *flaming dagger* and uses the dagger's ability to change the damage to fire, *dragonfrost* gains the fire keyword and loses the cold keyword for that use, since the power is dealing fire damage instead of cold damage. That use of the power can therefore benefit from effects, like feats, that affect fire powers, but not from effects that affect cold powers.

# Effect Type

Effect type keywords signify the presence of particular effects in powers, and many of these keywords have special rules that govern how their powers are used. Whether or not an effect type keyword has special rules, other effects in the game refer to that keyword. For example, the charm keyword has no special rules, but some creatures gain a bonus to saving throws against charm powers.

Three effect type keywords are introduced in this book: augmentable, full discipline, and runic. This section contains the definitions of all the effect type keywords used in this book.

## Augmentable

A power that has the augmentable keyword has optional augmentations, which you can use at the cost of power points. Characters gain power points from sources such as Psionic Augmentation, a class feature of ardents, battleminds, and psions.

**AUGMENTABLE**

You use these rules when you use an augmentable power.

- **Decide First:** You must decide whether and how to augment an augmentable power when you choose to use the power, before you make any attack rolls or apply any of the power's effects.
- **Power Point Cost:** An augmentation specifies its cost in power points. For example, "Augment 1" means you must spend 1 power point to use an augmentation. You must spend the required power points when you decide to use the augmentation.
- **One at a Time:** You can use only one augmentation on a power at a time, so you can't, for example, spend 3 power points to use both a 1-point and a 2-point augmentation on a single power.
- **Replace Base Effects:** When you augment a power, changes to the power are noted in the augmentation. If an augmentation includes a specific power entry, such as "Hit" or "Effect," that entry replaces the entry in the base power that has the same name. An augmented version of a power is otherwise identical to the base power.
- **Unaugmented:** When you use an augmentable power without augmenting it, the power is referred to as unaugmented for that use (some effects apply only when a power is unaugmented). A power that doesn't have the augmentable keyword is never considered unaugmented.
- **At-Will Attack Powers:** When a power or some other effect lets you use an at-will attack power, you can choose to use one of your augmentable at-will attack powers, but you must use it unaugmented.

  When a racial trait grants you an at-will attack power of your choice and you choose an augmentable at-will attack power, the power loses both the augmentable keyword and its augmentations.

## Charm

A charm power controls a creature's actions in some way. This control is often represented by the creature being forced to attack its ally or being subjected to the dominated condition.

## Conjuration

A conjuration power creates a conjuration, which is a thing of magical energy that resembles a creature or an object. Even if a conjuration looks like a creature or displays some degree of sentience, it is not considered a creature.

**CONJURATION**

A conjuration you create uses these rules, unless a power description says otherwise.

- **Occupies No Squares:** The conjuration occupies no squares.
- **Unaffected by the Environment:** Terrain and environmental phenomena have no effect on the conjuration. For example, a conjuration that is an icy hand functions in an inferno without penalty. The conjuration does not need to be supported by a solid surface, so it can float in the air.
- **Your Defenses:** Normally, a conjuration cannot be attacked or physically affected. If your conjuration can be attacked or physically affected, it uses your defenses. Unless an attack specifically targets conjurations, only the attack's damage (not including ongoing damage) affects the conjuration.
- **Attacking with a Conjuration:** Normally, a conjuration cannot attack. If your conjuration can attack, you make the attack. You determine line of sight normally, but you determine line of effect from the conjuration, as if you were in its space.

- **Movable Conjurations:** If the power you use to create a conjuration allows you to move it, it's a movable conjuration. At the end of your turn, the movable conjuration ends if you are not within range of at least 1 square it's in (using the power's range) or if you don't have line of effect to at least 1 square it's in.

  When you move a conjuration, you can't move it through blocking terrain.
- **Death Ends:** If you die, the conjuration ends immediately.

## Fear

A fear power inspires fright. This fright is often represented by a creature being forced to move, taking a penalty to attack rolls, or granting combat advantage.

## Full Discipline

A full discipline power contains what are effectively two mini-powers, an attack technique and a movement technique.

**FULL DISCIPLINE**

You use these rules when you use a full discipline power.

- **One per Round:** You can use only one full discipline power per round, unless you spend an action point. If you spend an action point to take an extra action, you can switch to a different full discipline power.
- **Separate Actions:** Each of the techniques in a full discipline power requires a separate action to use. The action types are specified in the power. You can use the techniques in whatever order you like during a round, and you can use one of the techniques and not the other during a particular round.

  The number of times you can use a technique during a round is determined by the power's type—at-will or encounter—and by the actions you have available in that round. For example, you can use the techniques of an at-will full discipline power as many times during a round as you like, provided you have enough of the required actions. If you use an encounter full discipline power, you can use both techniques, but can use each technique only once during that round.

## Healing

A healing power restores hit points, usually either by restoring hit points immediately or by granting regeneration.

## Illusion

An illusion power deceives the mind or the senses. Illusions often obstruct vision or redirect attacks. If an illusion power deals damage, the damage itself is not an illusion.

## Poison

A poison power delivers a nondamaging poisonous effect, deals poison damage (see "Damage Type" above), or both.

## Polymorph

Polymorph powers change a creature's physical form in some way.

**POLYMORPH**

You use these rules when you're affected by a polymorph power.

- **One Polymorph at a Time:** If you are affected by more than one polymorph power, only the most recent one has any effect. The other powers' effects remain on you and their durations expire as normal, but those effects don't apply. However, when the most recent effect ends, the next most recent one that is still active applies to you. For example, if you are a druid under the effect of *wild shape* and a monster uses a polymorph power on you, the effect of your *wild shape* is suppressed until the monster's polymorph effect ends on you.
- **Changing Size:** If a polymorph power reduces your space, you do not provoke opportunity attacks for leaving squares as you shrink.

  If a polymorph effect would make you too large to fit in the available space, the effect fails against you, but you are stunned (save ends). For example, if you are crawling through a narrow tunnel and a polymorph effect tries to turn you into a creature that is too large for the tunnel, the effect fails, but you are stunned until you save.
- **Death Ends:** If you die, polymorph effects end on you immediately.

## Reliable

If you miss every target with a reliable power, you don't expend the use of that power.

## Runic

A runic power channels the magic of runes that are specified in the power.

**RUNIC**

You use these rules when you use a runic power.

- **Choose First:** When you are going to use a runic power, you first choose one of the runes in the power and then use the power, applying the chosen rune's effects.
- **Rune State:** You are then in the rune state associated with the chosen rune until you enter a new rune state or until the end of the encounter. Certain effects rely on you being in a particular rune state.

## Sleep

Sleep powers knock creatures unconscious. Unless a power says otherwise, this unconsciousness is not normal sleep, so a creature that is subjected to it cannot be simply awakened; the power specifies how the unconsciousness ends.

## Stance

When you use a stance power, you assume a stance that lasts until you assume another stance or until the end of the encounter. You can assume no more than one stance per turn.

## Summoning

Powers that have the summoning keyword bring creatures magically from elsewhere, often from other planes, to serve you.

### SUMMONED CREATURE

A creature you summon uses these rules, unless a power description says otherwise.

- **Allied Creature:** When you use a summoning power, you create a creature that is an ally to you and your allies. The power determines where the summoned creature appears.
- **Your Defenses:** The summoned creature's defenses equal yours when you summon it, not including any temporary bonuses or penalties.
- **Hit Points:** The summoned creature's maximum hit points equal your bloodied value. When the summoned creature drops to 0 hit points, it is destroyed, and you lose a healing surge. If you have no healing surges left, you instead take damage equal to half your bloodied value.
- **No Healing Surges:** The summoned creature lacks healing surges, but if a power allows it to spend a healing surge, you can spend a healing surge for it. The summoned creature, rather than you, then gains the benefit of the healing surge.
- **Speed:** The summoning power determines the summoned creature's speed.
- **Commanding the Creature:** The summoned creature has no actions of its own; you spend actions to command it mentally. You can command the creature only if you have line of effect to it. When you command the creature, the two of you share knowledge but not senses.

  As a minor action, you can command the summoned creature to take one of the following actions, if it is physically capable of taking that action: crawl, escape, fly, open or close a door or a container, pick up or drop an item, run, stand up, shift, squeeze, or walk.

  The summoning power determines any special commands you can give the summoned creature and gives an action type for each command. If a special command is a minor action, you can give that command only once during each of your turns.
- **Attacks and Checks:** If a summoning power allows the summoned creature to attack, you make an attack through the creature, as specified in the power description. If the summoned creature can make a skill check or an ability check, you make the check. Attacks and checks you make through the creature do not include temporary bonuses or penalties to your statistics.
- **Duration:** Unless the summoning power states otherwise, the summoned creature lasts until the end of the encounter and then disappears. As a minor action, you can dismiss the summoned creature.

## Teleportation

A teleportation power transports creatures or objects instantaneously from one location to another.

### TELEPORTATION

You use these rules when you use a teleportation power on a target, which might be yourself, another creature, or an object.

- **Instantaneous:** Teleportation is instantaneous. The target disappears and immediately appears in the destination space you choose. The movement is unhindered by intervening creatures, objects, or terrain.
- **Destination Space:** The destination of the teleportation must be an unoccupied space that the target can occupy without squeezing. If arriving in the destination space would cause the target to fall or if that space is hindering terrain, the target can make a saving throw. On a save, the teleportation is negated.
- **Line of Sight:** You must have line of sight to the destination space.
- **No Line of Effect:** Neither you nor the target needs line of effect to the destination space.
- **No Opportunity Actions:** The target doesn't provoke opportunity actions for leaving its starting position.
- **Immobilized or Restrained:** Being immobilized or restrained doesn't prevent a target from teleporting. If a target teleports away from a physical restraint, a monster's grasp, or some other immobilizing effect that is located in a specific space, the target is no longer immobilized or restrained. Otherwise, the target teleports but is still immobilized or restrained when it reaches the destination space.

### Zone

Powers that have the zone keyword create zones, magical areas that last for a round or more.

**ZONE**

A zone you create uses these rules, unless a power description says otherwise.

- **Fills an Area of Effect:** The zone is created within an area of effect and fills each square in the area that is within line of effect of the origin square.
- **Unaffected by Attacks and the Environment:** The zone cannot be attacked or physically affected, and terrain and environmental phenomena have no effect on it. For example, a zone that deals fire damage is unaffected by cold damage.
- **Movable Zones:** If the power you use to create a zone allows you to move it, it's a movable zone. At the end of your turn, the movable zone ends if you are not within range of at least 1 square of it (using the power's range) or if you don't have line of effect to at least 1 square of it.

  When you move a zone, you can't move it through blocking terrain.
- **Overlapping Zones:** If zones overlap and impose penalties to the same roll or game statistic, a creature affected by the overlapping zones is subjected to the worst penalty. Similarly, a creature in the overlapping area takes damage only from the zone that deals the most damage, regardless of damage type.
- **Death Ends:** If you die, the zone ends immediately.

## Accessory

The two accessory keywords—implement and weapon—indicate whether a power can be used with an implement or a weapon.

### Implement

Implements are items wielded by certain characters to channel their powers. Your class description or a feat tells you which implements you can wield, if any.

The implement keyword identifies a power that can be used through an implement, and the implement must be a type wielded by the power's class or paragon path. For example, to use an implement with a wizard power, the implement must be a type used by wizards, such as an orb or a wand, and you must be able to wield it. If a power, like one from a racial paragon path, has this keyword but isn't associated with a class or a class paragon path, you can use any implement with that power, as long as you're able to wield the implement.

**Magic Implements:** To use a magic implement—including its properties and powers—you must be able to wield that kind of implement. If you can wield a magic implement, you can add its enhancement bonus to the attack rolls and the damage rolls of implement powers you use through it. See "Magic Items," starting on page 223 of the *Player's Handbook*, for more about magic implements.

**Using a Weapon as an Implement:** If you're able to use a weapon as an implement, the weapon works like a normal implement for you, but you use neither the weapon's proficiency bonus nor its nonmagical weapon properties with your implement powers.

When you use a magic version of the weapon as an implement, you can use the magic weapon's enhancement bonus, critical hit effects, properties, and powers. However, some magic weapons have properties and powers that are worded in such a way that they work only with weapon attacks. Also, a weapon's range and damage die are usually irrelevant to implement powers, since such powers have their own ranges and damage expressions.

### Weapon

The weapon keyword identifies a power that is used with a weapon, including an improvised weapon such as an unarmed strike (see "Weapons," *Player's Handbook*, page 215). The range and the damage of a weapon power is usually determined by the weapon you use with it. A [W] in a power's damage expression stands for your weapon's damage dice (see "Damage," *Player's Handbook*, page 276).

If you use a weapon power with a weapon with which you have proficiency, you add the weapon's proficiency bonus to the attack rolls of that power. Your class and feats determine your weapon proficiencies.

**Magic Weapons:** If you use a weapon power with a magic weapon, you can add the magic weapon's enhancement bonus to the power's attack rolls and damage rolls. See "Magic Items," starting on page 223 of the *Player's Handbook*, for more about magic weapons.

**Using an Implement as a Weapon:** Most implements cannot be used as weapons. However, a few implements, like staffs, are expressly usable as both implements and weapons. When you wield such an implement as a weapon, you follow the normal rules for using a weapon.

When you use a magic version of the implement as a weapon, you can use the magic implement's enhancement bonus and critical hit effects. To use its properties and powers, you must be able to wield it as an implement (see "Implement" above). Also, some magic implements have properties and powers that are worded in such a way that they work only with implement attacks.

# GLOSSARY

This glossary defines some of the game terms used in this book, as well as terms related to them. The material here assumes you're familiar with the skill and combat chapters in the *Player's Handbook*. The glossary supersedes previous sources and incorporates clarifications and new rules.

**aberrant [origin]:** Aberrant creatures are native to or shaped by the Far Realm.

**acid [keyword]:** A damage type (page 215).

**altitude limit:** If you have a specified altitude limit while flying, you crash at the end of your turn if you are flying higher than that limit. See also **fly speed**.

**augmentable [keyword]:** An effect type. See also page 216.

**blinded [condition]:** While you are blinded, you can't see, which means your targets have total concealment against you, and you take a –10 penalty to Perception checks. You also grant combat advantage and can't flank.

**blindsight:** If you have blindsight, you can clearly see creatures or objects within a specified range and within line of effect, even if they are invisible or obscured. You otherwise rely on your normal vision.

**blocking terrain:** A type of terrain that blocks squares, often by filling them. *Examples:* Walls, doors, and large pillars. Blocking terrain provides cover, interferes with movement around it, and blocks line of effect. It also blocks line of sight, unless it's transparent. See also "Terrain and Obstacles," *Player's Handbook*, page 283.

**bonus:** See "Bonuses and Penalties," *Player's Handbook*, page 275, and **untyped bonus**.

**charm [keyword]:** An effect type. See also page 216.

**cold [keyword]:** A damage type (page 215).

**conjuration [keyword]:** An effect type. See also page 216.

**darkvision:** If you have darkvision, you can see in dim light and darkness without penalty. This means you ignore the –2 penalty to attack rolls when you attack a target that has concealment as a result of dim light and the –5 penalty to attack rolls when you attack a target that has total concealment as a result of darkness.

**dazed [condition]:** While you are dazed, you can take either a standard, a move, or a minor action on your turn. You can still take free actions, but you can't take immediate or opportunity actions. You also grant combat advantage and can't flank.

**deafened [condition]:** While you are deafened, you can't hear, and you take a –10 penalty to Perception checks.

**dominated [condition]:** While you are dominated, you can't take actions. Instead, the dominating creature chooses a single action for you to take on your turn: a standard, a move, or a minor action. The only powers it can make you use are at-will powers. You also grant combat advantage and can't flank.

**dying [condition]:** Dropping to 0 hit points or fewer causes you to have this condition, which ends if you regain hit points. While you are dying, you are unconscious and must make death saving throws. See also "Death and Dying," *Player's Handbook*, page 295. See also **unconscious**.

**elemental [origin]:** Elemental creatures are native to the Elemental Chaos.

**extra damage:** Many powers and other effects grant the ability to deal extra damage. Extra damage is always in addition to other damage. This means an attack that deals no damage, such as the wizard power *sleep*, can't deal extra damage.

**fear [keyword]:** An effect type. See also page 217.

**fey [origin]:** Fey creatures are native to the Feywild.

**fire [keyword]:** A damage type (page 215).

**fly speed:** If you have a fly speed, you can fly a number of squares up to that speed as a move action. To remain in the air, you must move at least 2 squares during your turn, or you crash at the end of your turn. While flying, you can't shift or make opportunity attacks, and you crash if you are knocked prone. See also "Flying," *Dungeon Master's Guide*, page 47.

**force [keyword]:** A damage type (page 215).

**full discipline [keyword]:** An effect type. See also page 217.

**grab:** See "Escape" and "Grab," *Player's Handbook*, pages 288 and 290.

**half damage:** When a power or another effect deals half damage, apply all modifiers to the damage, including resistances and vulnerabilities, and then divide the damage in half.

**healing [keyword]:** An effect type. See also page 217.

**heavily obscured:** A measure of visibility and a type of obscured terrain. You have total concealment when you are in a heavily obscured square, although you have only concealment against an enemy adjacent to you. *Examples:* Heavy fog, smoke, or foliage. Contrast with **lightly obscured** and **totally obscured**.

**helpless [condition]:** While you are helpless, you grant combat advantage and can be the target of a coup de grace (*Player's Handbook*, page 288).

**hidden:** When you are hidden from an enemy, you are silent and invisible to that enemy. You normally use the Stealth skill to become hidden. See also **invisible**.

**hindering terrain:** A type of terrain that hinders creatures, usually by damaging them. *Examples:* Pits, lava, and deep water. You can make a saving throw when you are pulled, pushed, slid, or teleported into hindering terrain. See also "Teleportation," page 218, and "Falling," *Player's Handbook*, page 284.

**hover:** If you can hover, you can remain in the air without moving during your turn. You can also shift and make opportunity attacks while flying. See also **fly speed**.

**illusion [keyword]:** An effect type. See also page 217.

**immobilized [condition]:** When you are immobilized, you can't move, unless you teleport or are pulled, pushed, or slid.

**immortal [origin]:** Immortal creatures are native to the Astral Sea. Unless they are killed, they live forever.

**immune:** If you are immune to a damage type (such as cold or fire), you don't take that type of damage. If you are immune to a condition or another effect (such as the dazed condition or forced movement), you are unaffected by it. If you are immune to charm, fear, illusion, poison, or sleep, you are unaffected by the nondamaging effects of a power that has that keyword.

Immunity to one part of a power does not make you immune to other parts of the power. For example, if you are immune to thunder, a power can deal no thunder damage to you, but the power could push you.

**implement [keyword]:** An accessory type. See also page 219.

**insubstantial:** When you are insubstantial, you take half damage from any damage source, including ongoing damage. See also **half damage**.

**invisible:** If you are invisible, you have several advantages against creatures that can't see you: You have total concealment against them, you don't provoke opportunity attacks from them, and they grant combat advantage to you.

**knowledge check:** A skill check used to remember a useful bit of information in a particular field of knowledge. Arcana, Dungeoneering, History, Nature, and Religion are the skills most commonly used to make knowledge checks. See also "Knowledge Checks," *Player's Handbook*, page 179.

**lightly obscured:** A measure of visibility and a type of obscured terrain. You have concealment when you are in a lightly obscured square. *Examples:* Dim light, foliage, fog, smoke, and heavy rain or falling snow. Contrast with **heavily obscured** and **totally obscured**.

WAYNE REYNOLDS

**lightning [keyword]:** A damage type (page 215).

**low-light vision:** If you have low-light vision, you can see in dim light without penalty. This means you ignore the –2 penalty to attack rolls when you attack a target that has concealment as a result of dim light.

**marked [condition]:** When you mark a creature, that creature takes a –2 penalty to attack rolls for any attack that doesn't include you as a target. A creature can be subjected to only one mark at a time, and a new mark supersedes an old one.

**move:** Whenever a creature, an object, or an effect leaves a square to enter another, it is moving, whether that move is done willingly or is forced. This means shifting, teleporting, and being pushed are all moves, for example.

If a power notes a distance that you or an ally moves willingly (for example, "you shift 2 squares"), the character allowed to move can decide to move all, some, or none of that distance. Similarly, if a power forcibly moves an enemy (for example, "you push the target 3 squares"), you can decide to move the enemy all, some, or none of that distance.

If a power notes the destination for your or an ally's move (for example, "a square adjacent to the target"), the character allowed to move decides either to move to that destination or not. You can't move partway. Similarly, if a power specifies where you force an enemy to move, you decide either to move the enemy there or not.

See also "Movement and Position," *Player's Handbook*, page 282.

**natural [origin]:** Natural creatures are native to the natural world.

**necrotic [keyword]:** A damage type (page 215).

**once per round:** Some effects are usable only once per round. If you use such an effect, you can't use it again until the start of your next turn.

**penalty:** See "Bonuses and Penalties," *Player's Handbook*, page 275.

**phasing:** When you are phasing, you ignore difficult terrain and can move through objects and other creatures, but you must end your movement in an unoccupied space.

**poison [keyword]:** A damage and effect type. See also page 217.

**polymorph [keyword]:** An effect type. See also page 217.

**prone [condition]:** When you are prone, you are lying down. You take a –2 penalty to attack rolls, and the only way you can move is by crawling, teleporting, or being pulled, pushed, or slid. In addition, you grant combat advantage to enemies making melee attacks against you, but you gain a +2 bonus to all defenses against ranged attacks from enemies that aren't adjacent to you.

If you're flying when you fall prone, you safely descend a distance equal to your fly speed. If you don't reach a solid surface, you fall.

You can drop prone as a minor action.

**psychic [keyword]:** A damage type (page 215).

**radiant [keyword]:** A damage type (page 215).

**regeneration:** See the *Player's Handbook*, page 293.

**reliable [keyword]:** An effect type. See also page 217.

**removed from play:** Some effects can temporarily remove you from play. While you are removed from play, your turns start and end as normal, but you can't take actions, unless specified otherwise. In addition, you have neither line of sight nor line of effect to anything, and nothing has line of sight or line of effect to you.

**resist:** If you have resistance, you take less damage from a specific damage type. For example, if you have resist 10 fire, you take 10 less damage when an attack deals fire damage to you or when you take ongoing fire damage. See also "Damage Type," page 215.

*Against Combined Damage Types:* Your resistance is ineffective against combined damage types unless you have resistance to each of the damage types, and then only the weakest of the resistances applies. For example, if you have resist 10 lightning and resist 5 thunder and an attack deals 15 lightning and thunder damage to you, you take 10 damage, because the resistance to the combined damage types is limited by the lesser of the two resistances.

*Not Cumulative:* Resistances against the same damage type are not cumulative. Only the highest resistance applies. For example, if you have resist 5 cold and then gain resist 10 cold, you have resist 10 cold, not resist 15 cold. Similarly, if you have resist 5 cold and then gain resist 2 to all damage, you still have resist 5 cold, not resist 7 cold.

**restrained [condition]:** While you are restrained, you are immobilized, and you can't be pulled, pushed, or slid. You also take a –2 penalty to attack rolls, and you grant combat advantage. See also **immobilized**.

**runic [keyword]:** An effect type. See also page 217.

**save:** A successful saving throw. A save ends an effect that includes one of the following notations in parentheses: "save ends," "save ends both," or "save ends all." See also "Saving Throws," *Player's Handbook*, page 279.

*Identical Effects That a Save Can End:* If you are subjected to identical effects that a save can end, including ongoing damage, you ignore all but one of those effects. For example, if you are dazed (save

ends) and then you are attacked and again dazed (save ends), you ignore the second effect, since it is identical to the effect you are already subject to.

You never make multiple saving throws against identical effects. You do, however, make separate saving throws against effects that aren't identical, even if they contain the same condition. For example, dazed (save ends) and dazed and immobilized (save ends both) are not identical effects, so you must make separate saving throws against them. See also "Ongoing Damage," *Player's Handbook*, page 278.

*Overlapping Durations:* When you are subjected to identical effects that end at different times, you ignore all the effects but the one that has the most time remaining. Effects that a save can end work differently, since you don't know when they're going to end. You, therefore, track effects that a save can end separately from effects that end at specific times. See also "Durations," *Player's Handbook*, page 278.

**shadow [origin]:** Shadow creatures are native to the Shadowfell.

**sleep [keyword]:** An effect type. See also page 218.

**slowed [condition]:** When you are slowed, your speed becomes 2 if it was higher than that. This speed applies to all your movement modes (walking, flying, and so on), but it applies to neither forced movement against you nor teleportation. You also cannot benefit from bonuses to speed, although you can take actions, such as the run action, that allow you to move farther than your speed. If you are subjected to this condition while you're moving, you must stop if you have already moved at least 2 squares.

**solid obstacle:** See **blocking terrain**.

**stance [keyword]:** An effect type. See also page 218.

**stunned [condition]:** While you are stunned, you can't take actions. You also grant combat advantage and can't flank.

**summoning [keyword]:** An effect type. See also page 218.

**surprised [condition]:** While you are surprised, you can't take actions. You also grant combat advantage and can't flank.

**teleportation [keyword]:** An effect type. See also page 218.

**threatening reach:** If you have threatening reach, you can make an opportunity attack against any enemy within your reach that provokes an opportunity attack.

**thunder [keyword]:** A damage type (page 215).

**totally obscured:** A measure of visibility and a type of obscured terrain. You have total concealment when you are in a totally obscured square. *Example:* Total darkness. Contrast with **heavily obscured** and **lightly obscured**.

**tremorsense:** If you have tremorsense, you can clearly see creatures and objects within a specified range, even if they are invisible, obscured, or outside line of effect, but both you and they must be in contact with the ground or the same substance, such as water or a web. You otherwise rely on your normal vision.

**unconscious [condition]:** While you are unconscious, you are helpless, you can't take actions, and you take a –5 penalty to all defenses. You also can't flank. When you are subjected to this condition, you fall prone, if possible. See also **helpless** and **prone**.

**untyped bonus:** A bonus that has no type. Bonuses that have no type add together. However, if you gain multiple untyped bonuses from the same named game element (a power, a feat, a class feature, and the like), only the highest bonus applies, unless stated otherwise. For example, if you spend an action point and can see two warlords who have the Tactical Presence class feature, you gain the bonus to attack rolls from only one of the warlords, whichever one provides the higher bonus. See also "Bonuses and Penalties," *Player's Handbook*, page 275.

**vulnerable:** If you are vulnerable to a particular damage type, you take a specific amount of extra damage when you take damage of that type. For example, if you have vulnerable 10 radiant, you take 10 extra radiant damage when an attack deals radiant damage to you or when you take ongoing radiant damage. See also "Damage Type," page 215.

*Against Combined Damage Types:* Vulnerability to a specific damage type applies even when that damage type is combined with another. For example, if you have vulnerable 5 fire, you take 5 extra damage when you take ongoing fire and radiant damage.

*Not Cumulative:* Vulnerabilities to the same damage type are not cumulative. Only the highest vulnerability applies. For example, if you have vulnerable 5 psychic and then gain vulnerable 10 psychic, you have vulnerable 10 psychic, not vulnerable 15 psychic.

**weakened [condition]:** While you are weakened, your attacks deal half damage, but ongoing damage that you deal is not affected. See also **half damage**.

**weapon [keyword]:** An accessory type. See also page 219.

**zone [keyword]:** An effect type. See also page 219.

# Introduction

*Primal Power* has its roots in the decision to include the druid as a monster in the 1976 supplement *Greyhawk*®. D&D® cocreator Gary Gygax likely had little idea at the time that his description would affect the game for the next three decades: "These men are priests of a neutral-type religion . . . Druids may change shape three times per day . . . from size as small as a raven to as large as a small bear. They will generally (70%) be accompanied by numbers of barbaric followers (fighters)." That, in a nutshell, is the origin of the primal power source. In the first mention of the iconic primal character class, there are ties to shapeshifting and barbaric warriors.

The druid's identity in D&D has changed little since 1976, and in many ways the story of the primal power source's creation and development is the story of strengthening the druid class's roots and making them the centerpiece of both the class and the power source that arose around it.

For many years, druids were presented as a type of cleric, a divine spellcaster who worshiped gods of nature, the elements, and natural forces. Under that scheme in 4th Edition, druids might have been priests of Melora and similar deities. But that approach would have left druids as a second banana to the other divine classes and created a divide in the divine power source. Clerics and paladins share thematic and aesthetic similarities, whereas druids have more bonds thematically with barbarians.

As we looked at the barbarian and the druid together, the primal power source took form. Both classes have strong ties to nature, and both have a feral quality. They made a good match, and thus began a long process of design and development that culminated in *Player's Handbook*® 2 and this book.

Primal power is all about the natural world, which is more than plants, animals, mountains, and forests. Primal magic is a fundamental force of the natural world that holds the often malevolent forces of the planes at bay. Why do the gods dwell in the Astral Sea if so many of their followers live in the world? What keeps 25th-level monsters from stomping cities into dust? The primal spirits are keepers of the natural order. They ensure that the cycle of life and death, the turn of the seasons, and the web of life that connects all living things remain intact despite the intentions of gods, primordials, demons, and devils. Primal spirits are the world's defenders, not its masters. As a wielder of primal magic, your character is an inheritor of their tradition.

## Using This Book

As you can see by the table of contents, *Primal Power* is organized by class. Whether you have a character of a particular class or you want to make a character of that class, all you have to do is consult the proper chapter for new class features, builds, powers, and paragon paths. The final chapter of the book contains a large section on the spirit way, dozens of new feats, eight primal-themed epic destinies, several new rituals, and information on the primal spirits and the primal backgrounds that can deepen your roleplaying experience.

CHAPTER 1

# Barbarian

***"My rage is my weapon. My rage is my armor. My rage is your doom."***

A BARBARIAN can be a quiet warrior who launches into a rampage, or a fierce savage who lives for violence. Do you do battle out of duty and honor, wielding your weapon with grim resolve, or do you savor every blow you deal? Whatever your purpose, you are a barbarian—a force to be feared.

Despite your reputation for brutality, you are more than muscle and savagery. Your bond to the primal spirits makes you a wellspring of force and vitality. It is the spirits that make you a barbarian—they funnel power through your body, instill rage in your heart, and wreak carnage through your weapon.

Rageblood barbarians inspire their allies with their ferocity and endurance; thaneborn barbarians bolstering themselves and their comrades with their courage and resilience. A thunderborn barbarian is surrounded by a cloak of thunder spirits; a whirling barbarian, armed with two weapons, cuts through foes like a cyclone. Whatever type of barbarian you are, you'll find options in this chapter to support you.

- **Playing a Barbarian:** Ideas about the barbarian's place in the world and at the game table, to help you bring your character to life.
- **New Builds:** The thunderborn barbarian emits menacing war cries that make enemies stagger in fear. The whirling barbarian is a dervish of death, wielding a weapon in each hand.
- **New Class Features:** With thunderborn wrath, the death of each enemy lets you scatter your other foes in fear. Using your whirling slayer feature, you traverse the battlefield like a tornado.
- **New Powers:** You can unleash a voice like thunder or fight with two weapons as if they were twin claws. The chapter also supports existing builds with powers that inspire allies, add vigor, and dole out brutal blows.
- **New Paragon Paths:** You can harness primal force in the form of seven new paragon paths.

JASON A. ENGLE

Running with the beasts, a lone warrior haunts the forest like a ghost, guarding against interlopers. On the high mountain plateau, a somber leader guides his ravaged tribe in its struggle against the cruel winter and hungry predators. At the edge of town, a hermit trains a young boy to harness the beast within and channel it into his weapon. The barbarian has many manifestations, and each one has its place in the world.

## Your Primal Roots

Part of what makes you a barbarian is your connection to the primal spirits, so give some thought to the nature of that connection and how you forged it. Many barbarians were born and raised in cultures that venerate the primal spirits, and they underwent rites of passage designed to strengthen their ties to those spirits. In your rages, you might commune with the same spirits that your tribal ancestors have called upon for generations.

In contrast, your ties to the primal spirits might be intensely personal. You might have grown up on a farm and developed a mystical relationship with nature and the spirits that inhabit the wilds. You might even be a city-dweller who experienced a profound revelation of power of the primal spirits and learned to call on them and channel them in and out of combat.

Even in civilized lands, some warrior orders train their members to harness the power of the beast within, channeling primal spirits in rages and other evocations. Some of these orders venerate the spirits, while others view the spirits as tools to be manipulated in order to turn a warrior into a savage killer.

Whatever the nature and origin of your relationship to the spirits, that relationship defines your capabilities as a barbarian, and to some extent, it defines who you are.

### Trophies

Some barbarians wear trophies on their armor and weapons both to demonstrate their prowess in battle and to serve as a reminder of foes they have overcome. Evil barbarians focus on grim, horrific trophies—severed heads, preserved hands, and bits of bone—to strike fear in their enemies. Most barbarians, though, prefer less grisly displays of their skill.

Many barbarians are proudest of trophies taken from foes that have knocked them unconscious or otherwise pushed them to the brink of defeat. Barbarians also use trophies to mark a victory over a long-standing enemy or a powerful foe whose defeat trumpets their skill and prowess.

The best trophies symbolize an opponent's strength and ability. A dragon's fang, a shard from a powerful warrior's armor, or the stub of a necromancer's staff signify the enemy's power and ability. A barbarian typically attaches these trophies to his or her armor and gear, allowing them to hang as testaments to his fighting ability.

If you decide to collect trophies of your fallen enemies, make a list of each item you take from a foe. These trophies are more than marks of victory; they are important symbols of your history. Giving one of your trophies as a gift is a sign of trust and respect. When you are confronted by a particularly worthy foe, you might allow the enemy to live but make the surrender of some token a condition of that offer.

## Totem Animals

Although your powers do not require it, you might adopt a totem beast, an animal whose ferocity and traits appeal to you as a model for your own deeds. You might adorn yourself with tattoos, pelts, claws, and teeth to increase your resemblance to your chosen beast. Like the totem carved into a representation of specific spirits that serves as an implement in the hands of a druid or a shaman, your adorned body draws the spirits of your chosen beast so that they can lend you their power.

Most barbarians who have totem beasts take an appropriate name. Yoreth Hawksworn scales the highest peaks and swoops upon his foes like a diving falcon. Darva Thunderbear roars as she charges her enemies and swings her maul with bone-crushing, ursine strength.

## Living with Rage

Rage defines your magical combat prowess, and your relationship to that rage says a lot about your character's personality. As a barbarian, you have a choice. Does rage sum up your entire being, or are you at peace except when you must reach deep and summon the storm?

Anger might be a constant, simmering undercurrent to your every word and action. Are you aggrieved by some past wrong you seek to redress? Infuriated by the death of a loved one you hope to avenge? Or is the constant thrum of your rage like the heartbeat of the Primal Beast, not so much an undercurrent of anger as the predator's constant readiness for fierce combat?

Or you might be a calm, cheerful soul, at peace with the world—until enemies are in sight. Then you open your mind to the primal fury that lurks in the depths of your soul, and you unleash a rage all the more terrifying because it is so unlike your normal demeanor.

How well do you contain your rage? Does it erupt only when you summon it, or has it broken free of your control at times in the past—perhaps with tragic consequences? A single critical moment in your background when anger got the better of you can be a

defining element of your history and personality. Did you, in a moment of uncontrolled rage, kill someone you loved? Perhaps you dishonored yourself and your family by killing an enemy who pleaded for mercy. Maybe you went on a rampage through a marketplace and then fled your village in shame.

What's it like when you use a rage power? You're channeling the spirit of a powerful animal or a force of nature, which alters the nature of your attacks, sometimes fundamentally. Is the spirit's form visible above or around you as you rage? Do you undergo a physical transformation? Is your body warped and distorted by your frenzy, or do you suddenly sprout horns, claws, a furred or scaly hide, or other bestial features?

Primal power flows through you and invigorates you, strengthening your attacks. Is this power exhilarating or exhausting? Is it an aching or a burning that you ignore in the heat of your fury, or a pleasurable sensation that softens the pain of your wounds? Are you focused on the tumult of battle around you, or detached from it, as if you were watching from someplace outside your body?

A barbarian is always destructive and brutally effective in combat, but it can be interesting to explore the idea that your personality changes dramatically when you unleash your primal fury.

## Threats and Allies

As a barbarian, you know that your allies rely on you to hit hard and bring your enemies down. You also know that you are certain to suffer more damage than your friends do. Even if you fight alongside defenders such as wardens and paladins, you attract a lot of enemy attention because of the threat you pose.

### Civilized Barbarians

In battle, barbarians are howling, near-suicidal warriors, who overwhelm their enemies with brute strength and savage magic. But not every barbarian practices that same approach away from the battlefield. A barbarian might lay down his or her greataxe and behave as a cunning diplomat, a shrewd negotiator, or a talented artisan.

Such barbarians understand the balance between the civilized ways of humanoid cultures and the feral nature of the beast. When these individuals are living or traveling among civilization's trappings, they know that words are far more potent than swordplay. A warrior might conquer an enemy with savagery, but allies are better made and influenced by charm and wisdom.

This sort of behavior from a barbarian surprises those who are ignorant of the primal ways, a reaction that many chieftains and lords have used to their advantage. The perfumed, silk-clad merchant of a caravan might not suspect that the chief sitting across from him studied at four academies. All the merchant sees is the barbarian's frayed leather armor and a cloak made from the pelt of a girallon.

You might choose to develop talents and powers that play off that threat, gaining abilities that draw more of the enemy's attention while also setting up your own deadliest attacks. For example, the *savage growl* power (page 13) marks an enemy that you hit and lets you deal more damage to that foe—in exchange for letting it deal more damage to you. This approach makes you an even bigger target, creating a dynamic often seen in legends and tales—barbarians swagger like the king of all they see, but they frequently travel with a shaman or a bard companion who helps keep them alive.

Of course, you need not play your barbarian as a risk-loving combat gambler. Even if that's how you began your adventuring career, the life cycle of the great predators offers lessons that might affect you as you move into the paragon and epic tiers. As the old primal proverb has it, "Every old tiger is a careful tiger." You might have fought without a care early in your career, but you have come to learn a bit more strategy as you have gained power. You have grown more deliberate about when to use your deadliest powers and when to take a quick step back to allow an ally to handle a fight.

## Playing Your Build

If you choose a specific build for your barbarian, you might let your choice inform the way you roleplay the character as well as how you perform in combat. Even if you choose powers from different builds, your character might end up inclining toward one or another type of barbarian, which can suggest facets of your barbarian's personality.

Rageblood barbarians are perhaps the most likely to lose themselves in rage (see "Born to the Beast," page 23). You might feel no pain while seized by the primal spirits of battle, and felling an enemy fills you with exuberant vigor. Outside combat, you might be a quiet stalker, like a patient tiger, or a brash and boisterous adventurer, more like a thrashing boar.

Thaneborn barbarians retain their powerful presence even when gripped by rage, and they tend to keep their wits about them as well. You might shout encouragement to your allies as you hew about yourself in battle, exhorting them to follow your example. Outside combat, whether or not your allies follow your lead might depend on the wisdom you display. If you rush boldly into deadly situations, they might learn to disregard your magnetic personality in favor of the counsel of wiser heads.

If you're a thunderborn barbarian, the fury of the storm constantly surrounds you. You might have a quick temper that flares like lightning when someone angers you, or your fury might build slowly, as the distant rumble of thunder grows louder when the storm draws nearer. In combat, you might let the thunder be your voice, or you might shout battle cries and exhortations that reverberate in the noise of the storm. Thunderborn barbarians are most likely to wear their rage as a constant cloak, finding it difficult to set aside their anger when it isn't needed.

### Who's a Barbarian?

Just like members of other classes, barbarians are not common in the world. People of the barbarian class are exceptional, and they're usually heroes—or villains. Raging hordes of orc or human berserkers might sometimes rampage through the remnants of civilization, but at most only a handful of true barbarians fight among them, probably in positions of leadership. A barbarian has a special connection to the primal spirits, a relationship that few other people in the world can claim.

### Play Style: Keep It Simple

Playing a barbarian can be straightforward fun. You aren't necessarily expected to study the situation and choose the optimal path. You can say, "Look, I know there might be excellent tactical things to do, like feeding so-and-so a healing potion or using my second wind. But that's not me. I'm just going to hit this guy really hard." Everyone around the table nods because hey, you're the barbarian. If you don't hit the enemy hard, who will?

Whirling barbarians tend to be lighthearted and cheerful compared to other barbarians. Even in the heat of rage, while moving with dizzying speed among your foes, you might taunt them or joke about their misfortune. Your rage might be more of a physical state than an emotional one—like a rush of adrenaline that propels you to greater speed and strength without clouding your mind. If that's the case, it's probably easy for you to set aside your rage when you are not in battle; at those times you might carry yourself with the pride of a skilled hunter or with the jovial ease of a self-assured hero.

### Barbarians and Heavy Armor

Some folk believe that barbarians look down on heavy armor. Although some barbarians do believe that anyone who needs to pull on a steel shell before heading into battle is better off staying at home, most of them don't care how or why their enemies and allies armor themselves. Bravery and skill, not a warrior's belongings, are the paramount considerations.

Barbarians have no natural aversion to heavy armor, but its obvious benefits are realized only after long hours of training and practice. A barbarian who does use heavy armor typically modifies and decorates it with patterns, runes, and trophies evocative of the primal spirits. Dwarves emblazon shoulder and knee guards with leering, bestial faces to ward off bad luck. Human barbarians replace their armor's padding with furs taken from lions, owlbears, and other ferocious beasts they have defeated in battle. Goliaths paint their armor, scribing representations of their battles on each section of scale armor or across the expanse of their breastplates.

In the end, a barbarian in heavy armor might not look like a typical berserker, but he or she still cannot be mistaken for a fighter. If you decide to wear heavy armor, take some time to describe how your character has modified it. Give your equipment a primal edge, a mark showing that your armor is an extension of your fighting style and your beliefs.

The two new builds in this section expand the ways in which you can tailor your barbarian. The thunderborn barbarian, as the name implies, uses the power of thunder to damage enemies and make them cower. The whirling barbarian relies on speed and finesse to make particularly lethal two-weapon attacks.

## Thunderborn Barbarian

Some barbarians can be mistaken for savage warriors bereft of magic, at least until they rage. Whether you are raging or not, no one makes that mistake about you. Your ferocity and power have endeared you to the primal spirits of thunder. They circle around you, waiting for a time when you unleash them on your enemies.

When you stride into battle, low thunder rumbles around you. Even underground or on a clear day, the deep-throated murmur of distant storms accompanies you. When you charge, the growl grows into thunderclaps, sounding nearby. When you shriek your battle cry, a booming roar breaks over your enemies.

The faint-hearted cower before you. Those who are brave or foolish enough to stand before the rumble of your approach are laid low by your weapons and your rage.

### New Class Feature

When you choose your Feral Might, you can choose Thunderborn Wrath instead of another option, such as the ones in *Player's Handbook 2*.

**Thunderborn Wrath:** You gain the *war cry* power. In addition, once per round when your attack bloodies an enemy, each enemy adjacent to you takes thunder damage equal to your Constitution modifier.

**War Cry** Barbarian Feature

*Your potent victory cry sends nearby enemies reeling in terror.*

**Encounter ✦ Fear, Primal**
**Free Action** **Close** blast 3
**Trigger:** Your attack reduces an enemy to 0 hit points
**Target:** Each enemy in blast
**Effect:** You push each target 1 square.

### Suggested Options

Thunderborn barbarians lean toward controller as a secondary role. Powers improved by Thunderborn Wrath include blasts, which allow you to affect small groups of enemies, so it pays to move as close to as many enemies as possible. Consider favoring feats and powers that allow you to move more easily around the battlefield.

Like other barbarians, you should make Strength your highest ability score. Constitution should be your second-highest score, since Thunderborn Wrath powers often rely on it.

**Suggested Class Feature:** Thunderborn Wrath*
**Suggested Feat:** Thunderborn Rage*
**Suggested Skills:** Athletics, Intimidate, Nature
**Suggested At-Will Powers:** *howling strike*, *howl of fury**
**Suggested Encounter Power:** *shout of terror**
**Suggested Daily Power:** *tyrant's rage**
*New option presented in this book

# Whirling Barbarian

Some barbarians, particularly elves and half-orcs, rely on speed and startling force to slay their enemies. Stories abound of the ability of such barbarians to cut down an entire group of bandits in the blink of an eye. These whirling barbarians combine supreme speed and agility with great strength.

Whirling barbarians fight with two weapons, often a pair of axes or swords. Dwarf whirling barbarians favor battleaxes and war picks, whereas half-orcs lean toward clubs and maces.

Compared to other barbarians, whirling barbarians are more mobile and better able to deal damage to several enemies with a single attack. Such barbarians rove the battlefield, swinging their weapons in a blur and hewing down any foes that are rash enough to draw near.

## New Class Feature

When you choose your Feral Might, you can choose Whirling Slayer instead of another option, such as the ones in *Player's Handbook 2*.

**Whirling Slayer:** You gain the *whirling lunge* power, and you can wield a one-handed weapon in your off hand and treat it as an off-hand weapon. In addition, once per round when your attack bloodies an enemy, you can shift 2 squares as a free action, and each enemy adjacent to you at the end of the shift grants combat advantage to you until the end of your next turn.

**Whirling Lunge** Barbarian Feature

*Striking down one foe, you whirl deeper into enemy ranks.*

**Encounter ✦ Primal, Weapon**
**Free Action** **Melee** 1
**Trigger:** Your attack reduces an enemy to 0 hit points
**Effect:** You shift 2 squares and then deal 1[W] damage (off-hand weapon) to an enemy adjacent to you that you can see.

## Suggested Options

You can choose from several methods for improvement as a whirling barbarian. Feats that increase your prowess at wielding two melee weapons are a good investment, since Whirling Slayer powers all require you to wield two weapons. Consider wielding a thrown weapon in one hand to give yourself the option of fighting at range. Multiclassing into ranger will give you even more two-weapon powers to choose from.

Strength should be your highest ability score, since it bolsters all your barbarian attacks. You should make Dexterity your second-highest score, because that ability is often used by Whirling Slayer powers.

**Suggested Class Feature:** Whirling Slayer*
**Suggested Feat:** Two-Weapon Fighting
**Suggested Skills:** Acrobatics, Athletics, Perception
**Suggested At-Will Powers:** *pressing strike*, *whirling rend**
**Suggested Encounter Power:** *whirling frenzy**
**Suggested Daily Power:** *thunder hooves rage**
*New option presented in this book

## Prejudice and Rewards

The most common prejudice that you face in civilized lands is that you are a savage who does as much damage to your friends as to your enemies. On the bright side, those who believe this slur tend to overvalue your services as a hired warrior. In prejudiced areas, a noble or a merchant who employs a barbarian counts on rivals and enemies to give you, and your employer, a wide berth.

### Ancient Berserkers' Rage

Kavaki roared as he swung his axe, and the world slowed. He saw the blade gleam in the torchlight, saw it cut through the orc's armor, watched a spray of blood erupt from the creature's side. He heard the crunch of ribs, then the orc's gurgling death cry as it tried to bring its own axe to bear for one final blow. Kavaki's foot lashed out and knocked the weapon from the orc's hand.

The earth beneath him trembled with the answering roar of Kavaki's warrior ancestors shouting their approval. For a moment he saw them, their weapons gleaming gold as they gathered around him. He raised his axe, dripping with orc blood, and the ancestors shouted again.

The orcs could not hear the ancestors, he knew. And yet the orcs quailed, their savagery replaced by fear as he leaped into their midst, hewing right and left. Distant voices urged him on, and he fought with strength borrowed from generations of warriors before him.

He felt those warriors' hands clapping his shoulders and slapping his back, and as the last orc fell, he allowed himself a moment to bask in their approval. His clan had left him for dead years ago. So perhaps he was dead—but if that meant he could fight alongside the greatest warriors of the past, Kavaki didn't mind.

## A Great Ancestor

The shades of powerful barbarians frequently linger in the world as ancestor spirits. Sometimes death brings a perspective that can be difficult to appreciate in life. In other cases, barbarians who lived hard and died young feel compelled to learn more of the history of the people they barely got to know while they lived. In still other cases, barbarians leave important tasks unfinished when they die earlier than they had expected. A powerful barbarian ancestor spirit might bide its time through the generations, waiting for the advent of a new barbarian hero capable of accomplishing the quest that the spirit was unable to complete in its own life. Separate from any tribe or village, outside the nurturing power of the primal spirits, such an ancestor might have become a sad or vengeful ghost. Inside the spirit way, however, it functions as a more or less patient counselor, waiting for the day when its unfulfilled obligations can be laid to rest.

## Born to the Beast

Some barbarians retain little memory of their rage, or even the broad details of battle. Once combat begins, it's as if they literally become someone or something else. In the aftermath, they remember only scattered thoughts, blurred images, and the feelings of triumph and power.

Some cultures mark such warriors as "born to the beast." These barbarians receive little in the way of formal training; the beast that lurks within them, or the Primal Beast itself, guides their hands in battle. Many stories are told of a warrior born to the beast taking up a throwing axe while still a child and saving his family by hewing a dozen enemy marauders.

Given their relative lack of formal training, those born to the beast favor simple weapons, such as clubs and maces. In battle, such warriors howl and shriek like wild animals, their muscles surging with raw, primal magic.

This boon comes at a price. If a barbarian who is born to the beast fails to establish contact with wiser or less feral beasts or ancestor spirits, he or she risks giving in to the beast completely and becoming little more than a wandering berserker, a dangerous animal whose lust for battle can end only in death. The Primal Beast is too savage to consider that possible outcome to be a problem.

## Ancestral Weapon

*"What is best in life? To end each battle in honor and victory."*

**Prerequisite:** Barbarian, Rampage class feature

Elders tell stories to the young about the days when honored ancestors roamed the land. According to the stories, these forebears were a breed apart: stronger, wiser, and more attuned to the virtues of the spirit way than the people of today are. The ancestors' spirits do little to discourage such tales. It's good to be remembered fondly and respectfully, so that young people will heed ancient lessons. Eventually, the young grow up and learn that people throughout history have largely been the same.

You are exceptional, however—one of those who truly is a breed apart. You are a mighty slayer, a champion who can keep a community alive through the worst of times. You can inspire your people to take on fights they normally couldn't win, and your bravery might make you a hero for the ages.

Ancestral spirits have marked you as their chosen warrior, so they remain close to you. If they can help keep you alive, everyone benefits. If you fall, they'll be on hand to welcome you into their ancestral war band.

# Building Thunder

*"Dragon, the spirits rebuke you with thunder!"*

**Prerequisite:** Barbarian, Thunderborn Wrath class feature

As you have grown in power, the thunder spirits riding on your war cries have amassed strength of their own. When your weapon strikes true, the spirits pour from you in an unrivaled storm, smashing enemies who might have shrugged off your physical blows or the war cries of a lesser thunderborn barbarian.

Like a great storm piling thunderheads higher and darker, you gather strength as you fight battles and suffer wounds. More conservative warriors hold back or retreat when their wounds accumulate, whereas you reach your peak when your reserves are close to their end.

When the storm finally breaks, your voice calls the lightning as well as the thunder spirits. You master the full arsenal of the storm.

WARREN MAHY

# Calm Fury

*"Though I am consumed by rage, I push through to the stillness of true ferocity."*

**Prerequisite:** Barbarian, *rage strike* power

In the past, you raged like any other barbarian. Then you learned the secret power that comes from being able to harness your fury. You now attain the furious clarity on the far side of rage. You walk a perfectly controlled sword's edge of lethal potential.

It might have been a specific catastrophe—a moment when you had spent yourself in savagery and could not respond to a new and greater threat—that showed you the way to a higher plane of rage. Or you might have felt a call to a deeper understanding of rage, one that eludes other barbarians.

You have the spirit and the understanding of an elder. You are able to look beyond the next few bloody moments toward what might be best for the future. The primal spirits you call on are wise and strong. They share with you a broad perspective, the knowledge that controlled fury can be stronger than rage without restraint.

## Calm Fury Path Features

**Strength in Action (11th level):** When you spend an action point to take an extra action, you regain hit points equal to one-half your level + your Strength modifier.

RALPH BEISNER

# Death's Thane

*"Flee before me, fools! My battle cry heralds the stride of death itself."*

**Prerequisite:** Barbarian, Thunderborn Wrath class feature

From a young age, you studied the turning of the seasons and the relentless march of time. In the end, all things die. You embraced this truth, and in accepting the certainty of death, you found that it elicited no fear in you. Death is as common as the rain on your face or the wind through your hair. Why turn away from it like a frightened rabbit?

As a barbarian, death is your steady companion on the battlefield. Your profound acceptance of mortality and your mastery of primal magic combine to transform you into death's herald. You channel the fleeting passage of life and the inevitability of the grave through your mighty battle cries. Your mere presence on the battlefield is enough to drive the most superstitious of your enemies before you. As for the rest, they fall like wheat before the harvester's scythe.

# Stonefire Rager

*"The earth's rage abides deep below. When roused, it bucks and heaves, leaving nowhere to run or hide."*

**Prerequisite:** Barbarian

Many barbarians fight with the viciousness of a wild animal. Others draw strength from the violence of storms or the destructiveness of fire. You prefer a more steady source: the might of earth and stone. Although the earth endures in stillness, entire cities are destroyed when its anger is incited. You have studied the power of the earth and learned to incorporate it into your barbarian evocations. You combine the raging fury of magma with the patience of stone.

Stonefire ragers are common among dwarves and goliaths. They scale the greatest peaks of the world to commune with mountain spirits. Here and there, small monasteries stand atop mountains where stonefire ragers gather. At first glance, the warrior monks of these places seem to be simple ascetics. Woe to the villain that dares disturb their meditations.

## Stonefire Rager Path Features

**Calm Before the Flame (11th level):** When you spend an action point to make an attack, each target you hit takes extra fire damage equal to your Constitution modifier and is knocked prone.

# Twinclaw Slayer

*"Stand proud and face me, dog!"*

**Prerequisite:** Barbarian, Whirling Slayer class feature

Your prowess is hardly a mystery to those who behold you. You hold a weapon in your right hand and another weapon in your left. You keep your inner self somewhat contained until battle begins. At that point, you hurl yourself against as many enemies as possible. The two weapons in your hands, projecting from your whirling arms, are the lethal claws of a great predator. The spirit pack trailing you growls with bloodlust and relishes the kill.

You cultivate the feral spirit of a great wolverine, a scytheclaw drake, an ancient tribal hero, or another vicious combatant. This spirit guides your path, finally manifesting through you when you have mastered the *twinclaw berserker rage*.

CHAPTER 2

# Druid

*"I am the voice of the wilderness, and when I speak, the world shudders."*

**The primal** spirits that inhabit the world are at your command. The very substance of nature responds to your call, allowing you to use it as a weapon and a tool. Your own spirit is a part of the primal world, and your body is but a reflection of your spirit, shifting freely from your mundane humanoid form to any of thousands of bestial shapes, reflecting the glorious variety of nature. You are a druid, mysterious and elusive, wise beyond common mortal knowing.

Your body is a conduit for primal magic, and with that power, you might transform into a wolf or a panther and glide unseen among the trees. You could sculpt your body into a shifting mass of fur, feathers, claws, or scales. Or your form can become a swarm of hundreds of small creatures, which move as a shifting, shapeless mass over the ground.

In this chapter, you'll find powerful evocations to allow you to transform into beasts, control the elements, and summon creatures to your aid. The chapter contains the following material.

- **Playing a Druid:** Perspectives on the druid's place in the world and at the game table.
- **New Builds:** As a swarm druid, you can transform yourself into a beast form made of hundreds or thousands of tiny creatures. Becoming a summoner druid enables you to bring forth creatures great and small to do your bidding.
- **New Class Feature:** Primal Swarm is a new version of Primal Aspect designed expressly for the swarm druid.
- **New Powers:** This chapter offers more options for summoning both creatures and swarms, and it supports existing druid builds, providing powers for predator and guardian druids and for druids who favor evocations that control the battlefield.
- **New Paragon Paths:** You can channel the powers of the wild as a member of one of seven new paragon paths, among them the coiled serpent, the luminescent swarm, the pack lord, and the whirling samara.

# PLAYING A DRUID

A solitary traveler bedecked in claws and feathers walks a lonely road, just ahead of roiling storm clouds. At a crossroads, a robed woman stands before a mangled tree, asking the plant for directions. Atop a high mountain, a weathered ascetic stares out at the sky, reading portents. Druids live in concert with nature, enduring both the blistering sun and the paralyzing cold with quiet persistence. Despite their apparent isolation, they count all of the world's plants and animals among their friends, so few druids see themselves as hermits or recluses. As a druid, you view the wild as a living, breathing entity—one that is with you wherever you go.

## The First Mistake

In the ancient days when the first druids achieved mastery over primal magic, some of the mightiest magicians chose to remain in beast form at all times. After all, why return to the life of the tribe when one could run in the night with a pack of wolves, prowl the savannah as a fearless lion, or roam the forests as a bear? These druids had unlocked many deep secrets, and they thought that by remaining in beast form forever they would learn more.

In time, the error of their reasoning became apparent—but too late to benefit those who made the mistake. The druids who chose to live only as beasts were gradually subsumed into the lives of the beasts they had joined. As their souls merged with those of the beasts, their minds grew dim, so that they forgot that they had not always been beasts. The deep secrets they discovered became locked inside their animalistic minds.

The druids who came after these ancient ones learned from the error of their predecessors. They realized that a druid must stand at the center of all living things, seeing in each natural form the purpose it serves in the order of the world. A druid takes the shape of a beast not to become an animal, but to learn to see the world from a dual perspective—that of an animal and that of a person.

Some ancestor spirits say that those original, ancient druids still wander the world as immortal beasts. Can such druids be returned to their humanoid forms? If so, would they give up their secrets? Perhaps one day you will find out.

## Druids and the Primal Spirits

As with characters of other primal classes, your powers derive from your relationship with the primal spirits. However, your most important relationship is with the Primal Beast, the mysterious and savage entity that enables your *wild shape* power.

When you're fighting in your humanoid form, your evocations often direct and manipulate the spirits. But you don't normally communicate with the spirits in battle or summon them with conjurations. You summon beasts, not spirits. Your connection with nature during battle is more visceral—like bones crunching between your fangs or like lightning rippling out of your soul as you become the storm. The Primal Beast inhabits your flesh and shapes you into an echo of one of its many forms.

Outside combat, though, you might have much broader contact with a range of primal spirits, particularly in your use of ritual magic. Removed from the frenzy of combat, you are the most adept ritual caster in the spirit way.

## Your Wild Shape

The ability to shapeshift is a power that itches to be used, making it hard for some druids to remain in one form for long. Is *wild shape* a power you reserve for combat, when you need to unleash the Primal Beast on your foes? Or is changing shape a form of communication, like the expression on your face? Some druids use *wild shape* as a form of conversational punctuation, especially when they are agitated—taking on a beast form to snarl a curse before finishing the thought in a humanoid voice.

Do you speak in beast form? Some druids choose not to, perhaps because they believe that the purpose of their beast form is to experience animal life in its purest context, and humanoid speech is antithetical to that goal. Others use *wild shape* multiple times in the course of a single spoken sentence, keeping a constant flow of words while punctuating their thoughts with growls and roars that their humanoid voices can't properly produce.

What beast form do you prefer? Guardian druids lean toward the form of a large, hardy animal such as a bear, a boar, a wolverine, a rage drake, or a bulette. Predator druids often choose the form of a pack predator or a stalker such as a panther, a lion, a wolf, a tiger, or a displacer beast. Swarm druids have their own unique swarm forms, composed of countless tiny insects, rodents, or drakes. Many druids choose forms that defy these trends, however, commonly adopting the form of a stag, a ram, a horse, a bison, or a behemoth. Many more adopt a different form each time they change shape.

It's often possible to tell, looking at a druid in beast form, that the creature is no ordinary beast. Some druids always adopt forms that have obvious magical distinctions from normal beasts, such as patterned fur or glowing eyes. Others take on forms that don't resemble any normal animal, indistinct shapes of fur

and claws, feathers, or scales. Sometimes, though, it's subtle cues that reveal a druid in beast form—an obvious intelligence and attentiveness in the beast's demeanor or something unusual in the way it moves.

## Druids and Other Forms of Magic

Druids see the need for balance in all things, and that attitude extends to different forms of magic. Arcane, divine, and psionic magic all have their place in the world. Like all things, though, any form of magic becomes a threat when it grows too strong.

Arcane magic has the potential to upset the balance of the natural world. The quest for immortality seizes many wizards, some of whom take up the dark path of undeath to prolong their existence. Druids can accept that the influence of the Shadowfell sometimes spawns undead. However, they believe that rituals that create undead are intolerable attacks on nature. Such lore and its users must be destroyed.

Divine magic is a useful tool for protecting a community, but it comes at the price of obedience to a power that exists beyond the world. The gods are powerful and wise, but they have designs upon the world that at times put them in conflict with the primal spirits. To the druids, divine power is like a dire wolf taken at birth and trained to hunt. It might be a useful ally, but at some point its true, predatory nature will arise.

Psionic magic confuses druids. It has only recently appeared among creatures of the world, making its proper role in the natural order unclear. Its prevalence among aberrant creatures causes some druids to see psionic magic as a herald of the Far Realm's corrupting influence. Others view psionic magic as a powerful tool against the threat of the Far Realm.

## Other Origins

Most druids arise in families or communities that hold the primal spirits in esteem and follow the spirit way. As children, these druids seem aware of the spirits around them in the world, and they display the power of the Primal Beast within them. It's rarely a surprise when such a child takes on the adventuring life and manifests the full powers of a druid.

It's not unheard of for druid powers to arise spontaneously, for someone who has no familiarity with the primal spirits to suddenly change shape or call on druid evocations. This sort of event occurs most often in situations of great stress, moments when people want to flee or fight, and suddenly find that they can fight faster or with greater savagery than they had imagined possible. Their bodies transform without conscious will or effort, and the Primal Beast is unleashed.

Still other druids approach the primal spirits through less traditional routes. Some members of sects of Melora, for example, train their devotees to commune with the primal spirits, and occasionally druids arise among these sects, no less devoted to the goddess for all the primal power flowing through their bodies.

WARREN MAHY

This chapter presents one new build for the druid, the swarm druid. You can choose the Primal Swarm class feature and select related powers to create a druid character who has a distinctive flavor, becoming an insect swarm when you adopt your beast form.

In addition to this new build, this chapter also includes a suite of summoning powers for the druid. Whichever build you choose for your character, you can use summoning powers to enhance your other capabilities.

## Swarm Druid

Druids call on forces associated with primal magic, such as beasts, plants, storms, and the earth. Swarm druids prefer to call on a particular primal force: insect swarms. Such druids see great strength in the unity of purpose and combined might of a colony of ants or a nest of hornets.

Most druids assume the forms of creatures such as bears, panthers, and rams, but a swarm druid splinters into hundreds of insects, all driven toward a single purpose by the druid's mind. The druid is at once all the creatures in the swarm and none of them. Enemies might stomp at the swarm, crushing a beetle here and swatting a wasp there, but to the druid the loss of an individual in the swarm means nothing. It is the swarm as a whole—a dauntless tide of chitin and stingers—that matters.

Swarm druids are most often found in tropical climates. They typically dwell in jungles, where they have witnessed the power of an ant colony on the march. Druids of the Underdark also tend toward this discipline. In web-shrouded caves, drow and troglodyte swarm druids commune with spiders, mushroom forests, and creatures that have never seen the light of day.

### New Class Feature

When you choose your Primal Aspect, you can choose Primal Swarm instead of another option, such as the ones in *Player's Handbook 2*.

**Primal Swarm:** While you are in beast form and not wearing heavy armor, melee attacks and ranged attacks deal less damage to you. When you take damage from either type of attack, the damage is reduced by your Constitution modifier.

RALPH BEISNER

### Suggested Options

As a swarm druid, you focus on close attacks and other multitarget attacks that can be used while you are in beast form. Many of your powers (as well as the Primal Swarm class feature) cause you to take less damage or to avoid attacks entirely, allowing you to hold your own when you stay in melee range. It's a good idea to focus on feats, powers, and other options that boost your ability in close-quarters fighting. Many of your beast form powers are close bursts or blasts. Look for feats that improve such powers.

Make Wisdom your highest ability score to bolster all your druid attacks, followed by Constitution to enhance your Primal Swarm powers.

**Suggested Class Feature:** Primal Swarm*

**Suggested Feat:** Toughness

**Suggested Skills:** Arcana, Endurance, Nature, Perception

**Suggested At-Will Powers:** *grasping claws, swarming locusts,* thorn whip*

**Suggested Encounter Power:** *scattered form**

**Suggested Daily Power:** *fog of insects**

*New option presented in this book

# Summoner Druid

You are a champion of nature, a leader of spirits, and a summoner of feral beasts. You place your trust in the magic of the hunting tiger, the stalking wolf, and the shrieking hawk. The creatures you summon obey your every command, yet if you fail to guide them, they act according to their instincts.

Only the most powerful of your evocations can summon creatures to fight at your side, so you must be careful to pick the right moment to summon them. They fight with courage and tenacity regardless of the foe.

The creatures that heed your call are companions, not mere pawns. You are their caretaker and guide. If you allow them to run rampant, the blame for any foolish decisions they make rests on you alone. With the power to command the spirits and give them physical form comes the responsibility to use that power with wisdom and foresight.

## Suggested Options

The summoner druid is not a full build, but a druid of any Primal Aspect who chooses mostly summoning powers for his or her daily attack powers. As a summoner, you should choose powers and feats that allow you to function better when fighting alongside a creature you summoned. However, keep in mind that summoning powers are daily powers, so you can't rely on them too heavily at low levels.

**Primal Guardian:** You are a druid who dabbles in the leader role, and you can use summoned creatures to hold back enemies and provide relief to beleaguered allies.

**Primal Predator:** A summoning power allows you to build your own pack, granting you an instant ally for flanking and distracting your enemies.

**Primal Swarm:** You can use summoned creatures to hem in your enemies, making it easier to catch those enemies in your close attacks.

**Suggested Feat:** Strong-Willed Summoning*

**Suggested Skills:** Arcana, Diplomacy, Insight, Nature

**Suggested At-Will Powers:** *call of the beast, fire hawk,* savage rend*

**Suggested Encounter Power:** *call forth the spirit pack**

**Suggested Daily Power:** *summon pack wolf**

*New option presented in this book

### For the DM: Summoned Creatures

When a druid summons a creature into the world, that creature is an independent entity, a shard of primal magic given form. In extremely rare cases—so rare that some druids never witness such an event—a summoned creature carries a shard of a great spirit. After such a summoned creature has survived the battle into which it was summoned, the creature speaks briefly with the voice of the elder spirits, or it snarls and motions for the druid to follow it.

The good news is that such a summoned creature will speak words of prophecy or lead the druid to a previously unseen path. The bad news is that such remarkable events happen only when the primal spirits are gathering their power to oppose a force that threatens the world. The prophecy points to danger, and the path leads to peril. But that is the stuff of which a hero's life is made.

If it can't do that, it attacks an enemy within 3 squares of it if it can. Otherwise, it moves its speed to a square within 3 squares of the nearest enemy.

## Instinctive Effects

Druid summoning powers use the same rules as other powers that have the summoning keyword, as explained in *Player's Handbook 2* (page 221). However, all the summoning powers in this chapter include an instinctive effect, an action the summoned creature takes in lieu of any other command. This feature reflects the fact that your summoning powers give physical form to beast spirits—spirits that are independent and not much different from the living beasts of the world.

Be careful with the instinctive effects of the creatures you summon! Sometimes an instinctive effect is useful and helpful, letting the summoned creature attack without costing you any actions. Sometimes, though, the summoned creature might attack you or your allies. Remember that when an instinctive effect refers to "the nearest creature," that doesn't mean just enemies.

### Summon Pack Wolf — Druid Attack 1

*You reach out into the spirit world and find an ally, an ancient wolf spirit made solid by your magic for these few minutes of the hunt.*

**Daily ✦ Implement, Primal, Summoning**
**Standard Action** **Ranged** 5
**Effect:** You summon a Medium wolf in an unoccupied square within range. The wolf has speed 6. You can give the wolf the following special command. On the turn you summon the wolf, you give that command as part of using this power.

**Standard Action:** Melee 1; targets one creature; Wisdom vs. Reflex; 1d6 + Wisdom modifier damage, and if the wolf has combat advantage against the target, the target is knocked prone.

**Instinctive Effect:** If you haven't given the wolf any commands by the end of your turn, it attacks an adjacent prone creature. If it can't do that, it attacks an adjacent enemy if it can. Otherwise, it moves its speed to a square adjacent to an enemy.

## Druid Circles

As druids grow older, they are more and more likely to seek out other druids from near or distant lands with whom they create small informal groups that they refer to as circles, groves, or rings. A druid circle typically has between three and seven members. The members do not always share ideals, goals, or even alignments. Balance is the druid's life lesson, and as druids mature, they are increasingly aware that listening only to viewpoints similar to their own can push them out of balance.

Sometimes a circle has members of vastly varying power levels. Given the small number of truly powerful druids in the world, it is possible that some druids go their entire lives without being a member of a circle, while others are members of two or three, sometimes even at the same time.

Most circles do not meet often. If members gather once a year on a particular solstice or equinox, that's considered a busy schedule. Once every two or three years is just as likely, though members of the same circle might contact each other individually more often than that.

### Summon Guard Drake — Druid Attack 5

*You utter an age-old evocation that summons a drake to defend you or your friend.*

**Daily ✦ Implement, Primal, Summoning**
**Standard Action** **Ranged** 5

**Effect:** You summon a Small guard drake in an unoccupied square within range. Choose yourself or an ally as the character the drake guards. The drake has speed 6. You can give the drake the following special commands. On the turn you summon the drake, you give the first command as part of using this power.

**Standard Action:** Melee 1; targets one creature; Wisdom vs. Reflex; 1d8 + Wisdom modifier damage, and the target is marked by the drake until the end of your next turn.

**Immediate Interrupt:** Triggered when an enemy adjacent to the drake makes an attack roll against the character guarded by the drake; melee 1; targets the triggering enemy; Wisdom vs. Reflex; 1d8 + Wisdom modifier damage, and the target takes a penalty to the interrupted attack roll equal to your Wisdom modifier.

**Instinctive Effect:** If you haven't given the drake any commands by the end of your turn, it moves its speed to a square adjacent to the character it guards. If it ends adjacent to any enemies, those enemies are marked by the drake until the end of your next turn.

## DRUIDS' GARDENS

Druids often spend time, gold, and effort cultivating specialized magical gardens, but few people who are not good friends with a druid ever see a druid's gardens.

Druids' gardens partake of the class's dual nature. Transforming into animal form, a druid travels deep into forests, into caves, or perhaps high into the branches of a great tree. In a distant glen, in a cavern with flowing water, or on the wide, sun-dappled branch of a great tree, the druid tends a garden that nondruids might not even recognize as such. The art is in growing powerful herbs, ancient species of creatures, and glorious plants that fit seamlessly into their environment.

The highest art of a druid's garden comes when after centuries, the plants and creatures that the druid nurtured within the garden have spread naturally and noninvasively to form part of the natural heritage of an area. No matter how powerful a druid is in combat or as an epic hero, there is no guarantee that the druid's garden will find a place within the world. Nondruids don't usually understand how and why such gardens are so important to druids, but they sometimes see the consequences, such as moments when two druids who should be enemies spend time discussing tricks of gardening that seem irrelevant to everyone else.

### Three Halves Make a Whole

Although their ability scores don't necessarily make them the best druids, half-elf and half-orc heroes are sometimes drawn to the druid class. A half-elf who hasn't figured out how to balance her human and elven obligations can escape them both by shifting into beast form. A half-orc who has difficulty being accepted in civilized human or savage orc society can become a shapeshifter and gain acceptance with a primal tribe far from his original home. In a sense, half-elves and half-orcs who make this choice are taking a path set out for them by razorclaw shifters, who are descended from lycanthropes and drawn to the druid class for its ability to merge the separate pieces of their body and psyche.

## Emissaries of the World

The primal spirits' relationship to the planes that echo the natural world is a complex one. The Feywild and the Shadowfell aren't part of the world, but both of them parallel the traits of the world, and so they are not entirely cut off from the power of the primal spirits.

Shamans say that the primal spirits flow where they like, but that they are not nearly as powerful in either the Feywild or the Shadowfell, where other powers reign.

Druids say that when they enter these other planes, their presence helps the primal spirits flow alongside and out from their steps. Exploring or living in the Feywild or the Shadowfell, they say, makes one a kind of emissary, increasing the likelihood that people in those planes will benefit from primal power.

## Sky Speakers

Druids don't speak with the spirits as naturally as shamans do. Some druids choose a different mode of understanding the will of the spirits, a form of observation of nature that blends into a nomadic lifestyle that takes them across the world.

By observing the movements of storms, clouds, winds, birds and other flying creatures, druids who think of themselves as sky speakers believe that they can trace the earliest motions of the primal spirits—movements that lead to ancient places of primal power and hunting ranges in the clouds that have been preserved since before the Dawn War.

Sky speakers erect shrines atop the highest peaks. One sky speaker seldom has any difficulty recognizing another, because no one else pays so much attention to the world above, even while in the form of a creature that has four paws upon the earth.

## Seekers of the Lost Dawn

During the bleakest days of the Dawn War, the overwhelming power of the gods and the primordials scarred, churned, and scorched the world. Great holes opened in the surface of the world, swallowing entire forests and mountain ranges, until the primal spirits finally drove the combatants back to the planes.

To this day, primal heroes search out those long-forgotten lands swallowed deep within the earth. Guided by spirits who half remember the battles but have no memory of what was lost, a few druids in each generation find themselves drawn to search for forests of gleaming crystals and former mountain peaks buried beneath earth that rests uneasily over former places of primal power.

Where such sites have fallen into the Underdark, they have nearly always been broken apart and digested by that realm's alien nature. You have mastered the form of the coiled serpent, a sleek, stealthy beast form that carries the promise of pain and poison for your enemies. Some druids keep their distance from serpentine beasts, but you recognize such creatures as being just as integral to the natural world as anything that has fur or feathers. You call on cold-eyed serpent spirits, and your connection to the cobra, the adder, and the python gives you a subtle magic.

## The Circle of Serpentis

Most people, even among primal tribes, associate the form of the coiled serpent with evil druids, including the Circle of Serpentis. The circle is a sinister group that reveres Zehir—above all primal spirits, some say. The members of the circle (mostly yuan-ti) use their coiled serpent forms to strike secretly in the name of their dark god. Although their lairs lie deep in the wilderness, they sometimes infiltrate cities and borderland settlements.

If you are or were associated with the Circle of Serpentis, you might be a former member of the circle who now seeks redemption by foiling the circle's plans or a power-hungry character who becomes an ally of the circle despite its evil.

# Luminescent Swarm

*"Insects don't need to speak to communicate. Watch the way my swarm dances, and you'll see the way."*

**Prerequisite:** Druid, Primal Swarm class feature

When you take on the form of an insect swarm, the insects glow with supernatural light. The stories of your ancestors tell of luminescent insects in primeval times, insects that led your ancestors through swamps and forests to safety. These creatures had no kindness for the enemies of your tribe and used their hypnotic lights to lead enemies astray, drowning them in deep bogs and abandoning them in animal dens. You, too, are a protector and an ally when you take on the shape of the luminescent swarm.

You can harness primal lights to bewilder and blind your enemies. Your attacks deal psychic damage and deliver effects that make it more difficult for your enemies to attack.

When you summon the beasts of your pack, your evocations echo through them. Their wounds knit shut, and they leap to attack with a ferocity augmented by your primal magic. In turn, you draw on their feral strength to endure your enemy's attacks and to strengthen your own.

*"This isn't a battle. It's a hunt. And you're not the hunter."*

**Prerequisite:** Druid

Perhaps you were raised in the wilderness and learned to summon beasts to serve as your hunting companions. Perhaps your community needed protection, and you learned the ways of summoning animal guardians at a moment's notice. Or it could be that you grew up hearing the whispers of animal spirits and are a master at calling them to your side. Whatever your route to the path of the primal summoner, you seek a mastery over summoned beasts that other druids do not possess. Some of your abilities help your beasts act on their instincts, whereas other abilities help you command those beasts with even greater skill.

The primal slayer that you learn to control at the peak of your power is an ancient spirit. It might not be the most mighty creature you learn to summon, but its ability to change its shape echoes the versatility of your power.

TOMAS GIORELLO

# Spiral Wind's Ally

*"Stillness is death. Touch the wind and live."*

**Prerequisite:** Druid

Many of the world's languages use words for "spirit" and "breath" that are related to each other. Whereas other primal magicians mostly consort with the spirits behind the world's creatures and things, you have befriended one of the ancient winds. The Spiral Wind carries the secrets of life in its twists; look at any humanoid fingerprint, and you'll see the spirals that mark where the wind entered to give the person life.

You have learned to call the Spiral Wind when you and your allies have need of its healing powers. You won't be mistaken for a cleric or a shaman, but your allies have learned that a sudden breeze might be a sign of your allied wind's arrival.

The Spiral Wind has more to do with the people of the wilderness than with the beasts, and you are more comfortable in humanoid form than in beast form. You can still change shape, but most of the powers and features that rely on the Spiral Wind work only when you are in your humanoid form.

## Spiral Wind's Ally Path Features

**Healing Spiral (11th level):** While you are not in beast form, any bloodied ally within 5 squares of you who spends a healing surge regains additional hit points equal to your Wisdom modifier.

# Storm Speaker

*"Once the storm begins, no mortal force can halt it."*

**Prerequisite:** Druid

The might of primal storms—furious things of lightning, thunder, and rain—courses through your magic. Few druids walk the path of the storm speaker, for it is fraught with indomitable forces that can be channeled only temporarily, rather than truly controlled. The storm speaker dabbles with primal powers that dance and surge across the sky, free of all fetters.

Storm speakers seek out broad plains, the better to see and study storms that sweep across the sky. Their lodges are marked by tall spikes of iron marked with yellow and blue runes. During a storm, a speaker meditates within one of these lodges, allowing his or her mind to wander among the winds and rain. If the storms are open to sharing their secrets, bolts of lightning strike the iron spikes, sending waves of primal energy over the speaker, fortifying his or her power.

# Whirling Samara

*"For you, despoiler, these seeds are a promise of death."*

**Prerequisite:** Druid, Primal Swarm class feature

As a druid who assumes swarm shapes, you have already mastered complex magic that maintains your identity even while you are dispersed in the form of many insects. Your new path focuses on gaining greater control of the individuals that compose your swarm forms. Most druids work with one swarm shape at a time, but you mix many different types of seeds, leaves, insects, and other natural things into a supremely flexible form, which adapts to any challenge.

Many of your powers take advantage of the whirling wings of the seeds called samaras or the buzzing wings of insects. You can take flight as smoothly as you shift into beast form, then send pieces of yourself whirling among your allies to protect them from harm.

## Whirling Samara Path Features

**Shed Bulk for Speed (11th level):** When you spend an action point to take an extra action, you can reroll two different attack rolls before the end of your next turn. When you make one of these rerolls, you take 1d10 + one-half your level damage and use either result.

**Spinning Wings (16th level):** When you change from humanoid form to your beast form on your turn, you gain a fly speed equal to your speed until the end of your turn.

CHAPTER 3

# Shaman

*"You think the world is only what you can see? Then you are truly blind."*

**You live** in a world that most other people can't even perceive. To you, the realm of the primal spirits isn't a theoretical construct or an abstract notion—it's the world you live in, and the physical world sometimes seems like a dream. What others perceive, at best, in flashes and brief visions, you see all the time. This is your glory and perhaps, ultimately, your curse, for you are a shaman—the purest conduit between the mortal world and the spirit realm that suffuses it.

The most important spirit, of course, is your spirit companion, a constant presence and your link to the spirit world. When you call upon ancestor spirits or spirits of natural forces, your companion represents their presence in the world on your behalf. Your companion might also nudge you into adventures, point you in a certain direction, or even growl pointed advice when it thinks you need to hear wisdom.

This chapter includes evocations that allow your shaman character to channel a new array of primal spirits. You'll find a broad range of material to help build your shaman, including the following.

- **Playing a Shaman:** Suggestions to help you create your shaman as a character who has a unique perspective on the world and the spirits that inhabit it.
- **New Builds:** The eagle shaman and the world speaker shaman provide options beyond those previously presented in *Player's Handbook 2*.
- **New Class Features:** The Watcher Spirit class feature helps you guide your allies' ranged attacks, while the World Speaker Spirit class feature helps you convince the world to bend to your will.
- **New Powers:** The new powers in this book include an abundance of terrain-control effects and ranged attacks, as well as evocations intended to empower the ranged attackers in your party.
- **New Paragon Paths:** Seven new paths, including the scarred healer, whose body bears constant testimony to the wounds he or she seeks to heal, and the seasons' herald, who is adept at using the spirits to maintain the balance of nature.

HOWARD LYON

# PLAYING A SHAMAN

A wizened dwarf follows a shaggy bear spirit along a lonely mountain road, unsure where the spirit will lead. Moving with the grace and stealth of a panther, an elf and his spirit companion creep through the forest toward their unsuspecting orc prey. A human draped in leaves and furs stands with arms upraised to the stormy sky, calling on the spirits of thunder and lightning. Shamans are primal mystics, existing simultaneously in the world and in the realm of the primal spirits. Surrounded by a great cloud of ancestor and nature spirits, they bring the wisdom of the ancients to the people of the world.

## Your Spirit Companion

Shamans have one feature that sets them apart from other heroes—their spirit companions. A spirit companion is a spirit that temporarily leaves the great stream of spirits flowing throughout the world to join with a shaman's magic. It might be a guide that can show you options and paths you wouldn't otherwise consider, a being of ancient wisdom who waits patiently for you to match it in power and experience, or a weirdly intelligent pet.

Many spirit companions are animal spirits, minor forces of nature's power embodied in animal form. Your spirit companion might take the form of a panther or a tiger, but its spiritual essence is the stalker, the archetypal predator of which all earthly hunters are reflections. Similarly, a watcher spirit is a spirit of nature's watchful eye given form as an eagle or some other bird of prey, whereas a bear spirit embodies the protective instincts that sustain the natural world. A world speaker spirit might appear as an animal, but its essence is that of the living world itself, the cycles that change and move all things.

Your spirit companion might instead be an ancestor spirit from the distant past of your family or tribe. Or it could be an ancient humanoid spirit with no direct relation to you, attaching itself to you in order to share its wisdom for your benefit. Perhaps it has no living descendants and has chosen you to be its spiritual heir, or maybe its descendants have failed to honor it, and the spirit has chosen you for the job of reminding its ungrateful heirs to show proper respect for the departed.

In a few unusual cases, a spirit companion isn't a singular spirit. Some shamans call one spirit companion at a time from a pool of spirits, each with its own name and distinguishing quirks. You could invent personalities and descriptions for a roster of spirit companion allies, then randomly determine which one is with you in any given encounter.

Other shamans attract different spirit companions as their power increases; for example, a 1st-level shaman might have a spirit companion that is a minor panther spirit, but that same shaman at 27th level might have a great elder spirit as a spirit companion.

Your spirit companion might match your personality, embodying your ideals or your aspirations. If you have a bear spirit companion, for example, it might share your steadfast, trustworthy nature—or your companion might exhibit those qualities while you aspire to them but continually fall short. Some shamans feel that their spirit companions complement their own personalities because of the differences between the two; your panther spirit companion might be as free-wheeling and independent as you are staid and reliable.

## Talking with Spirits

Although shamans describe their interaction with the spirits as "talking," this communication isn't always verbal, and it's rarely as fluid as a conversation with another person. The spirits speak in many ways, and even ancestor spirits that were once people often find it difficult to maintain their attention on the physical world long enough to carry on a conversation, or even to complete a sentence.

BEN WOOTTEN

Communication with a spirit might take the form of an emotional impression, a vision, or a demonstration of the spirit's power upon the world. This is one reason why you can use the *speak with spirits* power to receive a bonus to a skill check only once in every encounter. You can sometimes get a good idea of what the spirits are trying to say, especially if you've asked the right question, but conversation with spirits other than your spirit companion is often a matter of interpreting feelings and intentions rather than gleaning actual words and clear instructions.

How you communicate with your spirit companion is a matter for you to decide when shaping your character. Do you give it verbal commands or requests? Do you form words in your mind that the spirit companion understands and responds to? Or does it simply apprehend your will and act upon it without any conscious effort on your part?

Perhaps your spirit companion isn't really under your control. It might act of its own free will, moving to where it believes it is most needed, perhaps even calling the spirits on your behalf without you fully understanding what it's doing.

## Acquiring a Spirit Companion

The process by which you acquired your spirit companion is virtually synonymous with the means by which you became a shaman. True, you might have gone through some formal rite of initiation or process of study under another shaman's tutelage after your spirit companion attached itself to you. But as soon as that spirit made itself known to you—whether you accepted it or not—you were on the road to becoming a shaman.

Some shamans first encounter their spirit companions during childhood. Perhaps you heard the soft growl of an animal in your dreams, or you caught glimpses of a beast peering at you from around a corner or behind a tree. Such a spirit is sometimes known as a spirit of destiny, for it appears unbidden, choosing you for the shaman's path rather than leaving your destiny to fate or chance.

A spirit of destiny is a guide, friend, and protector from when you take your first steps to your final day in the world. In the time between, you are marked for some destiny, though none can say whether you can live up to it. At some point in your life, you'll face a choice, and that decision will have grave consequences.

Other shamans have terrifying first encounters with their spirit companions, a harrowing process called a battle initiation. In your youth, you might have once wandered into the wilderness, far from home and help. You might have been hunting with a group and were separated from your companions, or perhaps you were traveling an ancient, worn road that suddenly came to an end. There you were attacked by a ferocious beast—a bear or a tiger, perhaps, or maybe the boar you thought you were hunting. Its first attack injured you, but not so terribly that you could not flee.

No matter how hard you tried to escape it, the beast followed you, dogging your heels until at last you collapsed in exhaustion. As you ran, the land seemed to twist and turn around you—familiar paths didn't lead where they should have, instead taking you farther into the wild. As you panted for breath, the beast toyed with you, circling you and taking the occasional bite or swipe.

Then something remarkable happened. Somehow, you mustered the strength to stand up and confront the beast. Perhaps your hand found a weapon you thought had been lost on the ground, or you seized a tree branch and swung wildly at the beast. Instead of fighting back, though, your spirit companion revealed its true nature to you, bowing in respect and communicating your new bond.

A shaman who undergoes a battle initiation, it is said, is meant for a life of struggle, during which his or her spirit companion prepares the shaman for a great battle or a lifelong ascension toward epic power.

## Shaman Eccentricities

Perhaps because of their close links to the primal spirits, some shamans are prone to eccentric behavior. They are so accustomed to interacting with the spirit world that their dealings with the mortal world suffer. It's not uncommon for shamans to speak out loud to spirits that no one else can see or hear. Some labor under prohibitions that they believe the spirits impose on them, such as abstaining from certain foods (see "Taboos," page 120). Others give the distinct impression that their spirit companions are the ones in control, bumbling their way through adventures while their companions act as the real leaders.

Some shamans play up their eccentricities, striving to appear harmless or perhaps taking advantage of the fact that people tend to associate strange behavior with dangerous power. Others seem oblivious to the possibility that there is anything odd about their conduct.

The shaman class fulfills the leader role in the game, but perhaps because of this tendency toward eccentricity, shamans are less likely than other leader types to actually serve in this role. Most shamans are happy to leave the job of commanding and organizing a band of adventurers to other characters in the party, while still supporting, healing, and enhancing their friends.

This section presents two new builds, the eagle shaman and the world speaker shaman. Each build has a new Companion Spirit option associated with it, either of which you can choose when you make your shaman.

## Eagle Shaman

Your spirit companion soars above you and your allies, keeping a watchful eye for hidden enemies and drawing attacks to distant foes. Your role is to guide the attacks of your allies, using your spirit companion to concentrate your allies' ranged attacks on enemies you want to slay or lock down.

You are at your best alongside allies who are armed with bows, javelins, slings, or powerful ranged magic. Rangers, warlocks, and other classes that have features or powers that let them target the nearest enemy thrive in your company, since your spirit companion lets them consider any enemy adjacent to it their nearest enemy.

### New Class Feature

When you choose your Companion Spirit, you can choose Watcher Spirit instead of another option, such as the ones in *Player's Handbook 2*.

#### Watcher Spirit

**Spirit Boon:** Enemies adjacent to your spirit companion can't gain cover from other enemies. In addition, your allies can treat any enemy adjacent to your spirit companion as their nearest enemy.

**Spirit's Prey:** You gain the *spirit's prey* power, an attack you make through your spirit companion as an opportunity action.

**Spirit's Prey** — Shaman Feature

*Your spirit companion lashes out at a moving foe, and an ally uses the distraction to fire on that enemy.*

**At-Will ✦ Primal, Spirit**
**Opportunity Action** **Melee** spirit 1
**Trigger:** An enemy leaves a square adjacent to your spirit companion without shifting
**Target:** The triggering enemy
**Effect:** One ally within 10 squares of your spirit companion can make a ranged basic attack against the target as a free action with combat advantage.

**At-Will Attack Power:** You gain the *claws of the eagle* power. You choose a second 1st-level at-will attack power as normal.

### Suggested Options

Make Wisdom your highest ability score, followed by Dexterity to enhance the effects of your Watcher Spirit powers. A high Constitution will improve your hit points and Fortitude. Choose powers you can use to heal the defenders and the melee strikers of your group, while you and other ranged attackers remain in the back ranks to concentrate fire on the foes that your spirit companion designates as optimal targets. Your secondary role is striker.

**Suggested Class Feature:** Watcher Spirit*
**Suggested Feat:** Invigorating Spirit*
**Suggested Skills:** Heal, Insight, Nature, Perception
**Suggested At-Will Powers:** *claws of the eagle*,* *watcher's strike*
**Suggested Encounter Power:** *Stormhawk's fury**

# World Speaker Shaman

You channel the living essence of the primal world and the cycles that define it, giving you command over the field of battle. Your spirit companion acts almost like a defender, preventing enemy movement around it while helping your allies move freely.

Your spirit companion is a being of stone and earth, summer and winter, wind and rain. Its appearance varies according to its nature and your desires. It might be vaguely humanoid or shaped somewhat like an animal. Most likely it changes its shape or its mix of earth, air, and water as the primal power flowing through it aligns with the cycles of the natural world.

## New Class Feature

When you choose your Companion Spirit, you can choose World Speaker Spirit instead of another option, such as the ones in *Player's Handbook 2*.

### World Speaker Spirit

**Spirit Boon:** Any ally who provokes an opportunity attack by entering or leaving a square adjacent to your spirit companion gains a bonus to all defenses against that attack. The bonus equals your Constitution modifier.

**World Speaker's Command:** You gain the *world speaker's command* power, an attack you make through your spirit companion as an opportunity action.

**World Speaker's Command** Shaman Feature

*The voices and growls of primal spirits cascade on your foe, stopping it in its tracks.*

**At-Will ✦ Implement, Primal, Spirit**
**Opportunity Action** **Melee** spirit 1
**Trigger:** An enemy leaves a square adjacent to your spirit companion without shifting
**Attack:** Wisdom vs. Will
**Hit:** The target stops moving and must use a different action to resume moving.

**At-Will Attack Power:** You gain the *voice of battle* power. You choose a second 1st-level at-will attack power as normal.

## Suggested Options

Wisdom should be your highest ability score, followed by Constitution to improve the battlefield control you exert through your World Speaker Spirit powers. Intelligence or Dexterity should be your third-best score, to improve your AC and Reflex. Choose powers that let you reshape the terrain around you in combat and control enemy movement, as well as healing and protecting your allies. Your secondary role is controller.

### Spirit of the Seasons

In the first year of your relationship with your spirit companion, you might have discovered that your companion shifts and changes with the seasons. Such a spirit companion is both an auspicious omen and a foreboding one. It foretells of a long life, but it also portends that, at some point, you shall commit to a great cause for good or evil, life or destruction. In shifting between each season, the spirit shows the turmoil that wracks your psyche.

If your spirit companion manifests in such a way, you will probably draw many powerful figures to your side over the course of your career. Some of these figures will seek to guide you to the hope of spring or the light of summer, while others will try to drag you into the dark of winter. You sit at the nexus of many great events.

### The Burden of Vision

None of the other primal heroes understand the spirits as well as you do. Wardens embody the protective role of the spirits, but that's not the same as understanding them. Barbarians are generally too single-minded to grasp the implications of what the spirits are showing them while they're raging. Druids understand the viewpoint of the animal spirits, the Primal Beast, and many others, but their perspective is limited.

It's up to you to grapple with the full range of the spirits that surge through the primal world and their viewpoints. Sometimes your allies might think you're absentminded, disconnected, or otherworldly. It's true that you aren't always fully aware of what your physical allies are talking about, but that's because you have hundreds, maybe even thousands, of spirit allies flowing around you, and sometimes what the spirits have to tell you is more important than the paladin's tale of her latest exploit or the rogue's display of acrobatics.

## Weighing the Spirits

At times, a shaman might want to understand the relationship between another shaman and that shaman's spirit companion. Nonshamans can't know anything more than what they see with their eyes, but a shaman observing the interaction between another shaman and that individual's spirit companion has a chance to figure out whether the companion started as an ancestor spirit, a local animal spirit, or something stranger.

Assessing another shaman's spirit companion requires making a Nature check as a standard action. Use the DCs for your level as given in the table on page 42 of the *Dungeon Master's Guide*. If the other shaman is lower level than you, it's an easy check; if the same level as you, it's a moderate check; if higher level than you, it's a hard check.

## Descendant Spirits

A few shamans seldom talk with ancestor spirits. Instead, these shamans have a relationship with tribal or primal spirits that are on the other end of the natural cycle. The opposite of an ancestor spirit isn't the spirit of a stranger; it's the spirit of a tribe member who hasn't been born yet or, as these unorthodox shamans say, "the spirit of a future ancestor." If you choose to play a shaman who has this viewpoint, that character might be the type who enjoys making portentous and potentially prophetic remarks that no one, including the character, truly understands. Your DM might be able to use your shaman's unique viewpoint as the source of new plot lines.
